It is easy to predict the sort of Goverment; it will be a Government of *optional reform*. No public cry now calls for any amendment; no large class parades its grievances; no body of influential agitators clamour for any repeal or for any enactment. The evils to be remedied in England now are not of the glaring and monstrous class which every one must heed, and which no one can mistake; they are latent in character, moderate in quantity, needing attention to be seen, requiring demonstration to be proved. No one of them, even if successful, will be an era in any man's life; no one of them will arouse an enthusiasm such as was aroused by the Reform Bill of 1832, and the repeal of the Corn Laws. In former times we were suffering from the acute attack of critical maladies; without an option, and as a matter of course, we set ourselves to cure them; and we were mad with joy when they were cured. But now we are but suffering from the latent irritation of minor ailments. We need not cure them now unless we like; we can go on as we are; but we shall be better if we change, and be pleased, though not elated, when we have done so. Most English institutions were not made, but have grown: they are the aggregate result of the labours of many generations, each of which looked mainly to its own benefit, and none of which thought much of what was to come after. They are an historical accumulation of temporary expedients; they work fairly well because they were commonly made with judgment; the continuity of our history for the most part makes them still advantageous; still they mostly present matter for improvement. Everything that began in one era of politics and has lasted into another—in many respects much different and in other respects wholly opposite—must need many changes and many alterations,—much to be added here, much to be diminished there. In politics we are wisely wearing our fathers' shoes; our feet are like theirs, and we step tolerably well; still, they are not like a made pair: the fit cannot be and is not perfect. In other times it was wise to put up with this. Burke, in the agony and excitement of the French revolution, warned his generation not to alter anything which worked 'tolerably well." But there is no excitement now, no extraneous argument forbidding change. There is no reason now why we should put up with anything that is not as good as we can make it.

It is Mr Gladstone's *chance* to interest people in such reforms. He has done so in finance. His budgets are mainly composed, not of compulsory, but of voluntary improvements. A few things excepted, what he has done might have gone undone, and England would not have cared. It would not have cared because it would not have known. The mass of quiet, dispersed, occupied men who make up the country know but little of politics, except what is explained to them by Parliament and the newspapers. They had no idea that what Mr Gladstone has done in finance *could* be done. They are delighted with it now he has explained it, but they needed to have it explained. If he can do so with the rest of politics, he may be our First Minister for many years.

We wish we could think Lord Russell's powers as suitable to this age. We are not ungrateful for his many services to the nation, and we are warm admirers of his patriotic and coherent life. But neither his ideas nor his faculties are fit for this time. He says he is "attached to the "principles of Mr Fox"; and it is true that he has always adhered to one blunder of Mr Fox. He has always been a party man. He had the start of Lord Palmerston; he was leader of the House twenty years before Lord Palmerston dreamt of being so. But he fell behind exactly because Lord Palmerston knew by instinct what the nation wished, while he only knew what a section wanted. He can transmit no tradition of perceptive wisdom to Mr Gladstone, for it is deficiency in this very wisdom which has marred his career, and vexed his temper, and shortened his power. It is an added difficulty to Mr Gladstone to serve under a man who failed formerly from want of flexibility of mind and sympathy of nature, and who cannot, after the lapse of years and in old age, be supposed to have improved in those necessary qualities. Mr Gladstone's career should be devoted to new ideas open to all parties: Lord Russell is fixed to old ideas which are entailed on one party. On Parliamentary Reform especially we expect from Mr Gladstone a philosophical settlement of an inevitable difficulty; yet, in season and out of season, Lord Russell reiterates his adherence to ideas which are not philosophically true, which augment the difficulty, which the nation will not accept.

There is another difficulty which touches on matters of delicate personality, but which should be spoken out. Lord Russell has many enemies in the House of Commons, and these enemies, though Liberals, will annoy the Government. If he were leader of the Lower House, he would have to meet the difficulties and endure the discredit. But he is in the Upper House. Mr Gladstone will have to meet the difficulty, and the country will never know the cause. The discontented Whigs will not rise and say, "The Noble Lord at the "head of the Government did not speak to me, or treated "me with hauteur, or bolted away from the party when he "ought not," but they will say, "The measure which the Right "Honourable the Chancellor of the Exchequer has introduced "is fraught with new matter. It suggests grave difficulties "which should be at least investigated by this House. Un-"less careful modifications are made, I shall be very reluc-"tantly obliged to vote against the Government." And the world at large will say this is the fault of the measure and Mr Gladstone, whereas it is a fault of the past and of Lord Russell. There are plenty of necessary difficulties just now in the management of the House without manufacturing artificial ones. Much has been in suspense during Lord Palmerston's life. Many men will come forward who used to stay back, and the more numerous the *melée* the harder the leadership. The Conservatives are strong in irritating power, and they will use it. They hope to find occasion against Mr Gladstone, if not in his intellect, then in his nerves. Some of the younger ones, to whom politics are a game, have been heard to say, "We will "put him in a rage any how." When the inevitable difficulties are so great, it is vexatious that any difficulties should be added which are not inevitable.

That the re-constituted Ministry will need eventual reconstruction—that new men must be brought forward who will help Mr Gladstone—that old men must be withdrawn who will impede or hurt him, is certain. But these are but auxiliary incidents in the impending drama; the hinge of the next great plot is, What will Mr Gladstone do?

THE TRUE POLICY OF THE BANK OF ENGLAND DURING THE AUTUMN.

TO THE EDITOR OF THE ECONOMIST.

SIR,—In your admirable article of the 14th inst. you clearly answered the question of the day, "Why 7 per cent.?"

The last paragraph of that article says, "These influences, "acting upon a world so predisposed to receive them, are "quite enough to explain the rise in the rate of discount. "How far these influences are due to irremediable nature, and "how far to improvable policy or alterable legislation, we "shall discuss in our next issue."

Leaving this article for the moment, I would revert to G. F.'s letter in your issue of the 21st inst., in which, as I think, he correctly shows why *October* is the pressure month of the year; and in his concluding paragraph says, "I "believe that observations in the direction I have indicated "would be found to confirm the law of annual tides, arising "from agricultural as distinguished from manufacturing "causes; and to prove that they are a periodical source of "disturbance in the money markets of the world, of greater "force and importance than has hitherto been acknow-"ledged.."

"Inasmuch, then, as your observations as to the *quarterly* tides of cash transactions and G. F.'s as to this *annual* tide are in harmony, these laws of the currency may be taken as of "irremediable nature." Assuming that you *admit* his conclusions as to this *annual* tide, which I doubt not you will, then comes the consideration, How far may the effects of these money tides be modified by an improvable policy or alterable legislation?

Agreeably to intimation, you have discussed this point in some measure in your article on "The Operation of the Act of "1844 at the present time" in your paper of the 21st inst., and you say, "Now, it is not right that a calculable increase

Digitized by Google

"of demand should cause an incalculable and sudden increase "of value. The seller ought to raise the price gradually. "Just so the Bank of England; they ought to manage so that "this periodical drain should never be a cause of sudden "alteration of value. They should keep such a reserve as "will enable them to spare such a sum (referring, I suppose, "for the moment to the driblet of coin absorbed just now by "Ireland) without much change of rate, if any change. This "rule has never indeed been formally laid down for the ma- "nagement of the Bank, but it is one of the first importance. "The neglect of it on the present occasion has done consider- "able evil."

Your remarks indicate that with regard to calculable increases of demand—and it would appear that we may always count on the month of *October* pre-eminently as such time—it is practicable so to act and forecast that *gradual* advances in the rate of discount which guide people in the value of capital, and are beneficial, shall take the place of, and so avoid, those *convulsive* rises which, as you say, puzzle people, check good transactions, and generally are prejudicial and lamentable.

Taking the position of things as they stand, and our experience and acquaintance with events as they have been developed during the past two months, what *should* the policy of the Bank have been within such period the better to have counteracted these effects?

It is to be borne in mind that the Bank of England must have regard to its own profit as a trading concern, whilst also holding the position of conservator of *public* interests.

I trust you may be pleased in noticing my letter to elaborate your views on the policy you indicate equally for the benefit of the commercial world and persons entrusted with the disposal of capital, and certainly not less applicable to bankers generally than to "The Bank" in particular.—I am, Sir, your obedient servant, H. F.

Oct. 24, 1865.

[We answer this very clear and able letter precisely and plainly. We say that at the end of August or thereabouts the Bank of England should have begun to raise the rate of discount. The reserve of notes and coin was then about 7,000,000*l*, and, foreseeing the usual reduction in October, the Bank of England ought to have begun to take precautions. If the rate had early in September been raised, say to 5 per cent., all this controversy would have been spared, the trading public would have been duly warned, and the Bank reserve would never have been reduced to a point at which it was possible that apprehension should begin.

The Bank of England would have lost no profit by so acting. The general market was a trifle below her as it was, and it would have gone up and been a trifle below her afterwards. She would not have found it necessary to raise the rate of discount so suddenly,—possibly she would not have had to raise it quite so high; but during the whole month of September she would have charged more and gained more than under the policy she in fact pursued.

The gain to the mercantile public would have been not a gain of half per cent. or so in the rate of discount, which matters only to very few traders, and those not of the highest class, but a substantial gain of timely guidance. By a very sudden rise in the rate of discount, transactions are confused and mercantile men puzzled; by a gradual and judicious rise, mercantile men are aided and guided, and their transactions become consistent and straightforward.—Ed. Econ.]

ITALIAN DIFFICULTIES AND MISTAKES.

Almost the first and most indispensable condition for the independence and security of any nation—especially a new nation—is that it should be *solvent*; that it should be able to meet its expenditure out of its revenue; that it should be able to pay its debts if it is compelled for a time to contract them; or at all events that its credit should be so good that it can borrow for its *occasional* wants on reasonable terms from creditors who do not look for the repayment of their capital, but only for undeniable security for the interest of their loan. This credit can scarcely be maintained for many years if the deficit be annual and the habit of borrowing be incessant and confirmed; nor can a State be fairly deemed solvent if its *ordinary* expenses are not defrayed or defrayable out of its ordinary resources. Looking at the matter from this point of view, Italy cannot fitly be called solvent, and as it is essential that in some way or other she should make herself solvent, her first necessity at present—next to the preservation of peace, which it will be her own fault if she do not secure—is a skilful and resolute financier at the head of affairs, a Minister who understands his subject thoroughly, and who at the same time has strength of will and ascendancy of character enough to induce his colleagues to support his measures and the country to accept them. Unfortunately, though not unnaturally, no such statesman has yet appeared; and Signor Sella, the present Minister of Finance, though honest, laborious and respectably able, appears to lack most of the higher qualifications for his post. Like his predecessors, he is surrounded with difficulties which are stronger than himself; and, in common with his predecessors, he has made many errors, and his ideas of taxation do not appear to be very enlightened or very clear.

In the first place, he is a comparatively young man who has a position to make; if he were to resign it is probable that others to the full as competent might be found to replace him; and in consequence he has not that ascendancy of character or talent which would enable him to say to the respective Ministers of War, of Marine, of Public Works:—"Gentlemen, I "can only afford you such and such a sum of money, and you "must cut down your estimate to that and keep within it,"—and to enforce this obligation upon them by refusing to hold office unless they obey him. In the next place, he seems to be still beset with the old benighted notion that the only way, or the shortest way, to obtain more revenue is to lay on new taxes, or to augment old ones;—and the Italians are already taxed nearly as heavily as they can bear. To increase the yield of an impost by reducing it might not perhaps prove as certain and instantaneous a resource in Italy as it does in England; and therefore we do not wonder at an inexperienced hand like Signor Sella's, not daring to try it. But there can be no doubt that a better application and administration of the existing taxes would enormously increase their yield; and to this reform his first efforts ought to be, but we regret to say are not, directed. For example, the produce of the Customs is disgracefully small, especially at the port of Naples, partly owing to extensive smuggling, partly to the old leaven of corruption which used to permeate every branch of official life, under the former régime, and which has not been by any means eliminated yet. The functionaries of Ferdinand the Second were systematically and notoriously robbers; their illicit gains were out of all proportion to their nominal salaries; and their venality was connived at if not actually encouraged by the Court. It takes a long time no doubt to eradicate a vice like this; but almost any steps, however harsh and peremptory, in that direction would be better and safer and more productive than raising the rate of duty or laying on fresh taxes.

Then the income tax, which is heavy and ought to yield a large revenue, has been mismanaged in more ways than one. First of all, instead of making it very light to begin with, and keeping it light till the machinery for levying it was perfected and the people accustomed to its operation, and a certain equality in its pressure obtained by its experience and modification, it was deemed so good and so tempting an impost that the Government, under the exigencies of the times, actually raised the assessment, or rather the rate, for the second year even before the first had been completely paid up. The consequence was that those who might have borne and cheerfully contributed a very moderate percentage, began to dodge and cheat in order to evade a severe one. Then it was made to descend too low, embracing nearly every class, except the very poorest, who can obtain from the municipality a certificate of poverty; so that if a peasant or labourer is honest enough to admit that he gains two or three francs a day, he has to pay income tax on that, as well as small tradesmen whose profits scarcely reach 50*l* a year. Lastly, the mode of apportioning the income tax is curious, and it would seem faulty. It is allotted by Provinces,—each Province declaring what its aggregate wealth is supposed to be, and agreeing to raise a proportionate amount of the whole sum voted. The provincial authorities then assign, according to their information, so much to each district or commune, which sum is levied there accordingly. But in the first instance, each Province is like an individual making his return to schedule D; it endeavours, if it is honest and accustomed to freedom and truth like Piedmont, to burden itself fairly; if, like the Kingdom of Naples and Sicily more especially, it be more selfish than patriotic, and trained under

Digitized by Google

the old vicious *régime* to look upon the Government as a body to be fleeced and cheated, it makes itself out to be as poor as possible;—and it is certain that, on this system, the apportionment is not a just one; and considerable discontent among the more heavily taxed Provinces is the result. Piedmont, or Tuscany may feel itself *done;* but it would not be very easy for either, or even for the members of the general Government, to detect or expose the misrepresentations of high provincial authorities, and convict them by statistical details, with which, of all men, they must be the best acquainted. A searching Commission of Assessment to sit for the whole Kingdom would probably soon increase the yield of the income tax by 50 per cent., without raising its nominal rate at all. Somewhat similar defects of honesty in the payment of the taxes are found in other directions, and greatly impair the aggregate receipts of the Treasury:—thus there is a "succes-" sion duty" in Italy as with us. So little, however, has a sense of integrity, or even common decency, penetrated the official mind in some of the remoter and less civilised portions of the Peninsula, that there was one district in the interior where for more than two years the return under this head was *nil*. No one had thought proper to die there during this long period. The very *employés* of the Treasury thus joined in cheating it. The cost of collecting the taxes, too, is far greater than it would be under a sound administrative system. It is towards the reform of this system that Signor Sella's most strenuous efforts ought to be directed.

In the introduction of railways, again, considerable mistakes would appear to have been committed. The Government were too grand in their ideas and wished to do too much at once. They were well aware of the enormous value of these fresh arteries of communication in developing resources, opening markets, spreading civilisation, and promoting union. But they did not sufficiently consider that *feeders* to these arteries are essential to their use, and they spent much in railways that would have been more profitably expended in making cross-roads and parish roads—*routes communales et vicinales*. Then they made railways, where they were useful indeed, but not necessary, and neglected them where they were the very first condition of improvement. Thus a glance at the map will show a great net-work in the North, in Piedmont and Lombardy, and scarcely a single line in the Neapolitan dominions. It was right and very important to make the great railway along the Adriatic coast from Milan to Lecce; but in all the rest of the South there is scarcely a single mile which did not exist or was not begun under Ferdinand; and no part of the country needs increased means of communication for the development of its resources and the satisfaction of its grievances and wants half so much as the provinces of the old kingdom of Naples. On the other hand the line from Turin to Cuneo might have waited indefinitely; and that from Genoa to Spezzia, which will be very costly, being nearly half of it tunnelling, was not wanted at all, there being quick and easy communication by sea. But this was not all: the Government, in their anxiety to have their railway-system as complete and as rapidly organised as possible, made very injudicious bargains with the Companies to whom they granted the concessions,—guaranteeing so ample a dividend as greatly to diminish the motive for promoting the accommodation of the public. The proprietors are secured a certain return for their money, and they do not see their way to obtain a very much larger return even by extra exertions and more numerous or cheaper trains,—at least not yet. The consequence is they are acting as rich and *secure* monopolists are apt to act, and take no pains to develope traffic by increased facilities.

In conclusion, we may briefly signalise one other blunder,—or what seems so not only to us but to some of the most practical among the Italians themselves,—the extravagant expenditure on the navy. It may be necessary to keep up a vast army: it cannot be necessary to attempt to become a great maritime Power for years to come. Italy cannot rival or approach France or England, and she need not guard against Russian attack. All that she needed in this direction was to have a marine a fraction more powerful than that of Austria,—to secure which would have cost her little. Instead of this she has wasted many millions in the purchase of iron-clads, in the building of experimental ships of war, and in the construction of naval arsenals and dockyards at Spezzia and Tarento,—from which she can scarcely hope to reap any advantage beyond that of giving employment to a certain number of labourers and artisans, many of whom are foreigners. On the whole, no one can visit Italy or see much of her public men without being convinced that a large reduction in her expenditure and a regenerated administration of her finances are at present her most urgent wants.

THE POLICY OF THE PRESIDENT IN THE SOUTH.

It is one of the many evils of the American Constitution that it induces politicians to examine every utterance or reported utterance of the President with overstrained anxiety. His opinion is as important as that of an English Premier, while he can no more be cross-questioned than an English Sovereign. He has no representative in Congress, and only one constitutional mode of communicating with the people he rules, which one is very seldom employed. Politicians are reduced, therefore, to watch him as despotic sovereigns are watched, to study his casual utterances, and letters on common-place subjects, and replies to deputations, if by any means they may thence extract some clue to his real designs and will. This is, we imagine, the secret of the importance attached to President Johnson's remarks to the deputation from South Carolina, and to the coloured regiment which recently passed through Washington. The first series of speeches really reveal nothing except that the President is disposed to treat all prisoners, including Mr Davis, with great clemency, that he is inclined to a stringent vagrant law pressing equally on whites and blacks, and that he defines liberty as simply the right to work and enjoy the products of labour, a very limited definition. But the conversation, though it throws some light on his views, indicating, for example, that he would accept negro testimony, *quantum valeat*, throws none on his policy, none; for example, on the point whether he will insist on such testimony being received. The speech to the negroes is equally obscure. He told them, indeed, that the United States was their country as much as anybody else's, a remark received with disapprobation by many of the white men standing round, and that they must respect marriage, and that they should improve themselves, but gave no hint as to the extent to which the freedom necessary to those ends would be secured. He evidently reserves any detailed expression of his views and decisions for his message to Congress to be delivered in the beginning of December, and meanwhile it is by his acts he must be judged. Those acts show, in our opinion, distinctly that Mr Johnson has made up his mind to reconstruct the Union by pushing the principle of State rights to its logical conclusion without any guarantees for the coloured population other than the bare prohibition of legal slavery. If any State chooses to grant full civil rights to its black inhabitants well, but if it chooses to refuse them well also; if it passes laws binding the negro to the soil that is no reason for interference, or even for official remonstrance. Accordingly orders have been issued disbanding all coloured troops except a few to be employed in unhealthy garrisons, the Freedmen's bureaus are being rapidly abolished, governors are accepted notoriously hostile to the negro, the right of voting is not demanded, and though the President advises the reception of negro testimony, he has not made it a condition. Indeed in two States slavery itself is not abolished, martial law having been withdrawn from Kentucky after the people of that State had refused to insert the necessary provision in their constitution, and no convention at all having been called in Texas. The Governor reports that it would as yet be dangerous, and Texas therefore is not pressed. With the exception of that State, however, the entire South will by December be absolutely free from military control, and at liberty to remodel their legal system as they please without interference from Washington. Commerce is already reviving, the specie hoarded during the war is coming out, the railways are under reconstruction, and there exists a strong probability that the Southern members, if admitted to Congress at all, will be so powerful, as with the aid of the President, to be virtual rulers of the Republic. They will have, it must be remembered, the right of electing members not only for themselves, but for the blacks; for while the latter, like women, have no votes, they are, like women, counted in the electoral census according to which members are apportioned: The Southerners will have many allies among the democrats, and the sympathy of the mercantile class, and even if not possessed of a majority, will hold the position the Tory

Digitized by Google

party holds in the present Parliament. Their exclusion, though threatened by the Republicans, is, we think, improbable. Supported by the whole people, that party might venture on such a defiance of the feeling in favour of State rights, but supported only by a section, though the more numerous section, and opposed to an irremoveable Executive Government, they would run too much risk of seeing their acts declared to be illegal, and themselves an imperfect Congress. Besides, a party which is in the majority is sure to believe that it can use its majority in a popular assembly without expelling its foes.

We cannot, as dispassionate observers, look forward to this prospect with anything like complacency. No man who has studied the history of the last four years in America will think himself justified in assigning limits to the American power of overcoming political difficulties, but the Government of the Union appears to us to be preparing most serious dangers for itself, and it may be for the world. The Southerners, if masters at home and powerful in Washington, are certain to rebuild society on the aristocratic base,—that is, to reinvigorate the main element of political discord between the two sections, and thus lay the seeds of a future war, are certain to reassert, in almost its old strength, the dangerous doctrine of State Sovereignty, and are nearly certain to tamper in some way with a debt contracted to ensure their own subjugation. Mr Morgan, the democratic candidate for the governorship of Pennsylvania, advised repudiation on the ground of the severity of the terms on which the loans were raised, and though he found little support he must have expected adhesion from sympathisers with the South. It would be difficult to conceive an event which would be more disastrous to the cause of freedom throughout the world than a repudiation of this war debt, and the immense privileges accorded to the South certainly increase the risk of its being repudiated. These things are independent of the negro, but it is impossible to pass in silence over the fate of four millions of human beings. Apart altogether from sentimentalism, it is certain that the experiment of allowing him freedom, had it been fairly tried and succeeded, would have been of incalculable benefit to the world. It would have proved to a demonstration that the principles of civil and political freedom are applicable to the inferior races, a proposition still denied with bad results in Africa, India, and Turkey. Even if it had failed, the world would have gained experience where it now has only a theory, and the higher races might have retained the guidance of the lower with much clearer conscience, and, therefore, firmer purpose. To interrupt such an experiment is in any case an evil, but to interrupt it by allowing slaveholders to subject their freedmen to laws menacing to their happiness, injurious to the competition of free settlers, and hostile to the principles upon which the nation has been founded and has grown great, is excusable only on a plea which the President does not put forward—a paramount necessity. We cannot but fear that when the troops are all withdrawn and the Southern States all reconstituted, and the Southern members reseated in Congress, the North will look round and find that the fruits of the great war in which it has been victorious have been most of them thrown away. It would have been wiser to wait.

Of course none of these objections apply to the President's resolve to show clemency to individuals. The world has decided, without much thinking on the matter, that excessive severity to political crime is immoral, and whether the world is right or not it is quite clear that it is unwise. If the disaffected are few, persecution only makes them martyrs, and if they are many, it is well to deprive them of the stimulus to energy contained in the conviction that conquest or execution are the only alternatives. Most men will fight well when victory is the only way to avoid massacre, and Anglo-Saxons, under such circumstances, seem lifted altogether out of themselves. The Southerners fought splendidly, but if they had the conviction which flashed on Anglo-Indians after Cawnpore, and had fought as they did, the South might have been conquered, but not its inhabitants.

IRELAND IN TRANSITION.

TENANT-RIGHT.

We endeavoured in our last paper to vindicate the principle of compensating an out-going tenant for unexhausted improvements. It remains to consider the possibility of applying this principle to the actual circumstances of Irish agriculture, and, lastly, its suitableness as a remedy for the industrial evils of Ireland.

The difficulty of applying in practice the principle of tenant-compensation arises primarily from the circumstance that the results of the tenant's labour are often inseparably blended with its subject-matter, the soil; while, at the same time, they are in their value blended with the effects of other causes of value. Thus land tends to rise in value with the progress of population, with the extension of commerce, with the development of internal communication, as well as with improvements effected in the soil; and to the augmentation of the value of land arising from the former causes, the landlord—where the land of a country is given up to private speculation—is plainly entitled. The first step, therefore, towards the realisation of a tenant-compensation scheme would lie in the separation between the effects on the value of land arising from these distinct causes—arising, that is to say, from the capital and labour of the cultivator, on the one hand, and from causes of a general nature connected with the progress of society, on the other.

It must at once be conceded that this problem does not admit of an exact solution; but it must also be strongly insisted on that it may be solved approximately, and with sufficient accuracy for practical purposes. We cannot say how much of the increased value of a farm is due to improvements effected on it by the tenant, but we can say, in the case of all the more important improvements, what their cost has been, and, in the main, cost (which is merely value *minus* profit) bears a constant and a close relation to value. The agricultural improvements now most urgently needed in Ireland are farm buildings, reclamation of waste land, and drainage. Every farmer knows that there is not the slightest difficulty in estimating the expense of such works; in point of fact, they are rarely undertaken on a large scale without an estimate being first made. To obtain the basis, therefore, for a tenant-compensation scheme, it is only necessary to adopt the assumption—an assumption favourable on the whole to landlords—that the cost incurred in improving an estate is a fair criterion of the value added to the estate by the improvement. Combine this with a scale of deterioration—setting forth the rates at which the several kinds of improvements wear out—and we have the principal data required for a practical settlement. The amount of deterioration deducted from the original outlay will represent the sum to which an out-going tenant, who has effected an improvement, is entitled.

But what is "an improvement"? If landlord and tenant agree upon this, the problem is solved. But suppose them to differ, who is to decide? The English reader will answer without difficulty—the landlord. His interest in the soil is durable, while that of the tenant is but temporary; and he is generally from his position and education more capable than the tenant of judging of what is needed for the permanent improvement of his estate. These considerations may be admitted to be decisive where the landlord himself, as in England, undertakes the responsibility of the task. But, as we have already apprised our readers, in Ireland landlords, as a class, decline to charge themselves with the outlay on improvement. Differing as the witnesses examined before the Land Tenure Committee did on many points, they were quite unanimous on this, that it is on the Irish tenant mainly that reliance must be placed for the improvement of the Irish soil. Now, if the reader will reflect on all that this fact implies, he will, we think, see reason to question the policy of committing the function of determining what constitutes improvements to the uncontrolled discretion of Irish landlords.

In Ireland as elsewhere, landlord and tenant are of course alike interested in the improvement of the agent from which each alike derives his income; but the nature of their interest in the work of improvement under the prevailing practice is not the same, and this results in certain antagonisms which may easily be overlooked by Englishmen. The tenant's interest in the improvement of his farm is immediate. He feels at once the benefit, as, if the needful outlay be not incurred, he suffers at once the loss. On the other hand, the neglect of providing what is required is not felt by the landlord till the termination of the tenant's tenure. It is obvious, that, where a landlord is not coerced by public opinion or traditionary custom into taking the nitiative, this circumstance gives him the power practically

Digitized by Google

of compelling the tenant to undertake at his own cost all expenditure of an urgent kind; and it is in fact in this way that it has come to pass that in Ireland agricultural improvement has become mainly the work of the tenant class. Now, keeping this state of relations in view, it is plain that a tenant-compensation scheme which should confine compensation to improvements sanctioned by landlords would not only leave the elements of jealousy, suspicion, and mutual exasperation involved in this system unremoved, but would even aggravate their force. The landlord, having only to compensate the tenant for such improvements as he had sanctioned, would be under the strongest inducement to sanction none which would be at all likely to be carried into effect irrespective of his approval—that is to say, the temptation to refuse his sanction would be strong just in proportion as the improvements proposed were urgent. Paradoxical, therefore, as it may seem, it is nevertheless simply the truth, that in the actual relations subsisting between landlord and tenant in Ireland, the owner of the soil is in a very distinct sense interested in refusing to acknowledge the necessity of agricultural outlay. It is of course his interest that his property should be rendered more valuable; but a slight augmentation of value effected solely at the cultivator's expense may be to him personally more profitable than a great one for which he has to pay compensation. Under these circumstances we cannot think it consistent with sound policy that the decision on the question—what constitutes agricultural improvements?—should be placed, without control or appeal, in the hands of the landlord class.

It is equally plain, or rather still more obvious, that this decision cannot be left with the tenant. No candid friend of the tenant class will say that landlords should be held liable to indemnify every cultivator for every alteration which he may choose to call an improvement. And this brings us to the practical hitch in the developement of the tenant-compensation plan—the difficulty of finding a tribunal fitted to decide this point.

It is here, and here alone, we believe, that Judge Longfield's plan of tenant-compensation has failed to satisfy those who accept in good faith the principle of his measure. We shall not now enter into that question: it is enough that, for the present at least, the obstacle is insuperable. But it may be worth considering whether it may not be possible to evade a difficulty which cannot be surmounted. It has been suggested that an escape from the present dead-lock may be found by following a clue already furnished by English law.

The law of England has long recognised the principle of compensating a tenant in kind—of permitting him, when he has incurred outlay, to indemnify himself, if he should be evicted, by taking the thing itself which is the product of his toil. A familiar illustration of this is the right of an outgoing tenant "to take the emblements"; and recent statutes, authorising the removal of tenant's fixtures, are instances more directly in point. But the principle has hitherto been confined in its application to specified instances, and in these is limited by strict conditions. At present it is only those implements of agriculture which may be removed "without "substantial damage to the freehold" that the tenant is suffered to take away. If he build a shed or make a drain, he is without remedy. Now we venture to question the justice of this restriction on the tenant's right of property in what he has produced. Why should the landlord's refusal to acknowledge the value of work performed be allowed to defeat the right of the workman to take his work for what it is worth? The landlord's property, it is true, may suffer in the process, but he can always prevent this by the simple course of paying the tenant for what he takes from him. If he refuses to do this—that is to say, if he refuses to respect the just rights of another, he can scarcely complain if the State, in the same degree, declines to protect his own.

Far from being inconsistent, therefore, with the rights of property, it would be merely carrying the theory of property to its legitimate results to permit an outgoing tenant, in all cases when compensation in money is refused him, to indemnify himself by taking compensation in kind—by taking, that is to say, the very thing which he has made. And we strongly incline to think that this rule in combination with the principles already laid down would in effect solve the question of tenant compensation. No doubt the materials of a house or drain would form but an indifferent return to a tenant for his labour in effecting those improvements; but the practical importance of the concession would not be measured by its tangible results; it would lie rather in the unequivocal assertion by the law of the true equities of the landlord and tenant relation—an assertion which would banish for ever that idea, ingrained it would almost seem in the Irish landlord's mind, that it is the natural right of the owner of the soil to profit at the cultivator's expense. This idea once precluded, the landlord would have no motive in refusing to recognise necessary improvements; should he do so, the tenant, though he could not enforce compensation, could at least defeat the attempt to appropriate the fruit of his labours. The practical result, we can scarcely doubt, would be, that in all cases the parties would be brought to terms; what was plainly necessary would be effected; and a definite contract setting forth the rights of each would come to take the place of the present scramble.

We think, therefore, that an effective tenant-compensation law is a feasible scheme; and we hold further that such a law is adapted to the present circumstances of Ireland. The strongest point that has been made against this view (and we have not the slightest desire to blink it) is the fact that a large portion of Ireland—perhaps a fourth of the country—has in fact been held for ages under long leases; yet that, notwithstanding the perfect security thus afforded for outlay, the lands thus circumstanced are amongst the worst cultivated in Ireland. Instead of security leading to improvement, what has happened is that the original lessees have by sub-letting the land stepped themselves into the rank of landlords, and have proved in general the most reckless and rapacious of their class; their tenants being the most miserable anywhere to be found. The inference suggested is that any law which should increase the tenant's security would only operate with him as an inducement to sub-let his farm; and that the state of things formerly and still to a certain extent prevailing on those middleman estates would receive a new impulse and be extended over the country.

One answer which might be given to this argument is that the evils apprehended might be obviated by the expedient of introducing into leases a clause against sub-letting—a precaution, where leases are granted, now all but invariably adopted. But this scarcely meets the drift of the objection, which we take to be that in Ireland a sense of security presents no inducement to outlay; in fact, that the ordinary motives to industry do not there operate. For ourselves, we should decline to accept an explanation of the phenomenon, not more at variance with the known principles of human nature than with ample experience of Irishmen under other conditions, even could we find no other; but in truth the facts admit a perfectly natural solution.

The state of things in question is plainly referrible to the strength of the landlord passion in Ireland in past times—the propensity to own land and lord it over tenants, which was the natural attribute of a society in which political power and social prestige were alike monopolised by landlords, while the great mass of the cultivators were in a condition not at all superior to that of predial serfs. The phenomenon was exactly analogous to the crave of the "mean white" of the Southern States to become the master of a slave. In each case the acquisition furnished or seemed to furnish the passport to the ranks of the privileged order. Any one, therefore, in Ireland who found himself in former times in possession of an interest in land sufficient by sub-letting to yield the means of support, sub-let his land almost as a matter of course; and, inasmuch as it was only the profit-rent which fell to him, he would be almost coerced by the circumstances of his position into rapacity and oppression. We need scarcely say that these considerations have no application to the state of facts with which we have now to deal with in Ireland. Not merely have the social conditions, out of which this ambition to live in idleness as the lord of tenants in a great degree passed away; but the realisation of the dream is manifestly only practically possible within certain narrow limits. The class in Ireland for whom, mainly, a tenant-compensation law is desirable, are the holders of farms ranging between 15 and 50 acres. These with the families constitute more than one-half the whole population of the country. Supposing them therefore to be ever so possessed with the passion for living as receivers of rents, it is not easy to see where they would find tenants, and not less difficult to imagine how they could subsist on the mere profit-rent of such farms as they occupy. The apprehension, therefore, of the present cultivators of land in Ireland re-

Digitized by Google

peating in a body the career of the middlemen, seems as chimerical as can well be conceived.

It is not to be denied, however, that amongst the actual cultivators, apathy and ignorance extensively prevails; and we are very far from thinking that any tenant-compensation law will act with magical effect in turning those qualities in a moment to enterprise and skill. We have, however, considerable confidence in the growth of industry, where the inducements to industry exist. Hitherto inducements to industry cannot be said to have existed in Ireland in that ordinary degree in which they are to be found in most civilised countries. And while inducements have been absent, disturbing influences of a powerful kind have been present. Most of these have now happily been removed. The principal which remains is this question of tenant-right. We cannot pretend to say how far the solution which we have indicated would meet the views of the Irish people. But we believe that it is in accordance with the principles of justice and with the true economic conditions of the landlord and the tenant relation; and we have a strong faith in the tendency of the opinions and feelings of men to adapt themselves in the long run to sound political economy and justice. J. E. C.

Agriculture.

A POLITICAL MOVE AGAINST LEASES.

Holding that the chief present obstacle to the progress of English agriculture is to be found in actual relations of landlords and tenants, we regard with great interest every indication of opinion on that subject. The terms many landowners impose on their tenants are absolutely irrational, and such as could only be submitted to in the belief that they will never be enforced, or by tenants who must be deficient in intelligence or capital, while the ordinary terms on which English farms are let place the tenants in positions of insecurity quite inconsistent with modern knowledge of the art of husbandry. These facts are so well known amongst the better classes of farmers, that the desire for rational bargains and long leases is producing amongst them feelings very adverse to the semi-feudal conditions under which they have have hitherto occupied their farms. Such feelings were strongly manifested in various directions during the recent county elections, and the landowners, who have the faculty of noting the signs of the times, are becoming aware that the present system of land management cannot be much longer maintained without bringing a serious conflict with public opinion in the rural districts. Hence we find the non-expediency of leases taken up by the most dexterous, if not the most successful, defender of obsolete customs and landlord prejudices. On economical grounds, the refusal to grant leases is wholly indefensible. It can only be defended on sentimental pleas, which are fictitious or fantastic, or, for political reasons, which though real, can scarcely—in the present temper of the public mind—be distinctly avowed. When we remember the fate of the moribund monopolies and restrictive laws which had the support of Mr Disraeli, it can certainly not be regarded as otherwise than hopeful that the feudalities of landownership have come to require in their defence the aid of his dexterous—and shall we say ironical?—advocacy. Yet such is the fact, and we augur therefrom that feudalism, in connection with English land, has been driven to its real and last stronghold, its modern political uses to the party most interested in its maintenance.

At the recen meeting of the Amersham and Ch sham Agricultural Association, Mr Field, in responding to the toast of "The Tenant Farmers," is stated to have "made some observations on the necessity of granting leases to tenants as security for their investments, and described the present system as a state of serfdom without the name." As yet the daily newspapers have not reported fully the outspoken remarks which the farmers are beginning to make at agricultural meetings, but some notice of Mr Field's statements were necessary to explain Mr Disraeli's speech, hence we get a glimpse of their effect.

Mr Disraeli therefore said, "If I stop for a moment to make an observation on the speech we have just listened to, it is not to provoke a discussion on an occasion like the present, on the subject of leases. Any one who has given attention to that subject must know that it would be impossible on an occasion like the present to exhaust the matter, or even to touch on the principles which lie at the foundation of it. It is very well to say that a farmer ought to have a lease, but you must consider the terms of that lease, and you will find when you come to discuss those terms with one who would be your tenant, that very different ideas are attached to these conditions from those which are entertained by another." And then, after stating he had heard the late Mr Pusey object in the House of Commons to leases, Mr Disraeli added "he thought that letting under such conditions [*i.e.* on lease] would deprive him of the opportunity of performing some of the first duties which, in his opinion, attach to the possession and. If you put it to a farmer whether he will have a lease for a short term of years he will give you reasons for objecting to that. On the other hand the landlord will say that as the value of land, generally speaking, has been rising for a long series of years, if he grants a lease for a long term it will be necessary to enter into some arrangement by which the rent shall be proportionately and periodically increased. That, again, might not satisfy the person who would be your tenant. The fact is, the arrangement under which land is held must vary according to the soil and the customs of different counties. I do not think any abstract principles can be laid down on the subject. But this is quite clear, that permanent improvements ought to be done by the landlord, and if that be done there are very few tenants, I think, who would wish to embarrass themselves with leases. That is a point, I think, on which experience has led us all to the same conclusion."

No doubt the terms of a lease would have to be settled in each case, and such terms would vary with the circumstances of soil, climate, district, and the wants or capabilities of different tenants, but is that any reason why the landlord should make every stipulation in his own favour, and retain an entire control over the acts and capital of his tenant? Doubtless, when the terms of leases were discussed in all parts of the country, the contracts for farms would daily assume more and more of the commercial aspect, and perhaps "some of the first duties which attach to the possession of land"—the preservation of game for battues, the compelling tenant-farmers to vote for their landlords' candidates and the like—might thereby be most usefully interfered with.

The question of leases or no leases is purely an economical one, for landowners have gone so far in the direction of commercial principle in letting farms—*i.e.*, in exacting the highest rents the competition of the market will afford—that they cannot withdraw from the subjection of the whole system of land management to economical laws.

Beyond this, there can be no question that the vast accumulation of land in a few hands has had a most prejudicial effect on the economical abuse of land by the proprietors. These large proprietors can afford to abuse their property, and their example operates badly on the management of the smaller landowners. If the majority of estates were of more moderate dimensions, the owners would do more to make the best of them than the great landowners do at present, and the result would soon be general and great improvement.

We met with a striking instance of this a few days since in Warwickshire, when riding through a fine rural district we came upon a farm with a capital set of farm-buildings, and with a great display of stacks, showing the perfection of farming neatness. Remarking to a person passing at the time on the goodness of the farm-buildings, he observed—"Yes, they are excellent, and form a complete contrast to those on the opposite side." We turned, and noticed a large set of farm-buildings in a state of great dilapidation, with most slovenly belongings. "And," said our informant, "the curious thing is the good buildings belong to the Colonel and the bad ones to the 'Squire." We afterwards ascertained that the Colonel was comparatively a small proprietor, while the 'Squire, his cousin, is the county member—*a farmer's friend*—and the owner of a tract equal in extent to a German principality.

Foreign Correspondence

(FROM OUR OWN CORRESPONDENT.)

PARIS, Friday.

The *Monteur* has published the following return of the Bank of France, made up to the 26th inst. The return for the previous week is added:—

	Oct. 26, 1865. f c		Oct. 19, 1865. f c

	1,432,340,159	72	.....	1,454,907,987	63

All the items in the Bank return of this week which are of general interest present a decline, compared with last. The coin and bullion are 332,000f lower; discount of bills, 18,809,000f; circulation of notes, 6,786,000f; and deposits, 13,661,000f. No change has been made in the rate of discount.

It will be seen from the Bourse table below that, with the exception of the Spanish railways, which are in marked disfavour, all securities have risen, remained stationary, or undergone only insignificant variations. Besides this, the Bank return is not unfavourable, and no political question causes special disquietude. Yet the Bourse is what the French call "tormented" and distrustful. It has been much occupied during the week with the Immobiliere Company, which, as I stated some time back, has succeeded in concluding the sale of building ground at Marseilles to an English company, headed by Mr Goschen; but this transaction, which is very favourable to the company, only produced a very unimportant advance in its shares. The following are the quotations of the week:—

The Superior Council of Commerce, charged with the inquiry into banks, currency, &c., is now proceeding with energy which surprises the public, and which is in surprising contrast with its dilatoriness at the beginning. It has received numerous depositions, and has made arrangements for receiving many more. Among the gentlemen who have appeared before it is M. Pinard, Director of the Comptoir d'Escompte, an establishment which stands next to the Bank of France in commercial importance. M. Pinard, joining to superiority of intelligence which is universally acknowledged practical experience of the highest order of many years' duration in banking, discounting, and financial operations in general, was listened to with marked attention by the Council, and his opinions will, no doubt, greatly influence its resolutions. Unfortunately, what those opinions are is not known to the public, as the Council persists in refusing to publish daily reports of its proceedings. I understand, however, that in the important matter of plurality of banks of issue, which, more than anything else, produced the inquiry, M. Pinard pronounced energetically in favour of one single issuing bank. But it is likely that the advantage of having, in times of political convulsion, only one single bank of issue instead of many,—an advantage which the adversaries of plurality hold to be demonstrated in the revolution of 1848,—and the probability that France is still destined to see such convulsions again, may have done as much to bring M. Pinard to this conclusion as purely commercial considerations. Another important witness before the Council was M. Victor Bonnet, one of the best writers on financial questions in this country. He declared, as in his book, "Le Credit et les Finances," for one bank of issue, and scouted the doctrine of fixity of the rate of discount. Another witness was M. Cernuschi, an Italian economist, author of a book entitled "Mecanique de l'Echange," a very remarkable work in many respects, but spoiled by the singular theory that bank notes ought to be abolished, and replaced by gold and silver. On the whole, the inquiry before the Council appears thus far to be contrary to the wishes and expectancy of the bank reformers of the Pereire and Chevalier school. In the familiar words of one of the members of the Board, "It is going dead against Michel Chevalier; he fights hard, but will be beaten." We must, however, remember that the inquiry is far from terminated, and that the disciples of Chevalier and Pereire have still to be heard.

His Excellency M. Fould has conceived a reform in the finance department of some importance—the abolition of the office of Receiver-General of Taxes. In each of the 89 departments of France there is such a functionary, and he gets a fixed salary of 6,000f and certain allowances for recovery of taxes, for interest of funds, &c., which make his revenue much larger, varying, however, according to the importance of his district. Taken altogether, the Receivers-General cost the State between 4,000,000f and 5,000,000f. M. Fould thinks that the saving of such a sum is well worth making; and he holds that it can be made by requiring the branches of the Bank of France to act as bankers for the Government. Unfortunately, however, his project is opposed not only by the functionaries whose interests it concerns, but by many influential personages, and even, according to common report, by some of his colleagues in the Ministry, who ought to be the first to aid him in effecting economy. Under the Imperial *regime* it is much easier to create places than to suppress them—to be wasteful than thrifty.

Although it be true that the Viceroy of Egypt has, on account of the sudden rise in the value of cotton, no need of the loan of 3,000,000*l*, which he was to raise on mortgage of his private estates, the belief is that the Government will before long require a loan of greater amount, and that it will apply to capitalists in Paris for one. They will naturally be even more willing to treat with the Government than they were with the Viceroy personally.

The following is a detail of the indirect taxes received in the first nine months of the present and the last two years:—

Designation of Taxes.	Nine months of 1865. f		Nine months of 1864. f		Nine months of 1863. f
Registration, mortgage dues, &c.	240,935,000	...	244,931,000	...	244,420,000
Stamp duties	57,867,000	...	55,838,000	...	53,461,000
Custom duties on imports of grain	140,000	...	231,000	...	1,409,000
Do. on different sorts of goods	46,896,000	...	47,482,000	...	50,777,000
Do. on exports	140,000	...	269,000	...	717,000
Navigation dues	2,754,000	...	3,082,000	...	3,135,000
Various Customs duties and receipts	1,028,000	...	1,062,000	...	1,081,000
Tax on the consumption of salt in Customs districts	15,181,000	...	14,959,800	...	14,204,000
Tax on wines, beer, &c.	164,486,000	...	160,630,000	...	156,257,000
Tax on consumption of salt beyond Customs districts	6,143,000	...	5,877,000	...	5,818,000
Various duties and receipts	42,194,000	...	41,762,000	...	39,754,000
Sale of tobacco	174,157,000	...	172,305,000	...	167,126,000
Sale of gunpowder	8,892,000	...	9,950,000	...	9,490,000
Post office	50,231,000	...	47,885,000	...	47,264,000
Tax of 1 per cent. on French money orders by post	867,000	...	815,000	...	785,000
Tax on foreign money orders by post	18,000	...	...	...	...
Tax on conveyance by post of articles of value	609,000	...	551,000	...	479,000
Duty on transit of foreign mails	1,012,000	...	1,164,000	...	1,333,000
Various receipts	40,000	...	39,000	...	23,000
Duty on French colonial sugar	20,503,000	...	18,944,000	...	34,935,000
Duty on foreign sugar	16,301,000	...	35,006,000	...	35,325,000
Duty on native sugar	21,285,000	...	13,958, 00	...	44,702,000
Total	871,984,000	...	876,640,000	...	912,435,000

The decline which the nine months of the present year presents, compared with the corresponding periods of the two years preceding, is, as stated last week, entirely owing to the alterations in the fixing and the mode of paying the sugar duties. Apart from these duties, the indirect revenue is this year 4,863,000f more than it was last, and 16,062,000f more than in 1863. It is worth noting, as regards the present year, that the revenue was considerably more in the quarter ending 30th September than in the two previous quarters—it was 309,063,000f; whereas, in the quarter ending 30th June, it was 290,342,000f, and in that ending 31st March, 272,579,000f.

Messrs Guillaumin and Co. have just issued a work entitled *Traite de Compatibilite et d'Administration Industrielles*, by M Guibault, chief accountant of the Company des Forges et Chantiers de la Mediterranee. It is not, the preface declares, a repetition of the numerous treatises on bookkeeping that have been published at different times, but an attempt to make bookkeeping an exact science, based on sound principles. The author brings to the execution of his task an experience of twenty-five years as accountant in great companies. After explaining the present system, and showing that it is in many respects defective, owing to proper account not being taken of the cost and selling price of articles, and of the work done by workmen, materials employed, &c., he lays down a series of new rules under which the daily operations of any trader or company can be correctly recorded in the minutest detail, and his or its real situation at any time be ascertained. Annexed to the volume is a collection of forms recommended by the author for account-keeping in banks, wholesale or retail trades, coal-pits, sugar refineries, and iron-works.

The subscription for the shares of the new joint stock bank at Lille mentioned in my last, was opened yesterday, and is to close on the 30th. The name of the bank is Societe de Credit Industriel et de Depots du Nord; the capital is to be 20,000,000f, the shares 40,000 in number, of 500f each, but only 125f are to be called up. Of this sum, 25f are to be paid on subscribing, the rest at a date to be hereafter fixed.

A revival of commercial activity between Marseilles and Egypt has to be recorded. The French are buying Jumel cotton largely in Egypt, and the Egyptians are taking considerable quantities of flour and other articles in Marseilles. During the cholera, with which both places have been afflicted, their trade fell off greatly.

The company of the Coal-pits of Carmeaux announces the payment of 7f per share on account of dividend for 1865.

In a meeting of the shareholders of the Charentes Railway, recently held, the report of the directors stated that though there had been delay in the execution of the works, owing to the slowness of governmental formalities, they are now progressing satisfactorily; that the contracts entered into for those works, and for the supply of *materiel*, are advantageous to the company, and that the accounts, which had been somewhat neglected, are now regularly kept. As to the financial situation of the company, on which a special report was presented, it was stated that the last call made on shares is being paid, and that the resources in hand are sufficient to provide for all present wants, but that the co-bankers of the company are still indebted to it to the amount of about 5,000,000f, for which, however, securities are held. The accounts of 1864 were presented and approved of. The directors having proposed three gentlemen to fill up vacancies in the board, a portion of the meeting objected to this most vehemently, and a scene of uproar followed; eventually, however, they were elected. One of them bears the name of Hennessy.

The dividend (80f) declared by the large engine building establishment of Cail and Co., for the year ending 30th June last, was announced in the ECONOMIST of the 7th Oct. It represents just one-half of the real profits of the concern, the other half going to the managers (*gerants*). In the course of last year the company, in spite of the depression of commerce, executed orders to the amount of 14,000,000f and it began a new year on the 1st July, with orders of 12,000,000f. In addition to the works at Paris, it has others at Denain, Douai, Brussels, Valenciennes, and Amsterdam. The success of this company will serve as an example of the truly extraordinary development which engine-building has taken in France in the last twenty years.

Within the last few days a marked rise has taken place in refined sugar at Paris. Yesterday the quotation for fine sorts was 135f to 136f the 100 kilogs, and it is the same to-day. The market report affirms that as the stock is low and the demand daily increasing, "there is no limit to the rise." The markets of raw foreign and colonial sugar are naturally influenced by this augmentation in the price of refined; but native raw at Paris has not increased so much as was to be expected.

The manufacture of beetroot sugar in the month of September, the first of the year 1865-6, was with the stock brought over, 22,559 tons, and the quantity taken for consumption, export, and distilleries, was 7,636 tons. Apart from this, the entrepots received in September, stock included, 12,025 tons, of which 8,385 were taken for consumption, export, and refining. According to the organ of the beetroot makers, this year's crop of beetroot will be very fine. This journal records that since the modification in the sugar duties "the industry of beetroot sugar has taken a giant's step."

An official return shows that the total quantity of alcohol made and imported in the season ("campaign") from 1st October, 1864, to 30th September, 1865, was, including stock in hand, 1,553,985 hectolitres, of which 1,301,857 were for consumption, leaving 252,112 in hand on the 1st October.

Letters from Madrid announce that M. Lopez de Mollinado, one of the most eminent bankers in Spain, committed suicide on the 19th. He was, it appears, temporarily embarrassed, but had ample means to pay all his liabilities. He was extensively engaged in business with some of the leading houses in Paris.

The news has been received here that Messrs Mallet, Pereire, and Hottinguer, of Paris; R. Drake, Dupré, Grenfeld, Lord Hobart, and Herman Stern, of London, have obtained the privilege of establishing a Discount Bank at Bucharest.

The market report is as follows:—

FLOUR.—The prices, yesterday, at *Paris*, were firm at 48f to 52f the sack of 157 kilogs. Six marks, current month, were 52f; November and December, 59f 25c. Type Paris, the 101 kilogs, 32f.

WHEAT.—At *Paris*, yesterday, holders, in order to sell, had to accept the prices of the week preceding.

COTTON.—The market at *Havre*, in the week ending Friday, was active but not agitated. The sales were 16,892 bales, and by auction 75. The arrivals were 1,149 bales; the stock 23,200 bales. The closing quotations were 5f higher for United States and Peru; 10f higher for Egypt, Cumana, Carthagena, Porto Rico, Kurrachee, Tinnevelly, Madras, and Bengal; 15f higher for Brazil, Surinam, Cayenne, Martinique, Guadaloupe, Coconada, and China; 20f for Hayti; 10f to 15f for Surat. Low New Orleans was consequently 305f the 50 kilogs; good ordinary qualities in Broach, 230f; in Tinnevelly, 230f; in Madras, 235f; in China, 230f; in Jumel, 300f. This week the market has been extremely calm, and prices have fallen. Yesterday, New Orleans was 295f; Oomrawuttee, 220f; Madras for delivery in December, 205f; in January, 195f; Bengal, 160f; Rangoon, 182f 50c; Sawginned, 250f. A telegraphic despatch announces that this morning the market was calm and prices not firm.

COFFEE.—Business was active at *Havre* in the week ending Friday, and prices were firm. 100 sacks of Hayti Port-au-Prince, 82f the 50 kilogs in bond; 200 ditto, very ordinary, 77f to 77f 50c; 1,014 Cape, 84f to 85f; 660 Gonaives, 85f 50c to 87f; 150 St Marc, for delivery, 87f; 150 St Thomé (African coast), 78f; 1,800 Rio, not washed, 63f to 86f; 500 ditto, for delivery, 71f 50c; 646 Rio, washed, for delivery, 97f; 70 Bahia, disposable, 67f 50c; 1,200 Santos, for delivery, 70f to 95f; 58 Malabar and 172 Mocha, for delivery, at prices kept secret; some Guadaloupe habitant, fine quality, 140f, duty paid, and by auction, 121f. The arrivals exceeded 5,300 sacks. This week, Rio for delivery, 63f to 81f; washed, 95f 50c; Gonaives, 87f; St Thomé, 78f; Santos, 82f; Bahia, 67f 50c and 62f; Malabar, 88f to 92f; Salem, 103f and 127f. At *Bordeaux*, last week, 500 sacks Mysore 118f 50c; 406 at 118f; 267 Winard, 183f 50c; 270 Rio, unwashed, 80f; 50 casks Santiago, 101f to 106f; 50 ditto, triage, 97f 50c. This week, Rio, washed, 103f to 107f 50c; Caracoly, 114f. At *Nantes*, last week, no sales, and there have been none this week. At *Marseilles*, last week, 1,283 sacks Rio, 72f to 81f; 431 ditto, washed, 102f 50c; 592 Mysore, 90f; 3,200 Bahia, 50f. This week, Rio, 78f 50c.

SUGAR.—The sales at *Havre*, in the week ending Friday, were 550 casks French West India, disposable, and for delivery, 49f the 50 kilogs, bonne quatrieme, duty paid; 936 casks 1,139 sacks usine, 46f to 58f 50c; 1,650 casks Havana, disposable, 31f 50c, 32f, 32f 50c, and 33f for No. 12 in bond; 4,338 sacks Mauritius, 52f 50c, bonne quatrieme, duty paid; 259 baskets Java, 31f, in bond, and a small lot of ditto, by auction, 49f, duty paid. The arrivals were 1,139 sacks and 340 casks. This week, Porto Rico, 50f, bonne quatrieme; French West India, 49f, bonne quatrieme; usine, 50f to 58f; Havana, 33f, No. 12. At *Nantes*, last week, 1,574 casks French West India, 47f 50c, bonne quatrieme; 698 sacks Java, 32f, No 12, of Holland. This week, Reunion, 51f 75c to to 52f 50c, bonne quatrieme: sales large. French West India usine, 54f to 56f 50c. At *Bordeaux*, last week, 976 casks French West India, of which about half at 47f 75c, bonne quatrieme; the rest at different prices. This week, Reunion at prices not stated, to be taken at Nantes, and 52f, bonne quatrieme, ditto. At *Marseilles*, last week, 650 casks French West India, 30f, bonne quatrieme, of Havre. By auction, 4,581 casks Havana, sound, by French vessels, Nos. 1 to 4, 28f 25c to 34f 75f; 8,956 Pernambuco, sound, by French ship, 27f 25c and 27f 50c; Bahia, same prices. This week, no sales.

INDIGO.—The demand was active at *Havre* in the week ending Friday: 71 casks Bengal, without, however, any variation in prices. The arrivals were 12 chests from England. This week, Bengal at prices not stated. At *Bordeaux*, last week, 33 chests Bengal, 12 Madras, 5 Kurpah at preceding quotations. Holders were disposed to sell at the same rates, but buyers held back. This week, the sales of Bengal have been rather important; some Madras has also been disposed of.

HIDES.—At *Havre*, in the week ending Friday, the sales were 164 La Plata ox, dry, 80f the 50 kilogs; 3,650 salted ditto, 80f for ox, heavy, and 41f 75c for cow; 876 Rio Grande dry heavy, 85f; 200 ditto salted ox, 55f 50c; 3,050 horse, Monte Video salted, 41f 50c to 42f 50c. The arrivals were about 27,000. This week, Buenos Ayres dry ox, 107f 50c; cow, 92f 50c; Valparaiso ox, 78f; Pernambuco drysalted, 65f; La Plata horse, salted, for delivery, 41f 50c; Monte Video salted ox, 56f and 60f; Rio Janeiro salted ox, 51f 50c and 52f; Monte Video horse, for delivery, 83f; Buenos Ayres ditto, heavy, 84f 50c.

TALLOW.—At *Havre*, in the week ending Friday, 270 pipes La Plata, disposable, in the port, 58f 50c to 60f the 50 kilogs; 710 ditto, for delivery, 59f to 60f 50c; 40 Rio Grande, for delivery, 60f; 25 casks New York, a la marque, 60f. No arrivals. This week, La Plata, for delivery, 60f 50c to 63f 50c; New York, a la marque, 64f. At *Paris*, yesterday, the 100 kilogs, octroi duty included, were 133f 20c.

SPIRITS.—At *Paris*, yesterday, 3-6, first quality, disposable, 50f 50c the hectolitre. At *Bordeaux*, the day following yesterday, 3-6 Languedoc, 86 deg., 56f; 3-6, beetroot, first quality, 90 deg., 57f.

COMMERCIAL AND MISCELLANEOUS NEWS.

The annexed report of the Calcutta money market is dated the 21st ult.:—There has been increasing demand for money during the fortnight, which would probably have led to an advance in its value had not recent supplies been so heavy that the banks hold larger balances of specie than usual at this season, and more than sufficient for present requirements of trade. Government securities advanced a little about the 12th instant, since which prices have been remarkably steady at 4 to 6 annas above our last quotations; the business done has been small; to-day we quote 5¼ per cents. at 10-14 to 11-2 prem. Share Market—In Bank of Bengal shares there have been but few transactions since our last, but former prices have been maintained, and the closing rate is 6,975 rs to 7,000 rs for the full share of 4,000 rs. Exchange has again advanced; a fair business was done last week at 2 7-16d for first class 6 months' sight credit bills on London, but latterly one of the leading banks has sold largely at this rate, and to-day credits do not find buyers at 2 9-16d. On Hong Kong business has been done at 218 for $100 for bank, and 217 for private bills. The following are the items of the Bank of Bengal for the weeks ending Sept. 5 and Sept. 12:—

Liabilities.	Sept. 5.		Sept. 12.
Proprietors' capital, paid up	£2,200,000	...	£2,200,000
Reserve fund	173,427	...	173,427
General treasury balance at head office	565,104	...	568,122
Do. at branches	855,465	...	754,081
Other deposits at head office and branches	3,140 875	...	3,114,185
Bank post bills, &c.	29,714	...	36,794
Bank notes outstanding	23,510	...	23,271
Sundries	58,487	...	66,070

Messrs Stoehr, Prieger, and Co., writing from Bombay, on the 28th ult., thus allude to the state of the money and exchange markets:—Money is plentiful, but as large amounts will soon have to be remitted up-country as advances against the new crop, there is little prospect for the present of a reduction in the rates of discount. Exchange—There was some business done by an extra steamer, which left on the 16th instant, at 2s 5-16d for bank paper and 2s 7-16d to ½d for credits. Later on the rates stiffened, several banks came out as free sellers, and within the last two days rates have advanced to 2s 7-16d for bank bills, 2s 9-16d to 11-16d for credits, and 2s ¾d for documents, and a further advance during the next fortnight is generally looked for.

Central Bank of Scotland	42953	64029	28227

The following returns show the state of the note circulation of the United Kingdom during the four weeks ending Sept. 16, 1865, compared with the previous month:—

	Aug. 19, 1865.	Sept. 16, 1865.	Increase.	Decrease.
	£	£	£	£
Bank of England	22178744	21617745	...	560999
Private Banks	2843151	2861915	18784	...
Joint Stock Banks	2748203	2774785	26582	...
Total in England	27770078	27254445	...	515633
Scotland	4349669	4305561	...	44108
Ireland	5664013	5938593	274580	...
United Kingdom	37783760	37498599	...	285161

And, as compared with the month ending the 17th of Sept., 1864, the above returns show an increase of 875,152*l* in the circulation of notes in England, and an increase of 1,616,877*l* in the circulation of the United Kingdom. On comparing the above with the fixed issues of the several banks the following is the state of the circulation:—The English private banks are below their fixed issue 1,316,370*l*, the English joint stock banks are below their fixed issue 452,472*l*,—total below fixed issue in England, 1,767,842*l*: the Scotch banks are above their fixed issue 1,556,290*l*; the Irish banks are below their fixed issue 415,901*l*. The average stock of bullion held by the Bank of England in both departments during the month ending Sept. 13 was 14,227,149*l*, being a decrease of 44,164*l* as compared with the previous month, and an increase of 1,375,214*l* when compared with the same period last year. The following are the amounts of specie held by the Scotch and Irish banks during the month:—Gold and silver held by the Scotch banks, 2,376,797*l*; gold and silver held by the Irish banks, 2,078,603*l*; total 4,455,400*l*; being an increase of 20,560*l* as compared with the previous return, and an increase of 326,794*l* when compared with the corresponding period last year.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 25th day of October, 1865.

ISSUE DEPARTMENT.

	£		£
Notes issued	27,061,150	Government Debt	11,015,100
		Other Securities	3,684,900
		Gold Coin and Bullion	12,411,150
		Silver Bullion	...
	27,061,150		27,061,150

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	9,308,018
Rest	3,184,009	Other Securities	20,003,638
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	3,793,682	Notes	5,241,250
		Gold and Silver Coin	808,063
Other Deposits	13,279,933		
Seven Day and other Bills	559,345		
	35,360,969		35,360,969

THE OLD FORM

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	22,370,245	Securities	29,408,656
Public Deposits	3,793,682	Coin and Bullion	13,219,218
Private Deposits	13,279,933		
	39,443,860		42,627,869

Dated the 26th October 1865 W. MILLER, Chief Cashier.

The balance of Assets above Liabilities being 3,184,009*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£513,908
AN INCREASE of Public Deposits of	204,329
A DECREASE of Other Deposits of	723,681
A DECREASE of Government Securities of	18,459
A DECREASE of Other Securities of	1,444,645
AN INCREASE of Bullion of	429,255
AN INCREASE of Rest of	10,411
AN INCREASE of Reserve of	927,595

The changes in the above return are unexpectedly favourable. An increase of nearly a million has taken place in the reserve, and a decrease of not quite a million and a half in the other securities. The demand for coin for internal circulation appears to have subsided, the augmentation in the bullion corresponding almost exactly with the amount of foreign gold, 438,000*l*, known to have been sent into the Bank during the week.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1855:—

At corresponding dates with the present week	1855.	1862.	1863.	1864.	1865.
Circulation, including bank post bills	£ 21,415,029	£ 21,733,522	£ 22,600,408	£ 21,525,745	£ 22,370 245
Public deposits	3,700,844	6 091,697	4,462,163	3 723,549	3,793 682
Other deposits	11 327,321	16,455,543	15,015,128	13,297,777	13,279,933
Government securities	10,528,955	11,763,992	10,995 363	9.410,461	9 308,018
Other securities	18,554 609	19,978 984	19,693,489	19,767,497	20,003,638

Digitized by Google

In the corresponding week of 1855, the Allied fleet, aided by the Anglo-French division of the army, had captured Kinburn. Trade in Paris had continued to suffer from the restrictive measures adopted by the Bank of France. Large purchases of wheat for Europe had been made in New York.

In 1862, the insurrection in Greece had broken out. American cruisers in the neighbourhood of the Bermudas were threatening interference with British shipping.

In 1863, King George of Greece had embarked from Toulon for Athens, where his arrival was impatiently expected. Russian troops continued to enter Poland, the insurrection being still maintained. The Hotel de Ville at Warsaw had been set on fire. The money markets in London and Paris were being acted on by the export demand for bullion on account of extended cotton purchases. In London, the continued introduction of new banking associations was taking place.

In 1864, the King of Greece, in his message to the National Assembly, had proposed the creation of a Council of State. The proposal was adopted, after a discussion, by a majority of 136 to 124. The shareholders of the Bank of Spain had been summoned to increase the capital of the Bank by 75 millions of reals. At Turin, the Chamber of Deputies had been re-opened, under the patronage of Signor Cassinis. Official advices from Mexico had stated that the Emperor Maximilian had been everywhere received with enthusiasm. In America, General Longstreet had superseded General Early, and the Confederates had recaptured Rome, Georgia. Money was abundant in London, but the market was disturbed on account of the late news from Brazil.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1855, a deficiency of 7,207,279*l*; in 1862, a deficiency of 3,523,441*l*; in 1863, a deficiency of 4,678,361*l*; and in 1864, a deficiency of 5,869,720*l*. In 1865, the deficiency is 6,723,705*l*.

DISCOUNT AND MONEY MARKET.—There has been a comparatively moderate demand for money this week, and the rates are becoming gradually easier. To-day, especially, owing to the favourable Bank return, three months' bills were readily taken at 6⅞ per cent. On account, however, of the funeral of Lord Palmerston, business has been little more than nominal in the general market, although at the Bank the applications for discount have slightly increased. Annexed are the current rates for bills, with various periods to run:—

30 to 60 days	6⅞ per cent.
3 months	6⅞ per cent.
4 months	7 per cent
6 months—Bank bills	6¾ per cent.
6 months—Trade ditto	7⅛ 8 per cent.

In the Stock Exchange, yesterday, there was a rather active demand for loans on Government securities at 6 to 7 per cent., and some rather large sums were taken from the Bank at the latter rate until Tuesday next. The favourable Bank return, however, was not known until after business hours, otherwise it may be concluded the terms would have been less onerous. Some loans, from day to day, were renewed this afternoon at 5 to 6 per cent.

About 6,000*l* in gold was taken to the Bank yesterday. There were no operations in bullion to-day.

The following are the rates of interest allowed on deposits:—

Joint Stock Banks	*5 per cent.
Discount houses at call	5 per cent.
Do. with seven days' notice	5½ per cent.
Do. fourteen days	6 per cent.

* At the London and Westminster 4 per cent. only on sums below 500*l*.

The Stock Exchange and Royal Exchange have been closed to-day, in consequence of the funeral of Lord Palmerston, and business in the City has been generally suspended.

The amount of Government bills on India for which tenders will be received at the Bank of England on the 1st of November, will be 35,00,000 rupees (350,000*l*), of which not more than 10,00,000 rupees (100,000*l*), will be drawn on Bombay.

The Stock Exchange Committee appointed yesterday a special settling day in the shares of the San Pedro del Monte Silver Mining Company (Limited), and Thursday, 2nd November, in the Six per Cent. Guaranteed Preference Stock of the Scottish Australian Investment Company (Limited). The Committee have also ordered the shares of the Oriental Commercial Bank (Limited) to be officially quoted.

The following notice has been posted in the Stock Exchange with regard to Turkish Consolides:—

The Committee have resolved—That the settlement of the Turkish Consolides be fixed for Friday, 10th November, in order to enable the buyers to send in their bonds for conversion. In all transactions in Turkish Consolides subsequent to the 10th November, it must be specified whether the bargains are to be settled in unconverted bonds, or in bonds stamped for conversion.

It is understood that the concessionnaires of the new Bank of the Danubian Principalities have made arrangements with the Imperial Ottoman Bank to take over their branches at Bucharest and Galatz on terms highly advantageous to the latter, and that this important undertaking will shortly be brought out by the Imperial Ottoman Bank.

The Bank of France return for the week shows the following changes:—

DECREASE.

Bullion	£13,000
Bills discounted	752,000
Advances	36,000
Circulation	272,000
Treasury balance	88,000
Current accounts	544,000

The rates of discount on the Continent are again tending downward. The following are the quotations:—

	Bank Rate. Per cent.	Open Market Per cent.
Paris	5	4½
Vienna	5	5 ½
Berlin	7	6⅛
Frankfort	5½	5½
Amsterdam	4	4
Turin	5	4½ 5
Brussels	5	5
Madrid	9	...
Hamburg	...	5⅜
St Petersburg	6	6¼ 7

ENGLISH FUNDS.—Consols this week have been flat, and closed yesterday at a decline of about a half per cent. The cause of the dulness has arisen partly from some large sales for immediate delivery and partly from the expectation, apparently unfounded, of a renewal of the late pressure in the money market. The favourable character of the Bank return was not known yesterday until some time after the close of the Stock Exchange. Consols for the account, which were quoted in the previous week 89⅜ to 89½, left off last evening at 88⅞ to 89. For money the final price was 88¾ to 88⅞. Reduced and New Three per Cents, closed at 87⅛ to 87¼, and India Five per Cents. 104¾ to 105.

Exchequer bills show a further recovery of 1s, the March issue being quoted 5s to 2s discount and the June 7s to 3s discount.

FOREIGN STOCKS.—The foreign market has followed the movements in the funds, and in a number of cases a decline has taken place, especially in Brazilian scrip, Egyptian bonds of 1864, Mexican, Sardinian, and Spanish Passive and Certificates. Turkish Six per Cents of 1854, the Consolides, and the new Conversion Five per Cent. loan have also fallen, while the stocks of 1858 and 1862 improved. New Grenada bonds have been rather dull. Notwithstanding the reduction in the old Sardinian stock, the new Italian Five per Cents. show increased firmness. There have been some inquiries for the Confederate Cotton Loan, and the price has nominally advanced to 6½ to 7½. United States Five-twenty bonds have experienced a renewed decline on some rather large sales, the market being especially sensitive to operations of this description owing to the existence of a heavy speculative account for the rise.

The final price of French 3 per Cent. rentes in the Paris Bourse to-day was 67f 95c, showing a fractional rise over yesterday, and an improvement of nearly an eighth compared with last week.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and yesterday:—

Railways and Other Shares.—The market for railway securities has been rather depressed, and in several of the principal stocks a decline has taken place. Caledonian and Metropolitan show the principal reduction, closing 1 per cent. lower than last week. London and North-Western, Great Western, Great Eastern, South-Eastern, and Great Northern A stock have also experienced a fall ranging from ¼ to ¾ per cent. The movement is attributable to the expectation of an adverse state of the money market. Midland, North-Eastern descriptions, and London and South-Eastern have exceptionally advanced.

In the colonial market, Indian guaranteed stocks have been in good demand, at an occasional improvement. Great Western of Canada shares are also higher, but Grand Trunk stock has fallen 1 per cent. The principal feature in the foreign department has been a rise in Brazilian descriptions. Belgian shares were heavy, particularly Dutch-Rhenish and Great Luxembourg. Imperial Mexican, and South-Austrian, and Lombardo-Venetian also receded.

The shares of Overend, Gurney, and Co. (Limited) have again been in active demand, partly to close previous speculative sales, and rose yesterday morning to 9⅝ premium. At the close, however, the price had relapsed to 9⅜ to 9½. The new issue of the Credit Foncier and Mobilier were quoted 3¾ to 4 premium. Imperial Ottoman Bank shares have advanced to 16⅛ to 16⅜ on the announcement of a concession for the establishment of a bank in the Danubian Principalities.

Subjoined is the usual list of the closing prices of the principal railway shares last Friday and yesterday:—

Foreign Exchanges.—The rates this week have been generally lower, short bills on Paris having been specially in demand.

Bullion.—The following is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper:—

Gold.—Since our circular of the 19th inst., the Bank has purchased about 338,000*l* in refined gold; it is not likely that any further amounts of importance will now be sent in unless there should be arrivals of fine gold, all other descriptions being in demand for export. The Cuba brings 14,750*l* from New York; the City of Washington, 30,000*l* from New York and 4,000*l* from Halifax; the Allemania, 82,000*l* from New York; and the Poonah, 165,000*l* from India. The Massilia takes 50,000*l* to Bombay.

Silver.—Some large transactions have taken place in silver for the outgoing mails to Bombay of the 27th instant from Southampton and the 5th proximo from Marseilles; the Massilia, leaving here on the 27th, will take about 300,000*l*. Prices have been firm, and have experienced a slight rise, owing to the good demand for bars. Quotations remain as stated below. The Messageries steamer took, on the 19th instant, from Marseilles, 322,000*l* to India and China, and the Peninsular and Oriental steamer, from Marseilles on the 19th instant, took 273,000*l* to Bombay.

Mexican dollars remain as last quoted, 4s 11⅝d per oz, but with a very quiet market, and without any business of importance to notice.

Exchange on India for drafts by the banks at 60 days' sight may be quoted 1s 11⅞d to 2s 0⅛d for Calcutta and Madras, and 2s to 2s 0¼d for Bombay. Demand drafts have been sold at 2s 0⅛d to 2s 0⅜d.

India Government loan notes remain at about last week's prices—5½ per Cents, are 107½ to 108½; 5 per Cents., 100 to 102; and 4 per Cents., 87 to 89.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std, last price; ditto, refinable, 77s 11d per oz std, last price; Spanish doubloons, 74s to 74s 6d per oz; South American doubloons, 73s 6d to 73s 9d per oz; United States gold coin, 76s 2⅜d per oz. Silver—Bar silver, 5s 1 3-16d to 5s 1¼d per oz std; ditto, containing 5 grs gold, 5s 1⅜d per oz std, last price; Mexican dollars, 4s 11⅝d per oz, nominal. Quicksilver, 8*l* per bottle; discount, 3 per cent.

The outgoing steamer with the Bombay mail will take 3,000*l* in gold for Alexandria, and 50,000*l* in gold and 280,000*l* in silver for Bombay,

Railway Dividends.—The half-yearly report of the directors of the West Flanders Railway Company, to be submitted at the meeting on Thursday next, recommends a dividend of 4s per share, payable on the 15th November.

At a meeting of the Recife and San Francisco Railway Company, held on the 24th inst., the report for the half-year ending with June was adopted, and a dividend at the rate of 3 per cent. per annum declared.

The eleventh dividend, being 5 per cent., for the year ending the 1st Sept. last, is announced, as payable on Norwegian Trunk Railway preference shares on the 2d November.

The report af the directors of the Great Indian Peninsular Cailway Company, to be submitted at the half-yearly meeting on the 31st inst., has been published. The net profit for the half-year is stated to be equal to 6 per cent. per annum,

Public Companies.—The general meeting of the Credit Foncier and Mobilier Company of England took place on Tuesday, when the report, an abstract of which has already appeared, was adopted unanimously. The available balance was stated at 180,805*l*, out of which a dividend and bonus were declared at the rate of 40 per cent. per annum, or the same as in the preceding half-year, and 30,000*l* was appropriated to dividend reserve fund, leaving 50,805*l* to be carried forward to next account. It was mentioned that the very large profit realised on this occasion had not been derived from any speculative or extraordinary sources, but from the exercise of regular financial business, and that there was good ground for believing that the present results may continue. A special vote of thanks was passed to Mr A. Grant, M.P., the managing director, for his successful exertions in bringing the company to its existing high state of prosperity.

Encouraged by these high profits the same company propose to issue 100,000 shares of 20*l* each, of which 5*l* per share will be called up by instalments, and on which no further call is contemplated. These 100,000 new shares are to be issued as follows:—

These 100,000 new shares the directors propose to issue as follows, viz., 50,000 shares will be issued to the shareholders in this company who stand registered on the books of the company, to be allotted to them at a premium of 2*l* 10s per share, in the proportion of one new share for every two shares now held; and 50,000 shares will be issued to the general public (including such shareholders as may wish to apply for shares in addition to those they are entitled to as shareholders), to be allotted at a premium of 3*l* 10s per share.

The following will be the position of the company when the issue is completed:—

	£	s	d
The capital paid up will amount to	1,000,000	0	0
The general reserve fund	500,000	0	0
The dividend reserve fund	100,000	0	0
In hand, profits not divided	50,805	4	9
	1,650,805	4	9

Equal to above 8*l* 5s per share on the whole 200,000 shares.

Digitized by Google

At the meeting of the Royal Mail Steampacket Company, held on Wednesday, a dividend for the half year of 4*l* per share out of the ordinary profits, and a bonus of 2*l* from the insurance fund, both free of income tax, were declared.

At the meeting yesterday of Smith, Knight and Co. (Limited), the proceedings were, on the whole, of a satisfactory character. The proposition of the committee of investigation, in favour of the undertaking being liquidated, was generally discountenanced; but no censure was cast upon their motives. The company appears to have commenced operations with too small an amount of capital, and the directors, to avoid pressing the shareholders for calls, have raised money on very severe terms. The failure of the Sardinian Railway Company to meet its financial engagements also operated unfavourably. The ultimate course adopted was to appoint five gentlemen to act as new directors, for whom vacancies are to be created at the board, which will be reduced to ten. It was also resolved to request the largest creditors to nominate a committee of their own body to act with the board as reconstituted in making arrangements with the creditors generally, and that no new contracts be entered into or expenditure incurred beyond that absolutely necessary to carry on present operations.

The Standard Bank of British South Africa held their half-yearly meeting on Tuesday, when the report, recommending the payment of a dividend at the rate of 5 per cent. per anaum, was formally adopted.

At the meeting of the Egyptian Commercial and Trading Company, held on the 24th inst., the directors' report, which was adopted, showed a net profit for the twelve months amounting to 14,701*l*. A dividend of 2s 6d per share, free of income tax, was declared; 1,470*l* added to the reserve; and 2,968*l* carried forward.

The report of the South of England Wagon Company (Limited) has been published in anticipation of the meeting to be held on the 3rd November. A dividend at the rate of 8½ per cent. per annum is recommended.

At a meeting of the Santa Barbara Gold Mining Company, held at Liverpool on the 18th inst., it was unanimously resolved to wind up the undertaking voluntarily.

Formal notice is given that a petition for the winding up of the Tyne Iron Shipbuilding Company (Limited) is to be heard before Vice-Chancellor Wood on the first petition day in Michaelmas term.

The Marine Mansions and General House Investment Company (Limited), capital 100,000*l* in 10,000 shares of 10*l* each, is designed to provide suitable accommodation for visitors to the coast of England at a moderate rate of expenditure. It is intended to combine under one management various boarding-houses and private hotels at attractive sites, and to give a practical effect to the new wine tariff, by giving such wines as are suited to the wants and wishes of the visitors.

The report of the directors of the Queen Insurance Company states that the fire premiums for the year amounted to 115,185*l*, and that the life income was 27,756*l*. It appears, further, that 37 per cent. of the entire net premiums has been added to the life fund.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 3 per mille premium, and the short exchange on London is 25.27½ per 1*l* sterling. On comparing these rates with the English Mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 1-10th per cent. dearer in London than in Paris.

By advices from Hamburg the price of gold is 428 per mark, and the short exchange on London is 13.6⅞ per 1*l* sterling. Standard gold at the English Mint price is, therefore, nearly 1-10th per cent. dearer in London than in Hamburg.

The course of exchange at New York on London for bills at 60 days' sight is 109 to 109½ per cent. At this rate there is scarcely any profit on the importation of gold from the United States.

POST OFFICE ANNOUNCEMENTS.

A postal convention having been concluded with Denmark, which will come into operation on the 1st November next, the following alterations in the rates of postage on correspondence forwarded to Denmark via Belgium and Prussia, or forwarded to Denmark through Sweden or Norway, will take place on and from that date. Letters.—Instead of the present rates of 8d per ½ oz letter to Denmark, 11d to Sweden, and 1s to Norway, with a proportionate increase for greater weights, letters, when prepaid, will be chargeable as follows:—Addressed to Denmark, not exceeding ½ oz in weight, 4d; above ½ oz and not exceeding 1 oz, 8d; above 1 oz and not exceeding 1½ oz, 1s; above 1½ oz and not exceeding 2 ozs, 1s 4d: to Sweden, not exceeding ½ oz in weight, 6d; above ½ oz and not exceeding 1 oz, 1s; above 1 oz and not exceeding 1½ oz, 1s 6d; above 1½ oz and not exceeding 2 ozs, 2s: to Norway, not exceeding ½ oz in weight, 8d; above ½ oz and not exceeding 1 oz, 1s 4d; above 1 oz and not exceeding 1½ oz, 2s; above 1½ oz and not exceeding 2 ozs, 2s 8d; and so on, adding one rate for each additional ½ oz, or fraction of ½ oz. When posted unpaid, letters will be liable to an increased charge on delivery. Registered Letters.—The postage of registered letters must, in all cases, be paid in advance, and, in addition, there must be paid a registration fee of 6d. Newspapers, Book Packets, and Patterns.—Upon every British newspaper, duly registered for transmission abroad, and posted within fifteen days from the date of publication, addressed to Denmark, Sweden, or Norway, postage must be paid in advance, by means of postage stamps, at the following rates:—When not exceeding 4 ozs in weight, 3d; above 4 ozs and not exceeding ½ lb, 6d; adding 6d for each additional ½ lb. Upon book packages addressed to Denmark, Sweden, or Norway, the following rates of postage must be paid in advance by means of postage stamps:—Not exceeding 4 ozs in weight, 4d; above 4 ozs and not exceeding ½ lb, 8d; above ½ lb and not exceeding 1 lb, 1s 4d; above 1 lb and not exceeding 1½ lb, 2s; above 1½ lb and not exceeding 2 lbs, 2s 8d; for every additional ½ lb, 8d.

On the 1st November next, and thenceforward, the combined British and foreign postage upon a prepaid letter addressed to Sweden, and specially directed to be sent via Stralsund, will be reduced from 11d to 9d per half-ounce letter, and the combined postage on a prepaid letter addressed to Norway, and specially directed to be forwarded via Sweden or in the Prussian mail, will be reduced from 1s to 11d per half-ounce letter. Unpaid letters will be charged with an additional rate. All letters, however, for Sweden and Norway, not directed to be sent by any other route, will be forwarded in the mails for Denmark, and will be liable only to the reduced rates set forth in the instruction No. 50 of this day's date. But, in exception to the foregoing arrangement, letters for Gottenburg and Uddewalla will continue to be forwarded, as a rule, by the Swedish mail packets from Hull during that portion of the year in which those packets run.

AVERAGES OF GRAIN.

The following is a statement showing the quantities sold and the average price of British corn (imperial measure) as received from the inspectors and officers of Excise, conformably to the Act of the 27th and 28th Victoria, cap. 87, in the week ended Oct. 21, 1865:—

	Quantities Sold. qrs bush	Average Price. s d
Wheat	78,404 3	42 1
Barley	46,447 2	30 11
Oats	4,665 0	20 11

COMPARATIVE AVERAGES.

The following is a comparative statement, for the corresponding week in each of the years from 1861 to 1864, of the quantities of British corn sold in the towns from which returns are received under the Act of the 27th and 28th Victoria, cap. 87, and of the average prices as ascertained under the Act 5th and 6th Victoria, cap. 14:—

COMMERCIAL EPITOME,

FRIDAY NIGHT

The supply of English wheat on sale at Mark lane to-day was very moderate. The trade for all qualities ruled firm, and the value of good and fine samples had an upward tendency. Foreign wheat, of which there was a tolerably extensive supply on offer was firm in price, but, owing to the limited attendance of buyers in the Exchange, the amount of business transacted was somewhat restricted. Malting barley was in request, and the quotations advanced 1s per quarter. Other descriptions of barley changed hands at full currencies. Oats were in good demand, on rather higher terms. Beans and peas were very firm, and fully previous quotations were obtained. The flour trade was steady, at full currencies. This week's imports consist of 4,610 quarters of wheat, 850 barley, 55,470 oats, and 1,080 sacks of flour.

At Liverpool, this morning, the wheat trade was very firm, and prices advanced 2d to 3d per cental. American flour improved 6d per barrel, and maize 6d per quarter. The market for wheat at Wakefield was very firm at an advance in the quotations of 1s to 2s per quarter.

The Liverpool cotton market has been very quiet throughout the present week, the total sales amounting to 44,000 bales only, of which spinners have taken 15,000 bales, speculators 17,000 bales, and exporters 12,000 bales. Quotations are about 1d to 2d lower than on Friday last. To-day's stock is 303,000 bales. The market has been still suffering under the influence of the large purchases made by spinners a few weeks ago. Yesterday nearly all the cheap parcels offering were withdrawn from the market, which closed with a much firmer feeling and hardening prices. To-day the improved tone of the market has been well maintained. The sales reach 20,000 bales, and prices are ½d to 1d higher than the lowest rate of the week.

Advices from New Orleans are to Oct. 12. The cotton trade at that date was very active, at 52 to 53 cents per lb for middling uplands. The receipts, from Sept. 1 to Sept. 28, had amounted to 67,683 bales, and the exports to 49,786 bales, the stock on hand and on shipboard (not cleared) being 101,136 bales.

From Mobile, we learn that the stock of cotton, Sept. 27, was 53,455 bales. The receipts since the opening of the season had been 55,544 bales, whilst the exports had been 26,379 bales.

From Charleston, we have intelligence to Oct. 5. The exports of cotton since Sept. 8 had reached 9,557 bales, the receipts during that period having been 9,506 bales. The supply on hand, Oct. 5, was 1,921 bales.

The exports of cotton from Savannah, since Sept. 1, have amounted to 23,483 bales upland; 1,422 bales Sea Island; and 2,609 bales domestic. The stock on hand, Oct. 6, was 1,424 bales upland; 24 bales Sea Island; and 103 bales domestic. Ordinary produce was quoted at 33c to 36c; low middling, 37c to 39c; and middling, 40c to 41c per lb.

Advices from Galveston are to Sept. 23. The stock of cotton at that date was 14,766 bales, against 9,367 bales in 1863. The receipts since Sept. 1, including the stock in hand at that date, had been 21,743 bales, whilst the exports had reached 7,967 bales, of which 5,007 bales were to New York, 1,965 New Orleans, 662 Boston, and 333 bales to Great Britain.

"The Secretary of the Treasury," observes the New York *Commercial and Financial Chronicle*, "has issued an order tending to greatly facilitate the delivery of cotton upon the market. It provides that the taxation under the revenue laws may be paid at the port of destination, instead of at the place of shipment. Much inconvenience having been experienced by parties purchasing goods at the South for shipment, on account of the difficulty in providing national currency to pay the revenue taxes, the Secretary of the Treasury has made these regulations to obviate this difficulty. He has also prohibited the seizure of cotton by special Treasury agents on any pretext whatever; only the higher officers of the Government can now make seizures."

Postal advices from Bombay are to Sept. 28. During the fortnight prior to that date, the cotton trade—owing to the excited state of the Liverpool market—had been very active, and a considerable advance took place in prices. Messrs Nicol and Co. observe that "the lateness of the rains this season having rendered the roads in the cotton districts impassable for carts longer than usual, our arrivals of cotton have been very limited. Dhollera has since been coming in very slowly; we look for pretty free arrivals, however, in ten to fourteen days' time. Of Broach, we have been getting small daily supplies by railway, but the quality is far from good, most of the cotton so far being much stained. From the Dharwar districts we hear that the Coompta cotton will be late in coming forward; it is not expected there will be much here for shipment before the end of November. This description has been in great demand in the districts, and the quality is reported good, but we are led to believe that the supply will not be large. There has been a large demand in the Broach districts for cotton; also, many orders which were impracticable here at the limits being sent both there and to Coompta, the consequence of which has been that prices in those districts have advanced almost on a par with those now ruling here. It must be borne in mind that the large business which we note is not likely to have any material effect upon exports for the next two months, as almost all the

Digitized by Google

transactions have been for forward delivery. Almost every description of cotton has been dealt in during the fortnight. Dhollera, however, has been most in demand, and contracts for delivery in one, and one and a half to two months, are reported at 310 rs to 370 rs. Next to Dhollera, Coompta, sawginned Dharwar, and Oomrawuttee Akote have found most favour. Coompta has been sold, for delivery in from one to three months, at from 290 rs to 355 rs; sawginned Dharwar, 335 rs to 390 rs; and Oomrawuttee Akote, 280 rs to 340 rs. Broach has not been much sought after here, and the sales, which are limited, are at from 295 rs to 340 rs. The following are the tables of prices and exports:—

CURRENT PRICES of COTTON at BOMBAY, Sept. 28.

Via the Persian Gulf, we have intelligence from Bombay to Oct. 11. The cotton trade was very active, at further enhanced rates. Dhollera was quoted at 15½d, and Broach at 15¼d per lb, free on board, and freight. Freight to Liverpool, 27s 6d per ton.

At Tinnevelly, the cotton trade on the 25th ult. was quiet at 162½ rupees, but the price had been as high as 165 rupees a short time previously.

From Alexandria, to Oct. 20, we learn that fair open-ginned produce was quoted at 25½d; ditto, for November delivery, 25d; ditto, for December delivery, 24½d per lb, free on board, light canvas. Freight to Liverpool had fallen to ⅝d per lb.

In the markets for colonial and grocery produce, this week, only a moderate business has been transacted. Prices, however, have ruled firm, and exhibit very little change from last week. Tea, sugar, and coffee have been in but moderate consumptive request, at late currencies.

The sugar trade at Havana, during the month ending Oct. 7, was very active, and considerable business had been done for shipment to the United States. In prices an advance took place, the demand being chiefly for middling and inferior qualities, from 8 to 12. The annexed statement of prices and table of shipments is from Messrs Morales and Co.'s circular:—Cucuruchos, Dutch numbers, No. 8 to 10, 24s 6d to 25s 7d; ordinary yellows, 11 to 12, 26s 2d to 26s 9d; middling ditto, 13 to 14, 27s 4d to 27s 10d; fine ditto, 15 to 16, 28s 5d to 29s; florete ditto, 17 to 19, 29s 6d to 31s 10d; ordinary whites, 31s 10d to 31s 10d; middling ditto, 34s 1d to 34s 1d; fine and florete ditto, 36s 4d to 37s 6d; crystallised, 15 to 16, 26s 9d to 27s 10d; ditto, 17 to 20, 29s to 31s 10d; muscovadoes, fair to good refining, at outports, 23s 4d to 24s 6d per cwt, free on board. The stock here and at Matanzas we estimate at about 136,000 boxes, including hhds, against 235,000 and 165,000 boxes at the corresponding periods in 1864 and 1863.

EXPORTS of SUGAR from Havana, Cardenas, and Matanzas, from Jan. 1 to Sept. 30.

To—	1865. boxes.	1865. hhds.	1864. boxes.	1864. hhds.

Total	1,434,085	116,216	1,228,119	93,420

The wool market has been quiet; nevertheless, most qualities of produce have supported previous quotations. Hemp is very firm, clean Russian produce being now worth 35*l* per ton, on the spot. Flax is steady in price, whilst jute commands more money.

Silk is firm, and India, as well as China and Japan qualities, fully support late rates. We learn from China that the market had been quieter, the settlements during the last fortnight having been 1,500 bales. "At the periodical sales held in London, this week, the quantity offered," writes Messrs Durant and Co., "was about 1,800 bales Bengal, 4,000 bales China, 1,000 bales Japan, and 600 bales Canton silk. There were not many biddings, but during the week, since the printing of the catalogues, a fair quantity has been sold at full prices. In the general market the tone is very strong. Importations are upon a more moderate scale, and the quantity upon the market appears small. The arrivals are eagerly watched, and generally bought upon landing. Prices of all classes of Tsatlee, including Haineen, may be quoted 1s higher than in our circular of the 7th instant, so also in certain classes of Taysaam. The deliveries continue upon the improved scale of September. In Bengal silk nothing of moment."

In metals, several changes have taken place. Copper has been raised 5*l*, and tin 3*l* per ton, as far as English qualities are concerned. Foreign descriptions are also dearer. Scotch pig iron is firm, at 58s 6d cash, mixed numbers.

Oils are firmer, linseed oil being worth 36s 6d; foreign refined rape, 51s 6d; fine palm, 45s; and fine Cochin, 51s 6d per cwt. Turpentine, however, is dull, at 44s 6d for French spirits. Petroleum continues to give way in price, the present quotation for American refined qualities being 2s 11d to 2s 11½d per gallon.

In tallow, a very moderate business has been transacted. New P.Y.C., in the course of the week, touched 52s; but is now selling at 51s 6d per cwt, on the spot.

Owing to the advance in the price of cotton here, the market for the raw material, as well as for goods, at New York during the week ending Oct. 14, was very firm, and an important import advance took place in prices. The arrivals of cotton from Southern ports had been on an augmented scale, and considerable business was done for shipment to Great Britain at the improvement in the quotations: the price of middling Upland cotton was 59 cents per lb. Breadstuffs also commanded more attention, and enhanced rates were obtained both for flour and wheat, yet the shipments to Great Britain had, in consequence of the upward movement in prices in this country, been on a more extensive scale. Other articles of food, including provisions, were in but moderate request, yet the quotations ruled firm. There had been an increased demand for money, and rates were firmer, as follows:—Best short-dated commercial paper, 7 to 8; ditto, three to four months, 7 to 9 per cent. The stock of bullion in the banks, Oct. 7, was 2,694,030*l*, and the balance in the Sub-Treasury, 13,979,730*l*. The shipments of specie, from Jan. 1 to Oct. 7, amounted to 4,478,270*l*, against 7,113,310*l* last year; 6,690,420*l* in 1863; 8,711,250*l* in 1862; 656,320*l* in 1861; and 8,008,560*l* in 1860. The import of dry goods, in the week ending Oct. 7, was valued at 456,000*l*, against 147,040*l* last year, and 318,720*l* in 1863.

THE COTTON TRADE.

LIVERPOOL—Oct. 27.

The cotton market this week opened with a fair demand, but since Monday the business has been extremely limited, and with an overabundant supply prices fell considerably; and though yesterday closed with more desire to buy by the trade, as well as exporters and speculators, quotations still show a marked decline from last week. For Sea Island the demand was less active, but former prices are fully sustained. American has been in fair request, but the large supply offering caused a heavy decline, amounting on Wednesday to 2¾d per lb; yesterday holders appeared less anxious to realise, and some recovery took place, but prices closed about 1½d below last week. Brazil has been in moderate demand, and a decline has been submitted to of ¾d to 1d for the lower descriptions of Pernam and Maranham, and 1d to 1½d for Bahia and Maceio. Egyptian has been falling throughout the week, but the reduction at last attracted the attention of buyers, and though prices were very irregular yesterday, the decline was arrested at about 1½d below last week. Smyrna has declined ½d to ¾d per lb. In East India no material change took place early in the week; though holders were free sellers, speculators were willing buyers of any lots offering at ½d per lb decline; but the demand fell off, and prices further gave way 1d per lb, which gave buyers more confidence, but the quotations show an average decline of nearly 1d per lb on the week. China and Japan have been in moderate request at a reduction of ¼d to ½d per lb. The transactions, to arrive, have been limited during the week, at irregular prices, and the last quotations were, yesterday, for American, bales cotton, ship named, middling, 21½d per lb; low middling, 20½d per lb; midding upland, 22d; Egyptian, fair open, new, December or January shipment, 22¾d,

Digitized by Google

23d, and 23½d: Dhollerah, fair, July sailing, 17½d; ship named, 17⅞d; Oomrawuttee, middling fair, ship named, 16½d; fair, 17d; Comptah, fair, ship named, 16d; Bengal, fair, ship named, July shipment and August sailing, 12d per lb.

The sales of the week amount to 44,180 bales, including 17,130 on speculation, and 11,690 declared for export, leaving 15,360 bales to the trade.

N.B.—It is understood that the prices are those fixed yesterday, as usual; subsequently the market became strong, at higher rates, and a considerable business was transacted after the daily circular was made up. To-day the market opens with a greatly reduced quantity offering. The sales will probably reach 15,000 bales, at prices ranging from ¼d to ¾d higher than our quotations.

LONDON—Oct. 27.

The market reopened flatly on Saturday last and has since exhibited a depressed tone, there being yet scarcely any disposition to buy, although prices have given way during the week 1d to 1½d, and the transactions are smaller than for a considerable time past; during the last two days the sales have been almost confined to a few floating parcels.

The sales for the week are as follows:—1,030 bales Tinnevelly, fair 18½d, fully fair 19d, good fair 20d, fair (to-day) 17d; 750 bales Western Madras, fair 18½d to 18¾d, good fair 19½d; 50 bales Salem, fully fair 18¾d; 50 bales Scinde, good fair 14¼d, good 14¾d; 400 bales Bengal, fully fair 13⅝d, good fair 14¼d to 14½d; total, 2,280 bales.

For arrival:—2,220 bales Tinnevelly, September shipment to August sailing, at 17½d to 18½d, guaranteed good fair; 1,110 bales Western, October shipment to June sailing, at 16¾d to 18½d, guaranteed fair, closing at 16¾d for August shipment; 500 bales Bengal, July sailing, at 12½d to 15d, guaranteed fair and equal to sample, and to-day November shipment at 11¼d.

At the weekly auctions there was scarcely any competition, and the long-stapled kinds were only partly sold at 1d to 1½d below the quotations of the previous week; of 266 bales West India the greater part was bought in at 20d to 36d, about 20 bales being sold at 21½d to 28d, 22 bales on the seed sold at 4d to 6d, 67 bales Venezuela sold at 23d; of 12 bales Mazagan 8 bales sold at 21d; 73 bales Australian were chiefly bought in at 24d, 13 bales sold at 21½d to 22d, and fine at 40d; of 162 bales Bengal 50 bales sold at 9½d to 11¾d, of 105 bales Madras 24 bales sold at 12d to 16¼d, 20 bales Surat bought in at 15d to 18¾d, making a total of 200 bales sold, of 703 bales offered.

NEW YORK—Oct. 14.

The heavy advance in Liverpool caused an advance of six to eight cents per lb, which has been well supported, with a general demand, notwithstanding that the deliveries at this market are largely increased. There is still a considerable margin for export, and shipments have been on a very large scale, both by packet and steamer. To-day's market was very firm, but less active, owing to the difficulty of making deliveries. The following are the quotations:—

New York Classification.	Upland.	Florida.	Mobile.	New Orleans and Texas.
	c	c	c	c

Hamburg	120
Bremen	51
Total for the week	10,672
Previously reported	46,666
Total since July 1	57,338

MARKETS IN THE MANUFACTURING DISTRICTS.

Cotton goods have been only in moderate request; nevertheless, prices were well supported. The stocks have certainly not increased. Most other branches of trade have shown an improvement. Iron and coals have continued active, and, in some instances, the quotations have had an upward tendency.

MANCHESTER, Oct. 26.—After the dulness of last week, yarns have become almost generally weaker, to the extent of 1d or 2d per lb, with a very limited business. In cloth, the absence of remunerative prices keeps manufacturers comparatively firm, but nevertheless they are running out of orders in many cases, and cannot find buyers even at some reduction. Consequently, the extension of manufacturing, which has been in rapid progress for some weeks, has changed to a visible diminution. Confidence in high rates has, for the present at least, received a check.

BRADFORD.—Spinners are now well supplied with wool, so that there is no necessity for buying. Holders have great confidence in prices, and hold to them with remarkable firmness. There is some little demand for lustre yarns, but 30s weft are flat, and to

Digitized by Google

be bought easier. Pieces.—There is a great absence of fresh orders, especially in plain goods, an increased demand for mohairs being the only exception to the general quietness.

LEEDS.—The market was steady as to prices, and the reports from the manufacturers and country clothiers show that they keep well employed, many of them having good orders for spring fabrics on hand. The export houses are doing a full average business for the season of the year. Wools command last week's prices.

LEICESTER.—The hosiery trade has been active. Goods usually in demand at this time of year sell readily, and the manufacturers are well engaged at the warehouses with orders on hand. Worsted yarns are in firm demand at high prices, and spinners continue well engaged. Cotton yarns are extremely firm. There is no important change in wools.

NOTTINGHAM.—There has been a fair amount of business doing in some classes of cotton goods. Mechlin qualities are finishing both for the home and foreign markets. The hosiery trade remains in a satisfactory state. Most kinds of goods keep well in demand. There are plenty of orders for shipping, and the home trade is in a healthy state. Yarns are very firm at extreme rates.

ROCHDALE.—For fine and fancy flannels there is a much better inquiry, although at the worst these departments have been better favoured than many others. Now, however, the qualities and styles of flannels used so much for shirtings are beginning to occupy chiefly the attention of the London and provincial houses.

CARDIFF.—For steam coal the export inquiry continues moderately buoyant, and the collieries in the Aberdare and Merthyr valleys are, as a rule, in pretty regular employ. Coasting buyers continue to purchase largely of house coals, and the local and inland sale, which has been so long depressed, is gradually improving. For coke and patent fuel the demand remains without change.

BIRMINGHAM.—Both factors and merchants report favourably of the prospects of trade. With regard to the former, business has been much more active of late, and the orders they are giving out are beyond the average of the last two or three years. In the foreign department a good amount is being done.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Oct. 14.—The market has been feverish and unsettled. The advance on Liverpool had the effect to bring from the West a considerable renewal of speculative orders, by which the downward tendency early in the week has been checked, and some advance established in flour and wheat. The receipts at the Western markets are on a vastly increased scale, and there is now not the slightest danger of any deficiency except in the finer qualities of winter wheats, but it is quite certain that the navigation will close upon us, with very deficient stocks of wheat. The following are closing quotations:—Flour—Superfine State and Western, $8 to $8.80; extra State, $8.60 to $9; Shipping roundhoop Ohio, $9.10 to $9.80; extra Western, common to good, $8.75 to $11.75; double extra Western and St Louis, $12 to $16; Southern, supers, $9.50 to $11.65; Southern, fancy and extra, $11.75 to $15.50; Canada, common to choice extra, $8.60 to $12.50 per barrel. Wheat—Chicago Spring, $1.75 to $1.80; Milwaukee Club, $1.77 to $1.82; red Winter, $2.20 to $2.30; amber Michigan, &c., $2.38 to $2.40. Corn—Western mixed, 80c per bushel.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The arrivals of English wheat up to our market, this week, having been very moderate, and in but middling condition, the demand for good dry samples has been steady, at an advance in the quotations of 1s per quarter. Inferior qualities have moved off slowly, but at full prices. The show of foreign wheat has been by no means extensive, and sales have progressed steadily at 1s per quarter above previous rates. Malting barley has produced quite as much money as of late, and other qualities have ruled steady in price. There has been a good demand for malt at extreme currencies. The supply has continued seasonably extensive. Although good supplies of oats have been brought forward, the oat trade has been steady, at 6d per quarter advance. Both beans and peas have tended upwards, owing to the limited quantities of English brought forward. The flour trade has been in a healthy state. In prices, however, no change has taken place. Most of the country markets have been scantily supplied with wheat, which has changed hands freely, at 1s per quarter advance. All kinds of spring corn have moved off freely at extreme rates to a slight improvement in value.

The heavy rains of the present week have partially stopped outdoor farm labours.

Throughout the continent, wheat is gradually tending upwards, and most descriptions of spring corn have sold at extreme quotations. The transactions on English account have been on the increase. American letters state that both wheat and flour are still too high to admit of profitable shipments to England.

In Scotland, the corn trade generally has been tolerably active, on rather higher terms.

The Irish markets have been steady, at enhanced rates for fine wheat, barley, and oats.

At Mark lane, to-day, the attendance of buyers was limited. English wheat was in short supply, and the trade ruled firm, with an upward tendency in price, as regards good and fine dry qualities. In foreign wheat only a moderate business was transacted, but at fully late rates. Malting barley was in request at an advance in price of 1s per quarter. Grinding and distilling qualities ruled firm at full quotations. Oats were in good supply and steady request, on rather higher higher terms. Beans and peas changed hands at fully late rates. For flour there was a fair demand, at full currencies.

In reference to the state of the floating trade, Mr George Dornbusch reports as follows:—Arrivals at ports of call since last Friday, only 3 cargoes, viz., 1 maize, 1 barley, and 1 beans. The tone of the trade has been very firm, with an upward tendency in prices. Wheat has again advanced 1s to 2s upon last week's extreme rates. Sales:—Wheat—9 arrived cargoes sold, Ghirka Odessa at 42s to 43s; Nicolaieff, 42s and 42s 8d; Taganrog, 42s 6d per 492 lbs; and Enos, 38s per 480 lbs; Ghirka Odessa, on passage, shipped or to be shipped, and to be shipped, about 40,000 qrs, at 43s to 44s 9d per 492 lbs: Sandomirca, on passage, 44s per 480 lbs; Nicolaieff, on passage, and shipping, about 8,000 qrs, 42s 6d to 44s 6d per 492 lbs; Ghirka Taganrog, about 15,000 qrs, 43s to 43s 6d per 492 lbs; and Banat, from Trieste, about 32,900 qrs, at 43s to 44s 6d per 492 lbs. Maize, 1s to 1s 6d dearer. 7 arrived cargoes sold; Odessa, 30s 9d; Galatz, 30s 3d per 492 lbs; Bulgarian and Ibrail, 28s (partially imperfect) to 31s per 480 lbs; Galatz, shipping, shipped, or to be shipped, about 16,000 qrs, at 31s to 31s 6d per 492 lbs; and Ibrail, about 10,009 qrs, at 29s per 480 lbs. Barley—Nicolaieff, on passage, 22s per 400 lbs. Beans—1 arrived cargo from Mazagan, about 37s; and Casabianca, on passage, 37s 3d per 480 lbs. Linseed—On passago, Azoff, from Taganrog, 60s per 424 lbs, L.A.T.; Neapolitan, 59s per 410 lbs; and East Indian, from Calcutta, 62s per 410 lbs, L.A.T.; Danubian, shipping or shipped, 61s 6d per 424 lbs, L.A.T.; Moorshank, shipping, 56s 6d per imperial qr; and Black Sea from Nicolaieff, 60s 1½d per 424 lbs, L.A.T.; Azoff, shipped or to be shipped, 60s 9d per 424 lbs; and East Indian, from Calcutta, 63s per 410 lbs, L.A.T. Cotton-seed—1 arrived cargo of Egyptian, from Alexandria, 7*l* 2s 6d, and shipped or to be shipped, 7*l* 7s 6d per ton. [Correction.—In last week's report, through a typographical error, the price of wheat was represented as being 1s to 2s lower, instead of being 1s to 2s dearer.]

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

MINCING LANE, FRIDAY MORNING.

The colonial markets were closed to-day, owing to the funeral of the late Premier.

Sugar.—A more quiet tone prevails, but prices remain steady. 1,813 casks West India have sold, including Barbadoes at 35s to 41s; Jamaica, 35s to 37s 6d per cwt. The public sales have been smaller than usual, and nothing reported in floating cargoes. Low sugars are less in demand than of late. The week's delivery was 4,985 tons, making an increase of 46,730 tons since the beginning of the year. Present stock, 90,210 tons against 121,040 tons in 1864 at the same time.

Mauritius.—2,575 bags by auction sold on previous terms: soft yellow, 36s; crystallised, 39s 6d to 40s 6d; white, 11s 8d duty, 43s 6d per cwt. Some business is reported privately in brown descriptions.

Manilla.—A parcel unclayed is reported at 30s 6d per cwt.

Other Foreign.—209 casks Guadaloupe offered by auction were taken in at 33s 6d to 36s for muscovado sorts: a portion since sold. 202 casks 61 barrels Porto Rico chiefly met with buyers at 37s 6d to 43s 6d for low yellow to fine grocery. The transactions by private contract are upon a very limited scale. 300 casks Porto Rico have sold.

Refined.—The market is steady, previous rates being maintained.

Melado.—240 casks Cuba have sold at 28s 6d per cwt.

Rum.—A few sales have been effected in West India at previous rates.

Cocoa.—The demand for Grenada continues, and the small quantity offered has sold at higher rates: 172 bags brought 59s to 76s 6d. 50 bags Trinidad chiefly sold at 65s to 70s 6d per cwt.

Coffee.—There has been a good business done in native Ceylon, at prices not previously obtainable. Good ordinary, in casks, 65s 6d to 66s. 695 casks 196 barrels and bags plantation obtained steady prices generally: pale small to good, 77s to 84s; good to fine, 85s to 91s; several parcels privately. 372 bags Singapore Java sort sold at 68s. 312 bales Mocha found buyers at 93s to 95s for long and short berry. 105 casks 237 cases 365 bags Neilgherry sold at 72s 6d to 87s. 190 barrels and bags Jamaica sold at previous rates for the lower qualities. 207 casks 198 bags Porto Rico were taken in at 73s 6d to 80s per cwt.

Tea.—Further sales of new season's congou have been effected, and the supply in importers' hands is exhausted. Red leaf congous now attract more attention, and green teas are still much wanted. 770 packages Indian growths offered by auction on Tuesday went off at previous rates for the better sorts.

Rice.—Considerable business has been done in soft grain descriptions, and the market is rather dearer. Prices do not transpire. A floating cargo of Bassein has sold at 12s. 100 tons yellow Bengal, to arrive, at 12s 6d per cwt, without guarantee of quality.

Imports and Deliveries of Rice to Oct. 21, with Stocks on hand.

	1865.	1864	1863	1862.
Imports ....tons	35950	47700	42050	82100
Deliveries	51350	60450	65100	52800
Stock	26030	33100	41000	59200

Sago.—1,094 cases partly sold at previous rates, from 20s to 21s 6d per cwt.

Spice.—The quotations of Zanzibar cloves are slightly higher, 572 bags, &c., selling at 3d to 3¼d. Pimento is less inquired after than of late. 384 bags were mostly taken in at 2⅝d to 3⅜d. 1,498 bags Singapore black pepper were chiefly sold at 3¼d to 3⅜d. 571 bags Singapore white sold at 5⅜d to 5⅝d. 10 cases mace partly sold at 1s 6d to 2s per lb. 127 bags African ginger sold at 37s to 39s, being dearer. 174 bags Bengal at 26s 6d 289 barrels Jamaica sold steadily at 64s to 106s. 59 cases Cochin at 66s to 116s per cwt.

Saltpetre.—Some business has been done in Bengal privately: refraction 7¾ to 6¾, at 24s 6d to 24s 9d. 1,980 bags by auction were taken in above the value.

Imports and Deliveries of Saltpetre to Oct. 21, with Stocks on hand.

	1865	1864	1863	1862

Gambier.—Sales have been made at 20s 6d to 20s 9d. Cubes, 27s 6d to 27s 9d per cwt. The former prices were slightly cheaper.

Cochineal.—The unusually large quantity brought to auction on Wednesday went off better than anticipated, and 1,623 bags about three-fourths sold: Honduras silver, 2s to 3s 5d for low and pasty to good dry grain. Teneriffe silver, 3s 3d to 3s 5d; black, 3s 5d to 3s 10d per lb.

Imports and Deliveries of Cochineal to Oct. 21, with Stocks on hand.

	1865	1864	1863	1862
Imports ....serons, &c.	1800	12180	16600	12450
Deliveries	13550	13170	17810	15750
Stocks	4350	6500	7550	8590

Metals.—Several kinds have improved in value; but the week's transactions have not been extensive. The smelters have raised the price of English copper 5*l* per ton. Tin is 3*l* dearer for British, and Straits has commanded an advance, selling at 92*l* 10s to 94*l* on the spot, and 95*l* to 96*l* to arrive. Scotch pig iron rose to 59s 3d per ton mixed numbers, and since receded to 58s 6d. Spelter is firm, although not very active. Present quotation, 21*l* 10s on the spot.

Jute.—A large quantity has sold during the week, on the spot and to arrive, at higher prices. The advance for the week is 1*l* 10s, or in some cases even 2*l*. 4,157 bales offered by auction on Wednesday went at 16*l* 5s to 25*l* 15s per ton.

Hemp.—Russian has further advanced. Petersburg clean, 35*l*. The high prices demanded for Manilla have checked further transactions of magnitude. Sorsogon has sold at 44*l* 15s to 45*l* per ton.

Oils.—Linseed has advanced to 36*l* 10s on the spot, but is now rather quiet. Rape is dearer, and some contracts have been made in foreign brown for forward delivery. Cocoa-nut active, with several large sales during the week. Palm firm, in the proportion of 45s per cwt for fine Lagos.

Tallow.—The market advanced since last week, but on Wednesday the price of foreign suddenly fell quite 1s to 1s 3d for forward deliveries, owing to the influence of speculative operations. The market is now quiet. First sort Petersburg Y.C. on the spot, 51s 6d; January to March, 52s; March only, 53s per cwt.

Particulars of Tallow.—Monday, October 23, 1865.

ADDITIONAL NOTICES.

Refined Sugar.—The home market for refined sugar has been moderately supported this week: prices rather in favour of the buyers. Dutch crushed remains firm, without any transactions this week.

Dry Fruit.—The market for fruit continues firm, and all fine descriptions are improved in value. Ordinary to common currants and raisins are a little in favour of buyers, but even for these sorts prices rule high. Supplies are moderate, and deliveries good.

Leather and Hides.—A good demand has been maintained for leather during the past week, in which almost all articles have participated. Prices, however, continue unaltered. At Leadenhall, on Tuesday, there was a small supply of leather, particularly of good crop hides, bellies, common dressing hides, calf skins of light weights, kips, and horse hides.

Metals.—We have had a steady business in metals all the week, with some improvements in prices. Copper advanced a further 5*l* per ton on Tuesday, which has checked somewhat the active speculative demand. Iron is in good request. Tin having stiffened for some days, was advanced in price 3*l* per ton on English yesterday. Lead is well maintained at quotations. Spelter is rather quiet, without material variation in price. Tin plates are very firm.

Tallow.—Official market letter issued this evening:—

	s	d
Town tallow	54	3
Fat by ditto	2	8
Yellow Russia	51	0
Melted stuff	41	6
Rough ditto	23	0
Greaves	20	0
Good dregs	6	0

METROPOLITAN CATTLE MARKET.

Thursday, Oct. 26—Our market, to-day, was but moderately supplied with beasts in middling condition. Prime breeds were in fair request, at full prices. Otherwise, the trade was in a sluggish state on former terms. The show of sheep was rather limited. Downs and half-breds commanded extreme rates; but long-woolled sheep were a dull inquiry, at Monday's currency. The top figure was 6s 8d per 8 lbs. Prime small porkers were firm in price; but large pigs were very dull. In milch cows very little was doing.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d

POTATO MARKETS.

Borough and Spitalfields, Friday, Oct. 27.—These markets are well supplied with potatoes. Most descriptions are in fair demand, and prices rule firm. Kent and Essex Regents, 60s to 90s; Yorkshire, ditto, 60s to 80s; Flukes, 70s to 100s; rocks, 40s to 60s per ton.

COAL MARKET.

Friday, Oct. 23.—Wallsend Hetton, 23s 6d—South Hetton, 23s 6d—Hartlepool, 23s 3d—East Hartlepool, 23s 3d—Acorn Close, 22s 9d—Braddyll's Hetton, 23s—Caradoc, 23s—Eden, 22s 9d—Heugh Hall, 22s 9d—Eden Main, 22s 6d—Russell's Hetton, 22s 9d—South Kelloe, 22s 9d—Wharncliffe, 23s 6d—Bates West Hartley, 18s 6d—Lamberts' West Hartley, 19s 6d—Walker Primrose, 15s 6d—West Wylam, 18s 3d. Ships at market, 83; sold, 22; gas contracts, 43—65; unsold, 18; ships at sea, 55.

Digitized by Google

HOP MARKET.

FRIDAY, Oct. 27.—The trade for good and fine hops continues firm, at fully late rates. The supply of inferior produce is large, and sales in such qualities progress slowly, at barely previous quotations. New Mid and East Kents, 160s to 195s; Weald of Kents, 80s to 120s; Sussex, 70s to 120s; yearlings, 90s 105s per cwt.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Oct. 27.—The East India wool sales have proceeded with great steadiness, and prices have, if anything, advanced during their progress. The miscellaneous kinds will be brought forward during the coming week, from the 1st to 3rd November, and the quantity declared amounts to 15,300 bales.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Oct. 27.—Full attendance. Wheat sells at 2d to 3d per cental over Tuesday's prices. Flour 1s higher. American maize advanced 6d per quarter, with a good demand.

The Gazette.

TUESDAY, Oct. 24.

BANKRUPTCY ANNULLED.

B. W. Saunders, Dorset street, Clapham road, brewer.

BANKRUPTS.

EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic receipts of railways in the United Kingdom amounted for the week ending the 14th of October, on 12,299 miles, to 715,361*l*, and for the corresponding week of last year, on 11,874 miles, to 679,874*l*, showing an increase of 425 miles, and of 35,877*l*. The gross receipts on the 14 principal railways amounted in the aggregate, on 8,808 miles, to 595,409*l*, and for the corresponding week of 1864, on 8,474 miles, to 569,268*l*, showing an increase of 334 miles and an increase of 26,141*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, Oct 23.—In the share market to-day Canadian and American securities were again lower, especially the former. In miscellaneous shares there were also some instances of weakness; but the other descriptions closed with a firm tendency, particularly English railways, of which Great Western recovered ¼, and Blackwall advanced 2, Manchester, Sheffield, &c., and Midland ½ each, North-Eastern (Berwick) ¼, Lancashire and Yorkshire a further ½, and Scottish North-Eastern (Aberdeen) and South-Eastern a further 1 each. In colonial, Great Western of Canada (shares of both descriptions) recovered ¼ each, Madras (4¾ and 4½ per cents.) improved 1 each, and Bombay and Central India and East Indian ½ each; Atlantic and St Lawrance declined 1, Buffalo and Lake Huron ⅛, and all the several kinds of Grand Trunk of Canada preference (except the 3d deferred) an average of further 1½ each. In foreign, Lombardo-Venetian recovered ⅛, Pernambuco improved ½, and Sambre and Meuse a further ⅛; Great Luxembourg relapsed ⅜, and Dutch Rhenish receded ¾. In American, Erie shares (paid up) further declined 1. In mines, Cobre Copper advanced 1, Frontino Gold ¼, and Washoe Gold (of both descriptions) a further ½ each.

TUESDAY, Oct. 24.—In the share market to-day dulness was the prevailing feature, and home and American securities were rather disposed to flatness, but the other descriptions, including miscellaneous, showed average steadiness. In English railways, Midland improved further ¾, and ditto (Birmingham and Derby) 1; Great Western and Lancashire and Yorkshire relapsed ¼ each, and South-Eastern ½; Great Eastern (East Anglian) declined ⅛, North-Western ¼, and Metropolitan ¾; and Metropolitan District were unaltered, at 102 to 104. In colonial, Grand Trunk of Canada and Great Indian Peninsula improved ½ each, and Great Western of Canada shares (of both descriptions) a further ¼ each. In foreign, Bahia and San Paulo improved ½ each, Namur and Liege ⅛, and Pernambuco a further ½; Lombardo-Venetian relapsed ⅛, and Ottoman receded ½. In British mines, Great Wheal Vor improved ½, Wheal Seton declined 2½, and Grenville, East Grenville, Great South Tolgus, North Wheal Bassett, North Wheal Crofty, and South Condurrow ¼.

WEDNESDAY, Oct. 26.—In the share market to-day dulness very generally prevailed, and all the descriptions closed with a tendency to flatness, which, however, chiefly affected American securities and English railways, of which latter descriptions Midland relapsed ¾, Great Northern (A stock) declined 1½, Chatham, 1, North Staffordshire ½, South-Eastern and Metropolitan a further ¼ each; ditto (Oxford) advanced 1½, and Metropolitan (new) ¼; and Metropolitan District remain at 102 to 104. In colonial, Grand Trunk of Canada relapsed ½, and Great Western of Canada (new) ½; and Punjaub declined ½. In British mines, Great Wheal Vor further improved ½, and East Caradon and Great Laxey declined ½ each, and North Wheal Crofty a further ¼.

THURSDAY, Oct. 26.—In the share market to-day a very small amount of business was transacted, and the closing prices of most of the descriptions showed an inclination to flatness, the exceptions being English and colonial railways, which were steady, and miscellaneous shares, in which the changes in both directions nearly balanced each other. Of the English lines, Metropolitan recovered ¼, Midland further declined ¼, and Metropolitan District (paid up) are unaltered at 102 to 104. In British mines, East Wheal Russell and Great Wheal Busy improved ¼ each; and East Bassett declined 2, and Wheal Buller 2½. In foreign mines, Cobre Copper recovered 1, Kapunda improved ⅛, Washoe Gold (of both descriptions) relapsed ½ each, and St John del Rey declined 1.

FRIDAY, Oct. 27.—The Stock Exchange having been closed to-day, no business was transacted in the railway share market.

ARMY CONTRACTS.—

Tenders will be received at the undermentioned office until 12 o'clock noon on the 4th November, for the supply of BREAD and MEAT for the use of Her Majesty's Land Forces stationed in the following places, from 1st December, 1865, to 31st May, 1866.

LONDON DISTRICT.

1. Chelsea Barracks—for all the troops in London, the Tower excepted.
2. The Tower.
3. Hounslow and Kneller Hall.
4. Hampton Court.
5. Windsor.
6. Brighton, with Coast Forts from Newhaven to Shoreham.
7. Sandhurst.
8. Guernsey.
9. Jersey.
10. Alderney.

Separate Tenders for Bread and for Meat must be made for each of the above-mentioned stations or barracks, as separately grouped and numbered.

Forms of Tender and conditions of contract may be obtained on application at this office, by letter addressed to the Senior Commissariat officer, or in person, between the hours of 10 and 4 o'clock.

Tenders on the printed forms must be properly filled up and signed, and no tender will be noticed unless delivered at the undermentioned office, under closed envelope (marked "Tender" on the outside), before 12 o'clock noon on the 4th November next.

Commissariat Office, 5 New street, Spring gardens, London, S.W., 21st October, 1865.

NOTICE.

GENERAL DEBT OF THE OTTOMAN EMPIRE.

CONVERSION OF THE OLD INTERNAL DEBTS.

The public are hereby informed, that the period during which Consolidés and other bonds of the Turkish Internal Debt are received for examination, verification, and conversion into the 5 per cent. General Debt of the Ottoman Empire expires on 14th November, after which date the conversion can only be effected at a reduction of ten per cent. in the terms of exchange for six weeks further.

The terms of exchange are at present as follows for Consolides of the 1st, 2nd, 3rd, and 4th issues:—

For 100 Medjidies of Eshami Djedide, or Consolides, bearing 6 per cent. interest, } there will be given in exchange } 121 Medjidies, or £110 sterling of bonds of the General Debt bearing 5 per cent. interest.

100 at 6 per cent.=6 | 121 at 5 per cent.=6.05

The following are the terms for the other Internal Stocks:—

For 100 Medjidies Tahviiate Mumtaze, } there will be given in exchange } £120 sterling 5 per cent. General Debt.

For 11,000 piastres Serghis de dix ans, } there will be given in exchange } £100 sterling 5 per cent. General Debt.

The Bonds of the General Debt will be of the following denomination:—

110 Medjidies, or £100 sterling.
55 Medjidies, or 50 —
11 Medjidies, or 10 —

Intending depositors can obtain prospectuses laws, and list forms at the Commissariat, which is open from Monday to Friday inclusive, between the hours of 11 and 2.

For the General Credit and Finance Company of London (Limited), Agents for the Contractors,

JAMES MACDONALD, General Manager.

Commissariat Imperial Ottoman, 27 Austinfriars, October, 1865.

IMPORTANT ANNOUNCEMENT.—

JOSEPH GILLOTT, METALLIC PEN MAKER to the QUEEN, begs to inform the commercial world, scholastic institutions, and the public generally, that by a novel application of his unrivalled machinery for making steel pens, he has introduced a new series of his useful productions, which, for the excellence of temper quality of material, and, above all, cheapness in price, must ensure universal approbation and defy competition

Each pen bears the impress of his name as a guarantee of quality; they are put up in boxes containing one gross each, with lable outside, and the fac-simile of his signature.

At the request of numerous persons engaged in tuition, J. G. has introduced his warranted school and public pens, which are especially adapted to their use, being of different degrees of flexibility, and with fine, medium, and broad points, suitable for the various kinds of writing taught in schools.

Sold retail by all stationers and booksellers. Merchants and wholesale dealers can be supplied at the works, Graham street, Birmingham; at 91 John street, New York; and at 37 Gracechurch street, London.

H. J. AND D. NICOLL, TAILORS

to the Queen, Royal Family, and Courts of Europe.—For GENTLEMEN, the FASHIONS for the SEASON, for the promenade or demi dress—Superfine frock coats, with rich silk breast facings, or morning coats of superfine Melton cloths, the charge for the former being 3½ to 4½ guineas; for the latter. 2½ to 3½ guineas. For negligé purposes, morning coats with pocket flaps at the waist, also the negligé jackets; these are of Melton, fancy coatings, Angola and Cheviots, the prices from 25s to 4 guineas. The Angolas and Cheviots are also made in suits, at prices from 2 to 4 guineas; evening dress, black cloth of the finest quality. For overcoats—Melton, Beaver, and Witney cloths, from 2 to 8 guineas. For young gentlemen from eight years of age—The morning coat and negligé jacket; also suits of Angola and Cheviot, the prices according to size, commencing at 31s 6d the suit. For boys from four years of age—The knickerbocker and Highland costume of black velvet, or fine cloth for dress, and of Angola and Cheviots for morning, the price of the first size knickerbocker, 1 guinea the suit. For overcoats—Melton, Beaver, and Witney cloths, from 1 to 2 guineas each. Foreigners and visitors to London, Manchester, and Liverpool, will find at Messrs Nicolls', garments ready for immediate use, or made to order at a few hours' notice.—H. J. and D. Nicoll, 114, 116, 118, 120 Regent street; 22 Cornhill, London; 10 Mosley street, Manchester; and 50 Bold street, Liverpool.

ANNING and COBB, Brokers, 11 Lime Street.

COFFEE ESTATES FOR SALE,

comprising about 1,370 acres of Plantation, nearly the whole of which is in full bearing, and very extensive tracts of Jungle, Forest, and Grazing Land, estimated to comprise several thousand acres.

To be Sold by Auction, unless previously disposed of by private contract, at Bombay, early in the month of January, 1866, subject to the conditions to be then and there produced, to be first offered in the entirety, and if not sold, in the following eight lots:—

Lot 1.—All that very valuable Estate called "LACKADIE,"

Situate at the head of the Tamboocherry Ghat, about 30 miles from Calicut, comprising about 250 acres, more or less, of coffee in full bearing. Also, a large tract of rich forest and grazing lands.

The estate is well supplied with permanent buildings, and the most approved machinery, including a first-class water-wheel, is thoroughly roaded and well laid out.

Lot 2.—THE CULLOOR ESTATE,

Situate about 2½ miles from the head of the Tamboocherry Ghat, and connected therewith by a good road, comprising about 290 acres, more or less, of coffee in full bearing, a large and very rich forest and grazing lands.

The estate is well furnished with permanent buildings, and the most approved machinery, driven by water power, for curing the crops.

The habit of the plant on this estate is most luxuriant, and its bearing capacity of the highest order.

The crops of the estate may be safely estimated at 10 cwt an acre.

Lot 3.—THE CHARLOTTE ESTATE,

Is a young and very promising property, cut out of the Harnooth Valley, is distant about 4½ miles from the head of the new Tamboocherry Ghat, and is connected therewith by a good road. The estate contains about 150 acres, most of which is in bearing, and possesses excellent permanent buildings.

Lot 4.—THE ANNETTE ESTATE,

Is bounded by the Culloor and Harnooth, and comprising about 240 acres in full bearing, a large tract of unopened forest, and some grass lands, and is furnished with all requisite buildings and machinery.

Lot 5.—THE ADELAIDE ESTATE,

Comprising about 180 acres of coffee, in full bearing, and sundry swamps and grazing lands.

This estate is well furnished with permanent buildings of all kinds of the best description, and is amply supplied with the best machinery and working plant.

It is opened on the most productive description of soil in the Wynaad, and is in all points second to no estate yet opened in the Wynaad district.

The first opening was made in 1857, and the last in 1859, so that it is just acquiring its fullest bearing capacity.

The crop of 1864 was 110 tons, and the crop now on the trees is estimated at 130 tons.

Lot 6.—THE FIELD ESTATE,

Comprising about 150 acres of coffee in the most luxuriant and promising state of growth, is well supplied with permanent buildings, machinery, and working plant; is well roaded, and otherwise well laid out. The estate is formed on the same description of soil as the Adelaide, has been well managed, and will become a very productive property.

Lot 7.—THE WALLACE ESTATE,

Opened in 1859, comprising about 150 acres of Coffee, in full bearing, and a large stretch of Jungle, Forest, and Bamboo and Grazing Lands. It is well roaded and well laid out, and possesses a first-class bungalow and other permanent buildings; also, in conjunction with the Field Estate, the most approved machinery and buildings for curing the crops.

Lot 8.—TWO UNCULTIVATED JUNGLES,

Called "Palakonda" and "Muddikah Mullil," of fine forest land, and in the vicinity of the above estates.

For particulars, and to view the estate, apply in London to Messrs Hughes, Masterman, and Hughes, solicitors, 17 Bucklersbury, and to Messrs Flux and Argles, solicitors, 1 East India Avenue; and in Bombay to Messrs Kelly, Hore and Manisty, and to Mr James Bowsey, on the Adelaide Estate.

JURY AWARDS.—DUBLIN

EXHIBITION.—PRIZE MEDAL to BROWN and GREEN for "A Close Range with an Open Chimney." No Smoky Chimneys—no close heat or smell.

Frederick Thomas, 72 Bishopsgate.

FREDERICK THOMAS'S BATH.

Honourable Mention awarded at the Dublin International Exhibition. Bath-rooms fitted up in the best manner. Designs and estimates on application.

Frederick Thomas, 72 Bishopsgate within.

A CLOSE RANGE WITH AN OPEN CHIMNEY.

—The new patent cures smoky chimneys, and avoids all close heat or smell in or from the kitchen. Prospectus post free.

Frederick Thomas, 72 Bishopsgate.

NATIONAL BANK OF SCOTLAND
(Established 1825.)
Incorporated by Royal Charter 1831.
An OFFICE of the Bank has been OPENED at No. 21 FINCH LANE, E.C.
W. J. DUNCAN, Manager.
July 8, 1865. JAMES MILLN, Agent.

ENGLISH, SCOTTISH, AND AUSTRALIAN CHARTERED BANK.
Capital paid up, 600,000*l.*
LETTERS OF CREDIT ON THE BRANCHES at
ADELAIDE,
MELBOURNE, and
SYDNEY,
are GRANTED on the most favourable terms. Bills on the Australian Colonies negotiated and sent for collection. DEPOSITS received at rates and for periods which may be learned on inquiry at the office.—By order of the Court. HENRY MOULES, Secretary.
73 Cornhill, E.C.

THE IMPERIAL OTTOMAN BANK,
CONSTANTINOPLE.
(Capital £2,700,000, paid-up £1,350,000)
Branches at Smyrna Beyrout, and Salonica, and Agencies at Galatz, Bucharest, Larnaca (Cyprus), Paris, and London.

The London Agency receives money on deposit for fixed periods at rates to be agreed upon. It grants credits on Constantinople, Smyrna, Beyrout, Salonica, Galatz, Bucharest, and Larnaca; purchases or collects bills drawn on those places, and undertakes the negotiation of all Turkish Government Securities and the collection of the coupons.

The London Agency will also execute orders through the Branches of the Imperial Ottoman Bank at Salonica and Smyrna for the purchase of produce, such as Cotton, Wool, Silk, Madder roots, Valonea, Opium, Grain, &c.
Terms may be ascertained on application at the offices of the London Agency, No. 4 Bank buildings, Lothbury.
R. A. BRENAN, Manager.

COMMERCIAL BANK
CORPORATION of INDIA and the EAST.
Incorporated by Royal Charter.
Capital £1,000,000 (one million sterling), with power to increase to £2,000,000.
Head Office, 64 Moorgate street, London, E.C.

Branches and Agencies at Bombay, Calcutta, Foochow, Hankow, Hong Kong, Shanghae, Singapore, and Yokohama.

The Bank negotiates and collects bills and grants drafts on its branches and agencies as above. It acts as the agent of parties connected with the East in transmitting funds, and in making investments in Indian and other public securities, effecting also the sale thereof either at home or abroad. It undertakes their safe custody and the receipt of interest or dividends thereon, and receives pay, pensions, and other moneys for remittance through the Bank or otherwise.

The Bank also receives money on deposit at rates of interest proportioned to the length of the notice of withdrawal agreed to be given, the terms of which may be ascertained on inquiry.
Office hours 10 to 4 Saturdays 10 to 2.

BANK OF NEW ZEALAND.

No. 52 Threadneedle street, London E.C.

DEBENTURES OF THE LAND MORTGAGE BANK OF INDIA (CREDIT FONCIER INDIEN) Limited.

Subscribed capital £2,000,000. Paid up £400,000.
Debentures of this Bank are issued in Bonds to Bearer, or Registered Proprietor, of £20 £100, £500, and £1,000 each, Redeemable at Par within 30 Years, by Half-yearly Drawings.

Interest, £5 per Cent. per Annum,
Payable Half-yearly or Quarterly, as stated below.
The Price of Issue is £87 for every £100.

The debentures of the Bank are secured by the whole of its invested funds and by the additional guarantee of the uncalled capital, which at present is £1,000,000, represented by a proprietary of 1,500 shareholders. The investment of the Bank's funds is restricted, by the articles of association, to real estate in India and Government Securities, and the issue of debentures can never exceed the sum so invested. The amount of debentures already issued exceeds half a million sterling, and the amount invested on mortgage of real estates in India is upwards of three quarters of a million sterling.

The above price of issue gives to the subscriber 5½ per cent interest on the amount invested, and a cash bonus of £14 18s 10d per cent. on the redemption of the bonds at par by the half-yearly drawings, which (averaging the period of drawing) yields a return of 6½ per cent.

The Bank also issues debentures at par for fixed periods of three, five, seven, and ten years, bearing 5½ per cent. interest.

The Bonds are payable either to bearer—transfers passing from hand to hand without endorsement and free of further stamp duty—or to persons duly registered in the debenture books of the Bank, ownership changing only by transfer deed. Coupons for the half-yearly interest are attached, payable either 1st January and 1st July, or 1st April and 1st October, by which means investors have the option of drawing their interest half-yearly or quarterly. The quarterly receipts of interest are secured by part of the investment being made in bonds, with interest payable January and July, and in those the interest of which is payable April and October.

Applications to be made at the Offices of the Company, 17 Change alley, Lombard street, E.C., where any further information may be obtained.

DEBENTURES BEARING INTEREST at 6, 6½, and 7 PER CENT. are issued by

THE NEW ZEALAND LOAN AND MERCANTILE AGENCY COMPANY (Limited).

The security possessed by the holders of these debentures is the uncalled capital of the Company, amounting to £450,000, and the freehold and other securities of the Company, upon which the paid-up capital and money received upon debentures have been advanced in the Colony,

Alliance Bank (Limited).
Messrs Barnet, Hoares, and Co.
The Union Bank of London.

At the Third Ordinary General Meeting of the proprietors, held at the London Tavern, Bishopsgate street, on Friday, the 27th day of October, 1865, the report of the Directors, dated the 13th October, 1865, and already forwarded to the shareholders, was taken as read.

The following resolutions were then put and carried:

1st. That the report and statement of accounts now presented be adopted, and that a dividend of 10s per share, free of income tax, be declared, and be paid on and after 1st November, 1865.

2nd. That Charles Bye Colchester, Esq., and George Lyall, Esq., be re-elected Directors of this Company.

3rd. That the Directors be authorised to set apart the sum of £1,000 as remuneration for their services during the past year.

The seal of the Corporation was then affixed to the Register of Transfers.

A vote of thanks to the Chairman and Directors having been proposed and seconded, the meeting separated.

Tenders marked "Tender for Locomotive Engines and Tenders" must be delivered, in sealed envelopes, addressed to the undersigned, on or before 12 o'clock at noon, on Thursday, the 16th day of November next.

The Company is not bound to accept the lowest or any tender.—By order of the Board,

D. I. NOAD, Secretary.

East Indian Railway House, Alderman's walk, New Broad street, London, October 23, 1865.

EAST INDIAN RAILWAY COMPANY.

The East Indian Railway Company is prepared to receive Tenders for the supply and delivery of the

IRONWORK,
WHEELS AND AXLES,
AXLE BOXES,
BEARING AND
BUFFER SPRINGS

for 1,455 carriages and waggons, as per specification and drawings, to be seen at the Company's offices.

Tenders endorsed "Tender for Ironwork, Axle Boxes &c.," as the case may be, must be delivered to the undersigned, on or before 12 o'clock at noon, on Thursday the 23rd day of November next.

The Company is not bound to accept the lowest or any tender.—By order of the Board,

D. I. NOAD, Secretary.

East Indian Railway House Alderman's walk, New Broad street, London, 23rd Oct. 1865.

EAST INDIAN RAILWAY COMPANY.

Chord Line from the Barrakur to Luckeseral, with a Branch to the Kurhurwallee Coal Fields, about 148 miles.

The East Indian Railway Company will be prepared on the 9th November next to receive Tenders for the construction of the above work.

Plans, sections, drawings, and specification of the work to be executed, together with the general conditions of contract, may be seen at the Company's Offices, between the hours of 10 and 4 o'clock. A copy of the specification, &c., may be had on payment of £5 5s.

Tenders, in sealed envelopes, and marked on the outside "Tender for the Chord Line," &c., must be delivered to the Secretary, in terms of the specification, on the 9th of November next. The Company is not bound to accept the lowest or any tender.—By order of the Board,

D. I. NOAD, Secretary.

East Indian Railway House, Alderman's walk, New Broad street, London, 27th July, 1865.

NAMUR AND LIEGE AND MONS and MANAGE RAILWAYS COMPANY.

Notice is hereby given, that the CONVERSION of the ORIGINAL SHARES of this Company into REDEEMABLE SHARES, pursuant to the circular of 14th January last, and the issue of the new coupon sheets will take place here on and after MONDAY, 6th November next.

The price of the new coupon sheets, inclusive of the costs of conversion, will be One Shilling per share, payable on their delivery.

The shares must be left at this office, with a form accepting the terms of the proposal and specifying the numbers of the shares held, for examination, two days previously. These forms can be had on application.

The January, 1866, coupons will be paid as usual, the deduction of 3½d on each dividend not taking effect until July next, after which the redeemable shares will be annually drawn by lot, for redemption at 312f 50c (about £12 10s) per share.—By order,

WM. MOATES, Agent.

19 King's Arms yard, Moorgate street, London, October 21, 1865.

CALEDONIAN RAILWAY.—

Contract for a Portion of the Works authorised under the Cleland Midcalder Railway and Branches Act, 1865.

The Directors of the Caledonian Railway are prepared to receive Tenders for Works on that portion of the main line of the Authorised Cleland and Midcalder Railway, described in the Act as Railway No. 1, extending from the commencement of the said main line to a point about three furlongs south-westward from the farmsteading of Muir House, Dyke Mains, in the Parish of Westcalder, to the eastern termination of the said main line, being about 13¾ miles in length, and for works on the branch described in the Act as Railway No. 2, being about four furlongs in length. The main line is to be constructed as a double line of railway. These works will be embraced in one contract, to be called the Dykehead Contract.

The rails, chairs, and fastenings will be supplied by the Company.

The drawings and specifications may be seen at the Company's office, 302 Buchanan street, Glasgow, or at the office of Messrs B. and E. Blyth, Engineers, 135 George street, Edinburgh, on and after Wednesday, 1st November.

Forms of tender, with copies of the specification, and duplicate copies of the schedules, may be obtained from Messrs Blyth, on payment of three guineas.

The assistant engineer will attend at the Motherwell Station of the Caledonian Railway, at ten o'clock on the morning of Thursday the 2nd of November, for the purpose of exhibiting the plans, and on that and the following day accompanying intending offerers over the line of works.

The successful contractor shall pay the cost of the measurements.

Sealed tenders, addressed to the Secretary, and marked "Tenders for the Dykehead Contract," must be lodged with him at the Company's office, 302 Buchanan street, Glasgow, on or before Monday the 13th of November.

The Directors do not bind themselves to accept the lowest or any of the tenders.

C. JOHNSTONE, General Manager.

General Manager's Office, 302 Buchanan street, Glasgow, 14th October, 1865.

ATLANTIC & GREAT WESTERN RAILWAY.

CERTIFICATES OF DEBENTURE.

The Coupons from the above Certificates of Debenture, due 15th November, will be paid at the Consolidated Bank (Limited), and must be left two clear days at the offices of the Company for examination. If sent by post a cheque for the amount will be remitted in course.

5 Westminster chambers, Victoria street, Westminster, or 2a Throgmorton street, London, E.C.

This Company is now issuing a limited number of Debenture Bonds for three, five, and seven years, bearing interest at 5 per cent. per annum, payable half-yearly, in sums of £40, £200, £400, and £800 each.

The funds of the Company have been advantageously invested in first-class Freehold and long Leasehold property in the City of London, which with the unpaid capital of £8 0,000 afford the most ample security for all the Debentures proposed to be issued.

Further particulars and forms of application may be had at the temporary offices of the Company, 79 Cornhill, E.C.

N.B.—These Debentures will be received from shareholders in payment of any future calls.

SOCIETE AGRICOLE ET INDUSTRIELLE D'EGYPTE.—

The London Committee hereby give notice that a Second Call of Four Pounds per Share on the Shares of this Society was made by the Council of Administration, at their Meeting held at Alexandria, on the 25th of September, 1865.

This Call is to be paid by the European Shareholders at the Banking-house of Messrs Glyn, Mills, Currie, and Co., No. 67, Lombard-street, London, as follows:—£2 per Share on the 30th day of November, 1865, and £2 per Share on the 30th day of January, 1866

The Council have found it necessary to make this Call in order to assist them in carrying out the important and expensive contracts that have been conceded to the Society by His Highness the Viceroy, the Egyptian Government, and numerous private individuals. Among such Contracts are works for,—

The Viceroy's Palace at Abbasieh.
The Port, Quays, Jetties, and Lighters at Alexandria
The Mahmoudieh Coulong Wharf.
The Citadel of Cairo.
The enclosure of the Esbekieh Public gardens
The Cairo Improvements.
The Azizié Co.
The Railway Station at Alexandria, &c., &c., &c., &c.

N.B. The holders of Provisional Scrip can exchange it for share Certificates at the office of the Society as under on and after the 20th of November 1865.—By order,

W. H. MAITLAND,
Secretary to the London Committee.

No. 5 East India avenue, E.C., 28th Oct., 1865.

The following letter appeared in the "Times" of the 24th inst.:—

GOOD NEWS FOR PORT WINE DRINKERS.

TO THE EDITOR OF THE "TIMES."

SIR,—In an article which lately appeared in "The Times," you refer to the practice which largely prevails in Portugal of more or less brandying the wine intended for this market, and you add, "this brandy is added in order to stop fermentation, and to retain a certain amount of sugar in the wine." The apology for this practice consists in the fact that the appearance of the odium in 1851 necessitated a larger addition of alcohol than heretofore for the preservation of the wine.

Now that the odium has passed away, and the fruit-bearing of the vine is not disturbed by the appearance of disease, it becomes a matter of some importance to reduce the alcoholic properties of port to a minimum of strength. With this view we have endeavoured to secure ports possessing lightness, purity, and quality, and we have just received a parcel equal to about 1,700 dozen from a well-known "quinta" of the Lower Douro.

Our correspondent states that "this wine possesses many of the characteristics of Burgundy, viz., fine colour, great body, and is silky, soft, and extremely dry, combined with great flavour."

It is, besides, a fully fermented wine.

We would only further mention that the price is 30s per dozen.

We beg to remain, Sir, your very obedient servants,

H. R. WILLIAMS and CO.

Crosby Hall, 32 Bishopsgate street within, Oct. 23.

SECRETARY (pro tem.)—George Leman, Esq.

Temporary Offices—32 Queen street, Cheapside, E.C.

PROSPECTUS.

The objects of this Company are to provide a superior style of accommodation for visitors at a moderate rate of expenditure, and with this view to combine under one system of management various boarding houses and private hotels, principally at watering places on the coast, as well as at other suitable localities where the connections and co-operation of one establishment will tend to the advantage of the others. The Company is accordingly empowered to purchase or rent freehold and leasehold house and other property, to furnish the same for letting, either for lengthened or temporary periods, and generally to carry on such business as may be incidental thereto.

The Directors feel every confidence that a properly regulated scale of charges will give satisfaction to visitors, and at the same time yield a highly remunerative rate of profit to the shareholders, estimated at from 20 to 25 per cent.; and in order to give shareholders an additional interest in their own property, original holders of not less than 10 paid-up shares, or 20 ordinary shares, will be entitled, when visiting any of the establishments of the Company, to a deduction of 10 per cent. off the published tariff.

The business of the Company will be forthwith commenced at Brighton and Sydenham, where arrangements have been concluded for the immediate possession of the following extensive and valuable properties, including the leases, good-will, furniture, fixtures, &c., viz.:—

BELVIDERE MANSION, BRIGHTON.

This delightful residence is situated in the King's road, facing the sea, and is admirably adapted for the accommodation of families, with whom inclusive terms will be arranged.

VICTORIA HOUSE, BRIGHTON.

This establishment is also situated in the King's road, a few doors from Belvidere. It is intended to convert it into a private hotel, for which but few alterations are required. An elegant drawing room and dining room, with table d'hote, will be provided for visitors, and there will be also private rooms for such as desire them. At the termination of the present season it is intended that this house should be entirely redecorated and refurnished as far as necessary.

LONGTON HOTEL, SYDENHAM.

This hotel is about half-way between the principal entrance to the Crystal Palace and the Sydenham entrance to the grounds. Here also it is intended to carry out the system of a ladies' coffee-room and table d'hote. Excellent stabling is attached to the hotel, and there are one hundred and eighteen trains which stop at the Sydenham station daily.

The hotel, from its situation and proximity to the Crystal Palace, is admirably adapted for residents at the sea-side who require change of air inland.

In the above establishments a practical effect will be given to the new wine tariff, and everything will be done that can tend to the comfort and convenience of visitors; such, in the opinion of the Directors, being the most efficient mode of promoting the interests of the shareholders. The above premises have all been surveyed and valued by the Company's architect, and his report, together with the agreement for sale and the articles of association, may be inspected at the offices of the solicitors.

The capital will be called up only as it can be profitably employed. No call can exceed £3 per share, and a period of at least three months must elapse between successive calls.

To meet the views of those who object to the uncertainty of the times at which calls may be made, a limited number of paid-up shares will be allotted, upon which no further liability can accrue under any circumstances whatever.

No provision is made in the Articles of Association for the remuneration of the Directors, which will depend entirely upon the decision of the shareholders in a general meeting. No "promotion money" will be paid, and the preliminary expenses will be confined to the actual outlay.

Should no allotment be made, the amount of the deposit will be returned without deduction.

Applications for shares are to be forwarded in the usual form through the bankers, brokers, solicitors, architect, or secretary to the Company.

Prospectuses may be obtained in Brighton from Messrs Webb and Co., surveyors, &c., 1 Marine parade, and at either of the above-named establishments.

THE TYNE GENERAL ENGINEERING COMPANY (Limited).

Capital £100,000, in 10,000 shares of £10 each. Incorporated under the Companies Act, 1862, whereby the liability of each member is limited to the amount of his shares. Deposit on application £1, and £4 on allotment. First issue of shares 5,000.

DIRECTORS.

SECRETARY—James Isaake, Esq., A.I.A.

Temporary Offices—London, 13 Moorgate street, E.C.; Newcastle, No. 15 Dean street.

ABRIDGED PROSPECTUS.

The Tyne General Engineering Company is projected to supply the daily increasing demand for marine engines and hydraulic and other machinery consequent on the rapid development and growing importance of the port of Newcastle, and which the available engineering power of the district has so little capacity to satisfy that serious loss, by unavoidable delay, not only in the performance of original contracts but also in the execution of complicated and extensive repairs, is of frequent recurrence.

The Directors have secured, at a moderate rental and option of purchase, premises at South Shore, Gateshead, having the advantage of buildings originally erected at great cost, well suited for the operations of this Company, comprising a river frontage of 350 feet, a roadway, and with easy access by tramway to the North-Eastern, North British, and Newcastle and Carlisle Railways, thus placing the works in ready communication with all parts of the kingdom by sea and rail.

The Directors are justifiably sanguine of securing success for this undertaking, for already the offer of a large number of orders indicates that an ample and a lucrative business will be readily obtained. The determination of the Directors being, however, to assure to the shareholders, from the commencement of operations, liberal dividends, it is not intended to encumber the profits with an outlay for works and plant beyond that which may be deemed immediately necessary.

In view of the limited expenditure contemplated, the Directors do not intend to call up more than £25,000 of the capital of the Company. This amount is estimated to be ample to meet the cost of buildings and plant, and to provide the working expenses.

Calculations, based on the results of similar enterprises on the Tyne and Clyde, the well-known success of private firms, and the reports of eminent engineers having been considered, the most moderate computation justifies the expectation of dividends at the rate of not less than £20 per centum per annum.

A large number of shares have already been applied for and taken up.

The Directors having engaged a competent manager and experienced staff, and having completed their negotiations for the site for the works, will so soon as possible commence operations.

Full particulars may be obtained, and the articles of association inspected at the temporary offices of the Company, London, 13 Moorgate street, E.C.; Newcastle, 15 Dean street.

Full prospectuses and forms of application for shares may also be obtained from the brokers and the Secretary, in London, as above.

TO GENTLEMEN SEEKING preparation for Woolwich, the Civil Service, and the Line.—A Graduate of Oxford, who has had long experience in preparing for the competitive and University examinations, and has three students at present, wishes to receive two more. Delightful situation, great educational and domestic advantages, and moderate terms.—Address, L. L. D., 9 Leighton crescent, Tufnell park West, N.W.

6, 6½, and 7 per Cent. DEBENTURES.

THE BRITISH HONDURAS COMPANY (Limited).

Capital, £100,000, in 20,000 shares of £5 each.
Subscribed, £86,840.
Paid-up, £66,837 15s.

This Company was formed rather more than six years ago; the dividends have averaged above 7 per cent. per annum free of income tax (the last two being at the rate of 8 per cent.), and the reserve fund amounts to 11 per cent. on the paid-up capital.

A limited number of Debentures, for 3, 4, and 5 years, bearing interest at 6, 6½, and 7 per cent. per annum, according to term, and secured on the uncalled capital as well as the land and plant of the Company are now offered to the public. The remaining unallotted shares (about 2,500) are also offered; 10s per share to be paid on application, and 10s on allotment. Further calls, if made, not to exceed 20s per share, at intervals of not less than three months.

Applications for debentures and shares to be made to the secretary, Mr William Heriot, at the offices of the Company, No. 2 Great Saint Helen's, London, E.C., or through Messrs Barnetts, Hoares, Hanburys, and Lloyd, the bankers of the Company, and the National Bank of Scotland, at Edinburgh and Glasgow.

Further information and forms of application may be had of the Secretary.

By order of the Board,
J. R. ROBERTSON, Chairman.
2 Great Saint Helen's, London, E.C., October, 1865.

THE DUNRAVEN UNITED COLLIERIES COMPANY (Limited).

Incorporated under the Companies Act, 1862, with limited liability. Capital £200,000, in 8,000 shares of £25 each. Deposit £1 per share on application, and £2 on allotment. Calls not exceeding £3 per share at intervals of not less than three months. A minimum dividend of 10 per cent. guaranteed by the vendor for the first five years.

SOLICITORS—Messrs Bell, Brodrick, and Bell, 9 Bow churchyard, London.

SECRETARY—T. C. Simmons, Esq.

Temporary Offices—10 Cullum street, E.C.

ABRIDGED PROSPECTUS.

This Company is formed with a view of purchasing from the proprietor the Dunraven, New Brithdir, and Blaenclydach Collieries, in the county of Glamorgan, for the purpose of developing and further improving the property; and full powers have been taken for efficiently carrying out the same.

These properties are sold entirely in consequence of the vendor's capital being insufficient effectually to work so large a concern.

The proprietor has guaranteed to the satisfaction of the Directors that for the first five years after the formation of the Company 10 per cent. per annum shall be paid upon all the paid-up capital (taking the average of profits over such period). He will also continue to manage the whole business of the Company, at a salary fixed by the Directors.

There is sufficient plant at each of the collieries efficiently to work a much larger quantity of coal than has been named.

The purchase money for the whole of the above-named properties is £130,000, and the same is to be paid by instalments spreading over two years. The proprietor will take shares to the extent of £50,000.

The price to be paid is based upon valuations made by several well-known and experienced colliery engineers, all of which have been thoroughly verified. The originals may be seen at the offices of the Company.

Prospectuses and forms of application for shares may be obtained of the bankers, at any of their branches, brokers solicitors; of James Wright, Esq., C.E., 12 Copthall court, London; of Messrs Smith and Pickering, solicitors, Merthyr Tydfil and at the temporary office of the Company, 10 Cullum street, E.C.

DUNRAVEN UNITED COLLIERIES COMPANY (Limited)

Notice is hereby given, that the List of Applications for Shares in this Company will be Closed on Monday, 30th, for London, and Tuesday, 31st October, for the country.

OFFICES—17 and 18 Cornhill, E.C.

PROSPECTUS.

The marked success which has attended the operations of the Credit Foncier and Mobilier of England (Limited) is almost unexampled in the history of any commercial undertaking.

The results of its operations have been so satisfactory that, as will be seen by the half-yearly report just issued, a dividend and bonus, up to the 30th September, at the rate of 40 per cent. per annum, has been declared, being the same dividend and bonus as was paid for the previous half-year.

Besides these unprecedented results, the Company is in the possession, up to 30th September, of a general reserve fund of £200,000, of a dividend reserve fund of £100,000, and has profits in hand up to the same period, after paying the abovementioned dividend and bonus, of £50,805 4s 9d, the paid-up capital being £500,000, making in all £850,805 4s 9d, or above £8 10s per share.

The following is the business transacted by this Company:—

This Company negotiates loans for colonial and foreign Governments;
Co-operates in the financial arrangements of British and other railways;
Makes advances to corporations, town councils, and other public bodies;
Negotiates loans for public works;
Assists in the introduction of industrial and commercial undertakings;
Makes advances upon approved stocks, shares, bonds, &c.;
Makes temporary loans upon eligible freehold and leasehold securities;
and generally transacts such other financial business as is suitable to the capitalist, whether as principal or agent.

The greatly-increased and still increasing amount of business offered to this Company, both by eminent private firms, companies, and corporations, has decided the Court of Directors to make their second issue of shares, by allotting the remaining capital of the Company, consisting of 100,000 new shares, on which £5 per share only is intended to be called up.

These 100,000 new shares the Directors propose to issue as follows, viz.:

50,000 shares will be issued to the shareholders in this Company who stand registered on the books of the Company, to be allotted to them at a premium of £2 10s per share, in the proportion of one new share for every two shares now held; and

50,000 shares will be issued to the general public (including such shareholders as may wish to apply for shares in addition to those they are entitled to as shareholders), to be allotted at a premium of £3 10s per share.

The premiums to be received upon this issue will amount to £300,000, which will be added to the £200,000 already standing at the credit of the General Reserve Fund, and will thus increase that fund to £500,000; the Dividend Reserve Fund being £100,000; the paid-up capital will then be £1,000,000.

The new shares will be paid up as follows, viz.:—

On those issued at £2 10s per share premium to the shareholders:—

£	s	d	
1	0	0	per share on application, being on capital account.
1	10	0	per share on allotment; £1 being on capital account, 10s on premium account
2	10	0	per share, 1st January, 1866; £1 10s being on capital account, £1 on premium account.
2	10	0	per share on 1st March, 1866; £1 10s being on capital account, £1 on premium account.
7	10	0,	being £5 capital, £2 10s premium.

On those shares issued at £3 10s per share premium to the general public, the following will be the mode of payment:—

£	s	d	
1	0	0	per share on application; being on capital account.
2	10	0	per share on allotment; £1 being on capital account, £1 10s on premium account
2	10	0	per share on 1st January, 1866; £1 10s being on capital account, £1 on premium account.
2	10	0	per share on 1st March, 1866; £1 10s being on capital account, £1 on premium account.
8	10	0,	being £5 capital, £3 10s premium.

These 100,000 new shares will participate in the next distribution of profits, pro rata with the existing shares, according to the amount of capital paid up thereon; the valuable option will be, however, reserved to the holders of these shares of paying upon any of them the whole of the above instalments at any time previous to the date of the last instalment—viz., 1st March, 1866, on paying the Company back interest from the date of such payment to 30th September last, at the rate of 20 per cent. per annum on the £5 on capital account; the shares so paid up to be then entitled to the same amount of profits next half-year as is declared on the existing shares.

Interest at the rate of 20 per cent. per annum will be charged on all instalments not punctually paid, and any instalments not duly paid will render the previous payments liable to forfeiture.

The Directors are aware that in thus admitting the public to subscribe for shares, at a price so much below their real value, they are departing from the practice generally adopted in an issue of new shares, of offering the whole of them to the shareholders; but the Directors are so impressed with the importance of increasing the area of influence of this Company—influence second only in importance to a Company like the Credit Foncier and Mobilier of England—and have had such proofs in the result of the issue of shares a year ago, of the sound policy of admitting the public to a participation in such issue, that they feel confident of obtaining the approval of the shareholders in the course they have adopted.

The following calculation will guide investors in estimating the intrinsic value of the shares, after the dividend and bonus now declared are paid, and when the issue is completed:—

The capital paid up will amount to	£1,000,000	0	0
The general reserve fund	500,000	0	0
The dividend reserved fund	100,000	0	0
In hand, profits not divided	50,805	4	9
	£1,650,805	4	9

Equal to above £8 5s per share on the whole 200,000 shares.

So that the public, on subscribing at £8 10s per share (being £5 capital and £3 10s premium), are being admitted partners in this Company by only paying 5s per share premium, as premium; £8 5s per share being actually represented in value in the assets of the Company. Over and above these advantages, there is the probable enhanced value which will attach to these shares, in the same way that the shares issued to the public at £2 13s 4d premium in September, 1864, after having received £1 per share in April last as dividend and bonus, are now worth £5 5s per share premium, making together £6 5s for what they paid £2 13s 4d for, being in one year more than 140 per cent. increase in value on the amount paid for premium.

The Directors feel that with a paid-up capital of £1,000,000, a general reserve fund of £500,000, a dividend reserve fund of £100,000, making a total of £1,600,000, they will be in a position to meet the exigencies of any business that may be brought before them; it is, however, the intention of the Directors to increase, out of future profits, the dividend reserve fund to £200,000, being in accordance with the plan announced in the last report, to have always in hand one year's minimum dividend at 20 per cent. per annum, calculated on the amount of the capital paid up for the time being.

The Directors further wish to place on record their deliberate opinion and conviction that this Company is destined in a very short period to take a foremost place among the leading monetary institutions of the country.

Applications for shares may be made in the form annexed, and must be accompanied by the payment of £1 per share. Should a less number be allotted than is applied for, the sum paid on account of such application will, so far as it will extend, be applied in payment of the sum due on allotment.

Prospectuses, forms of application for shares, and copies of the half-yearly report (just published), may be had on application to the bankers, solicitors, stockbrokers, or of the Secretary, at the offices of the Company, 17 and 18 Cornhill, E.C.

The lists of application for shares will be closed on Thursday, the 2nd November, at 4 o'clock, for London, and on Friday the 3rd November, at 12 o'clock, for country applications, before the expiration of which time all applications must be made.

London, October 20, 1865.

No.—— Form C.—General Public.

FORM OF APPLICATION FOR SHARES, to be retained by the Bankers.

To the Directors of the Credit Foncier and Mobilier of England (Limited).

Gentlemen,—Having paid to your bankers [insert bankers' names] the sum of £ , being a deposit of £1 per share on new shares in the Credit Foncier and Mobilier of England (Limited), I hereby request that you will allot me that number, and I agree to accept such shares, or any less number you may allot to me, on the terms of the prospectus at £3 10s premium per share, and I agree to pay the amount due on allotment, and the other instalments as they become due, to sign the Articles of Association if required, and I authorise you to insert my name on the register of members for the number of shares so allotted to me.

THE

CREDIT FONCIER AND MOBILIER OF ENGLAND, LIMITED.

Notice is hereby given, that the LISTS of APPLICATION for the NEW SHARES in this Company will be CLOSED on THURSDAY, the 2nd November, at 4 o'clock, for London, and on FRIDAY, the 3rd November, at 12 o'clock, for country applications, before the expiration of which time all applications must be made.—By order,

ALFRED LOWE, Secretary.

17 and 18 Cornhill, London, October 24, 1865.

THE

CREDIT FONCIER AND MOBILIER OF ENGLAND, LIMITED.

At a Meeting of the shareholders of this Company, held this-day (Tuesday), the 24th October, 1865, at 11 o'clock, a.m.,

The Right Honourable JAMES STUART WORTLEY, Governor, in the Chair,

It was proposed, seconded, and carried unanimously :—

That the balance sheet and report be, and are hereby approved, confirmed, and adopted.

It was also proposed, seconded, and carried unanimously :—

That the best thanks of this meeting are due, and are hereby given, to the Govenor, Deputy-Governors, and Directors, for the great care and attention they have given to the interests of the shareholders, and for the extremely satisfactory results which have arisen therefrom.

It was also proposed, seconded, and carried unanimously :—

That the cordial thanks of this meeting are eminently due, and are hereby offered, to Albert Grant, Esq., M.P., the Managing Director, for the talent displayed by him in the administration of the affairs of the Company.

It was further proposed, seconded, and carried unanimously :—

That the thanks of this meeting be given to Alfred Lowe, Esq., Secretary, for his unvarying attention ; and to him and the other officers of the Company for their industry and zeal during the past half-year.—By order of the Court of Directors,

J. STUART WORTLEY, Governor.

ALFRED LOWE, Secretary.

17 and 18 Cornhill, London, October 24, 1865.

THE

CREDIT FONCIER AND MOBILIER OF ENGLAND, LIMITED.

The PROSPECTUSES and FORMS of APPLICATION for the SHARES of the NEW ISSUE of CAPITAL of this Company are NOW READY, and, as well as copies of the Half-yearly Report and Balance Sheet, can be obtained at the Company's Offices.

17 and 18 Cornhill, London, October 24, 1865.

ALFRED LOWE, Secretary.

CONVERSION OF THE MEXICAN SIX PER CENT. LOAN OF 1864.

The Commission of Finances of Mexico, in virtue of powers conferred on it by H. M. the Emperor Maximilian, has decided that the holders of paid-up certificates of Six per Cent. Mexican Stock, issued in 1864, shall have the right to exchange their securities, from the 2nd October current to the 10th November next, for Obligations of 500f (£20), inscribed in the Grand Livre of the Mexican Exterior Debt, and representing to the number of 500,000 the amount of the bonds of the loan of 1864.

This Conversion shall take place at the rate of £3 sterling of revenue, or 75f 60c, for two new Obligations of 500f, producing each an annual interest of 30f, payable half-yearly, on the 1st April and the 1st October of each year, from the 1st April, 1866.

In addition to the interest of 30f borne by each of them, these new Obligations, which form a second series distinct from the first one, shall enjoy all the advantages accorded to the Obligations of the first series, issued in April, 1865.

Thus, the paying-off shall take place as for the Obligations of the first series by means of drawings by lot, made publicly at Paris, under the direction of the Commission of Finances of Mexico, every six months, on the 2nd January and 2nd July of each year, and the reimbursements shall be effected to the persons entitled to them three months later.

The first drawing shall be effected on the 2nd January, 1866, immediately after the drawing of the first series.

At each half-yearly drawing, the first Obligation drawn shal be reimbursed at 500,000f (£20,000)
The two following at 100,000f each 200,000
The four numbers following at 50,000f..... 200,000
And sixty numbers at 10,000f.....600,000

Total half-yearly 1,500,000

In addition, 756 Obligations shall be reimbursed at 500f in the drawing of the first half-year, in such a way that the loan will be integrally reimbursed in fifty years.

Lastly, there shall be accorded to each Obligation a premium of reconstitution of 340f, payable in fifty years, It shall be constituted by means of a deposit of French Three per Cent. *rentes* in the Caisse des Depots et Consignations of France, and the interest of which shall be capitalised every three months during the said fifty years.

THE COMPTOIR D'ESCOMPTE OF PARIS *is charged to effect this conversion. The Certificates to be exchanged (Coupon of 1st October detached) must be deposited in its offices, Rue Bergere, from the 2nd October current to the 10th November next, from 10 o'clock in the morning to 3 o'clock in the afternoon. A special bureau shall be opened for the purchase or sale, at the quotations of the Bourse, and without commission of fractions which cannot be converted into an obligation.*

WESTERN GRAMMAR SCHOOL, Brompton, S.W., in union with King's College, London.—The system pursued at this school is eminently practical, and calculated to prepare pupils for the competitive examinations and the various pursuits of life. Three pupils successfully passed the Oxford Local Examinations this year. The Head Master takes a few boarders.—For terms and prospectus apply at the school.

PROPRIETARY SCHOOL, GRAVESEND.

Head Master, Mr M. GUTTERIDGE, B.A.

The course of study combines the main features of the best middle schools with the distinctive characteristics of our ancient classical schools, and is such as to fit a boy either for business or professional life. It includes the Classics and Mathematics; History, General and Sacred; Geography, Physical and Political; English Grammar and Composition, Spelling and Arithmetic, Drawing and French and the practice of good Handwriting.

Pupils are prepared for the Civil Service Examinations, for the Oxford and Cambridge University Local Examinations, and for Matriculation at the London University.

For terms and prospectuses, apply at the School.

NOTHING IMPOSSIBLE.—The greatest and most useful invention of the day, AGUA AMARELLA.—Messrs JOHN GOSNELL and CO., Three King court, Lombard street, perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes: it, on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price one guinea per bottle; half bottles, 10s 6d. Testimonials from architects of the highest order and from individuals of undoubted respectability may be inspected. Messrs John Gosnell and Co. have been appointed perfumers to H.R.H. the Princess of Wales.

DR DE JONGH'S
(Knight of the Order of Leopold of Belgium)

LIGHT-BROWN COD LIVER OIL, Prescribed by the most Eminent Medical Men as the safest, speediest, and most effectual remedy for CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS, Is incomparably superior to every other kind.

Dr EDWARD SMITH, F.R.S., Inspector of Poor Laws, Late Physician to the Hospital for Consumption and Diseases of the Chest, Brompton, in his Work on "Consumption," writes: "It is impossible in private practice to determine whether the Oil which we prescribe is genuine Cod Liver Oil or not, and hence we think it a great advantage that there is one kind of Cod Liver Oil which is universally admitted to be genuine—the Light Brown Oil supplied by Dr de Jongh."

Dr BARLOW, Senior Physician to Guy's Hospital, states: "I have frequently recommended persons consulting me to make use of Dr de Jongh's Cod Liver Oil. I have been well satisfied with its effects, and believe it to be a very pure oil, well fitted for those cases in which the use of that substance is indicated.

Sold only in capsuled Imperial Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; by respectable chemists.

NEW OPERA AND FIELD GLASS and the Reconnoitrer. Glass, price 10s 10d (sent free). This "TOURIST'S FAVOURITE," through extraordinary division of labour, distinctly shows small windows ten miles off, landscape at 30 miles, Jupiter moons, &c. The Marquis of Carmarthen—"The reconnoitrer is very good." Earl of Breadalbane—"I find it all you say, and wonderfully powerful for so very small a glass." Earl of Caithness—"It is a beautiful glass." "Rev. Lord Scarsdale approves of it." Lord Gifford—"Most useful." Lord Garvagh—"Remarkably good." Sir Digby Cayley—"It gives me complete satisfaction, and is wonderfully good." Captain Sidney, Royal Small Arms Factory, Enfield, "found it effective on the 1,000 yards range." F. H. Fawkes, of Farnley hall, Esq.—"I never before met, although I have tried many, a glass combining so much power, for its size, with so much clearness." THE FIELD—"We have carefully tried it at an 800 yard rifle range against all the glasses possessed by the members of the corps, and found it fully equal to any of those present, although they had cost more than four times its price." NOTES AND QUERIES—"What intending tourist will now start without such an indispensable companion to a pleasure trip?" The celebrated Hythe Glass shows bullet marks at 1,200 yards, and men at 3½ miles, 31s 6d. All the above glasses, respectively bearing the registered Trade-Marks, "Salom," "Reconnoitrer," and "Hythe," are only to be had direct from Salom and Co., 98 Princes street, Edinburgh. No agents of any kind anywhere.

In addition to the information formerly given, it gives a concise summary of the Reports of the Companies for the present year as will enable Investors to judge of their position.*

THE BANK RETURN OF THIS WEEK.

THE Bank return of this week cannot be called unfavourable. The corresponding week in other years does not generally exhibit an increase of notes in the banking department, but at the same time it suggests matter for serious consideration.

We have got through one-third of the quarter, and, therefore, should now be preparing for the next. We hold, as we have lately explained, that the ebbs and flows of notes and coin at the close of each quarter ought to make but a trifling, if any, change in the money market. The Bank ought, as bankers, by a timely foresight to provide the funds for payments which are quite certain in time, and very nearly calculable in amount. But to do so the Bank must begin in time. Last quarter it had to run up from 4½ to 7 per cent. very rapidly, because it had not begun sufficiently early. If they would avoid a similar risk again they must be wise in time. The deposits—the principal liabilities of the Bank—are now unusually small. It will be seen by reference to the table in our City article that they are lower than at the corresponding period in each of the last three years, but, nevertheless, the reserve is nearly at the minimum at which the banking department is safe. We have often pointed out that under the present law (and whatever opinions we may hold on the abstract theory of the currency, all men of business will agree that we ought to work the present law as well as we can), the banking department in September ought to have never less than a third, and at times when an efflux is to be expected, something approaching to a half of its liabilities. But now the figures are:—

	£
Public deposits	4,163,517

and the reserve is 6,030,498*l*, or but a little over one-third.

The Bank of England ought to be getting bullion to meet the drain she will have at Christmas; but now she barely keeps her own. She is liable to a drain of bullion to the East. Large sums have gone from France, and it is only the high rate of discount which has preserved us from an external drain here. The foreign exchanges have shown symptoms of weakness, and if the rate of interest had not been very high here, in proportion to the continental rate, bullion would have flowed from the Bank. The trade of the country, as we have shown in another article, has of late started forward with great rapidity. The market rate is certainly not below—perhaps a little above—the Bank rate, and therefore it is very unreasonable to expect cheaper money, and not unreasonable to expect dearer money.

THE SUDDEN INCREASE IN THE TRADE OF THE COUNTRY AND ITS EFFECT UPON THE MONEY MARKET.

THE Board of Trade tables just issued are among the most remarkable we have ever seen, and go far to explain the recent rise in the value of money which has puzzled so many persons, and upon which such absurd theories have been hazarded. But in order to give this explanation those tables must be discreetly used. The attention of readers is too often directed to comparisons between the exports of this year and last year and the year before that, which are the figures that stand out on the surface of the tables. But to explain the recent change in the money market, we must compare, not September this year with September last year, but September this year with August this year. The comparison with former years is of great value in a general retrospect, but when we are explaining a recent remarkable fact it is the new recent causes to which we ought particularly to attend. It is the sudden start forward of trade that raises the value of money, just as it is the sudden diminution of trade that lowers it. At the very beginning of October, the value of money increased from 4½ to 7 per cent. Can this be explained by the mercantile events of September, now that we have the most important part of them in an authentic statement?

It is at once evident that they can. It appears that there was during September an extraordinary new call upon the capital of the country.

	£
The exports of British and Irish manufactures were in September	17,316,681
Whereas in August they had only been	14,158,648
	3,158,033

being an increase *in one month* of more than 20 per cent.

Digitized by Google

On looking at the tables annexed to this article, it will be found that there was an increase of *a million sterling*, more than 75 per cent., in the trade with America, and of a million and three quarters in export of cotton yarn and piece goods. Besides this, the trade in linen and woollen manufactures to all countries has started forward, and several other important articles show an increase, while very few show much decrease.

The demand from America, owing, as we believe, to the changing conditions in the country, has been held in suspense this year in a very remarkable manner. It was during the first eight months of this year only as great as in 1863, and very much less than 1864. The accurate figures, including *all* articles, are as follows :—

EXPORTS from GREAT BRITAIN to UNITED STATES in first Eight Months.

	£
1863	9,387,908
1864	14,144,578
1865	9,483,084

We do not as yet get from the Board of Trade the complete statement of the American trade in all articles, but when we do it will doubtless show a still further increase than that which the table below indicates in the principal articles, all which are now given us. But the remarkable result remains that, though the new commerce with America has given or aided in giving such an increase to the value of money, the whole exports of this year to that country are not so great as those of last year.

This remark applies to all our exports :—

	£
The exports of first *nine* months of 1864 were	123,404,161
— — 1865 —	119,717,377

But in each case it is the *new trade that produces the new effect*. We must withdraw our attention from all other comparisons if we would trace the meaning of the facts before us.

Indeed if we examine the accounts of last year themselves, we shall find that they are themselves an example of the principle that it is the new increment to trade which causes the fresh addition to the value of money.

	£
The exports for Aug, 1864 were	16,274,269
— July —	14,394,364
Being an augmentation of	1,879,905

which was one principal cause of the rise from 6 per cent. to 9 per cent. between the 25th July and the 8th September, though there were other co-operating causes.

The increase of 3 000,000*l* in the exports of September as compared with August has had a greater effect, because it succeeded another great increase of a different kind. We do not yet know the real value of the imports for September this year, the account of imports only goes down to August, but that month shows a very remarkable rise : the figures are—

COMPUTED REAL VALUE of principal Articles imported.

	£
June	15,453,909
July	19,019,162
August	21,142,430

being an increase of more than five millions and a half sterling —or more than 35 per cent. in August compared with June.

It will be seen by the table annexed to this article that this increase is principally in cotton and silk, but that timber and a great number of minor articles show also an augmentation, not large or important in any particular case, but needing grave consideration when the aggregate of all the items has been summed up.

Those who comprehend how delicate our money market is, who know how great an alteration in value a very slight addition either to the supply or the demand immediately causes, will at a glance perceive how great will be the effect of so great an increase in our export trade, preceded by so great an increase in our import trade.

To this large and new item in the capital account is to be added the new and large item in our bullion account, the demand for silver for the East caused by recent purchases of cotton. This has not actually diminished our bullion, because of the high rate of discount here, but large quantities have been sent, and the French and other available stores have been largely drawn upon in consequence.

With these great and indisputable natural causes of the great increase in the value of money, it is quite absurd to look further. The *Journal des Debats* supposes that there is a diminution of credit in this country, and that bank notes are needed to supply it. An infinitesimally small foundation may be discovered for the theory in the minute disturbance of the Irish paper currency consequent on the Fenian arrests. But omitting this, which is but a grain of sand in the account, the credit of this country is as sound as it ever was. The sort of crisis contemplated by the *Debats* has not yet come. There is no want of credit; no need that subsisting credit should supply the room of destroyed credit. What is wanted is more capital and more bullion ; and no alteration of the law, no augmentation of bank notes, can or will create for us these.

THE PROSPECT OF A GOOD REFORM BILL.

THERE can be little doubt but that a Ministry, whose leading members are Lord Russell and Mr Gladstone, will be in favour of Reform ; and there cannot be much but that at a time when the Tory party are likely to renew their attacks upon the Government with something like ardour, there will be a general disposition in the Liberal party to adopt any Reform Bill, which, without admitting a false principle, might unite heartily the different sections of that party above and below

Digitized by Google

the gangway. Is any such Reform Bill possible? Is there no measure which even moderate Liberals would regard as right in principle and as giving a just share of power to the working class, and to the great cities of the North, without admitting the principle of a bit-by-bit lowering of the franchise, which would also satisfy the demand of the more Radical section of the House, and produce a hearty co-operation between such Liberals as Mr Cardwell and such Liberals as Mr Forster? We do not think it by any means hopeless, provided those whose views we have always striven to set forth,—those who wish to see a real *representative* assembly, not a mere delegation of the working class—are prepared, as we are, to give a substantial and not a merely nominal share of power to the intelligent industry of the kingdom. All we earnestly protest against is a measure which takes, like the last Conservative Reform Bill, *uniformity* of qualification as its central idea, and descends a step lower in the standard of that qualification than the existing law. We all know where such a measure as that will end. If you hew out the second in a flight of descending steps, you invite the next political generation to proceed with the third, and so on till you get to the bottom or universal suffrage, which certainly means almost the reverse of universal representation. Steadily as we have opposed this idea, for the very reason for which we oppose it we are *anxious* to see the manufacturing operatives receive their due share of representation at once. We demand it for them indeed, precisely on the ground on which we oppose a gradually descending scale of uniform qualification,—the ground, namely, that both the working classes and educated classes have a *permanent* right to be heard in the House of Commons. It is obvious that we cannot claim that right for one intelligent and industrious class, and refuse to claim it for another class quite as industrious, nearly if not quite as intelligent, and much larger in numbers. It is not, therefore, from any timidity of feeling that we object to the common Radical ideas on reform. It is because we believe that they tend to injure and eventually destroy the representative character of Parliament with regard to the important class now constituting the main body of electors, on the plea of claiming to give it that representative character with regard to a class equally important which is not yet included among the electors. Cannot we secure this last point, and that in a way to satisfy the Radicals, without surrendering the first? Is there no measure Lord Russell and Mr Gladstone could introduce which would justly be thought conservative of the rights of the middle class, while it was generous and cordial to the claims of the operative class?

It seems to us that a measure which should reduce the occupation franchise in the counties to the 20*l* limit, and not lower,—which should disfranchise such rotten boroughs as every Reform Bill has proposed to disfranchise, thereby gaining probably some thirty or forty seats,—which should then transfer those seats to the largest towns, chiefly, of course, in the manufacturing North, so that there should be not less than three members for each town having a population say beyond 100,000, and which should then, while keeping the borough franchise unchanged in all other boroughs, grant household franchise in all the great towns whose population is above the given limit,—with the qualification that each elector might give all his three votes for a single candidate if he pleased,—would satisfy all the conditions of a thoroughly liberal and a wisely conservative Reform Bill, and might cordially unite those who plead, like Mr Forster, for the rights of the working men, and those who think with the moderate Liberals that we ought not to merge the middle in the working class. Let us look for a moment at each of the provisions we have suggested.

In the first place no one will question the advantage of lowering the county franchise to 20*l*. Lord Palmerston himself had practically assented to that measure, and even Mr Locke King has, we believe, intimated that he would accept it. No thinking man can resist the argument in its favour. The occupiers of country houses between 20*l* and 50*l* are doubtless, on the whole, a more educated and independent class than the tenants at will for 50*l* and upwards. In a country town all the poorer gentry live in houses with a rent between 20*l* and 50*l*. The country lawyer, the country doctor, assuredly the country curate, all the principal shopkeepers, almost all the retired tradesmen, occupy houses of this class; and who are to vote, if these are not? Then the same class of houses would include by far the larger number of suburban villas, whence thriving tradesmen, rising solicitors, confidential clerks, and literary men, go up daily to Liverpool or Manchester, or Birmingham, or London, to do their daily work, though residing out of the town for the sake of the purer air and the advantage of change. There can be no possible pretence for excluding this class from the franchise. It would vastly increase the number of really independent and educated electors in the counties, while many objections might justly be urged against the independence of the class occupying the houses between 10*l* and 20*l*. The change proposed would, no doubt, greatly augment the influence of the best section of the middle class in the House of Commons, and do so in the best way, without interfering with the provisions by which we may hope to provide for the representation of the working class.

Next, it seems obvious both that the lowest class of small boroughs, those which, like Harwich and others of the same sort, are notoriously of no use in representing the ideas of any *class*, should be disfranchised, and that, in the medium county town boroughs which we retain, it would be absolutely mischievous to lower the franchise. The object of lowering the franchise in the great manufacturing towns is to include a class with political ideas of their own who wish to express those ideas. Now, in the small Parliamentary boroughs this class does not exist. Of operatives, in the Lancashire sense of the word, there are none. Of men utterly without political ideas, or the vestige of political ideas, whose only desire with respect to a vote would be to sell it to the best advantage, there are many in these boroughs occupying houses under 10*l*,—too many, indeed, occupying houses up to that value. Now, not even the sternest Radical can possibly contend in the same breath that we ought to disfranchise the smallest boroughs because they are corrupt and do not really add to the representative character of Parliament, and *yet* that we ought to make the other country boroughs which we do not disfranchise *more* corrupt than they now are, and less truly representative than they now are. Cynical as Radicals sometimes are, we shall scarcely hear them advocating a change in the minor boroughs which would degrade their political worth and value, on the plea that by that means we shall the sooner get rid of them. Nothing can be plainer than that, whatever case may be made for a lowering of the suffrage in really *great* towns, there is no such case for it, on the contrary the strongest possible case against it, in the boroughs which are not great. The vicious principle of uniformity can scarcely be carried so far as to enforce a reduction of the franchise which would injure deliberately the electoral value of a large and useful class of boroughs, because in another and very different class of boroughs that reduction has been forced upon us as a means of *improving* their electoral value. A reduction of the franchise is good in Birmingham, because it will find an expression for the ideas of a numerous, active-minded, and industrious class; in Cambridge it would not give an expression to the ideas of any such class, but, on the contrary, would tend to prevent the class which has already ideas of its own from getting for those ideas an honest representation; how absurd, then, to maintain that what is good for Birmingham must be good also for Cambridge.

Finally, with a middle-class representation thus materially strengthened in the counties, and protected against a degraded franchise in the country towns, there would be no kind of danger in granting household suffrage at once to all towns with a population above a certain limit. We believe this would be in substantial accordance with Lord Russell's principle, recently laid down, that any new Reform Bill must proceed on "good sound old British principles." The scot-and-lot voting in particular towns was assuredly one of these good old British customs. Only, *before* the Reform Bill there was no sort of principle on which this privilege was granted, and, consequently, it seemed anarchical and unmeaning. To restore the scot-and-lot voting in great manufacturing towns, where it would practically ensure the representation of the working classes, would be to restore all its advantages, with few of its disadvantages. Especially if, as we have proposed, we combined it with a principle—also accepted by Lord Russell—by which a majority of more than one-fourth could (*if absolutely united, in which case they would deserve it*) secure one out of the three members while the majority would secure the other

Digitized by Google

two, there would be no danger of disfranchising the capitalist interest in the great towns in order to enfranchise the labour interest.

Such a measure would in short secure all the requisites of a good Reform Bill. It would get rid of the notoriously corrupt element in our present system. It would increase largely the influence of the intelligent and independent middle class in the counties. It would provide a certain *considerable* representation for manufacturing labour. It would reserve a real representative influence for manufacturing capital. And finally, it would add *relatively* to the representation of the enterprising, intelligent, and wealthy North, as compared with that of the comparatively stationary South. And yet it would concede nothing to the mere numerical ideas of representation. On the contrary, by extending the principle of variety of qualification, instead of going further in the establishment of a dead uniformity, by asserting the right of a united and influential minority in the most important centres of population to a voice in the representation, and by refusing to lower the franchise in places where a lowering of the franchise would introduce a less independent class of voters, it would assert all those conservative principles for which we, and the moderate Liberals generally, have earnestly contended. It seems to us that the present is a very happy opportunity for a junction between both sections of the Liberal party, on the basis of such a measure as we have indicated, a basis at once conformable to the principle laid down by Lord Russell, and, in the magnitude of its *results*, at least, to the demands of such reformers as Mr Forster or Mr Stansfeld.

THE POSSIBLE UNITY OF NORTHERN GERMANY.

It seems to be generally understood upon the Continent that Prussia is about to annex Holstein as well as Schleswig, and that Austria, despairing of successful resistance, has been persuaded to accept a pecuniary equivalent for her share in the conquered Duchies. The opposition of the King, which was at one time most determined, has, it is said, been overcome, and the Liberal majority in the Prussian Parliament, from whom a strenuous resistance was expected, admit that they prefer the aggrandisement of their country to an immediate revival of constitutional freedom. Herr Twesten, a member greatly trusted by the party, has openly refused to join in any agitation which may "end in preparing a defeat for Prussia," and Count von Bismark has accordingly ventured to threaten the free city of Frankfort with ulterior consequences if it again permits the delegates of Germany to discuss opposition to Prussian designs. The alarm in the minor Courts of the North is considerable, for they believe that Prussia, when it has once reorganised the Duchies, a work fast being accomplished, will proceed to absorb themselves, and change all Germany north of the Maine into one united Empire. The Liberals evidently look forward to this contingency, and the few really free papers are full of speculations and rumours as to the terms by which the French Government has been induced to abstain from interfering. Most, if not all, of these speculations are without foundation, but they all indicate the impression among politicians that Count von Bismark intends to take some considerable step towards the union, or it may be the federation, of Northern Germany.

Is there anything in that design which, setting apart wild talk about bargains for Belgium, should excite either suspicion or annoyance in Great Britain? Several of our contemporaries, aroused apparently by the political cynicism involved in conquering States under pretence of liberating them, appear to believe there is, but we cannot bring ourselves to that opinion. It is no doubt an evil in politics as in society that the regime of law should give place even temporarily to the regime of force, but it is a worse evil that that regime once established should be endured to no purpose, that the constitution of Europe should be overstepped in order to do nothing. The means preferred by Count von Bismark are as worthy of condemnation when only used for the conquest of Lauenburg as when employed for the annexation of North Germany, and the only difference is between the different ends attained. Now Englishmen, as a nation, have long since been agreed that the existence of the petty principalities of Germany is a nuisance to Europe,—so heartily agreed, that the real defence of those States, their value as centres of different forms of German cultivation, has been somewhat too contemptuously overlooked. They are also agreed, ever since the aggressive war upon Denmark, that "duality" as the Germans call it—*i. e.* the division of Germany between two Powers—would be a safer arrangement for Europe than unity under a single head. If, therefore, we look on quietly while the King of Prussia annexes Lauenburg, *a fortiori* we must look on quietly while he absorbs North Germany. In the first case the end was as worthless as the means; in the second, the end is so great and so beneficial to the world as to extenuate if it cannot excuse the means. If, indeed, North Germany were to be absorbed by sheer force against the utmost exertions of its people, then indeed end and means would be equally inexcusable, but we take it this is not the case. The Princes, of course, dread the change, for, whatever provision may be made for them, the result is certain to diminish their possessions and impair their rank. The vast appanages of the Crowns can scarcely be left entire to the mediatised families, and no dethroned King of Wurtemberg will be able to order his army to salute every closed court carriage. The citizens of the small capitals, again, can hardly expect annexation with pleasure, for the local Courts are, after all, centres of society,—often of very intelligent and amusing society,—which the provincial cities of Prussia are not. Their importance and their wealth will be materially decreased, and that is a hard prospect even to cities as patriotic as Turin. The armies, again, are doubtful, for the extinction of independence offends their military pride, and the discipline of the Prussian service is needlessly severe and aristocratic. But the mass of the people appear exceedingly indifferent, and certainly would acquiesce in the change sooner than prevent it by a national war to be commenced by a levee *en masse*. Nothing short of a popular uprising could check the advance of Prussian armies, and for a popular uprising the difference between a Hanoverian Government and a Prussian Government offers too slight a temptation. If the stroke is ever struck Prussia, we think, will have little to fear except from abroad, and the end, therefore, is all that need be carefully discussed. That end most Englishmen pronounce good.

But it is said success so enormous will enable the Hohenzollerns permanently to dispense with their constitution. Their old subjects will be interested in maintaining their new position, and their new subjects will be powerless to resist. That view rests, we think, on a considerable mistake. In a country which is governed by a despotism so strong that the Sovereign can increase taxation by his bare will, a phenomenon visible in Russia only, additional population may increase the power of the throne, but not in any other. Whenever the people have advanced to the point at which they will not be taxed without being first consulted, a great country has a better chance of freedom than a little one. It is much more expensive to govern. Northern Germany, for example, besides its existing expenditure, must, in the event of its becoming united, maintain a fleet, a very costly instrument of power, and to pay for this fleet the population must be so far conciliated that it shall be possible to increase the taxes. The money power is the strongest power, and the greater the State the more completely does the money power reside in the middle class, always of necessity eager for a certain influence upon political affairs. In the little States of Germany, as now constituted, that class is not strong, because Government can go on without its aid, and because the Prince, if coerced either by opinion or force, can always call in foreign assistance. But in a great State want of money involves paralysis, as we now see in Austria, and every victory gained by the people is, as far as outside interference is concerned, a durable one. It is not only probable, but almost certain, that were North Germany once united, the Liberal party in Prussia would be reinforced, first by all the Liberals of the smaller States, and secondly by all those whose importance had been diminished by annexation, a class likely to contain the very men which Liberals most need—men capable of conducting an administration. The reinforcement, moreover, will be entirely free from that instinctive deference for the Royal family which five generations of obedience and universal drill have impressed upon all Prussian minds. The "filial sentiment" will be absent, and the new members will be able to deal with the King rather as junior partners remonstrating with a senior than as children trying to resist the tyranny of their father. Absorption would, we conceive, therefore rather increase the chances of constitutional free-

Digitized by Google

dom in North Germany; would substitute a strong State for a federation of many weak States, and need not on either ground be displeasing to the people of this country.

IRELAND IN TRANSITION.

PEASANT PROPRIETORSHIP.

In an early paper of this series we called attention to the fact that Ireland is one of the few countries in which there have never been peasant proprietors. How far and in what way this circumstance may be connected with some of the leading traits in the character of the existing race of Irishmen, would be an interesting and perhaps not altogether profitless inquiry. We have no intention of embarking in it now further than to say that those qualities which are the well-known characteristics of populations of peasant proprietors, in whatever part of the globe they are found—solidity of disposition, frugality approaching to meanness, and an incessant and dogged industry—are precisely the qualities which the Irish people have not; from which we think it is not an unwarrantable inference that the *status* of proprietor of the soil—could it be realised on any considerable scale by Irish cultivators—is one well fitted to correct those habits of mind which have been found in them so obstructive of sustained industrial progress; and is therefore entitled to be regarded as a remedy peculiarly adapted to meet the special circumstances of the Irish case.

We do not know how far this view will, as a general proposition, be admitted; but an opinion has lately been much insisted on in connexion with the discussions on the state of Ireland, which, if it should be generally accepted, would go far to prepossess the public mind against all projects having for their object to enlarge the Irish cultivator's interest in the land which he tills. It is held by some—and the notion is supposed to have received confirmation from evidence taken before the Land Tenure Committee of last session—that if an Irishman by any means acquires a permanent interest in land, he will, by a sort of necessity of his nature, forthwith sublet it. This fact, as it is assumed to be, constitutes, it is considered, the true answer to the demand for "fixity of tenure," since it shows, it is said, what would be the practical effect of conceding that measure, namely this, that the present race of tenant-farmers, instead of taking advantage of their new position to improve their methods of cultivation, would use it only to escape from the rank of cultivators: they would at once proceed, we are assured, to sublet their farms; and we should thus have as the definitive result a new race of petty landlords receiving rents from a new race of still pettier rack-rented tenants. In short, what has happened in those parts of Ireland in which under favourable leases practical "fixity of tenure" has long existed, would, it is urged, soon become normal in the country. And it is plain that, if this would be the consequence of granting "fixity of tenure" subject to a rent, *a fortiori* it might be expected to occur if the present tenant-farmers of Ireland should become the proprietors in fee of their farms.

We do not deny that this argument, which we adverted to last week in another connection, contains much plausibility. But we believe it is as fallacious as it is plausible; and standing in the way as it does of the fair consideration of measures which we regard as of prime importance in connexion with our present subject—the form which industrial organisation is destined to assume in Ireland,—we shall make no apology for exhibiting once again, in a few words, its absolute untenableness.

Let us say at once that we disclaim altogether the advocacy of schemes of a revolutionary kind. The time has long gone by when expedients of this sort could for a moment be justified for Ireland; and the fact that what is called "fixity of tenure" necessarily involves revolution—involves, that is to say, the wholesale and violent transference of property from one class to another—is what constitutes for us the decisive objection to the scheme. We add that we should equally regard it as a decisive objection to any plan, whether for promoting peasant proprietorship or any other end, which involved the same condition. But we repudiate altogether the doctrine that either "fixity of tenure" or peasant proprietorship, however introduced, would be productive of the evils which those who oppose them on the grounds we have stated apprehend. That wholesale process of subletting which the argument supposes would, as on reflection will be seen, be a practical impossibility. The rents of the smaller and moderate-sized farms,—and, still more, the profit-rents which would be derived from subletting these,—would, it is plain, be wholly inadequate to the subsistence of their owners; they would, therefore, from the sheer necessity of finding a livelihood, be coerced into continuing in their present occupation; and, even were it possible for them to live on the rents of their present holdings, it must be remembered that the present tenant-farmers of Ireland form, with their families, the bulk of the Irish population. Where, then, supposing they were ever so possessed with the desire of subletting, are they, in the case supposed, to find tenants? The argument derives its whole plausibility from the common error of generalising from a state of things not only exceptional, but necessarily so,—a state of things traceable, as we showed last week, to a condition of society which is rapidly passing away, and which does not admit of being reproduced on a national scale.

This is, perhaps, the most important of the arguments of a presumptive kind against the project of a peasant proprietary, or of any scheme of this complexion, for Ireland. But there is another which we fancy also weighs with some minds, and which may be conveniently noticed here. It is a common notion in this country that this peasant-proprietor form of rural economy belongs to an early stage in social progress, and, consequently, may be expected to disappear with the advance of civilisation. The tenure of the soil, according to this view, is conceived as passing through successive phases, commencing with tribal possession, which coincides with the pastoral state, passing into cultivation under peasant proprietors, and finally issuing in the large-farm system carried on by capitalist farmers. And, agreeably with this view, it is thought that the capitalist *régime* having once become possible, the introduction of peasant proprietorship would be a retrograde step. There can be no doubt that copious illustration of the position in question might easily be adduced from general history. Mr Thornton has traced the course of development which we have stated, in the history of the Jews, Greeks, Romans, and English. Nevertheless, it may well be doubted whether there is anything normal or necessary in this order of things. Peasant proprietorship exists now extensively over the continent of Europe. Its establishment in some countries, and its extension in others, have been directly connected with the triumph of democracy, emphatically a modern power. In the United States, a country certainly not retrograde in industry, the cultivators of the soil are everywhere throughout the Northern States its owners. And we are not aware that in any of those countries peasant proprietorship shows symptoms of decline. In spite, therefore, of what has happened in some countries, there is plainly no warrant in general experience for assuming a law in social progress inconsistent with the permanent maintenance—or, at all events, the maintenance for many generations—of a peasant-proprietary system. But, in truth, for our present purpose there is no need to insist upon this point. Though it could be shown that the *grande culture* were destined to be the ultimate goal of agriculture, in the actual condition of Ireland, so backward as compared with countries which are now cultivated by peasant proprietors, it might still be good policy to encourage this system, as a transitional expedient, to help her forward on her course.

We have dwelt on these somewhat abstract considerations, because we believe they are at the present time practically obstructive of just views upon the question with which we are concerned. It remains to consider what the possibilities are, in the actual circumstances of Ireland, and, consistently with the maintenance of existing rights, of favouring the acquisition of property in the soil by any considerable portion of the Irish people.

And, first, let us see how the facts stand as regards the inclination and means of the people themselves. It seems certain that up to the present time no movement of any importance has occurred in this direction, notwithstanding the extensive changes which have in recent years taken place in the ownership of land in Ireland. The great bulk of the land sold has been purchased by the mercantile and professional classes, who in general have simply taken the place, as receivers of rents, of the owners whom they have displaced. That this, however, has not happened from indifference on the part of the cultivators to the acquisition of a larger interest in their farms there is abundant evidence to show. One fact alone seems to be decisive upon this point. It is well known that in the North of Ireland enormous prices are paid for the "tenant-

Digitized by Google

"right" of farms—"the good-will," that is to say, of the out-going tenant *plus* compensation for such improvements as he may have made. According to the evidence of competent witnesses before the Land Tenure Committee, it is not uncommon to find small farmers paying for this right a sum little short of the fee simple value of the land to which it applies. Now, when it is remembered that the right purchased on these terms is merely the "good-will" of a farm which is already subject to a good round rent, and that it is entirely unprotected by law, the fact, it must be allowed, is not a little remarkable, more particularly at a time when large quantities of land are in the market. Why, one naturally asks, do not these people who pay fifteen and twenty years' purchase for the mere right to occupy a farm—a right not even protected by law—have recourse to the Landed Estates Courts, and there, at a slightly larger cost, buy an equally good farm out and out? The phenomenon is, of course, confined to Ulster, where alone the opportunity of such purchases presents itself: elsewhere we must look for the evidence of the territorial passion in the decrees of Ribbon societies and in those agrarian disturbances carried on under their direction,—according to the Devon Commission, but "a methodised war "to obtain the Ulster tenant-right." That there is thus a strong and widely-diffused passion among the actual cultivators of Ireland to acquire a permanent interest in their farms, it is impossible to doubt; and the question to which we invite attention is, how it happens that, with abundance of land in the market, this feeling is so rarely gratified. We shall probably be told, for the simple reason that those who experience the feeling have not the means of gratifying it: that there is, in short, a want of capital in Ireland. But this position we take leave to dispute, at least in the general form in which it is laid down, and which the argument requires. One fact will throw some light upon the question. Within the last twenty years the private balances and deposits in the banks of the country increased from 5,568,000*l*.—the point at which they stood in 1841, some years previous to the famine,—to 14,389,000*l*. their amount in 1862. At the present time they are probably not less than three times what they stood at twenty-five years ago. Now, there are good reasons for believing that this augmentation is due mainly to the accumulations of small farmers. This, we know, is the opinion of men extensively conversant with Ireland, and it is confirmed by numerous facts. For example, the low rate of interest paid on deposits by the Irish banks affords more than a presumption that the small farmers are the depositors, since they are the only class at all likely to invest their savings in any large amount on such an inducement; and secondly, there is the decisive circumstance that the banks in which the increase has been largest are those whose branches in the rural districts are mose numerous. We are thus remitted to the problem, how it happens that with many millions standing to the credit of the small farmers of Ireland, with an eager desire amongst them to become the possessors of land, and with large quantities of land constantly in the market, no considerable portion of the land of the country has yet, as property, come into their hands. We believe the true explanation is to be found in the state of our land laws. It does not answer to sell land in quantities sufficiently small to suit the demand of the run of Irish cultivators. The cost of transferring land in small portions is, relatively to the purchase money, very considerable, even in the Landed Estates Court. The cheapest conveyance that could be drawn in that court, where the utmost economy, consistent with the present mode of remunerating legal services, is strictly enforced, would, irrespective of stamp duties, cost 10*l*.—a very sensible addition to the purchase of a small peasant estate: a conveyance to transfer a thousand acres might not cost more, and would probably not cost much more. But, in truth, the mere cost of conveyance represents but the least part of the obstruction, A far more serious impediment is the complicated state of the ownership of land, which renders it frequently impracticable to subdivide a property into such portions as would bring the land within the reach of small bidders. A statement made by Judge Longfield, in his examination before the Land Tenure Committee, sets this point in a striking light. "Sometimes," he said, "I have "known the occupying tenants club together and buy a larger "lot, and agree to leave it to the parish priest, or somebody "else whom they would depute, to divide it, and to say in "what proportions they would pay the money." With such facts as these coming to the surface one can have little doubt where the obstacle to the introduction of peasant properties into Ireland really lies. As for the remedy, it is at once obvious, and in the present state of the public mind, obviously impossible. A registry of titles may succeed in reducing this complex condition of ownership to its simplest expression; but where real complication exists, the difficulty is not to be got rid of by mere simplicity of form; and a registry of titles—while the powers of disposition at present enjoyed by landowners remain undiminished, while every settlor and testator has an almost unbounded licence to multiply interests in land, as pride, the passion for dictation, or mere whim may suggest—will, in the writer's opinion, fail to reach the root of the evil. In spite, therefore, of the accumulating evidence of the vanity of those legal restraints, which, to borrow M. Lavergne's not too strong language, "destroy property in order to preserve it," there seems but small reason to hope for an early removal of the only really serious obstacle to a movement which would more than any other correct the worst weaknesses of the Irish character, and furnish in the most complete form that security for outlay the want of which now paralyses Irish industry.

We have thus attempted to furnish an answer to the question raised in a former paper of this series—By what course can the State, consistently with free-trade principles, so act on the industrial organisation of Ireland as to preserve for that country and for the empire the bulk of the present population? Our reply, in effect, has been—by rendering it possible to carry on that sort of industry for which Ireland is naturally suited on farms of moderate dimensions. It seems to us that this may be accomplished by no more revolutionary course than that which we have indicated, and which lies in acting out the maxim that the labourer is worthy of his reward—of that natural reward which consists in the thing he has produced. A tenant-compensation scheme, such as that of which we have sketched the outline, would, it seems to us, give practical effect to this principle; and the removal of the existing obstructions to the acquisition of land in small portions by the cultivators, the nature of which obstructions we have considered in this paper, would be only a more complete and expeditious mode of attaining the same end. With the securities for outlay and the inducement to improved cultivation thus afforded, it seems not an unreasonable expectation that the ten or twelve millions sterling of agricultural capital now lying in deposit in the Irish banks would be transferred to active employment on the Irish soil, and in this more productive occupation rapidly augmented: agricultural improvement would, for the first time, become a good speculation for tenant-farmers in Ireland, who, with the advantages of improved methods and more liberal outlay, would enter the competition with the *grande culture* on something like terms of equality. On the other hand, if nothing effective in the direction we have indicated be done,—if Englishmen persist in believing that laws under which agriculture has flourished with *them* must of necessity be suited for a people pervaded by ideas and habits very different from theirs, the result cannot surely be doubtful: the small farmers, with their present wretched system of cultivation, must inevitably succumb; that half of the area of Ireland now held under farms of moderate size will undergo consolidation: the country will, doubtless, be vastly improved as compared with its present condition; but improved at the cost of its existing inhabitants, and of permanent loss in power and *prestige* for the British Empire. J. E. C.

BOARD OF TRADE RETURNS.

From the returns issued by the Board of Trade, it appears that the value of British and Irish produce and manufactures exported during the first nine months of the present and two previous years was as follows:—

	£
1863	104,294,713
1864	123,404,161
1865	119,717,377

The above figures show a falling off in this year's shipments, when compared with 1864, of 3,686,784*l*. Compared with 1863, however, there is an increase of 15,422,664*l*. During September only, the exports were valued as under:—

	£
1863	14,542,862
1864	14,687,942
1865	17,316,681

Digitized by Google

During the first eight months, the value of the goods and produce imported was :—

	£
1863	118,099,465
1864	141,012,477
1865	115,670,434

The annexed return shows the increase and decrease in the real value of the principal articles imported in the first eight months of the current year, compared with the same period in 1864 :—

LANCASHIRE AND THE BANK RATE OF DISCOUNT.

(COMMUNICATED.)

THE criticism upon the action of the Bank of England, at p. 1299 in the last number of the ECONOMIST, appears to be very just and fair. Going a little further back in point of date, another blot may be found.

The reductions of rate in May and June were at the time quite uncalled for, because looking at the comparative amounts of the other deposits and other securities, it was apparent that the public were allowed to lean upon the Bank more than they should have done, considering the season and the circumstances of the times, without making an adequate requital in the shape of interest.

The ground of the action of the Bank at that period was supposed to be their not finding in their securities what they considered to be a due proportion of bills of exchange. The fact was that the bills did not exist. There had been a pause in the trade to the East, which only revived again after that time. Subsequently to the drop in the rate of interest, long-dated bills became more common, while by-and-by a great demand for manufactured goods set in from America, which has recently still further increased the amount of paper, that trade being done more upon direct credit than formerly.

When any sudden expansion of business takes place requiring larger transfers of floating capital from hand to hand, pressure may be felt in London by an increase of labour at the clearing house, but it produces very little effect on the amount of active circulation. In Manchester, on the contrary, it tells immediately upon the currency, for about one-half of the turn over of the current accounts of the banks there is made in notes and coin. The great pay-days occur monthly—the last Friday, the following Tuesday, and the first Tuesday of the month. Last month the demand for notes and gold occasioned by these was confined within the space of five days, the interval covered by one Bank return.

As the payments of the last week in September and the first week in October were probably more than double the average weekly payments, what a great and sudden use of circulating medium was concentrated in those five days! Of course, these notes return shortly either on the spot or in the neighbourhood—at Liverpool, for instance, in payment of cotton invoices; but the sudden drain on the reserves of the Bank of England, as shown in the return published 6th of October, was no doubt caused by an extraordinary employment of cash in Lancashire. Large amounts are again required now; but they will be spread over three weeks. Next month the demand will be more concentrated, and probably still large. After that time the present collapse of business will, no doubt, exhibit its consequences in a diminution of the amount required for the monthly pay-days.

Digitized by Google

Some economy in the use of bank notes always takes place in Lancashire when the Bank rate exceeds 5 per cent., because bankers' drafts at 3 months' date can, in terms of the contracts, be passed in payment of twist and cotton invoices, and are some times accepted in payment for cloth, but the issue of these merely varies the incidence of the pressure. The merchant who pays his acceptance by the proceeds of his produce comes into the money market as the discounter instead of the buyer of twist and cotton. The use of bank notes is, however, in the meantime economised, for bills passing from hand to hand act very much as cheques do in this respect.

One thing has been made very clear by the recent movement in the Bank returns, and the sudden rise of interest occasioned thereby, namely, that the directors were either not aware of the rapid increase of business taking place, or else had overlooked the certain drain of notes and gold which must necessarily follow.

There has been no cause for alarm. A large business, at unusually high prices, of course employs a larger capital than usual, but the resources of the local banks have been adequate to meet the demands upon them; they, doubtless, all held an ample supply of convertible securities or reserves at call or on short notice. Their surprise, therefore, may be imagined when they discovered the attitude assumed towards them by the Bank of England. On the 20th October, the agent in Manchester received instructions to charge to bankers on any discounts or advances upon bills that they might apply for 1 per cent. more than would be charged on ordinary trade bills received direct from the drawers.

If this were done with any idea of economising the issue of notes at Manchester, it was an entirely futile attempt, for the notes, if required, must be had; and whether they are procured by the collection of due bills in London, by calling in reserves, or by realising securities, the funds have all to come from London for issue through the Branch Bank of England.

A general advance in the rate of discount was fully justified by the circumstances of the last two months, If an extra rate had been put upon the operations of Lancashire and Yorkshire generally (seeing that the rush of business to the manufacturing districts had caused the rapid fall in the reserves of the Bank), one might have understood why such a step was taken, but a measure pointed specially at the Manchester banks, who, like the branches of the Bank of England, are mere agents in the process of interchange, seems utterly senseless. Had the Manchester banks been notoriously supporting speculation (as those of Liverpool are sometimes accused of doing), there might have been a plausible plea for such an attack upon them; but, under present circumstances, it will surely be characterised as very unjustifiable.

Were any real difficulty to occur, which the Bank of England were called upon to aid in relieving, she would best protect herself by conciliating and not insulting intermediate agency, which really acts as a buffer between her and the pressure of the public. When no real difficulty exists, the natural tendency of her present policy must be to cause excess of the active circulation, by inducing the banks to hoard notes and coin, while a larger proportion of ill-secured paper will be thrown upon the Bank of England, and her receipt of the bills bearing the most numerous and best endorsements must be curtailed.

Agriculture.

THE GAME QUESTION IN THE MIDLAND COUNTIES.

OPINION on the game question is becoming daily more pronounced and practical throughout our agricultural districts, and in the midland counties of England it has latterly assumed a form and proportions which the game-preservers and their abettors find it impossible to ignore. During the late election for the Northern division of Warwickshire the Game Laws and game-preserving formed topics which had great influence on the farmers of that district, and afforded indications of a still more effective influence at future elections. Even Mr Newdegate, one of the members for that division, whose seat cannot be said to have been assailed, has come forth in defence of game preservation in a very characteristic manner. On this defence we may hereafter find it useful to comment. Our present purpose is to draw attention to the treatment the game question has received at the Midland Farmers' Club, the members of which are amongst the most active and influential of the midland counties. The subject was opened by Mr Robotham, of Drayton Bassett, near Tamworth, who read an elaborate paper on the subject, concluding with a letter he had received from Mr Bright, whose suggestions, if acted upon by the farmers, would speedily settle the game question. We shall hereafter refer to Mr Bright's letter, for we are by no means sure that the farmers have not entered upon a course which must ultimately settle the question, although not in the direct and logical way suggested by Mr Bright. Every true friend to British agriculture will watch the development of agricultural opinion and will follow the course of agricultural action on this question with interest and, now, with hopefulness.

In the opening of his lecture, Mr Robotham invited discussion, that the knowledge and experience of other members might be brought to bear upon his own views and statements. He had been himself a sufferer from game-preservation. He also mentioned the case of Mr Owen Bennion, who, on leaving Ruckley Grange farm in 1859 (by reason of its being infested by game), sold the crops of 72 acres of good land for the aggregate sum of 46*l* 15s. The details are instructive:—

	a.	r.	p.		£	s	d
Lot 1, a rick of wheat the produce of	5	2	16	.....	5	5	0
Lot 2, a rick of rye the produce of	3	3	0	.....	5	0	0
Lot 3, a rick of barley the produce of	8	0	0	.....	5	0	0
Lot 4, a rick of barley the produce of	9	2	14	.....	11	0	0
Lot 5, a rick of barley the produce of	16	1	14	.....	0	10	0
Lot 6, a rick of barley the produce of	11	2	14	.....	17	0	0
Lot 7, a rick of wheat the produce of	17	2	10	.....	3	3	0
Total	72	1	29		46	15	0

Besides, there "was a large quantity of meadow land which had been boned at the tenant's expense in 1857, and had no stock upon it, except rabbits, from 22d of Sept., 1858, and the produce of this up to the 2d of Feb., 1860—a period of eighteen months—was sold for 7s 9d." This sale took place on the 20th of Sept., 1859. "The eating of the young grass on 45 acres, up to the 1st of Nov., was sold for 6d per acre."

Mr Bennion, being a man of capital, had retreated in time from the game-preserved farm, and is tenant of "another farm, a happy and prosperous man, and the landlord became an insolvent debtor." But it is not often that a farmer can escape scathless from a game-preserved farm. He is commonly too much impoverished by the game to be accepted by a non-preserving, and therefore usually an improving, landlord. And, besides, his late landlord or his agent would speak of him as "having left his farm in a foul state," or that "he has not farmed with sufficient spirit," or that "he had been very troublesome about game" or the like; and such reports from one landowner to another were often found to interfere with a farmer who had left a game farm being accepted as a tenant on another estate. But it is absolutely impossible to farm well where game is abundant. Apart from the actual destruction of crops, "the game nuisance has a most depressing effect, both morally and physically, on a man." "Therefore," said Mr Robotham, "do not be surprised if a man who is placed in such a predicament should go on the old jog-trot way as long as he can, and spend his all in trying, year after year, to meet his engagements; and when he can do so no longer, then comes the game-preserver, as landlord, and sweeps off the little he has left for rent, in many cases not leaving a farthing for his other creditors—the tradesmen who have been helping to carry him on."

Every game-preserved estate will prove too truly the truth of that picture.

Mr Robotham then referred to the opinions against the possibility of farming well on a game-preserved farm, given by the late Lord Hatherton and the late Mr Pusey before the Select Committee of the House of Commons on the Game Laws in 1846, and to other evidence given on that occasion. He then added: "This was in June, 1846. In February, 1865, I know where there were seventy-five hares counted on one field of wheat of only six acres." The effect of a repeal of the Game Laws, he said, would be "that game will be kept in moderation, and that the landlords will become what their fathers were, sportsmen in the true acceptation of the word—viz., hunt their game and kill it, instead of, as at present, making themselves aristocratic butchers by having it driven to them to be slaughtered." The gamekeepers are amongst the most vexatious incidents to modern game-preserving; they are generally believed to preserve as much for their own private profit as for their masters' sport, and their relations with the tenant-farmers are commonly the reverse of amiable. Much was said on this head by the lecturer.

He also gave a calculation to show that the loss of food from game-preserving—the substitution of hares and rabbits for sheep which necessarily takes place—amounted in this country to 10,000,000*l*. Whether that be correct or not (and we see no reason to think it exaggerated), it is quite true that in estimating the loss to the public which game-preserving occasions by keeping back husbandry, where otherwise it would be progressive, must be taken into account. He thinks the landlords should trust to their tenants to preserve game, and that one hare to four acres of land, with an abundant supply of partridges (which farmers don't object to), would furnish ample sport to the landlord who really is a sportsman. And this seems to be the main practical suggestion most frequently made by farmers. And in a sense they are right; for with gamekeepers must go the battues,

Digitized by Google

while rabbits would soon be extirpated. The modern and more stringent laws for preserving game were of course denounced, as they always are where farmers congregate. In the discussion which followed,

Mr Brown endorsed many of Mr Robotham's views, and after stating that he regards night poachers as thieves said, "it spoke volumes in condemnation of the game-preserving system, that it made the tenant-farmer look upon the midnight depredator as his best friend, and the thief-catcher (the gamekeeper) as his most inveterate enemy." Numerous others spoke on the subject, some having more and some less hope of inducing landowners to deal with their tenants justly and wisely in regard to game.

Mr Lowe said farmers "should refuse to take land from game-preserving landlords; he thought, so long as the farmers themselves were willing to take farms on which game was preserved to an improper extent, so long would game have to be complained of by them. He thought the most effective way of endeavouring to get redress for this great grievance of the Game Laws was to petition the House of Commons to inquire into the subject."

That farmers should petition for the repeal of the Game Laws, we fully admit, but as for inquiry, it is wholly needless. Everything that could be told now in regard to the Game Laws and game-preservation is to be found in the evidence of the Committee of 1846, with this addition, that the evils are 55 per cent. greater than they were then.

Mr King, in reference to Mr Lowe's remark, that farmers should refuse to take land from game-preserving landlords, said landlords might die, "and their successors might be very different men from what they were. He had known many tenants who, under their old landlord, preserved the game on their farms and killed it, or did as they pleased with it, but a new landlord came in, and things were quite altered. It did not suit them to move off with their old landlord, and so, in some instances, they had to endure vexations, and losses, and oppressions." And he added, "he had seen enough of game-preserving and its consequences to know that a game-preserving landlord was an enemy to himself, an injurer of his country, and the ruin of his tenantry and his neighbourhood." The only safety of a tenant-farmer is to resist any reservation of game, and then if protected by a rational lease any change in the ownership of his farm will be of consequence to him. Thus, Mr Sydney said, "He had no restrictions as to game, or any other nonsense. That evil and nuisance rested entirely with the tenant's themselves. He was desirous of taking another farm for his son, and he had had the refusal of several good farms, *but he had declined them on the score of the blackguard game question*.....When he took a farm he intended to pay rent, but he did not intend to keep another man's stock." This is the right position for a farmer to take up, and he believed that if they would do so generally they would be so backed by public opinion that all the better disposed landowners would give way. They will not do so, however, without a decided pressure. Thus, Mr Sydney said—"He would not take a farm under a game-preserving landlord. After one of their previous meetings, during the tenure of land discussion, he had the honour of riding with Lord Lichfield, and the whole conversation came up. His Lordship said he (Mr Sydney) could not expect to take a farm on the conditions he had stated. And he replied, 'of course he did; and he had got one; and no doubt he should take another.' He farmed to the best of his ability, and spared no expense; but tell him he was to have his crops destroyed by vermin, and he said he would not. And so he told Lord Lichfield that he would shoot any mortal thing that ate his crops. He assured them what they had to do was to make a firm stand, and not take the farms if they were to be robbed (he could give no better expression of it than 'robbed' (cries of 'The right term') of their property by the unlimited support of game. How many tenants were there who took farms with a limited quantity of game, but in a short time the game increased tenfold? They then went and lodged a complaint against the game, and the landlord told them if they did not like the farm they might leave it. That was very nice satisfaction for a man who had laid out all his capital and made all the improvements he could, expecting to stay some time! He (Mr Sydney) said they ought to do away with such rubbish. They should not take a farm under a game-preserving landlord till they had mutual covenants with the landlord for game."

Mr Bigge, a land agent, said that on an estate in Shropshire, under his management, he had got rid of the gamekeepers, and left it to the tenants to preserve and save enough for the landlord, who was fond of sport, and the result had been quite satisfactory to both landlord and tenants.

Mr Burbury referred to the iniquitous plan of letting the game reserved to the landlord to strangers.

While Mr Masfen pointed out by the law of England that unless the game was expressly reserved to the landlord it passed with the land to the tenant. "So that really and truly it was an act the farmer himself committed. The law of the land gave them (game animals) to the tenant, who by his own act parted with it."

Mr Wright "agreed with Mr Sydney in not taking game farms, and he had given one up himself on that account. He thought he had sufficient capital to stock the farm, and would not trouble his landlord."

It was finally resolved, 1st, "That this club desires in the most emphatic manner to call attention to the serious losses which were being inflicted on tenant-farmers in many localities by the excessive preservation of game, and to the necessity that exists for a general and earnest appeal to be made by landed proprietors in order to induce them to take immediate steps for abating the evil;" and 2nd, "That the excessive preservation of game is not only injurious to the tenant-farmer, but at the same time it is a fruitful source of crime, entailing a great annual loss in prosecutions, which are increasing from year to year; while the Game Laws at present in force are most objectionable, as leading to the opinion on the part of a portion of the population that those laws are the result of class legislation, and prejudicial to the welfare of the country at large." Now the moral of all this is that, in order to get rid of the incubus of game preserves, farmers must in the main help themselves. This they will do, in part, by such effective expressions of opinion and out-spoken statements of facts as we have here recorded, and still more, by each farmer of capital refusing to take land from a game-preserver, and in insisting on having complete control of the mage.

Foreign Correspondence

[FROM OUR OWN CORRESPONDENT.]

PARIS, Friday.

The *Moniteur* has published the following return of the Bank of France, made up to the 26th inst. The return for the previous week is added:—

DEBTOR.	Nov. , 1865. f c		Oct. 26, 1865 f c
Capital of the bank	182,500,000 0	.....	182,500,000 0
Profits, in addition to capital	7,044,776 2	.....	7,044,776 2
Reserve of the bank and branches	22,105,750 14	.....	22,105,750 14

Sundries	11,738,817 23	.....	10,339,256 42
	1,460.635,442 26	.....	1,432,340,159 72

The chief features in the Bank return of to-day, compared with that of last week, are an augmentation of 42,629,000f in the discounts, of 20,672,000f in the circulation of notes, of 21,290,000f in the deposits, and a decline of 12,249,000f in the coin and bullion. The increase in the discount accommodation has afforded pleasure, as it always does, but the other items have attracted no special observation.

The Bourse has naturally received with favour the measures of economy proposed by the Government and referred to below. To-day some uneasiness has been occasioned by Mr Seward's speech, and by reports that the King of Italy contemplates abdication; also that the new outbreak of the Arabs possesses greater gravity than has been represented; but, nevertheless, no bad effect has been produced in prices. The monthly liquidation in transactions in *rente*, which took place to-day, has gone off favourably. The following are the week's quotations:—

	Oct. 26. f c		Nov. 2. f c

An unusual number of Cabinet Councils have been held lately, and the public wondered what they could be about. On Saturday last the mystery was cleared up: his Excellency M. Fould had been occupied in driving into the heads of his colleagues the great fact that economy was indispensably necessary, in consequence not only of expenditure having been carried to excess, but of the revenue showing less elasticity than it used to do, and, in truth, beginning to give way. The Minister's operation happily succeeded, for on that day it was announced in sundry newspapers which are supposed to be "inspired" at the Ministry of Finance, that "the Emperor,"—the credit of every popular measure is always ascribed by the Ministers to his Majesty,—had been pleased to order reductions in expenditure to the amount of 30,000,000f,—the reductions to be applied principally in the army, the navy, and the Customs. The said sum is what Mr Disraeli would call a flea-bite in the gigantic Budget of France, but that M. Fould—pardon, the Emperor—should have succeeded in obtaining it, is justly regarded as an incident of importance, inasmuch as it proves that the Minister has gained the upper hand over his wasteful colleagues, and as the public knows well, he is determined, so far as in him lies, to have economy. It is, however, to be borne in mind that the promised reductions can only take effect in 1867.

The public has been further informed that hopes are entertained by the Minister of resuscitating the operation of the sinking fund, which has been for some years suspended,—or rather of substituting a *bona fide* sinking fund,—that is the actual buying up of portions of the national debt by means of surplus revenue, as in England—for the fictitious fund which has heretofore found favour in French eyes. The possibility, however, of France, the country of chronic deficit, being able to do any such thing—at all events under her present political regime—seems so strange that but faint credit is placed in it.

In consequence of economy being resolved on, the statement is made that the scheme of M. Behic, Minister of Agriculture and Commerce, for raising 300,000,000f for the execution of public works, will be indefinitely adjourned. But you may remember that when it was broached it encountered energetic opposition in influential quarters, and that the Minister of Finance in particular declared that he would not allow it to be adopted. It was accordingly dropped; and why it should be mentioned now does not clearly appear.

It is officially announced by the French Government that the receipts in the Custom-house of Vera Cruz, in the month of August last, were 654,809 piastres, and were 315,180 piastres more than in August of the year preceding. These figures testify not only to an increase of trade, but to the fact that under French superintendence the Customs functionaries in Mexico have become more active and more honest.

The Receiver of Taxes at Havre has issued the following announcement:—"The conversion of the first Mexican loan leaves disposable a certain number of obligations in every respect similar to those subscribed by the public, which will be delivered without expense or brokerage charges at the office of the Receiver of Taxes, at the quotation of the Bourse of the day preceding that on which the demand is made." The obligations referred to are, no doubt, part of those which were given by the new Mexican Empire to the French Government in part payment of its debt to France. Heretofore, circumstances have not been favourable to the negotiation of them; and even at present quotations the sale of them will cause serious loss to the Treasury. That they should be offered to the provincial public through the tax collectors (no doubt all tax receivers have made similar notifications to that issued by the official at Havre), instead of being presented on the Bourse at Paris in the usual way, may seem singular; but your readers will see that a larger sum can be gained by selling them in detail throughout all France than by offering them *en masse*, or in portions more or less considerable, in the central money market.

Some newspapers assert that the French Government has resolved on withdrawing its army from Mexico at no distant date. But though such a measure is undoubtedly most desirable as regards both economy and possible complications with the United States, it cannot evidently be adopted before the throne of Maximilian shall be consolidated. Otherwise, the French Emperor would have nothing but humiliation to present to France for all the sacrifices in men and money she has made to found the Mexican Empire; and he would stand convicted of a political blunder which would lessen his *prestige*, and would tarnish his fame as a statesman for ever. Moreover, France would, as a matter of good faith, be obliged to take on herself the last two Mexican loans, for they were only raised in the belief that she would defend the Empire she set up, and these loans would be to her a heavier burden than the maintenance of an army in Mexico.

The Superior Council of Commerce is continuing with laudable activity its inquiry respecting banking and currency. Baron James de Rothschild and Baron Alphonse de Rothschild have appeared before it; so have M. Deniere and M. Ernest Gouin of the Chamber of Commerce. Complaints are made on all sides, and at Bordeaux, Marseilles, and other great towns as well as at Paris, that no reports of the proceedings of the Council are published daily. In withholding them the Council renders the inquiry practically useless. For it was undertaken to enlighten the public on matters on which, in this country, considerable ignorance prevails; and it is only by newspapers that enlightenment can be spread. To suppose that the public will study a heavy blue book of several hundred pages, for which the evidence is to be reserved, is absurd. And besides, if the custom generally followed here in official inquiries be adhered to, the blue book will not be published for eighteen months or two years to come; by which time probably all the interest once felt in the inquiry will have subsided.

A new notification has been made at the Bourse that the Caisse des Depots et Consignations will continue its purchases of *rentes* during the month of November, employing 398,000f per day; but it has produced no effect on the market.

The Societe Generale has this day, pursuant to announcement, commenced the delivery of the bonds of the converted 5 per cent. Ottoman General Debt. The bonds bear the French stamp, and are quoted at the Bourse.

According to Customs returns, which have just appeared, the value of imports for consumption in the first nine months of the present year was 2,014,747,000f; in the corresponding period of last year it was 1,855,558,000f; in that of 1863, 1,796,290,000f; and the value of exports of French productions in the first nine months of this year was 2,240,399,000f; same period last year, 2,228,583,000f; same period of 1863, 1,875,427,000f. In the eight months of the year the imports were 1,770,097,000f; and the exports, 1,932,846,000f,—from which it appears that there was an extraordinary increase in trade in the course of September, namely, 552,203,000f, or 22,088,000*l*. It would be very desirable to learn with what countries this augmentation was obtained; but the Customs returns in France are drawn up in such a bungling way that, whilst giving elaborate details on matters of small or no importance, they do not present the total trade with different countries. Some of the principal articles, however, stand thus, the difference between the figures representing the increase for September:—

	Value of Imports. First eight months of 1865. francs.		First nine months of 1865. francs.
Wool	168,645,000	.....	195,873,000
Silk	189,290,000	.....	213,359,000
Sugar	100,551,000	.....	108,939,000
Coffee	56,792,000	.....	64,371,000
Flax	50,608,000	.....	57,626,000
Cotton	260,029,000	.....	289,834,000
Coal	80,471,000	.....	91,754,000
Hides and skins	72,533,000	.....	79,214,000
Indigo	19,606,000	.....	19,899,000
	Value of Exports.		
	First eight months of 1865 francs.		First nine months of 1865. francs.
Silk tissues	251,486,000	.....	299,868,000
Woollen tissues	221,376,000	.....	273,178,000
Cotton tissues	69,971,000	.....	78,383,000
Flax and hemp tissues	17,157,000	.....	18,392,000
Turnery, buttons, &c.	105,278,000	.....	122,404,000
Wines	178,285,000	.....	198,616,000
Brandies	37,172,000	.....	41,782,000
Ready made clothes	72,173,000	.....	79,530,000
Silk	75,925,000	.....	85,977,000

The precious metals, which are kept apart from the imports and exports of merchandise, present these results:—

	Imports. First eight months of 1864. francs.		First nine months of 1865. francs.
Gold bullion	41,794,644	.....	43,178,487
Coin	256,073,325	.....	268,412,616
Silver bullion	61,430,389	.....	68,453,062
Coin	107,120,863	.....	117,116,181
	466,419,161	.....	497,160,346
	Exports.		
Gold bullion	26,289,765	.....	26,841,003
Coin	168,243,111	.....	174,427,755
Silver bullion	35,684,527	.....	36,168,727
Coin	51,869,246	.....	52,592,705
	282,086,649	.....	290,390,191

Digitized by Google

It thus appears that the imports of the precious metals in September were 30,741,185f, and the exports only 8,303,541f;—consequently 22,437,644f (897,505*l*) were added to the stock.

The Vieille Montagne Zinc Company announce the payment from the 10th November next of a second dividend of 10f per share for 1864.

The liquidation of the Caisse Generale des Chemins de Fer, the famous speculating company founded by M. Mires, which fell in his great disaster, notify that they will be able to make a new distribution of 10f per share, being the third. It is to take place from the 1st December next.

The Lyons and Mediterranean Company announces anew the payment, from the 2nd November, of 25f per share on account of dividend for 1865.

The share and bondholders of the Seville-Xeres and Cadiz Railway, a very unfortunate enterprise, held a meeting the other day, and appointed a committee to examine into and report on the situation of the company.

The Direct Railway from Brussels to Lille and Calais is now paying 7f 50c per privileged share, and 5f per dividend share.

The Banque de Credit et de Depot des Pays Bas is to pay at Paris and Amsterdam 8 florins, or 17f per share, on account of dividend for 1865.

The report of the Society Espagnole Mercantile et Industrielle for 1864, which has just been published, shows that the net profits were 3,675,510 reals (rather more than 38,000*l*) which were sufficient to enable a dividend of 6 per cent. to be given to the shares.

The failure of the bank of M. Schmidt, of Berne, is announced. The liabilities are large.

The following is the market report:—

FLOUR AND WHEAT.—No market was held at *Paris* yesterday, the day being a holiday. But this morning flour, six marks, was 53f 79c the sack of 159 kilogs, disposable, and 54f for December; and choice wheat was 28f the sack of 120 kilogs; ordinary, 25f; other sorts, 24f.

COTTON.—Business was less active at *Havre* in the week ending Friday, and there was a reaction in prices of certain sorts. The sales were 4,699 bales, and the arrivals 3,813. The stock was 23,000 bales. The closing quotations were 5f lower for Indian, except Coconada, which was unchanged, and 10f lower for other sorts, except Jumel unchanged. Low New Orleans was consequently 205f the 50 kilogs; good ordinary qualities in Broach, 225f; in Tinnevelly, 225f; in Madras, 230f; in China, 225f; and in Jumel, 300f. On Monday and Tuesday of the present week, the market was very dull. Yesterday, on account of the holiday, no business was transacted. A telegram states that this week the market was calm, and prices had a downward tendency.

COFFEE.—The demand was regular at *Havre*, in the week ending Friday, and prices were firm. 510 sacks Hayti Port-au-Prince, 82f to 83f 25c the 50 kilogs in bond; 100 Cape, 84f; 200 Gonaives, 87f; 1,800 San Thomé (African coast) for delivery from Lisbon, 78f; 183 Bahia, 67f 50c; 200 ditto, damaged, 62f; 1,750 Rio, not washed, 63f to 87f 50c; 2,330 ditto, for delivery, 78f to 83f; 598 washed, 95f 50c; 150 Santos disposable, 73f; 400 for delivery, 70f to 82f; 900 Malabar, 88f to 92f; 150 Salem, 103f; 144 bags, ditto, 127f duty paid. The arrivals exceeded 5,000 sacks. This week, Hayti, 82f and 82f 50c; Cape, 85f; Malabar, 82f; Rio, 61f to 82f, and at prices kept secret; washed, 105f. At *Bordeaux*, last week, 115 bales Reunion for delivery at prices not stated; 355 Rio, washed, 107f; 369 at 103f; 74 at 107f 50c; 280 La Guayra, 90f; 300 Winard and 25 casks plantation at prices not given; 13 chests Caracoly, 114f. This week, Rio washed and not washed at prices not stated, and by auction La Guayra sound, 95f to 95f 50c. Nothing done at *Nantes*, last week, and no sales this week. At *Marseilles*, last week, 400 sacks Brazil, 80f; 185 at 78f; 377 at 70f. By auction, 831 Rio, 70f to 80f 75c. This week, Rio, 75f.

SUGAR.—The sales at *Havre*, in the week ending Friday, were 400 casks French West India, 49f to 49f 50c the 50 kilogs, bonne quatrieme, duty paid; 78 for delivery, 49f 25c; some usine, 50f to 59f, on sample; 268 casks Porto Rico, 50f, bonne quatrieme; 380 casks Havana, in French and Spanish ships, 32f, No. 12 in bond. The arrivals were not important. This week, French West India, 50f, bonne quatrieme; usine, 54f to 57f 50c. At *Bordeaux*, last week, 280 casks Martinique at the previously established price of 49f 50c, bonne quatrieme; some usine, for delivery, 54f; 5,169 sacks Reunion, to be taken at Nantes, 51f 50c to 52f 50c. This week, Reunion, to be taken at Nantes, 53f and 53f 25c, bonne quatrieme; usine at prices not stated; Santiago, 44f 50c, on sample. At *Nantes*, last week, as many as 11,204 sacks Reunion were taken at 51f 75c to 52f 25c, bonne quatrieme; 1,207 indifferent quality, 48f 50c; some French West India, 48f, bonne quatrieme; usine, 61f. At *Marseilles*, last week, some French West India, 30f 50c, bonne quatrieme of Havre. This week, ditto, 30f 75c, same sort.

INDIGO.—At *Havre*, in the week ending Friday, the demand was regular. 45 chests Bengal, part at 9f 15c the ½-kilog, the rest at prices kept secret, but which were understood to be without variation. 2 chests Kurpah at prices not given. The arrivals were 6 chests. This week, Bengal at prices kept secret. At *Bordeaux*, last week, 99 chests Bengal, 1 Madras, 11 Kurpah, at established prices. This week, Bengal at prices not given.

HIDES.—At *Havre*, in the week ending Friday, 671 Buenos Ayres dry ox, 107f 50c; cow, 92f 50c the 50 kilogs; 4,100 La Plata salted cow, 48f 50c; ox light, 53f 25c to 56f; ox heavy, 60f; 1,275 Rio Janeiro salted ox, 51f 50c to 52f; 661 ditto cow, 59f; 1,600 Pernambuco dry salted, 65f; 1,000 Valparaiso dry salted ox, 78f; 250 Buenos Ayres horse, 6f 50c each; 3,900 La Plata salted, for delivery, 41f 50c; 2,000 ditto heavy, 42f 25c. The arrivals were about 13,500. This week, Rio Janeiro salted ox, 52f; Rio Grande, 44f 50c; dry ox and cow, 82f 50c; Buenos Ayres, 45f; ditto, dry cow, 80f and 82f; ox, 95f.

WOOL.—At *Havre*, in the week ending Friday, 116 bales Buenos Ayres unwashed, 1f 60c to 2f 30 the kilog; 7 bales La Plata sheepskin rasons, 72½c. A quantity of different sorts of damaged was sold by auction. The arrivals were under 200 bales. No sales this week.

TALLOW.—At *Havre*, in the week ending Friday, prices advanced considerably, in consequence of news from England and Paris. 240 pipes La Plata disposable, or in part, 60f to 62f 50c the 50 kilogs; 1,250 ditto, for delivery, 60f to 63f 50c; 45 casks New York a la marque disposable, 61f to 64f. The arrivals were 101 casks from Monte Video. This week, La Plata for delivery, 61f to 62f. At *Paris*, this morning, the 100 kilogs, octroi duty not included, were 125f the 100 kilogs.

SPIRITS.—At *Paris*, to-day, 3-6 90 degs. were 50f the hectolitre. At *Bordeaux*, on Monday, 3-6 Languedoc, 86 deg., 57f the hectolitre; beetroot, first quality, 90 deg. 57f.

COMMERCIAL AND MISCELLANEOUS NEWS.

Messrs Dymes and Co., writing from Madras on the 27th September, thus allude to the state of the money market at that port:—On the 19th and 26th instant the banks again raised their rates two per cent. all round. They now are at nine per cent. for loans on Government securities, and eleven per cent. for discount on three months' sight private bills. The demand for money continues unabated. Madras bank shares have been neglected during the fortnight, and although there are few or no transactions to report, prices are steady at 73 to 75 premium. Government paper is rather lower. There has been no demand. We quote 5½ per cents., 9¾ to 10¼ premium; 5 per cents., 3¾ to 4 premium; and 4 per cents., 9 to 9¼ discount. Prices have of course, to a certain extent been effected by the stringency in the money market. Exchange—A very important advance was established by the Bombay mail leaving here on 23rd instant. Document bills having been freely sold at 2s 1⅞d, and first class agency and credit bills at 2s 1¾d to 2s 1⅞d. Some large sales of Madras paper have been made in Calcutta, and rates there are one per cent. dearer than at date of our last. Rates close for the mail to-day at 2s 1 7/16d for first-class document bills at 6 months' sight. The banks' drawing rate now stands at 2s 0⅜d for 6 months' sight bills. Sovereigns—English, 10-5-0 rs each, and Australians, 10-1-0 rs each.

Subjoined is a portion of the circular issued by Messrs Sharp, and Co. relating to bullion movements at Hong Kong, during the fortnight ending Sept. 11:—Gold—There have been no arrivals from San Francisco, but the market has nevertheless receded on account of the low prices in India. The imports represent $190,000 value; and the exports, inclusive of the shipments per Behar, on the 28th ult., and excluding those to leave on Monday, are $290,000. Silver—Both bar silver and Sycee have been in good demand, the stock left over from last mail having all been purchased at higher rates. The imports are $160,000 value. The Arabia, leaving to-morrow, and the mail will take a considerable amount, which will come into our next return. Dollar Currency—Shipments of coin up and down are now crossing each other between this and Shanghai; a portion of them en route for India. $180,000 have been received, and $700,000 sent away. Discounts and Mortgages—The value of money for these investments is much as last stated, viz., 8 to 10 per cent., at both of which rates transactions have been made on satisfactory securities. Exchange—There has been a remarkably quiet exchange market during the fortnight, without any fluctuation. The amount of bills sold has been less than usual. Shares—A few forced realisations have been made, but little real business has been done. Closing Quotations:—On London, 6 months' sight, 4s 5¾d; on Calcutta, 3 days' sight, 218 rs; on Bombay, 3 days' sight, 217½ rs; on Shanghai, 30 days' sight, 72¾ tls; on Singapore, 30 days' sight, par; on Foochow, 15 days' sight, ½ per cent. dis.; on Amoy, 15 days' sight, 1½ per cent. dis.; bar silver, 11 per cent. prem.; Sycee, Hyquan, 8⅛ per cent. prem.; Sycee, coast, 8¼ per cent. prem.; gold leaf, $22.70 per tael; sovereigns, $4.50 each; discount, 8 per cent.; Hong Kong and Shanghai Banking Company shares, 6 per cent. prem.; Hong Kong and Whampoa Dock Company, 40 per cent. prem.; Hong Kong Gas Company, 30 per cent. prem.

During the week ending Nov. 1, the imports of the precious metals were:—Gold, 268,623*l*; silver, 284,207*l*. The exports were:—Gold, 72,466*l*; silver, 344,777*l*.

Subjoined are the official statistics of the imports and exports of coal into and from the port and district of London, by sea, railway, and canal, during October, 1865:—

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the Gazette.)

An Account pursuant to the Act 7th and 8th Victoria, cap. 32. for the week ending on Wednesday, the 2nd day of November, 1865.

ISSUE DEPARTMENT.

	£		£
Notes issued	27,162,265	Government Debt	11,015 100
		Other Securities	3,634,900
		Gold Coin and Bullion	12,512,265
		Silver Bullion	...
	27,162,265		27 162,265

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	9,240 964
Rest	3,181,692	Other Securities	20 144 578
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	4,163 517	Notes	5,314,960
		Gold and Silver Coin	715 538
Other Deposits	12,979 790		
Seven Day and other Bills	538,041		
	35,416,040		35,416 040

THE OLD FORM

The above Bank accounts would, if made out in the old form, present the following result :—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	22 385,346	Securities	29 482 542
Public Deposits	4,163,517	Coin and Bullion	13,227,803
Private Deposits	12,979,790		
	39,528,653		42,710,345

Dated the 3rd November 1865. W. MILLER, Chief Cashier.

The balance of Assets above Liabilities being 3,181 692*l*, as stated in the above account under the head Rest.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

An increase of Circulation of	£15,101
An increase of Public Deposits of	369,835
A decrease of Other Deposits of	300,143
A decrease of Government Securities of	67,054
An increase of Other Securities of	140 940
An increase of Bullion of	8,790
A decrease of Rest of	2,317
A decrease of Reserve of	18,815

The changes in the above account are of little importance, but generally favourable. Both the bullion and the reserve have increased, but the advance in the former is only 8,590*l*. while 154,000*l* in foreign gold is known to have been sent in during the week. The drain of sovereigns for internal circulation appears, therefore, to have partially recommenced.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1855 :—

At corresponding dates with the present week	1855.	1862.	1863.	1864.	1865.
	£	£	£	£	£
Circulation, including bank post bills	21,061,105	21,878,952	22,783,018	21,596,300	22,385 346

In the corresponding week of 1855, the money market was easy, owing to the increase in the bullion at the Bank. The conviction had taken place of the delinquent bankers Paul, Strahan, and Bates. News of the capture of Kinburn had been received.

In 1862, the Provisional Government in Athens had pronounced the deposition of King Otho. The National Assembly of Greece had been convoked, and measures were being organised for the protection of life and property. The Bank of France had advanced its rate of discount from 3½ to 4 per cent. The demand for silver for export to the East was giving rise to greater activity in the money market, and withdrawals of bullion were being made from the Bank for the Continent.

In 1863, the reply of Denmark to the Federal Diet on their resolution to send the army of execution into Holstein had been sent. The Finance Committee of the Austrian Reichsrath had passed a resolution to grant 20,000,000 florins for the relief of the distress in Hungary. Numerous engagements were taking place between the Polish insurgents and the Russian troops with varying success. Money on the Continent was advancing, and the rate of discount had been raised at Amsterdam, Berlin, and Frankfort.

In 1864, the convention recently arranged between France and Italy respecting the evacuation of Rome by the French was still attracting attention. News had been received of the suspension of the remittances of Customs duties pledged for the Venezuelan debt of 1862, and a heavy fall had consequently taken place in that stock. The Bank of France had reduced their rate of discount from 8 to 7 per cent. while the official minimum at the Bank of England remained at 9.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1855, a deficiency of 6,661,348*l*; in 1862, a deficiency of 4,647,303*l*; in 1863, a deficiency of 6,148,351*l*; and in 1864, a deficiency of 5,851,049*l*. In 1865, the deficiency is 7,164,788*l*.

Discount and Money Market.—There has been a fair demand for discount during the week, which has somewhat increased to-day, owing to the preparations for to-morrow, the 4th of the month. For the best short paper, the general quotation is 6⅞ per cent., or slightly below the Bank minimum. As regards three months' paper, however, the terms are almost always 7 per cent., although some very exceptional transactions have taken place at a fraction less. For six months' drafts there has been no material alteration. The following are the current rates of discount for bills of various dates :—

30 to 60 days	6⅞ per cent.
3 months	7 per cent.
4 months	7 per cent
6 months—Bank bills	6½ per cent.
6 months—Trade ditto	7½ 8 per cent.

On the Stock Exchange this morning, owing to the falling due of an instalment of 10 per cent. on the New Brazilian scrip, money was in demand at 6 to 7 per cent. Later in the day, the requirements for this special purpose having been satisfied, loans were effected at not more than 4 to 5 per cent.

The following are the rates of interest allowed on deposits :—

Joint Stock Banks	*5 per cent.
Discount houses at call	5 per cent.
Do. with seven days' notice	5½ per cent.
Do. fourteen days	6 per cent.

* At the London and Westminster 4 per cent. only on sums below 500*l*.

About 30,000*l* in gold was taken to the Bank yesterday, and 15,000*l* to-day.

The biddings for 35,00,000 rupees (350,000*l*) in bills on India took place on Wednesday at the Bank of England. The

Digitized by Google

proportions allotted were—to Calcutta, 19,16,000 rupees (191,600*l*); to Madras, 5,84,000 rupees (58,400*l*); and to Bombay, 10,00,000 rupees (100,000*l*). The minimum price was as before, viz., 1s 11½d on Calcutta and Madras, and 1s 11⅞d on Bombay. Tenders on Calcutta and Madras at 1s 11⅞d receive about 52 per cent.; and on Bombay, at 2s 0⅛d, about 17 per cent.—above these prices, in full.

The following notice respecting the dividends has been issued at the Bank:—

"Bank of England, Nov. 1, 1865.

"Notice is hereby Given,—That in order to prepare the dividends due on the 5th of January, 1866, the balances of the several accounts in the following funds will be struck on the night of Friday, the 1st of December, 1865, viz.:—Three per Cent. Consolidated Annuities; New Five per Cent. Annuities; New Three-and-a-Half per Cent. Annuities, 1854; New Two-and-a-Half per Cent. Annuities; Annuities for Terms of Years; India Five per Cent. Stock.

"On Saturday, the 2d of December, the above-named funds will be transferable without the dividend due on the 5th of January next.

"East India Stock.—Shut: Friday, Dec. 8, 1865. Open: Saturday, Jan. 6, 1866.

The return of the Bank of France for the week shows the following changes:—

	£
Increase.	
Bills discounted	1,704,000
Advances	20,000
Current accounts	850,000
Decrease.	
Bullion	488,000
Treasury balance	672,000

The following are the rates of discount in the chief cities of the continent, showing an advance at Frankfort owing to the withdrawals of silver from the Bank for Finland, and at Amsterdam:—

	Bank Rate. Per cent.	Open Market Per cent.
Paris	5	4½
Vienna	5	5 ½
Berlin	7	6½
Frankfort	5½	5
Amsterdam	5	5
Turin	5	4½ 5
Brussels	5	5
Madrid	9	...
Hamburg	...	6½
St Petersburg	6	6½ 7

English Funds.—Consols were steady during the greater part of the week, and yesterday closed at 89 to 89⅛ or an eighth higher than the previous Thursday. To-day the market has been heavy, partly owing to the approach of the settlement, and partly to an insurrection in Jamaica. The returns of the Banks of England and France were also rather unfavourably considered, particularly the latter. The final price this evening for the account was 88¾ to 88⅞, showing a fa of an eighth on the week. For money the latest transactions were at 88¾. Reduced and New Three per Cents. were quoted 87⅛ to 87¼; and Indian Five Cents., 104¾ to 105.

Exchequer bills have likewise been dull, at a decline of about 1s—the March issue leaving off at 6s to 2s discount, and the June at 8s to 4s discount.

The amount applicable to the reduction of the national debt this quarter is 624,212*l*, and the Government broker consequently commenced on Tuesday his purchases of stock on account of the above sum.

Foreign Stocks.—The transactions in the foreign market have been below the average, but prices have been fairly maintained, and in some cases an advance has taken place. Mexican and New Granada bonds and Spanish Passive and Certificates have been chiefly in demand, though the best prices of the week have not been fully maintained. Italian Five per Cents. have again shown increased strength, while Greek and Egyptian of 1862 have slightly given way. Turkish securities at one period experienced a rather heavy fall, but subsequently rallied. The Consolidés, after declining to 47, left off at 47½ to 47¾. United States Five-twenty bonds have recovered to 63⅝ to 63⅞.

The closing price of French Three per Cent. rentes on the Paris Bourse this evening was 68f 15c for the new account, showing a slight decline compared with yesterday.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks on Oct. 26 and this day:—

Railways and other Shares.—The railway market has been dull, chiefly in sympathy with the funds. To-day, in particular, the general tendency has been decidedly flat. Compared with last week, a reduction has occurred in several of the leading stocks, especially in Great Northern, Great Eastern, North British, and Metropolitan. Midland and South-Eastern are also slightly lower. On the other hand, Lancashire and Yorkshire and London and North-Western have exceptionally risen. There has not been much business doing in this department apart from the fortnightly settlement just concluded.

The chief movement in the colonial market has been a rise in Grand Trunk stock. Great Western of Canada shares are also higher. Indian guaranteed descriptions have been in good demand at a general advance. Foreign shares were flat, especially Belgian. South Australian and Lombardo-Venetian show a recovery.

The shares of Overend Gurney and Co. (Limited) have relapsed to 8½ to 8¾ prem. Credit Foncier and Mobilier closed at 3½ to 3⅝ prem., ex all.

Subjoined is the usual list of the closing prices of the principal railway shares on Oct. 26 and this day:—

RAILWAYS.	Closing prices Oct. 26.	Closing prices this day.

Foreign Exchanges.—There has been no material alteration in the rates this week.

Bullion.—The following is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper:—

Gold.—During the past few days a slight demand has arisen for gold for export, and the Bank has only received about 177,000*l* during the week. The purchases for abroad have now, however, ceased, and for the present all immediate arrivals will go into the Bank. The Seine has brought 140,000*l* from the West Indies; the Persia has brought 30,000*l* from New York; the City of London has brought 47,000*l* from New York; and the Bremen has brought 3,200*l* from New York.

Digitized by Google

Silver.—The Seine has brought 135,000*l* from the West Indies, the Dore portion of which has been sold at 61½d per oz standard, and the fine bars at 61¼d per oz standard. The market has been very firm at this latter quotation, and a considerable business has been done for the outgoing mail to Bombay from Marseilles on the 5th inst. The Messageries steamer from Marseilles took 265,000*l* to Calcutta on the 29th ult.

Mexican Dollars.—The large quantity expected by the Seine were left behind at Tampico, owing to the bad weather; prices have accordingly been somewhat firmer for some small orders that had to be executed for the mail to China of the 4th inst.

Exchange on India for drafts by the banks at 60 days' sight may be quoted 1s 11⅞d to 2s 0⅛d for Calcutta and Madras, and 2s to 2s 0¼d Bombay. The Council drafts disposed of yesterday brought higher prices as regards Bombay, but the same as regards Calcutta, the allotments being—on Bombay, 17 per cent. at 2s 0⅛d, and 52 per cent. on Calcutta and Madras at 1s 11⅞d.

India Government loan notes continue unchanged; 5½ per Cents. are 107 to 109; 5 per Cents., 100 to 102; and 4 per Cents., 87 to 89.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std, last price; ditto, **refinable, 77s 11d per oz std, last price;** Spanish doubloons, 74s to 74s 6d per oz; South American doubloons, 73s 6d to 73s 9d per oz; United States gold coin, 76s 2¾d per oz. Silver—Bar silver, 5s 1¼d per oz std; ditto, containing 5 grs gold, 5s 1½d per oz std, last price; Mexican dollars, 4s 11¾d to 5s per oz, nominal; five-franc pieces, 4s 11⅝d per oz, last price. Quicksilver, 8*l* per bottle; discount, **3 per cent.**

The amount of specie that will be sent with the outgoing India and China packet to-morrow is 92,842*l*, chiefly for Calcutta and Madras.

Public Companies.—At the meeting, on Wednesday, of the London and South African Bank, the directors' report stated the net profit for the first half of the present year at 28,920*l*; but, owing to the commercial failures at the Cape, the board think it their duty to refrain from making the usual interim distribution. The chairman, Mr J. R. Thomson, in referring to the above-mentioned unfavourable circumstances, and to the non-payment of any dividend, said he was happy to report that they had sufficient funds to meet any liabilities without trenching on their capital. They had, he added, 29,000*l* of profits and 18,000*l* reserve, in all 47,000*l*, to meet liabilities and protect their capital. In reply to a question, the chairman further mentioned that the past due bill account on the 30th of June, was 76,000*l*. Of that amount, 21,000*l* has since been recovered, and the colonial officers estimated the final loss at 21,000*l* or 22,000*l*. The directors, however, from a consideration of the generally depressed state of the colony, think the loss may turn out greater.

At an extraordinary meeting of the Oriental Financial Corporation, the resolution previously passed for voluntarily winding up the undertaking, was confirmed.

The directors of the Buenos Ayres Great Southern Railway Company (Limited) have issued the subjoined circular:—

The directors have great pleasure in informing you that the line was partially opened as far as Jeppener station, a distance of 48 miles, on the 14th of August last, and the traffic returns of that portion of the line for the first four weeks are annexed. Considering that this result has been attained by the running of only one train a day, to avoid interference with the completion of the works, the directors consider the returns highly satisfactory. They expect the entire line to Chascomus will be opened early in November.

The traffic receipts of this railway, for the four weeks ending 10th September, were 1,658*l* sterling.

The London and Brazilian Bank have made a call of 5*l* per share on the old shares, which, with the call of 5*l* already made on the new shares, is payable by the 1st December next. An extraordinary general meeting of the shareholders will be held on the 10th instant.

An extraordinary general meeting of the Malta and Mediterranean Gas Company (Limited) will take place on the 15th, "for the purpose of considering and adopting (if thought expedient) a proposition for the lighting by gas the towns of Trapani and Marsala in Sicily, and of empowering the directors to take all necessary steps to that end."

At the third annual meeting, on Tuesday, of the Upper Assam Tea Company, the amount available for distribution was stated at 10,350*l*, and a dividend was declared of 10 per cent. per annum, free of income tax, of which 6 per cent. has already been paid. The balance of 4 per cent. will be due on and after the 10th November. This distribution makes, with the bonus given on the 1st September, a total of 18 per cent. divided amongst the shareholders during the twelve months.

At the meeting of the Quebrada Company, the directors' report was adopted. It announced their intention to make a railway in Venezuela, from Tucacas (the shipping port) to Palma Sola or Tablera, about 28 miles, being half way to the company's mines, and to repair the present mule road for the remainder of the distance. The resident engineer fully expects to be able to complete this by February or March next.

The following circular has been issued on behalf of the directors of the London and Middlesex Bank (Limited), which is being wound up:—

54 Bishopsgate street within, London, E.C., Oct. 30.

Sir,—I am instructed by the directors of the London and Middlesex Bank (Limited), to inform you that they are enabled to make a further return to their shareholders, in respect of the capital of the bank, at the rate of 1*l* per share, and that you may receive the amount due upon the shares registered in your name on application here any Monday or Thursday in the months of November or December next, between the hours of ten and three o'clock. It will be necessary that you should forward your share certificates a few days before you apply for the amount due upon them. The liquidation of the bank is now almost completed, and when a final settlement can be arrived at, any balance remaining will be distributed, with a statement of account.—I am, sir, your obedient servant, Oswald Howell, Accountant.

A call of 2*l*, making 4*l* paid, is to be paid on the shares of the Alliance Financial Company (Limited) by the 18th of November.

At a meeting of the Queensland Sheep Investment Company yesterday, it was resolved, after considerable discussion, to appoint a committee of investigation.

Miscellaneous.—With regard to dividends on New Grenada bonds, Messrs Baring Brothers and Co. have notified to the Stock Exchange the receipt of the following news by the mail just arrived:—"From the Custom house at Santa Marta 6,509*l* 18s 5d, which includes 395 dols 77c received from the Custom house at Rio Hacha. The agent at Santa Marta reports that he has a balance in hand (of about 2,300*l*), for which it was impossible to secure bills in time for this mail. From Custom house of Sabanilla, 511*l* 13s 4d; ditto, Cartagena, 536*l* 19s 8d.—Oct. 30, 1865."

The following, relating to the Venezuela loan of 1864, is from the General Credit Company:—

Venezuela Six per Cent. Loan, 1864.—The General Credit and Finance Company (Limited) are in receipt of advice from their agents, Messrs H. L. Boulton and Co., dated La Guayra, 9th October, 1865, of duties collected (and remitted) on account of the above loan, as follows:—"Per statement No. 51 from La Guayra, 11,327.06; ditto, No. 62, Puerto Cabello, 24.37; total, 11,351.43 dols.

The mail from Guayaquil has brought a remittance of 300*l* on account of the dividend on the debt of Ecuador.

The Provisional Governor of Texas has issued an advertisement in the nature of a "caution to the public," in which he states that certain individuals obtained from the late Governor of the State, during the rebellion, a large number of Texan Indemnity Bonds without legitimate authority, and under a pretended and fraudulent contract. It is accordingly intimated that these bonds will not be paid "unless presented for payment by proper authority of the State of Texas."

The following notification shows that the long-pending question of the claims of the Mexican Deferred bondholders has at last taken one more step forward:—

Mexican Deferred Bonds.—Messrs Baring Brothers and Co. have received advice through the Foreign Office that the Emperor has given orders for the examination by a commission of the plan proposed some time since for the settlement of the Deferred bonds claims.—Bishopsgate street, Nov. 2, 1865.

The Freehold Land and Brickmaking Company (Limited), capital 25,000*l* in 5,000 shares of 5*l* each, has been formed to purchase a freehold estate near Arundel, in Sussex, where a valuable deposit of fine "plastic clay" has recently been discovered. A guaranteed dividend of not less than 15 per cent. will be paid for five years, and the first payment will be made on 1st April, 1866.

Leeds Woollen Extract Company, capital 150,000*l* in 10,000 shares of 15*l* each, is formed for the purpose of purchasing the goodwill of Low Hall Mills, Holbeck, Leeds, where fibres of wool are extracted from fabrics or materials composed of wool in combination with cotton and other vegetable substances. The patent by which this is at present effected will be the exclusive property of the new company.

The object of the Import and Export of Fresh Provisions Company (Limited), capital 100,000*l* in 10,000 shares of 10*l* each, is intended to supply our market with fresh provisions on the best discoverable method. They have purchased the patent of Mr Richard Jones, by which animal food may be preserved in a fresh raw state for an indefinite period of time. The present high price of meat is obviously a great encouragement to well-managed undertakings with this object.

We are informed that the lists of the new issue of shares of the Credit Foncier and Mobilier of England, Limited, which closed to-day, show the large total of upwards of 170,000 shares applied for.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 3 per mille premium, and the short exchange on London is 25.22½ per 1*l* sterling. On comparing these rates with the English Mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 1-10th per cent. dearer in Paris than in London.

By advices from Hamburg the price of gold is 428 per mark, and the short exchange on London is 13.6⅝ per 1*l* sterling. Standard gold at the English Mint price is, therefore, nearly 1-10th per cent. dearer in London than in Hamburg.

The course of exchange at New York on London for bills at 60 days' sight is 109 to 109⅜ per cent. At this rate there is scarcely any profit on the importation of gold from the United States.

The numbers are published of 629 bonds, representing 110,000*l*, of the Russian Four-and-a-Half per Cent. loan of 1849, which were drawn on the 19th ult., and are to be paid off at par between the 1st January and 28th February next.

The Commercial Times.

POST OFFICE ANNOUNCEMENTS.

A reduction having taken place in the postage charged by the United States Post Office for the sea conveyance of letters between Panama and San Francisco, such reduction will be applied to all letters between this country and Vancouver's Island, British Columbia, San Francisco, Oregon, and the Sandwich Islands, which may be addressed to be forwarded via St Thomas and Panama; and the rate to be paid in future on those letters will be as follows:—For a letter not exceeding ½ oz, 1s 6d; above ½ oz and not exceeding 1 oz, 3s; above 1 oz and not exceeding 1½ oz, 4s 6d; above 1½ oz, and not exceeding 2 ozs 6s and so on, one additional rate of 1s 6d being charged for each half-ounce or fraction of half-an-ounce. The postage upon all letters for the above places, when addressed to be sent via St Thomas and Panama, must be paid in advance.

MAILS ARRIVED.

LATEST DATES.

CORN IMPORTED AND EXPORTED.

An Account showing the quantities of the several kinds of Corn and Meal imported into each division of the United Kingdom; and the quantities of British and foreign Corn and Meal, of the same kinds, exported from the United Kingdom, in the week ended the 28th October, 1865.

AVERAGES OF GRAIN.

The following is a statement showing the quantities sold and the average price of British corn (imperial measure) as received from the inspectors and officers of Excise, conformably to the Act of the 27th and 28th Victoria, cap. 87, in the week ended Oct. 28, 1865:—

	Quantities Sold. qrs bush	Average Price. s d
Wheat	68,951 1	42 4
Barley	53,043 3	31 0
Oats	5,667 5	21 0

COMPARATIVE AVERAGES.

The following is a comparative statement, for the corresponding week in each of the years from 1861 to 1864, of the quantities of British corn sold in the towns from which returns are received under the Act of the 27th and 28th Victoria, cap. 87, and of the average prices as ascertained under the Act 5th and 6th Victoria, cap. 14:—

COMMERCIAL EPITOME,

FRIDAY NIGHT

The supply of English wheat on sale at Mark lane to-day was small, and the condition but middling. The trade was very firm, and Monday's prices were fully supported. In foreign wheat only a moderate business was transacted, but at extreme rates. Barley and oats were very firm, and the quotations had an upward tendency. Very few beans were on offer, and Monday's currency was well maintained. Peas sold steadily, at very full prices. For flour the trade was steady, at extreme quotations. This week's imports consist of 6,080 quarters of wheat, 720 barley, 24,790 oats, and 140 sacks of flour.

At Liverpool, this morning, wheat advanced 3d per cental; flour, 1s per barrel; and maize 6d per quarter from Friday last. At Wakefield, the wheat trade was very firm, and the quotations improved 2s to 3s per quarter.

The transactions during the present week in the Liverpool cotton market have been on a very limited scale, the total sales reaching 51,000 bales, of which spinners have taken 22,000 bales, speculators 15,000, and exporters 14,000 bales. Quotations are reduced ¼d to 1d per lb upon cotton on the spot, and 1½d to 2d upon cotton afloat, since Friday last. Yesterday and to-day there has been an improved feeling in the market, and the sales have reached 10,000 bales each day, with prices decidedly in favour of the seller.

Advices from New Orleans are to October 10. Since Sept. 1, the receipts of cotton had been 113,973 bales and the shipments 82,316 bales. The stock on hand at latest date was 114,896 bales.

From Mobile, we have intelligence to Oct. 6. The stock of cotton on hand at that date was 53,008 bales. Since the 1st of September, 67,592 bales had arrived, and 38,874 bales been exported.

The arrivals of cotton at Savannah, from Sept. 1 to Oct. 13, had amounted to, including the stock on hand at the opening of the season, 33,476 bales, whilst the exports had been 31,576 bales, leaving a supply on hand at latest date of 1,805 bales.

At Charleston, Oct. 12, the stock of cotton was 1,885 bales. The receipts of produce, since Sept. 1, had been 13,184 bales, and the exports 11,299 bales.

From Galveston, we have intelligence to Sept. 30. The amount of cotton during the month, including the stock on hand at its commencement, had reached 30,020 bales, the exports being to the extent of 17,610 bales, leaving a stock of 12,410 bales, against 12,153 bales last year.

The stock of cotton, therefore, at the leading Southern ports, at latest dates, was as under:—

	bales.
At New Orleans	114,896
Mobile	53,008
Galveston	12,410
Savannah	1,805
Charleston	1,885
	184,004

Messrs Neill Brothers estimate the stock at New York, on the 17th of October, at 114,000 bales, and in their circular of the above date observe "that the aggregate receipts since 1st July were 602,000 bales, or an average of 43,000 bales weekly. Of this supply about 300,000 bales remain in stock here and at the Southern ports. 188,000 have been taken for home consumption, and 114,000 have been shipped to Europe." The stock of cotton at New York and Southern ports at this date in 1860 was 387,000 bales; in 1859, 319,000 bales; in 1858, 281,000 bales; and in 1857, 145,000 bales.

The following figures are from Ellison and Haywood's monthly cotton report of the 1st inst.:—

IMPORTS, EXPORTS, HOME CONSUMPTION, and STOCK of COTTON at Liverpool, for the past Ten Months of 1865 and 1864.

	1865.	1864.
	Liverpool.

Havre	23,000	63,800	17,200	48,540
Rest of Continent	15,000	19,100	7,800	23,600
Total	382,190	680,710	210,500	648,000

Via the Persian Gulf, we have intelligence from Bombay to Oct. 18. At that date the cotton trade was less active, at 14⅝d for Dhollerah. On the 14th Broach was quoted at 14.332d; and Dhollerah at 15.320d per lb. Freight to England was 30s per ton.

The cotton trade at Madras, during the fortnight ending Sept. 26, was very active, and prices further advanced. Western produce realised nearly 11d; Salem and Coimbatore ditto, 9½d per lb. For Tinnevelly produce, the quotation was 10d per lb. The annexed table of exports is from Messrs Dymes, Cartwright, and Co.'s circular:—

EXPORTS of COTTON from MADRAS for Eight Months.

	Great Britain. cwts.	France. cwts.	Elsewhere. cwts.	Total. cwts.
In Aug., 1865	73,139	...	617	73,756
In previous seven months	210,045	7,556	1,231	218,829
Total for eight months	283,184	7,556	1,848	292,585
Against same period 1864	234,188	15,427	2,412	252,027
— — 1863	271,784	29,602	4,330	305,716
— — 1862	162,052	10,047		172,099
Against the whole of 1864	297,235	15,819	2,557	315,601
— — 1863	422,111	37,177	6,741	464,019
— — 1862	234,745	11,475		246,220

We learn from Alexandria, under date Oct. 28, that the market for cotton was decidedly quieter. The open-ginned produce was selling at 23d on the spot; 23d for November; 21.75d for December; and 21d per lb for January shipment, free on board, light canvas. Freight, ⅜d per lb.

With the exception of raw sugars, the trade for which has ruled heavy, at a decline in prices of 6d to 1s per cwt, the markets for colonial and foreign grocery produce have been tolerably active, and, in most articles, a fair consumptive business has been transacted, at fully last week's currency. In tea there has been considerable activity, and prices have ruled firm. Coffee has changed hands to a fair extent, at fully late rates, whilst cocoa—owing, in some measure, to a Government contract for 400,000 lbs—has realised full prices. The duty paid on tea in London last week was on 1,680,023 lbs, whilst the export, for the week ending Oct. 26, was 382,556 lbs, making a total of 1,680,023 lbs, against 1,450,428 lbs last year. Advices from China state that the export to Great Britain had reached 58,000,000 lbs.

The advance in the price of wheat has produced great firmness in the value of rice, and most descriptions are held at higher rates. The enhanced rates now being paid for barley have caused a rise of 2d in the value of British spirits, the quotation being now 12s per gallon.

We extract the following from Messrs Trueman and Rouse's circular:—

IMPORTS and STOCKS of SUGAR and COFFEE at the Principal European Ports, for the Nine Months ending Sept. 30, 1864 and 1865.

At the date of our latest advices from Colombo, the shipping season had been brought to a close. As regards the extent of the exports of produce during the year ending Sept. 30, the returns exhibited very favourable results, the diminution from the previous year being confined to cocoa-nut oil and plumbago, whilst all other articles showed an augmented outward trade. The new coffee season was about to be commenced, and, judging from the favourable accounts from the interior, considerable arrivals were anticipated. The coffee trade, however, was dull, and prices were somewhat easier, plantation produce being quoted at 12s 9d to 13s 3d per bushel; native ditto, unpicked, 42s 6d; picked and dried, 48s per cwt. The subjoined statment of shipments from Colombo, during the year ending Sept. 30, is from Messrs Fryer, Schultze, and Co.'s circular:—

The public sales of colonial wool will be commenced on the 16th inst. About 62,000 bales will be brought forward during their progress, the arrivals, according to the latest statement issued, being as follows:—From Sydney, 11,681 bales; Port Philip, 2,555 bales; Adelaide, 1,087; Van Diemen's Land, 159; New Zealand, 3,135; and from the Cape, 29,121 bales, making a total of 47,738 bales. The demand for wool, both home, foreign, and colonial, rules quiet, at about previous rates.

Hemp continues very firm, and clean Russian qualities are now quoted at 36*l* per ton, on the spot. Flax is in steady bequest, and fully supports late rates. Jute is very firm, and commands higher prices.

COMPARATIVE STATEMENT of HEMP, FLAX, and JUTE on hand in London, on Nov. 1, 1863, 1864, and 1865, Dealers' Stock included.

Telegraphic advices from Shanghai are to Sept. 21. The export of silk since the opening of the season had been 37,000 bales, the market at latest date being quiet. Postal intelligence is to Sept. 3, and at that date the quotations, all charges paid to England, at the exchange of 6s 2d per tael, were as under:—Tsatlee, chop No. 1, 30s 5d; ditto No. 2, 29s 4d; ditto No. 3, 28s 3d. Market, No. 3, 26s 4d to 26s 10d; ditto No. 4, 25s 3d to 25s 9d; ditto No. 5 and com., 23s 8d to 24s 9d. Taysaam, chop No. 1, 25s 3d to 25s 9d; ditto No, 2, 23s 8d to 24s 3d; ditto No, 3, 22s 11d to 23s 5d; ditto No. 4, 5, and com., 20s 1d to 22s 5d. Yuenfa, chop No. 1, 25s 3d to 25s 9d; ditto No. 2, 24s 3d to 24s 9d; ditto No. 3, 23s 2d to 23s 8d; ditto No, 4 and com., 20s 7d to 22s 2d. Hainings, 20s 7d to 25s; Hangchow Tsatlee, 24s 3d to 25s 3d; Sewhings, 20s 7d to 22s 11d; Laeyongs, 19s 6d to 20s 7d per lb.

In reference to the state of the tobacco trade last month, Messrs Grant, Hodgson, and Co. write as follows:—The market has continued firm and unchanged for all American descriptions, and a fair extent of business transacted both for home trade and exportation, at very full prices. Sales may be estimated at 1,400 hogsheads, including a parcel of nearly 400 hogsheads of factory dried leaf, stated to have been taken for resale on American account. Purchases of export leaf were chiefly of good, fine, and selected qualities; a very choice lot of nearly 60 hogsheads realised extreme quotations. All sorts, other than American, were in very good demand, and for some descriptions, especially Paraguay, importers declined progressing with sales unless at an advance on previous prices, and at which some parcels were closed. Sampling has not yet made much progress in consequence of the unfavourable state of the weather, and we, therefore, defer any report until some of the best marks have been sampled and examined. Latest advices from New York represent a strong market for good and fine qualities, and report that the stock of Kentucky, on the 1st of October, was 28,912 hogsheads, against 46,058 hogsheads at the corresponding period of 1864, showing a decrease of 17,146 hogsheads. Imports, 2,210 hogsheads. Deliveries—804 hogsheads, against 918 hogsheads in the corresponding month of last year. Stock—21,940 hogsheads, against 17,230 hogsheads in 1864; 17,929 hogsheads in 1863; 22,266 hogsheads in 1862; 27,764 hogsheads in 1861; and 20,417 hogsheads in 1860.

In the metal trade the leading feature to notice is an active demand for tin, at higher prices as regards foreign descriptions. Copper, tin plates, and lead are very firm, but Scotch pig iron is dull, at 58s per ton cash, mixed numbers. The following table, from Mr Th. L. Van Houten's circular, refers to Banca tin in Holland:—

	1865 slabs	1864 slabs	1863 slabs
Import in October	24,226	8,038	5,631

New stock unsold with the Trading Company	39393	46324	73014

Oils continue firm, and a further advance has taken place in the value of rape, the quotation for foreign refined being 52s 6d to 53s per cwt. Other descriptions fully support late rates. Turpentine is steady, at 44s 6d to 45s for French spirits. Petroleum is firmer, at 2s 11d to 3s 2d for American refined.

The tallow trade has been quiet, and prices are now 1s 6d per cwt below the late highest point. The quotation for P.Y.C. is 50s 6d per cwt on the spot.

Owing to the tightness of the money market, trade at New York, during the week ending Oct. 21, was very quiet. The receipts of cotton—though less than in the previous week—had been large, and a decline took place in prices to the extent of about 5 cents per lb. Cotton goods were quieter, but in consequence of limited stocks, the quotations ruled tolerably firm. The market for breadstuffs was also dull, at reduced quotations, and the transactions both in wheat and flour for export were very limited: the export movement in breadstuffs in fact was almost entirely confined to maize. Grocery produce of most descriptions was in but moderate request, but the market for pork and petroleum was very firm. There had been a very active demand for money: prime short-dated paper was discounted at 7 to 8, whilst second-

Digitized by Google

rate and inferior bills were quoted at from 9 to as high as 15 per cent. The stock of bullion in the banks on the 14th ult. was 3,178,160*l*, and the balance in the Sub-Treasury 13,542,620*l*. The fluctuations in the premium on gold had been from 44⅜ to 46⅜ per cent. The shipments of specie, from Jan. 1 to Oct. 14, amounted to 4,760,800*l*, against 7,161,210*l* last year, 7,201,580*l* in 1863, and 9,162,350*l* in 1862. On the 26th ult. gold was quoted at 145¼ per cent., and the money market continued stringent.

THE COTTON TRADE.

LIVERPOOL—Nov. 3.

A fair business was done on Saturday morning, but in the afternoon a reaction took place, upon advices from New York of lower quotations and increasing receipts. On Monday the demand was limited, and freely supplied at declining rates. On Wednesday the business, though general, was almost entirely confined to the supply of the immediate wants of consumers, and a heavy decline was submitted to, but yesterday the reduced prices attracted attention, and, with increased sales, the market became more regular at the reduction.

For Sea Island there has been a moderate inquiry, and prices remain unchanged. American, now arriving abundantly, attracts more general attention, and has been in demand throughout the week; on Friday an advance of fully 1d was readily paid but subsequently the advance has been lost, and a further decline submitted to of 1d to 1½d per lb. Brazil, on Friday and Saturday, was in improved request, but has since been much pressed for sale, and has declined 1½d to 2d per lb. Egyptian advanced 1½d on Friday, but has since been freely offered, and quotations have given way daily, and closed about 1½d under last week. Smyrna has declined 1d per lb. East India has been freely offered, and has participated in the general depression, the inferior grades being quoted 1½d to 2d and the better kinds ½d to 1d per lb lower, as compared with prices at the close of last week. The inquiry for China and Japan is becoming comparatively limited, and prices have fallen 1d per lb.

The transactions to arrive were numerous on Saturday, but since have been limited, the quotations following the changes of the market on the spot. The last quotations were, yesterday, for American, New Orleans and bales cotton, middling, due, 20d per lb; Maceio, fair average, ship named, 20d; Egyptian, fair open, November delivery, 21½d; Western Madras, fair, ships named, 15½d and 16⅛d; August sailing, 15½d; Dharwar, fair, from quay, 17d per lb.

The sales of the week amount to 51,130 bales, including 15,920 on speculation, and 13,130 declared for export, leaving 22,080 bales to the trade. The sales to-day, about 10,000 bales, with a steadier market, particularly for American, the advices per China imparting more confidence.

LONDON—Nov. 3.

Annexed is a portion of the circular issued on Friday by the London Cotton Brokers' Association:—The tone of our market has been dull throughout the week, and prices for cotton on the spot have declined ½d to 1d per lb all round. Yesterday and to-day buyers have been tempted by offers of Tinnevelly and Western afloat at low prices, and a considerable business has been the result; these sales showing a decline of 2d on Tinnevelly, and 1½d per lb on Western.

NEW YORK—Oct. 21.

The market has tended steadily downward. Prices have given way, and close about 4 cents below the highest quotations of Monday. The receipts are on a very large scale, although not so large for the past as for the previous week. At to-day's market the demand was limited, and prices weak. The following were closing quotations:—

	New York Classification. Upland. c	Florida. c	Mobile. c	New Orleans and Texas. c
Ordinary ...per lb	48	48	48	49
Good ordinary	51	52	52	53
Middling	57	58	58	59
Good middling	59	60	61	62
Middling fair	...	...	...	...

New York, Oct. 26.—Our market is much firmer, and an advance of 2 cents has taken place in prices. Middling Upland is now quoted at 59 cents per lb.

— Florida	176	Per railroad.....	4,304
— Savannah	3,413	From foreign ports	20

Total for the week	27,626
Previously reported	309,699
Total since July 1	337,325
Same time last year	58,895

The exports are as under:—

To Liverpool	7,611
— Havre	689
— Hamburg	249
Total for the week.....	8,549
Previously reported	57,338
Total since July 1	65,887
Same time last year	3,296

MARKETS IN THE MANUFACTURING DISTRICTS.

There has been less activity in the demand for cotton goods this week. On the whole, however, prices have been supported. The stocks have rather increased. For iron the market has been in a healthy state, at steady currencies. A very large business has been doing in coals, both for home use and export, on higher terms.

MANCHESTER, Nov. 2.—The prospects of increased supplies of cotton towards the end of the year have had a further depressing effect on our market this week. Yarns have declined 2d to 3d per lb, but buyers have only acted for needful wants. Shirtings have declined to about 2s per lb, at which some sellers are offering fair makes; but the late advices from India are not thought sufficiently favourable to encourage operations, and some further decline is looked for. Printers domestics, T'cloths, jacconets, are equally neglected; and as contracts are visibly drawing to a close, sellers daily become more anxious for renewals, but the terms on which renewals could be effected become day by day more a matter of uncertainty.

BRADFORD.—The operations of wool buyers are most limited, the demand being confined exclusively to the supply of spinners' present requirements. The transactions have been unimportant, and the sales have consisted chiefly of matchings. Yarns are more quiet than wool. There is the strongest indisposition on the part of shippers to make purchases. The recent activity in the piece market has quite subsided.

LEEDS.—Goods were bought in retail quantities, and were not confined to any particular kind of goods. Melton and tweeds, however, continue in chief request. The country clothiers report themselves as being moderately busy, a fair proportion of them having orders on hand. Prices of wool, woollen yarns, and goods are steady. The local wool trade is rather quiet.

LEICESTER.—Business in the hosiery trade is fully as active as it usually is at this time of the year. Cotton yarns are without important alteration in price. Worsted yarns are fair, at high rates. There is a fair consumptive demand for wools at recent quotations.

DUNDEE.—Our flax market has continued very firm, and a steady business has been doing, at gradually improving prices. Jute has been in brisk demand at advancing prices, especially for fine ute, stocks of which are very light. Linens continue in extensive demand, and manufacturers are all actively employed.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Oct. 21.—The deliveries are interrupted by a serious break in the Erie Canal. The deliveries at and shipments from the principal upper lake markets are largely in excess of last year. Some grades of flour have declined nearly a dollar a barrel, and wheat about 10c per bushel. There is as yet no export movement in flour and wheat, but there are steady shipments of corn. The following are closing quotations:—Flour—Superfine State and Western, $7.70 to $8; extra State, $8 to $8.50; shipping roundhoop Ohio, $8.75 to $9; extra Western, common to good, $8.25 to $11.40; double extra Western and St Louis, $11.50 to $16; Southern, supers, $9.40 to $11.40; Southern, fancy and extra, $11.05 to $16; Canada, common to choice extra, $8.25 to $12.25 per barrel. Wheat—Chicago Spring, $1.65 to $1.73; Milwaukee Club, $1.67 to $1.75; red Winter, $2 to $2.20; amber Michigan, &c., $2.25 to $2.30. Corn—Western mixed, 75c to 78c: Western yellow, 90c per bushel.

NEW YORK, Oct. 26.—The flour trade is dull, on easier terms. For wheat there is a limited inquiry, at late rates. Corn, however, commands increased attention.

EXPORT of GRAIN, &c., from NEW YORK from Oct. 1 to Oct. 17.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Fresh up to our market this week, the arrivals of English wheat have been on a limited scale. The demand for both red and white qualities has ruled firm, at an advance in the quotations of 2s per quarter, and of which clearances have been effected. The show of foreign wheat has been only moderate, and sales have progressed steadily, at 1s to 2s per quarter more money. There has been an increased demand for most descriptions of barley at a rise in value of 1s per quarter. The malt trade has been very firm, and the currencies have had an upward tendency. Although good supplies of foreign oats have been on sale, the oat trade has continued steady, and prices have further advanced 6d per quarter. Beans have improved 1s per quarter, and the same advance has been paid for peas, with very limited quantities on sale. Town-made flour has risen 3s, other kinds 1s per 280 lbs. Foreign qualities have likewise tended upwards. American flour is now much wanted.

Heavy rains having fallen during the week, the progress of ploughing and sowing has been very slow. On light soils, however, those operations are seasonably forward.

The continental markets have become rather active for wheat on English account, at enhanced quotations, whilst the value of most kinds of spring corn is tending upwards. New York letters state that both wheat and flour continued to find buyers at strong prices. The shipments to England, however, had rather increased.

In Scotland, most descriptions of wheat have realised rather more money. The supplies on offer have rather fallen off. Barley, oats, and all other articles have sold freely, at very full prices.

The Irish markets have been firm for wheat, at enhanced quotations. All spring corn has produced rather more money.

The supply of English wheat on sale at Mark lane to-day was small, and the trade was very firm at fully Monday's currency. Foreign wheat was in moderate supply, and all descriptions changed hands at fully late rates. Barley and oats realised rather more money. Beans and peas were in short supply, and were fully as dear as on Monday. The flour trade was firm at full currencies.

In reference to the state of the floating grain trade during the week, Mr George Dornbusch writes as follows:—Arrivals at ports of call since last Friday have been limited to 2 cargoes, viz., 1 wheat and 1 maize. The trade has been very firm, and prices tending upwards, with a very large business doing in cargoes. Wheat again 1s to 2s dearer [afloat and for shipment]. Sales:—Wheat—4 arrived cargoes sold: Ghirka Odessa at 42s 6d; Nicolaieff, 44s; and Taganrog, 43s 6d per 492 lbs; Ghirka Taganrog, on passage, August to October shipment, about 16,000 qrs at 42s 9d to 45s 9d per 492 lbs; Nicolaieff, about 7,000 qrs, September to October shipment, 45s to 46s; Odessa, about 9,000 qrs, September to October shipment, 44s to 45s per 492 lbs; hard Odessa, 44s 6d; hard Taganrog, 45s; Galatz, 41s 9d per 492 lbs; Polish, 46s; Sandomirka, 46s; Varna, 39s per 480 lbs; Saxonska, 46s 6d per 496 lbs; Ghirka Odessa, shipped, or to be shipped, 44s 6d; and to be shipped, 46s 6d; Banat, from Trieste, 44s 6d to 45s 6d; Venetian, 46s 6d per 492 lbs. Maize 6d to 1s dearer—Sales: 1 arrived cargo, Bulgarian, at 37s 7½d per 480 lbs; on passage, Galatz, August, at 32s; Odessa, S ptember, 32s; Bessarabian, 32s 3d per 492 lbs; 10,500 qrs Ibrail, August, September, 29s 3d to 29s 9d per 480 lbs; Galatz, shipping, 32s per 492 lbs; 9,800 qrs Ibrail, 29s and 30s per 480 lbs; and shipping, shipped, or to be shipped, Odessa, 32s; Galatz, 31s 6d to 32s 6d per 492 lbs; 54,500 qrs Ibrail and Wallachian, 29s 3d to 32s 3d per 480 lbs; Bulgarian, 29s 10½d; and Foxanian, 30s 6d per 480 lbs. Barley also 6d to 1s dearer—Sales: Odessa, on passage, September shipment, 22s 6d; Black Sea, from Nicolaieff, on passage, August to October shipment, 22s 9d to 23s 3d; and shipping, or to be shipped, 22s 6d and 23s; and 10,000 qrs Danubian, shipping, 22s 3d per 400 lbs. Rye—1 cargo Odessa sold at 30s per 480 lbs. Beans quiet. Millet-seed—A cargo Ibrail at 21s 6d per 480 lbs. COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market has become flat, and to effect sales a reduction of 6d to 1s per cwt must now be accepted. All kinds are dull, more especially so low soft brown sugars. Some fine crystallised kinds obtained the quotations. Soft brown Mauritius has sold upon reduced terms, and no transactions are reported in Manilla. Only 1,100 casks West India had sold in three days, including crystallised Demerara at 38s to 42s 6d yellow, and 44s to 45s 6d for white. The last week's delivery was 4,589 tons, making an increase of 47,320 tons contrasted with those in 1864 to the same period. Present stock, 88,050 tons, or 32,520 tons less than last season.

Mauritius.—2,700 bags offered by auction only partly found buyers: soft brown, 29s to 33s, being quite 6d cheaper. Grainy and crystallised went at 35s 6d to 41s 6d per cwt, the best qualities only supporting their previous value.

Bengal.—1,581 bags partly sold at 39s 6d to 41s for white Benares. Low Gurpatta date withdrawn at 37s to 37s 6d per cwt.

Madras.—6,050 bags soft Jaggery brought forward on Tuesday were withdrawn. 500 bags sold privately: dark grainy at 29s per cwt.

Natal.—287 bags part sold at 30s to 37s per cwt.

Foreign.—All kinds have been dull, with an absence of business privately during the greater part of the week. 259 casks Porto Rico were chiefly taken in at 36s to 42s 6d, a few lots being sold within the range of these prices.

Refined.—The market is quiet, at unaltered rates, for very dry goods.

RUM is steady in price, with a better inquiry for Jamaica and Demerara. The latter has sold at 1s 7½d to 1s 9d per proof gallon, in puncheons.

COCOA.—Granada maintains the great advance lately established, and there is a limited quantity offering. The appearance of a Government contract for 180 tons (tenders to be sent in on the 14th instant) has given increased firmness to the market generally. 75 bags Surinam, by auction, brought 76s to 80s 6d per cwt.

COFFEE.—A good demand prevails, especially for native Ceylon, which is fully 1s dearer. 60 casks 2,314 bags, by auction, sold at 68s to 71s 6d for good ordinary to fine; some doubtful quality, in casks, at 65s to 65s 6d. 1,316 casks 674 barrels 1 bag plantation sold steadily at 77s to 85s 6d, up to 89s 6d for fine. Some business has also been done privately. 624 cases 3,379 bags East India partly sold at steady quotations: Malabar, 71s to 72s; other pale sorts, 73s 6d to 77s 6d; fine ordinary to good, 78s to 88s per cwt.

TEA.—The market is very firm, with diminished supplies offering. Some speculative business has been done in the common grades of congou, at rather higher rates.

RICE.—A large business has been done in soft grain descriptions at 10s 9d to 12s 3d, and new Rangoon at 12s 6d to 12s 9d per cwt. These are 3d to 6d higher prices in many instances. The sound portion of 3,500 bags Necrancie Arracan, offered by auction, was sold at 10s 6d to 11s 6d per cwt.

SAGO.—112 boxes middling small grain sold at 20s to 20s 6d per cwt.

IMPORTS and DELIVERIES of RICE to Oct. 28, with STOCKS on hand.

SPICES.—The recent advanced rates for some kinds have generally been maintained, with a steady demand. 1,644 bags Singapore black pepper partly sold at 3¼d to 3⅜d; 288 bags Alleppy kind realised 3⅜d. Business has been done privately in Penang at 3½d per lb. White is quiet. 728 bags Zanzibar cloves sold steadily at 3d to 3⅛d. 576 bags pimento part sold at 2⅝d to 2⅞d. 61 cases brown nutmegs sold at 1s 1d to 3s 2d for small to bold. 30 cases mace partly sold at 1s 6d to 2s 10d per lb. 323 barrels Jamaica ginger sold steadily: ordinary to good, 64s to 92s. 650 cases wormy Cochin all sold at 66s 6d to 73s. 290 bags rough Bengal sold at 26s 6d per cwt.

SALTPETRE.—Bengal is dull, and there have not been any transactions on the spot. A sale of 50 tons, reported for arrival, at 25s per cwt.

IMPORTS and DELIVERIES of SALTPETRE to Oct. 28, with STOCKS on hand.

SHELLAC.—The market is at present quiet, but the moderate quantity to arrive attracts some attention. 630 chests offered by auction, were chiefly bought in, a few lots fine selling at 5*l* 10s to 5*l* 17s 6d.

DRYSALTERY GOODS.—No sales of importance have occurred. Bengal turmeric has sold at 25s 6d per cwt.

METALS.—The week's transactions are of moderate extent, although a steady tone pervades the market. Foreign tin has further advanced since the English smelters raised their prices. Straits sold at 94*l* to 96*l*, according to prompt. To arrive, 96*l* paid. Lead commands a ready sale. Spelter has been firm, but without sales of any magnitude. British iron steady. Scotch pig is easier in price, the last sale being at 58s to 58s 6d per ton, mixed numbers, cash.

MANILLA HEMP.—The high prices required have prevented business.

JUTE.—The sales on Wednesday went off irregularly, some marks being 10s dearer than last week. 5,020 bales chiefly sold: ordinary to good, 15*l* to 25*l* 5s per ton. Many parcels have changed hands by private contract since last Friday, but the market is now less excited.

OILS.—Olive oils generally are quiet at the quotations. Sperm is held at 120*l*. Other fish oils remain firm. Palm steady, in the proportion of 44*l* to 44*l* 10s for fine Lagos. Cocoa-nut steady: Cochin 51*l*; Ceylon 48*l*. Rape continues firm. There is not so much animation in the demand for linseed oil as of late. This morning, 36*l* to 36*l* 5s per ton on the spot is the nearest value.

TALLOW.—The market has been rather quiet during the week. This morning it is steady, and the quotations for new Peterburg Y.C. are as follows:—on the spot and to the end of the year, 50s to 50s 6d; January to March, 51s 3d; March only, 50s per cwt.

PARTICULARS OF TALLOW.—Monday, October 30, 1865.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market closed very flat, and 646 casks Barbadoes, &c., 4,200 bags Mauritius, 660 bags date Bengal, were nearly all bought in. The sales of West India for the week are only 1,244 casks.

COFFEE has sold readily, native Ceylon bringing a further advance of 6d to 1s per cwt.

RICE.—About 12,000 bags soft grain have sold at 10s 9d to 12s per cwt.

SALTPETRE.—A little business done at 24s per cwt.

METALS.—Scotch pig iron, 57s 6d for mixed numbers.

TALLOW.—Petersburg, on the spot, closed at 51s 9d; and for first three months, 51s 3d to 51s 6d per cwt. At the public sales, Australian beef realised 48s 3d to 49s 6d per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar in dry goods has been moderately supported this week. Unstoved goods are rather easier. Dutch crushed rather lower for ready goods; for forward delivery steady.

GREEN FRUIT.—Demand good for all kinds. Messina lemons of the new crop have arrived per Heaton Hall steamer. Some parcels sold by Keeling and Hunt at public sale realised high prices. Palermo oranges improved in value. Para nuts advanced 3s per barrel. Barcelona firm. Almeira grapes of sound quality in request, the parcels hitherto landed not being of a keeping character. Two cargoes black Spanish nuts arrived, opening price high.

DRY FRUIT.—Currants have not been quite so active during the week, but the article still is healthy, and fair sales are still being made at full rates. Ordinary Valencias show a considerable decline during the past fortnight, whereas fine has, if anything, advanced. Sultanas are very scarce, and a parcel of good fair soft sold to-day at auction at 68s. Figs are dull, and buyers are holding off, expecting lower prices.

ENGLISH WOOL.—Market very quiet.

COLONIAL WOOL.—The next sales will commence on the 16th inst. Quantity arrived to date is about 50,000, of which over 30,000 are Cape. Market remains quiet, but very firm. There has been more demand lately for America.

FLAX.—Market firm.

HEMP.—Owing to a considerable quantity being damaged at the late fire at Katharine Docks, holders are asking more money.

SILK.—A fair business doing, and prices very firm in Chinas. Bengals quiet.

TOBACCO.—The market has presented a firm and steady appearance for all good and fine descriptions of American, and holders have declined progressing with sales unless at outside quotations. Other growths than American have experienced an active demand, and especially Paraguay, which has been taken to a considerable extent, at advanced prices.

LEATHER AND HIDES.—The demand for leather continues good, the principal feature being that heavy sole leather is now more required than that of light substance. At Leadenhall on Tuesday the supply was no doubt lessened by the bad drying weather, and of good crop hides, foreign bellies, light calfskins, English horse hides, and prime kips, it was inadequate to the demand. Scarcely any change, however, can be quoted in prices.

METALS.—There has been an absence of activity in our market this week, but prices are steady for the most part. Copper is firm at quotations, but there are not a great many buyers ready to pay the advanced rates. Iron is well supported by demand, and here and there a trifle more is paid. Tin hardly holds its ground, although early in the week prices were even firmer, but the stock of Banca in Holland having proved extremely large, the buyers have evinced shyness. Spelter and lead both firm, and in fair demand. Tin plates steady.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	54	3
Fat by ditto	2	8½
Yellow Russia	52	0
Melted stuff	41	6
Rough ditto	23	6
Greaves	20	0
Good dregs	6	0

METROPOLITAN CATTLE MARKET.

THURSDAY, Nov. 2.—The supply of beasts here to-day was tolerably good as to number, but very deficient in quality. All breeds moved off freely, and Monday's quotations were well supported. The top figure was 5s 4d per 8 lbs. The show of sheep was rather limited, nevertheless sales progressed slowly, and in some instances prices had a drooping tendency. The best Downs and half-breds realised 6s 6d per 8 lbs. Calves were in fair average supply and moderate request, on former terms, viz., from 4s 6d to 5s 6d per 8 lbs. There was only a limited business done in pigs, at 2d to 4d per 8 lbs less money. Milch cows were very dull, at late rates.

Per 8 lbs to sink the offal.

	s	d		s	d		s	d		s	d
Coarse and inferior beasts	3	2	to	3	6	Prime Southdown sheep	6	4	to	6	8

HOP MARKET.

BOROUGH, Friday, Nov. 3.—The market is well supplied with hops. For good and fine qualities the market is firm, at full currencies, but for inferior hops the trade is dull. New Mid and East Kents, 80s to 190s; new Weald of Kents, 70s to 126s; new Sussex, 60s to 115s; yearlings, 95s to 135s per cwt.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, Nov. 3.—The supplies of potatoes on sale are but moderate. The trade is steady at the annexed quotations:—Kent and Essex Regents, 50s to 90s; Yorkshire ditto, 60s to 80s; Flukes, 70s to 100s per ton.

COAL MARKET.

FRIDAY, Nov. 3.—Wallsend Haswell, 23s 6d; Hetton, 23s 6d; South Hetton, 23s 3d; Cassop, 22s 9d; Hotspur, 19s; Pensher Primrose, 21s 9d; Tunstall, 22s; Lambton, 22s 6d; West Hartley, 18s 6d. Ships at market, 46; sold, 15; gas contracts, 22—37; unsold, 9; ships at sea, 50.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Nov. 3.—The sales by auction of the miscellaneous descriptions have not met with much spirit, and the bulk had to be withdrawn.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Nov. 3.—The market fairly attended. Moderate business in wheat at 1d to 2d per cental dearer. Flour firm, at extreme rates, with steady business. Indian corn firm: mixed, 29s 9d to 30s. Beans steady. Oats scarce, at 2d per bushel dearer. Oatmeal strong.

The Railway Monitor.

EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic receipts of railways in the United Kingdom amounted for the week ending the 21st of October, on 12,299 miles, to 691,707*l*, and for the corresponding week of last year, on 11,874 miles, to 655,293*l*, showing an increase of 425 miles, and of 36,414*l*. The gross receipts on the 14 principal railways amounted in the aggregate, on 8,808 miles, to 573,291*l*, and for the corresponding week of 1864, on 8,474 miles, to 547,928*l*, showing an increase of 334 miles and an increase of 25,363*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, Oct. 30.—In the share market to-day, being the preparation for the account at the end of the month the transactions were chiefly for the account, and the final quotations were rather inclined to improvement in all the descriptions, except American securities, which were again flatter, and the banks and mines, in which there was no material average alteration. In English railways, North-Eastern (Berwick) recovered ½; and Great Northern (A stock) advanced 1, North-Western and Midland ½ each, and Lancashire and Yorkshire a further ½. In colonial, Great Western of Canada shares (of both descriptions) improved further ⅜ each, Grand Trunk of Canada a further ½, and ditto (4th preference) and ditto (deferred) 1 each; and Madras (5 per cent.) receded ½. In foreign, Lombardo-Venetian recovered ⅜, and Northern of France advanced ½, and Great Luxembourg and Dutch-Rhenish ¼ each. In American, Virginia (6 per cent.) declined 1, Erie debentures ⅝, Illinois Central shares ½, and Erie shares (paid up) a further ½. In Brittish mines, Chiverton recovered ½; East Caradon, Tin Croft, and Wheal Trelawney advanced ½ each, and East Wheal Russell ¼; Great Wheal Vor relapsed ½; East Bassett and West Bassett declined 1 each, and South Condurrow ¾; and Herodsfoot are now quoted ex dividend. In foreign mines, Cape Copper further improved ¼, and Frontino Gold receded ¼.

TUESDAY, Oct. 31.—In the share market to-day, little more than a nominal amount of business was transacted, and in English railways the tendency at the close was downwards; mines and colonial railways were firm, and the other descriptions were without change of tone, several instances of lower quotations being generally in consequence of being ex dividend. In English railways, North-Western and Midland relapsed ¼ each, ditto (Birmingham and Derby) and Great Northern declined 1 each, Great Western (Oxford) 1½, and Metropolitan ½; and Metropolitan District are unaltered at 102 to 104. In colonial, Madras (5 per cent.) recovered ½; and East Indian improved ½, Grand Trunk of Canada a further ½, and Great Western of Canada (paid up shares) a further ½. In foreign, Lombardo-Venetian further improved ⅛, and Antwerp and Rotterdam declined ⅛. In American, United States (5-20) improved ½, and Virginia (6 per cent.) further declined 1. In British mines, Great Wheal Vor recovered 1; and Wheal Buller advanced 2, Hingston Downs ¾, and Tin Croft a further ½. In foreign mines, St John del Rey improved 1, Washoe Gold (of both descriptions) ½ each, and Cape Copper a further ¼, and Vallanzasca Gold declined ¼.

WEDNESDAY, Nov. 1.—The Stock Exchange having been closed to-day, no business was transacted in the market for railway shares.

THURSDAY, Nov. 2.—In the share market to-day, with a very few transactions, there was again a tendency to depreciation in English railways and American; foreign railways were steady, and the other descriptions firmer, particularly Canadian. In English railways, North London improved 1; Great Northern (A stock) declined 1¼, Great Eastern ½, Lancashire and Yorkshire ¼, Metropolitan (Extension) ⅛, and ditto (stock) further ¾; and Metropolitan District remain at 102 to 104. In colonial, Bombay and Central India and Eastern Bengal improved ½ each, Buffalo and Lake Huron ¼, and all the descriptions of Grand Trunk of Canada (except 1st and 3rd preference deferred) an average of over 1½ each. In foreign, Ottoman advanced ½; Paris and Mediterranean receded ½, and West Flanders are now quoted ex dividend. In American, West Chivert n advanced 7½, South Condurrow ½, and Tin Croft a further ½. In foreign mines, Cape Copper further advanced 1¼, and St John del Rey and Washoe Gold (of both descriptions) 1 each; and Frontino Gold declined ¼.

FRIDAY, Nov. 3.—The railway share market was inactive to-day; prices exhibited no alteration compared with those last current yesterday. Caledonian and Great Eastern stocks were rather flat. London and North-Western stock was quoted 124½ to 124¾; Great Western, 63¼ to 63¾; Midland, 126¼ to 126½; Lancashire and Yorkshire, 122⅝ to 122⅞; South-Eastern, 79¾ to 80; Great Eastern, 46¼ to 46¾; Caledonian, 128 to 129; Metropolitan, 137¼ to 137½; London and South-Western, 96 to 97; Great Northern, 129 to 130; ditto A, 148½ to 149½. Foreign and colonial securities showed no variation of importance. There were inquiries, however, for Great Western of Canada and Sambre and Meuse shares.

DEATH.—On the 1st Nov., at Trevor House, Gipsey Hill, Norwood, Harriet Maria, aged 26, the beloved wife of C. T. Getting, Esq.

TO GENTLEMEN SEEKING preparation for Woolwich, the Civil Service, and the Line.—A Graduate of Oxford, who has had long experience in preparing for the competitive and University examinations, and has three students at present, wishes to receive two more. Delightful situation, great educational and domestic advantages, and moderate terms.—Address, L. L. D., 9 Leighton rescent, Tufnell park West, N.W.

EDUCATION IN GERMANY.—ANGLO-GERMAN ESTABLISHMENT, Bonn-on-the-Rhine, founded in 1847.—Herr THOMAS prepares Young Gentlemen for the Army, Navy, Civil Service, and Mercantile pursuits. German and French only are spoken in the establishment, where the Pupils enjoy all the comforts of an English home. The highest references given.—For particulars, apply to the Director, THEODORE THOMAS, Baumschule Allée, Bonn.

PROPRIETARY SCHOOL, GRAVESEND.
Head Master, Mr M. GUTTERIDGE, B.A.
The course of study combines the main features of the best middle schools with the distinctive characteristics of our ancient classical schools, and is such as to fit a boy either for business or professional life. It includes the Classics and Mathematics; History, General and Sacred; Geography, Physical and Political; English Grammar and Composition, Spelling and Arithmetic, Drawing and French and the practice of good Handwriting.
Pupils are prepared for the Civil Service Examinations, for the Oxford and Cambridge University Local Examinations, and for Matriculation at the London University.
For terms and prospectuses, apply at the School.

SAUCE.—LEA AND PERRINS' WORCESTERSHIRE SAUCE.
This delicious condiment, pronounced by connoisseurs is prepared solely by Lea and Perrins.
"THE ONLY GOOD SAUCE."
The public are respectfully cautioned against worthless imitations, and should see that Lea and Perrins' names are on wrapper, label, bottle, and stopper.
Ask for LEA AND PERRINS' SAUCE.
*** Sold wholesale and for export by the Proprietors Worcester; Messrs Crosse and Blackwell; Messrs Barclay and Sons, London; &c., &c., and by Grocers and Oilmen universally

NOTHING IMPOSSIBLE.—The greatest and most useful invention of the day, AGUA AMARELLA.—Messrs JOHN GOSNELL and CO., Three King court, Lombard street, perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has non of the properties of dyes; it, on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price one guinea per bottle; half bottles, 10s 6d. Testimonials from ar ists of the highest order and from individuals of undoubted respectability may be inspected. Messrs John Gosnell and Co. have been appointed perfumers to H.R.H. the Princess of Wales.

H. J. AND D. NICOLL, TAILORS to the Queen, Royal Family, and Courts of Europe.—For GENTLEMEN, the FASHIONS for the SEASON, for the promenade or demi dress—Superfine frock coats, with rich silk breast facings, or morning coats of superfine Melton cloths, the change for the former being 3½ to 4½ guineas; for the latter. 2½ to 3½ guineas. For negligo purposes, morning coats with pocket flaps at the waist, also the negligo jackets; these are of Melton, fancy coatings, Angola and Cheviots, the prices from 25s to 4 guineas. The Angolas and Cheviots are also made in suits, at prices from 2 to 4 guineas; evening dress, black cloth of the finest quality. For overcoats—Melton, Beaver, and Witney cloths, from 2 to 8 guineas. For young gentlemen from eight years of age—The morning coat and neglige jacket; also suits of Angola and Cheviot, the prices according to size, commencing at 31s 6d the suit. For boys from four years of age—The knickerbocker and Highland costume of black velvet, or fine cloth for dress, and of Angola and Cheviots for morning, the price of the first size knickerbocker, 1 guinea the suit. For overcoats—Melton, Beaver, and Witney cloths, from 1 to 2 guineas each. Foreigners and visitors to London, Manchester, and Liverpool, will find at Messrs Nicolls', garments ready for immediate use, or made to order at a few hours' notice.—H. J. and D. Nicoll, 114, 116, 118, 120 Regent street; 22 Cornhill, London; 10 Mosley street, Manchester; and 50 Bold street, Liverpool.

PRACTICAL OBSERVATIONS on the CAUSES and TREATMENT of CURVATURES of the SPINE. Third edition, price 6s.
AND
Just published, second edition, price 1s 6d,
CASES and OBSERVATIONS illustrative of the beneficial results which may be obtained by close attention and perseverance, in some of the most unpromising instances of Spinal Deformity; with numerous Engravings. By SAMUEL HARE, F.R.C.S., &c.
"We unhesitatingly commend this work as a truthful and trustworthy statement of the power of scientific surgery and medicine over some of the most grievous hindrances to human activity and industry."—MEDICAL GAZETTE.
"Mr Hare is, we think, a sound and successful practioner."—MEDICAL CIRCULAR.
"The author has had much success in his plan of treatment, and we are of opinion that the principles on which he acts, in the treatment of these affections, are correct."—LANCET.
"Mr Hare may take credit to himself for having effected much good in the treatment of the cases described."—BRITISH MEDICAL JOURNAL.
London: John Churchill; and may be had of all booksellers.

London: C. Macintosh and Co., 3 Cameron street, West; S. Man and Son, 4 Aldersgate street; J. G. Gould, 198 Oxford street. Glasgow: Thomas Chapman, 56 Buchanan street; and may be had by order of all druggists.

DEANE'S TWO-HOLE BLACK PENS which are unequalled for the durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped.
"G. and J. Deane, London bridge,"
and the ox, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed.
"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

IMPORTANT ANNOUNCEMENT.—JOSEPH GILLOTT, METALLIC PEN MAKER to the QUEEN, begs to inform the commercial world, scholastic institutions, and the public generally, that by a novel application of his unrivalled machinery for making steel pens, he has introduced a new series of his useful productions, which, for the excellence of temper quality of material, and, above all, cheapness in price, must ensure universal approbation and defy competition
Each pen bears the impress of his name as a guarantee of quality; they are put up in boxes containing one gross each, with lable outside, and the fac-simile of his signature.
At the request of numerous persons engaged in tuition, J. G. has introduced his warranted school and public pens, which are especially adapted to their use, being of different degrees of flexibility, and with fine, medium, and broad points, suitable for the various kinds of writing taught in schools.
Sold retail by all stationers and booksellers. Merchants and wholesale dealers can be supplied at the works, Graham street, Birmingham; at 91 John street, New York; and at 37 Gracechurch street, London.

NEW OPERA AND FIELD GLASS and the Reconnoitrer Glass, price 10s 10d (sent free). This "TOURIST'S FAVOURITE," through extraordinary division of labour, distinctly shows small windows ten miles off, landscape at 30 miles, Jupiter moons, &c. The Marquis of Carmarthen—"The reconnoitrer is very good." Earl of Breadalbane—"I find it all you say, and wonderfully powerful for so very small a glass." Earl of Caithness—"It is a beautiful glass." "Rev. Lord Scarsdale approves of it." Lord Gifford—"Most useful." Lord Garvagh—"Remarkably good." Sir Digby Cayley—"It gives me complete satisfaction, and is wonderfully good." Captain Sendey, Royal Small Arms Factory, Enfield, "found it effective on the 1,000 yards range." F. H. Fawkes, of Farnley hall, Esq.—"I never before met, although I have tried many, a glass combining so much power, for its size, with so much clearness." THE FIELD—"We have carefully tried it at an 800 yard rifle range against all the glasses possessed by the members of the corps, and found it fully equal to any of those present, although they had cost more than four times its price." NOTES AND QUERIES—"What intending tourist will now start without such an indispensable companion to a pleasure trip?" The celebrated Hythe Glass shows bullet marks at 1,200 yards, and men at 3½ miles, 31s 6d. All the above glasses, respectively bearing the registered Trade-Marks, "Salom," "Reconnoitrer," and "Hythe," are only to be had direct from Salom and Co., 98 Princes street, Edinburgh. No agents of any kind anywhere.

TO MERCHANTS AND SHIPPERS.
The increased demand for
DINNEFORD'S FLUID MAGNESIA
(for thirty years highly approved by the Faculty, and extensively used in hot or tropical climates) recommends it to the attention of Shippers. A very liberal discount is allowed on export orders by the manufacturers, DINNEFORD and CO., Chemists, &c., 172 New Bond street, London.

COLMAN'S PRIZE-MEDAL MUSTARD

Bears their Trade Mark, the "BULL'S HEAD," on each Package.

It was the only Mustard which obtained a PRIZE MEDAL at the GREAT EXHIBITION, 1862. Their Genuine and Double Superfine are the Qualities particularly recommended for Family Use.

Retailed in every Town throughout the United Kingdom.

J. and J. COLMAN, 26 CANNON STREET, LONDON.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting Iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their next work.

Each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"For public schools, and all rooms occupied by children, there will now be no excuse for using poisonous paints. Parents have remarked, that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14. 1850

THOMAS TURTON AND SONS, Manufacturers of CAST STEEL for cutters, punches, taps and dies, turning tools, chisels, &c. CAST STEEL piston rods, crank pins, connecting rods, straight and crank axles, shafts, and forgings of every description. FILES marked T. Turton. Superior to any other make. DR DE JONGH'S

(Knight of the Order of Leopold of Belgium)

LIGHT-BROWN COD LIVER OIL, Prescribed by the most Eminent Medical Men as the safest, speediest, and most effectual remedy for CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,

Is incomparably superior to every other kind.

Dr EDWARD SMITH, F.R.S., Inspector of Poor Laws, Late Physician to the Hospital for Consumption and Diseases of the Chest, Brompton, in his Work on "Consumption," writes: "It is impossible in private practice to determine whether the Oil which we prescribe is genuine Cod Liver Oil or not, and hence we think it a great advantage that there is one kind of Cod Liver Oil which is universally admitted to be genuine—the Light Brown Oil supplied by Dr de Jongh."

Dr BARLOW, Senior Physician to Guy's Hospital, states: "I have frequently recommended persons consulting me to make use of Dr de Jongh's Cod Liver Oil. I have been well satisfied with its effects, and believe it to be a very pure oil, well fitted for those cases in which the use of that substance is indicated.

Sold only in capsuled Imperial Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; by respectable chemists.

ABRIDGED PROSPECTUS.

The objects of this Company are to provide a superior style of accommodation for visitors at a moderate rate of expenditure, and with this view to combine under one system of management various boarding houses and private hotels, principally at watering places on the coast, as well as at other suitable localities where the connections and co-operation of one establishment will tend to the advantage of the others.

The Directors feel every confidence that a properly regulated scale of charges will give satisfaction to visitors, and at the same time yield a highly remunerative rate of profit to the shareholders, estimated at from 20 to 25 per cent.

The business of the Company will be forthwith commenced at Brighton and Sydenham, where arrangements have been concluded for the immediate possession of the following extensive and valuable properties, including the leases, good-will, furniture, fixtures, &c., viz.:—Belvedere Mansion, Brighton; Victoria House, Brighton; and the London Hotel, Sydenham. The above premises have all been surveyed and valued by the Company's architect, and his report, together with the agreement for sale and the articles of association, may be inspected at the offices of the solicitors.

Applications for shares are to be forwarded in the usual form through the bankers, brokers, solicitors, architect, or secretary of the Company.

SIX PER CENT. SECURED ON FREEHOLD PROPERTY in LONDON.

The Directors of the INNS of COURT HOTEL COMPANY (Limited) are ISSUING the remainder of the Company's SIX PER CENT. MORTGAGE DEBENTURES.

These Bonds secured as a first charge on the entire Hotel property (estimated as worth not under £120,000), are issued for three, five, or seven years, with coupons attached for payment of interest half-yearly, and investors have the option of paying in full, or by three instalments.

The Company cannot borrow more than £80,000.
H. T. L. BEWLEY, Secretary.
Offices of the Company, 63 Lincoln's inn fields, July, 1865.

SOCIETE AGRICOLE ET INDUSTRIELLE D'EGYPTE.

—The London Committee hereby give notice that a Second Call of Four Pounds per Share on the Shares of this Society was made by the Council of Administration, at their Meeting held at Alexandria, on the 25th of September, 1865.

This Call is to be paid by the European Shareholders at the Banking-house of Messrs Glyn, Mills, Currie, and Co., No. 67 Lombard street, London, as follows:—£2 per Share on the 30th day of November, 1865, and £2 per Share on the 30th day of January, 1866

The Council have found it necessary to make this Call in order to assist them in carrying out the important and expensive contracts that have been conceded to the Society by His Highness the Viceroy, the Egyptian Government, and numerous private individuals. Among such Contracts are works for,—

The Viceroy's Palace at Abbasieh.
The Port, Quays, Jetties, and Lighters at Alexandria.
The Mahmoudieh Coaling Wharf.
The Citadel of Cairo.
The Enclosure of the Esbekieh Public Gardens.
The Cairo Improvements.
The Azizié Company.
The Railway Station at Alexandria, &c.

N.B. The holders of Provisional Scrip can exchange it for Share Certificates at the office of the Society as under, on and after the 20th of November, 1865.—By order,
W. H. MAITLAND,
Secretary to the London Committee.
No. 5 East India avenue, E.C., October 28, 1865.

LAMBERT BROTHERS, WALSALL.

MANUFACTURERS OF GAS TUBES AND FITTINGS.
LAP WELDED BOILER TUBES.

VIDONIA.—BRUCE'S BEST OLD VIDONIA, an excellent White Wine, 30s per dozen, bottles included. Other Wines as per price list.

WILLIAM S. LAWTON,
35 Trinity square, Tower hill, E.C.

NUNN'S MARSALA OR BRONTE WINE, 25s per dozen, £7 4s per six dozen, £12 15s per quarter-cask.

Rail paid to any station in England. This wine will be found of superior quality, is soft and old, and, though full flavoured, entirely free from heat or the slightest approach to acidity.—THOMAS NUNN and SONS, Wine, Spirit, and Liqueur Merchants, 21 Lamb's Conduit street, W.C. Price lists on application Established 1801

KINAHAN'S LL WHISKY v. COGNAC BRANDY.—This celebrated old Irish Whisky rivals the finest French Brandy. It is pure, mild, mellow, delicious, and very wholesome. Sold in bottles, 3s 8d, at the retail houses in London; by the agents in the principal towns in England; or wholesale at 8 Great Windmill street, W. Observe the real seal pink lable, and cork branded "Kinahan's LL Whiskey

BASS'S EAST INDIA PALE ALE.

The October, 1865, Brewings are arriving in casks of 18 gallons. Last season's Ale in bottles is in fine condition.

BERRY, BROS. & CO.,
3 St. James's street, London, S.W.

ALLSOPP'S PALE OR BITTER ALE.—Messrs SAMUEL ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for the March Brewings of their Pale Ale in Casks of 18 Gallons and upwards, at the Brewery Burton-on-Trent; and at the undermentioned Branch Establishments.—

The Right Hon. James Stuart Wortley.

BANKERS.

The Agra and Masterman's Bank (Limited), Nicholas lane.

SECRETARY—G. W. Benwell, Esq.

This Company is now issuing a limited number of Debenture Bonds for three, five, and seven years, bearing interest at 5 per cent. per annum, payable half-yearly, in sums of £40, £200, £400, and £800 each.

The funds of the Company have been advantageously invested in first-class freehold and long leasehold property in the City of London, which, with the unpaid capital of £800,000, afford the most ample security for all the debentures proposed to be issued.

Further particulars and forms of application may be had at the temporary offices of the Company, 70 Cornhill, E.C.

N.B.—These debentures will be received from shareholders in payment of any future call.

THE FREEHOLD LAND AND BRICK-MAKING COMPANY (Limited).

Incorporated under the Companies Act 1862, whereby the liability of each shareholder is strictly limited to the amount of his subscription.

Capital £25,000, divided into 5,000 shares of £5 each.

Deposit £1 per share upon application, and £1 per share on allotment. Calls not to exceed £1 per share, and at intervals of not less than three months. It is not proposed to call up more than £2 per share.

A guaranteed dividend of not less than 15 per cent. for the first five years, and all profits above 20 per cent., will be carried to the Freehold Land "Purchase Account."

DIRECTORS.

Colonel Onseley, Junior United Service Club, and Gloucester place, Hyde Park.
J. E. Panter, Esq., Lee Park, Blackheath.
J. Broderick Hartwell, Esq., 1 Brunswick place, Regent's Park (Director of the London and Paris Hotel Company).
Joseph H. Tilston, Esq., Chepstow place, Bayswater, W. (Director of the City Assurance Company.)
Edward Charles Lea, Esq. (Moss, Lea, and Co., Merchants), 16 Water lane, E.C.

BANKERS.

Sydney G. Smith, Esq., (Public Accountant,) Coleman street, E.C.; and one to be selected by and from the body of shareholders.

SECRETARY.—Charles Snewin, Esq.

Offices—160 Gresham house, Old Broad street, London, E.C.

PROSPECTUS.

This Company has been formed for the purpose of purchasing a freehold estate in the neighbourhood of Arundel, in the county of Sussex, on which has been discovered a valuable deposit of fine "Plastic Clay" well adapted for the "Manufacture of Bricks &c.," not only on account of the superior quality of the material itself, and the ready means of obtaining lime and sand in the immediate neighbourhood, but also on account of the very great advantage which the site offers for the carriage of the manufactured goods either by water or railway.

It is a well-ascertained fact that bricks as an article of commerce are so much in demand, that no thought of being able to glut the market can be reasonably entertained; and consequently an article bearing qualities of an extraordinary description with respect to lightness, strength, and cheapness, will take an unrivalled position.

In this undertaking there is no hidden element to deal with, there is little of the speculative character in the works, which lie at the surface, and the calculations, which are plain and simple, must foreshow the result of the Company's operations.

The Company will commence operations forthwith. The series of dividends of 15 per cent. will be payable the 1st April, 1866, the 1st July, the 1st October, the 1st January, 1867, and afterwards in quarterly succession each year, on the same day of the month.

Agricultural and many other industrial pursuits, shipping, &c., only admit of credit being taken annually, half-yearly, quarterly, or monthly; but in this investment the books will be kept and the accounts posted, so that the stock and profit will appear daily, preventing irregularities, and producing complete information for the shareholders.

At the present time the demand for best White Bricks is enormous, and there is the greatest difficulty in obtaining them in the London market, the price being so high, ranging from 65s to 68s per thousand. The trade is confined to a few firms who possess the necessary quality of clay for their production. It is certain that for many years to come the demand will steadily and rapidly increase.

This undertaking is absolutely free from anything of a speculative nature. The trade is done principally for cash. The cost of manufacture and the selling prices taken are upon a moderate and fixed basis, and cannot vary except in a slight degree; thus the profits are ascertained with unusual exactitude.

One-half the required capital has been subscribed by the Directors and their friends, and the Directors will allot the remaining shares in the order in which applications are received. If no allotment is made, the deposits will be returned in full.

Particulars, with prospectuses and forms of application, may be obtained at the Company's offices, also from the bankers and solicitor.

LEEDS WOOLLEN EXTRACT AND SPINNING COMPANY (Limited).

Incorporated under "The Companies Act, 1862."

Capital £150,000, in 10,000 shares of £15 each.

First issue, 5,000 shares.

£1 per share to be paid on application, and £2 on allotment. Future calls not to exceed £3 per share, nor to be made at intervals of less than three months.

The business being now in active operation, and producing large profits, the Directors fully anticipate declaring a dividend early in the ensuing year.

DIRECTORS.

Col. Stuart Wortley, Roslyn house, and Carlton club, Chairman.
John Holmes, Esq., banker, Leeds.
John Norris, Esq., iron merchant, Pancras lane, and Hensham, Surrey.
Augustus Wehner, Esq., Hanoverian Consul, 6 Lime street, London.
John Wade, Esq., wool merchant, Albion street, Leeds.

AUDITORS.

Messrs Price, Holyland, and Waterhouse, Gresham street, E.C.

SECRETARY—Benjamin Hirst, Esq.

Temporary Offices—No. 21 Gresham street, London; 6 Victoria chambers, Leeds.

PROSPECTUS.

This Company is formed for the purpose of purchasing the freehold premises, plant, machinery patents, and goodwill of the business now in active operation at Low Hall Mills, Holbeck, Leeds, for extracting the fibres of wool from fabrics or materials composed of wool combined with cotton or other vegetable substances, and for spinning purposes.

The principle of limited liability and the advantages of a joint stock company are especially adapted to the acquisition of industrial enterprises, such as that proposed to be worked by this Company, where associated capital is all that is necessary to increase largely the existing profits, it being an admitted fact that the demand for the staple manufactured under the patent, viz., wool, is considerably in excess of the supply, and consequently the late proprietor seeks, by the formation of the present Company, to considerably extend the works and the production of wool, for which there is always a ready sale.

The patent will be the absolute property of the Company.

The advantages of the patented process over the methods hitherto known and worked are such that the quality of the wool extracted can be at all times depended upon, and a large and lucrative business secured.

The books of the present proprietor and patentee, for the last two years months, have been examined by Messrs Price, Holyland, and Waterhouse, public accountants, and from that report the directors feel assured that, with an increase of capital, very large dividends may safely be calculated upon.

Calculations have been made from reliable data, showing that upon a capital of £50,000, net profits of upwards of £15,000 per annum may be secured, and that a first dividend can be declared early in the ensuing year.

The premises, which are freehold, are most eligible, and admirably adapted for the purposes of this Company.

They consist of a mill, upwards of 200 feet in length, with dry house, warehouse, packing shop, joiner's shop, stabling, coach-house, store rooms, &c. There are also seven cottages, outbuildings, &c.

The plant consists of a very powerful 60-horse steam engine, fitted with improved boilers, also large iron cisterns, weighing machine and weigh house, hydraulic packing press, large shaftings, drums, &c, and all requisite fittings.

There is an unlimited water supply, available at all seasons of the year, which is an important desideratum.

Such confidence has the present proprietor in the profitable results of this undertaking, that he is willing to continue the management of the works, making his remuneration chiefly dependent upon the successful operations of the Company, by receiving a commission only when the shareholders have been paid a minimum dividend of £15 per cent upon the paid-up share capital. He also agrees to allow a portion of the purchase-money to remain upon mortgage, at 5 per cent. per annum, and to take a considerable sum in shares of the Company.

Applications for shares to be made in the annexed form. In the event of no allotment of shares being made, the deposit will be returned in full.

The contract may be seen, and prospectuses and forms of application for shares obtained of the Secretary, at the offices of the Company, and also of the bankers, brokers, and solicitors.

FORM OF APPLICATION FOR SHARES

No. ——.

To the Directors of the Leeds Woollen Extract and Spinning Company (Limited).

Gentlemen,—Having paid to your bankers the sum of £ , being a deposit of £1 per share on shares in the above Company, I hereby request that you will allot me that number, and I agree to accept such shares, or any less number you may allot to me; and I agree to pay the sum of £2 per share on allotment, and to become a member of the Company.

BROKERS.

Messrs Barry and Co., 7 Birchin lane.

SECRETARY—Frederick Bryant, Esq.

Temporary Offices—6 Martin's lane, Cannon street, E.C.

ABRIDGED PROSPECTUS.

The formation of this Company has arisen from the combined efforts of some gentlemen who last year formed themselves into a private association, with the view of finding out the best method of preserving meats so as to supply our home markets with provisions exported from those countries where they are produced in excess of the local demand. The result of their efforts has led to the adoption of the process patented by Mr Richard Jones, by which animal food (beef, mutton, poultry, &c.) may be preserved in a fresh raw state for an indefinite period of time, and under all circumstances of climate and temperature.

Those gentlemen have consented to make over to this Company, for the sum of £32,000, the whole of their interest, which consists of all the home and foreign patents which they have secured at a great expense (with the exception of the one for America, which the patentee has reserved), together with the valuable freehold land, consisting of above 16 acres, and the new factory and apparatus recently erected thereon, situate near Rainham, in Essex, on the Tilbury and Southend Railway.

The former proprietors have agreed to invest £20,000 in the shares of this Company; and as 3,000 shares are already reserved for Australia, it will appear that half the capital has already been placed.

A gentleman, now on his passage to Australia, has been vested with authority to form a board in that colony to act in concert with the home Directory, and an arrangement has been made for supplying the European market with beef and mutton at prices which will enable the poorest classes of the population to become consumers, and from the well-known fact that cattle of the finest quality can there be obtained at almost nominal prices, there is reason to believe the profit will be highly remunerative to the shareholders.

The factory may be inspected by a special order from Mr R. Jones, No. 29 Botolph lane. Samples of the meat may be seen at the Company's temporary offices, 6 Martin's lane, where the articles of association can be read and prospectuses obtained, as well as at the brokers of the Company, Messrs Barry and Co., 7 Birchin lane; at the Agra and Masterman's Bank, Nicholas lane, and at the solicitors.

Applications for shares must be accompanied by the payment of a deposit of 10s per share, which will be received by the Agra and Masterman's Bank, 34 Nicholas lane, Lombard street. In the event of no allotment being made, the deposit will be returned in full: should a less number of shares be allotted than are applied for, the deposit will, so far as required, be appropriated towards the payment due upon allotment.

Botolph lane, October 4, 1865.

The Company's works are now in operation, with shipping orders in the course of execution, and the Company are prepared to supply any quantity of preserved meat and poultry that may be required.

LAND CREDIT
AND
AGRICULTURAL CREDIT.

BY A. LANGRAND-DUMONCEAU.

SUMMARY.

INTRODUCTION.
CHAPTER I.— § 1. Definition of Land Credit. Slowness of its growth. The two rival systems—the Loan with reimbursement of the capital by a Single Payment; the Loan with reimbursement of the capital by Yearly Payments. Inconveniences of the first of these systems; advantages of the second.
§ 2. Mortgage Loans, repayable by yearly instalments. Land Bonds, representing these mortgage loans. Banks of Land Credit. Their system of operations. Examples. Advantages which these establishments present to Landowners who wish to borrow, and to Capitalists who wish to lend.
§ 3. Land Institutions which have been originated by me: the International Character which distinguishes them. Austria the starting point of my operations. The *Vindobona, Banque de Crédit Foncier et Industriel, Société de Crédit Foncier International, Banque Hypothécaire Néerlandaise, Banque Hypothécaire Saxonne.* Special object of each of these establishments. How they work together towards a common end.
CHAPTER II.—Definition of Agricultural Credit. Institutions of Agricultural Credit which I propose to establish,—the *International Bank* and *Local Bank of Agricultural Credit.* Local operations indispensable, in order to come into efficacious relations with the rural population. Examples of operations. Relations between the *Local Banks of Agricultural Credit* and the *Land Credit Banks.*
CONCLUSION.

I have described in former publications the creation of an international bank of agricultural credit and of local banks of agricultural credit, by the aid of the large amount of capital placed at my disposal by the various land companies recently established.

It may be useful, I think, to develop my ideas on this matter, still new to the general public, and to show the exact relation and close union which my existing institutions of land credit bear to those which I am about to establish. This seems to me the best means of bringing into view the special character of institutions which, pursuing the same object, may appear burdensome superfluities to those who lose sight of my plan as a whole.

Such is the object of the present publication, which may be regarded as a programme for the future, and as an explanatory record of what has been already accomplished. It is good from time to time to glance back upon the distances traversed, for thereby one better understands the road yet to be passed over, and the goal which is sought to be reached. In other words, I propose to show what I have already accomplished, and what still remains for me to do in order to complete the work which it is my great aim to achieve.

There are three kinds of industry—the commercial, the manufacturing, and the agricultural. Credit, therefore, may take three different directions—towards commerce, towards manufactures, and towards agriculture.

My institutions have for their exclusive object to favour the development of credit as applied to the soil and its productions. This comprises land credit and agricultural credit. The institutions which I have already established relate to land credit; those which I am about to establish will concern themselves specially with agricultural credit.

What is meant by land credit? What is meant by agricultural credit? What is the line of demarcation which separates the one from the other?

These questions I shall answer in the two following chapters.

CHAPTER FIRST.

Land Credit, and the Institutions connected therewith which I have originated.

§ I.

Land Credit—What is it?

Land credit* is the credit given to persons who have immoveable property to offer in security. The mortgage system ensures to the lender repayment of his loan, inasmuch as, if the borrower does not fulfil his obligations, the law gives the lender the power to put the property up to sale. Land credit, therefore, differs essentially from commercial or industrial credit; for, while the latter is seldom or never based upon any material security, and is given merely on the personal character of the borrower, the former rests on the best of all securities, namely, that of immoveable property. Land credit deals only with landed property. It therefore presents to capitalists who wish to lend, a security much more solid than that which is offered by commercial and industrial credit.

Such is land credit, its essence, and its character.

It is curious to observe that the institutions connected with commercial and industrial credit, although dealing with less solid securities, have nevertheless made a much more rapid and remarkable progress than the institutions connected with land credit. Human genius seems to have exhausted itself in devising manifold and ingenious means by which capital may be brought to the aid of commerce and industry—means which have found their fullest development in banks, whether public or private; but the institutions connected with land credit are still in their infancy. Their advance has been heavy as the soil itself. This is especially true in regard to landed property in France, Belgium, and Holland.

What, in fact, has been the history of the credit-system as applied to property in land?

At present there are two forms of land credit which struggle for the ascendency, and of which, it is sad to say, the more logical and the more rational has not yet won the victory. One of these systems—the old one—is that of the ordinary mortgage, with repayment of the whole loan at a fixed time; the other is the mortgage with repayment by yearly instalments, and connected with the issue of land bonds.

Unquestionably the latter system presents immense advantages over the former, which is most burdensome alike to the borrower and the lender, and which is most unfavourable for the development of public credit.

In order to prove this, I cannot do better than to state, in a condensed form, the views on this matter entertained by one of the most distinguished political economists of Belgium:—

The landed proprietor wishes to obtain a loan upon the security of a mortgage, engaging to pay the annual interest on the loan, and to pay the capital at the end of a certain time. This is the old and still usual form of land credit: how does it work?

The landowner has first to seek about for a capitalist who knows not only his solvency, but also his character, and who is satisfied that he will loyally fulfil his engagements. This will be all the more difficult, if the landowner desires to obtain the loan quietly and without publicity. This is frequently the case; and in such cases the landowner must employ an agent, an intermediate between himself and the capitalist, who charges the more for his services in proportion as the wants of the landowner are urgent.

But let us suppose that no intermediate is employed, and that the landowner finds a capitalist ready to lend him the sum which he requires.

The lender proceeds to register the mortgage upon the property of the borrower. Thus the borrower, at the very time he is most short of funds, must commence by paying fees to a notary, the cost of registering and inscribing the mortgage, and by and by also the costs of closing the transaction. As the average of such loans in Belgium is only for seven years, and as three-fourths of them do not exceed in amount 400*l*, these costs of them form a considerable addition to the annual interest paid on the loan. So that, taking the case in the most favourable aspect for the borrower, and without taking into account the secret clauses which usually aggravate his position, he has to pay a very high rate of interest annually upon the capital advanced to him in this way.

Again, as the land can restore the borrowed capital only in the form of yearly savings arising from a surplus production, and as the lenders do not take repayment of their capital by instalments, another inconvenience presents itself. What becomes of the savings in the hands of the borrower, which must accumu-

* *Crédit foncier*, which in this pamphlet is generally translated "land credit," means credit applied to all kinds of immoveable property, including not merely the land, but also the buildings upon it.—*Translator.*

Digitized by Google

late until they amount to the whole sum borrowed? In most cases they remain sterile and unproductive,—always supposing that their owner has moral strength enough to refrain from appropriating them to some other purpose; for it is more easy to make money than to refrain from touching a small saving. In all countries there is an immense amount of small savings lying unproductive, which is a great loss to every nation.

Since the present mortgage system is not advantageous to the borrower, is it advantageous to the lender, the capitalist? I think not.

The lender must exercise great prudence in his estimate of the value of the property, in the examination of the title-deeds, in seeing that there are no previous mortgages upon the property, in the drawing up of the mortgage, and in duly registering it. In most cases, the lender cannot do all this for himself, and has to employ lawyers and others conversant with such work. This is one source of expense.

The ordinary mortgage system by no means adequately ensures to the capitalist exactness and regularity on the part of the borrower in the fulfilment of his obligations. The borrower rarely pays the interest on the day named in the agreement,—so that the capitalist can never count upon his money, and is thereby hampered in his engagements.

If the landowner can pay neither the interest nor the capital, the lender has to encounter further and greater inconveniences. He must have recourse to a forced sale. Now the public, which is sometimes unjust in its pity, generally considers that the man who thus makes a forced sale of the property is playing an odious part, even though he is only protecting his own rights: in country districts, especially, the public always takes the part of the man whose property is sold. On the other hand, in putting up the property for sale, the lender enters upon a long and costly process, the duration of which cannot easily be determined; and when at last he has realised the value of the land, he finds that a large portion of the proceeds of the sale are swallowed up by expenses of one kind or another. This is especially true when the property put up to sale is of small value.

In these circumstances, what becomes of the lender's security? The security of the ordinary mortgage system, in truth, is much less than is generally supposed; and after much trouble, and loss both of time and money, the lender often finds that his security has slipped through his fingers, which under a better system ought to have amply ensured him repayment of his capital.

But let us take the case in its best form. Let us suppose that the landowner pays the interest regularly, and repays the capital at the term specified in the contract. Even in this case there is a great inconvenience for the capitalist. If he have need of his money before the expiry of the mortgage, it will be difficult for him to find any one who will buy his mortgage, for the purchaser in such a case must be acquainted with the circumstances of the debtor and be convinced of his integrity. Moreover, such a transfer of the mortgage cannot be effected without expenses,—a deed is required, which must be notified to the debtor, or in which he is required to take part. Mortgage loans thus labour under the serious disadvantage of not being negotiable. Lenders must lie out of their money for a long period, without having any means of getting it back in case of need. This fact, of itself, suffices to divert to other purposes a large amount of capital which, under other circumstances, would be placed at the disposal of agriculture.

Such is the position of landed property under the present system. It is far from being brilliant. And, notwithstanding, the advances of capital upon landed security are every day very numerous. Thus, to take but one example, the landed property of Belgium is burdened by debt to the extent of upwards of £30,000,000, spread over 333,000 debtors. The annual amount of capital borrowed in this form is £2,000,000. This fact shows how far behind the rural population still is in the science of financial economy.

§ 2.

Mortgage Loans Repayable by Annuity.—Land Bonds.

I now proceed to consider the new system—namely, mortgage loans which are repayable by yearly instalments, and which are represented by an issue of land bonds. This system has the advantage of simplifying and economising mortgage transactions, alike to lender and borrower; and at the same time it transmutes unnegotiable mortgages into a readily negotiable security in the form of land bonds, based, not only on the security of landed property, but also upon the credit of the banks which issue them. This newly-established system presents unquestionable advantages over the old one. As an essential part of the system, it has led to the establishment of banks of land credit, the operation of which banks is as follows:—

A landowner has need of a certain sum of money. He goes to a land credit bank, and offers it a mortgage upon his property. The bank thereupon proceeds to examine most carefully the title-deeds and value of the property, and having satisfied itself upon these points, it says to the proprietor who wishes to borrow:—

"We shall take a first mortgage upon your property to the extent of one-half of the value of the land not built upon, and to the extent of one-third of the value of the woods and buildings on it. You shall pay to us for ten, twenty, or forty years—as you may prefer—a certain sum annually, equal to the rate of interest on the loan *plus* a sinking fund, adequate to replace the capital borrowed, and at the end of the period agreed upon you will be absolutely free; thereafter you will have no payment at all to make, either as interest or as capital. Your position, therefore, will be quite different from what it would be under the present system, which obliges you not only to make an annual payment, but also to repay the whole capital borrowed, though you should go on paying interest for a lifetime."

The bank makes a certain number of these loans, receiving in return mortgage bonds signed by the borrowers. It places these mortgage bonds in its portfolio. But it is evident that if it do no more than this, its capital will soon be exhausted, so that no more loans can be made.

But these land credit banks, which I have established, have a means of escaping from this limitation upon their operations. They address themselves to capitalists, and say:—

"We hold mortgage bonds, and we mean to convert their value into a more convenient form, namely, that of land bonds, bearing a fixed rate of interest, somewhat less, of course, than that which we receive from our debtors. These land bonds, in fact, are mortgage bonds in another and better form. They are secured alike by the capital of our bank and also by the landed property mortgaged to us, so that their security is much more solid than that of ordinary mortgage bonds.

"Buy these land bonds from us, and you will thereby renew our capital, and enable us to enter upon new operations; in buying them, in fact, you will become the lenders to our borrowers. You wish a mortgage? Well, you shall have it, but you shall have it more ample and more perfect than you ever had before. You will have it without needing to inquire into the circumstances and character of the borrower, without having to examine the value or the title-deeds of the property, as you would have to do, at great risk of error, under the ordinary system; you will also have the great advantage of being able to count upon having your money on a certain day, for it is we, the bank, which will pay you the interest of the loan, since by your purchase of the land bonds we become directly responsible to you for the debt; and, lastly, you have the mortgage without any trouble or risk on your part, and also without subjecting yourself to any animosity in the case of the debtor being dishonest or compelling the law to be put in force against him. Your capital, also, as well as the interest, is fully guaranteed; the bank will repay it to you without the least trouble on your part; and, should you be short of funds, you can sell your land bonds, which are payable to bearer, and negotiable at no expense, which you could not do easily if you held an ordinary mortgage bond."

I ask, then, of every unprejudiced person, if the position of capitalists is not infinitely better under the new mortgage system, perfected by these land credit banks, than under the old and still usual system? One may see at a glance the special functions of a land credit bank: it estimates the value of the properties offered in pledge, and determines the extent of credit which may safely be given to the proprietors. It borrows with one hand the money of capitalists, to whom it gives in return land bonds bearing a fixed rate of interest; and, with the other hand, it lends this money to landowners, from whom it receives mortgage bonds. The bank, therefore, is an intermediate between the borrower, whose name and wants it screens from view, and the capitalist who wishes to lend, whom it saves from all trouble in verifying the solidity of the security offered, and to whom it ensures regular payment of the interest. In one word, the bank is a creditor in its relations with the borrowers, and a debtor as regards the holders of the land bonds. It undertakes to collect the yearly payments from the borrowers,—payments which comprise the interest and also a sinking fund for the extinction of the land bonds, which bonds simply represent the mortgage bonds held by the bank.

Let us us now examine what effect these land credit banks have upon the position of the proprietors of land, and also upon the position of capitalists.

Under the ordinary system of mortgage, the borrowing landowner pays (taking into account the expenses of effecting a mortgage) a very high rate of interest; and, also, he has to repay the capital sum. He naturally looks forward with great anxiety to the time when the capital has to be repaid. Save in exceptional cases of good fortune, where is he to get the money to repay the loan? He thinks himself fortunate if he can only put off repayment, and be allowed to go on paying the heavy yearly interest.

On the other hand, under the new system, and by means of the intervention of these land credit banks, he has only to make an annual payment for a certain number of years, and thereafter he is free. Instead of being compelled to sell a part, or the whole of his mortgaged property, in order to meet his engagements, the landowner, who borrows under the new system, finds himself entirely freed from this necessity: he liquidates his debt by means of his annual revenue,—and, what is more, instead of having to extinguish the loan in the onerous form of a single payment, he pays it off gradually by means of yearly instalments. This mode of paying off a loan is, of all others, the best adapted to meet the requirements of landed property, which yields its pro-

In addition to the information formerly given, it gives a concise summary of the Reports of the Companies for the present year as will enable Investors to judge of their position.*

THE MONEY MARKET OF THE WEEK.

THE tendency of the money market is towards greater ease, but still the change is not great. The demand for money consequent on the immense development of trade is still very large. The condition of the Bank of England is improved. It has paid off 500,000*l* of loans on Government security, and its reserve of notes and coin is considerably augmented. But it is to be observed that the condition of the banking department is not even now very strong. The accounts stand:—

LIABILITIES OF BANKING DEPARTMENT.

	£
Public deposits	4,886,861
Private —	13,148,786
Seven-day and other bills	522,121
	18,557,768

while the reserve is 6,482,502*l*, but little above the minimum of 6s 8d in the £, with which, according to the generally admitted rule, the Bank of England ought to be content. We see no reason, therefore, to alter our judgment that money must be dear for a considerable time. The *popular* impression is not so unfavourable as last week, because the *patent* facts are more encouraging, but the essential features of the financial situation are much what they were.

THE STATE OF THE MINISTRY.

IT is said, and we believe on good grounds, that one of the difficulties in re-constructing the Cabinet is the embryo state of Parliament. There is now no House sitting—there is not even a Speaker, and, therefore, new writs cannot be issued. Any member of the House of Commons who now takes office must return to the wretched career of a candidate for three months—till February he must lead a life of perpetual solicitations, innumerable questions, and latent anxiety. But this only shows that the regulations for the assembling of Parliament singularly need the immediate attention of a reforming Government. There ought *always* to be an authority capable of issuing a writ for a new election. The creation of a good Cabinet is now and is always a matter of grave magnitude. It is preposterous that it should be prevented or even impeded by traditional rules and obsolete maxims as to the election of particular members. The Queen ought to be free to choose any member of Parliament she likes for any place she wishes, and if he is to be sent back to his constituents in consequence (as perhaps is best), some authority ought always to be in existence at once to send him back.

It is singularly important now that the Cabinet should be immediately framed in the manner in which it is expected to meet Parliament. By confession and agreement this Government is to be one of *action*—of moderate and careful action—but still of action. They must interest mankind by optional reforms. They must show the world that it can be made better in ways which it does not know of, does not ask for, but which it would ask for if it did know. It must first explain the grievance, and then expound the remedy. But so grave a task of investigation and discussion peculiarly needs time for thought and for discussion. One set of men cannot arrange the measures, and another set explain them. The Cabinet which sits now ought to be the Cabinet which is to meet Parliament—to meet it with the fixed intention if possible of lasting through and ruling it. Nothing can be worse than a provisional Cabinet now settled to think, and an ultimate Cabinet at the meeting of Parliament hastily huddled up to talk.

The difficulty of the reconstruction is grave and clear The Liberal party is divisible, like a French Assembly, into a left, a right, and a centre. There are men like Mr Lowe who object almost, if not altogether, to the minimum of reform. There are men like Mr Bright who demand without stint or reservation the maximum of reform. There is the great moderate section, five times as numerous as each of these, which lies between them, and variously, according to the shifting dispositions of times and men, inclines towards either. The Cabinet ought to contain representatives of each of these sections, if it is to be, as it should be, the party in miniature; yet how, if so, is it to discuss the matters upon which it has a difference almost of principle—how is it to frame a Reform Bill—how is it to agree not to frame a Reform Bill?

We ventured last week to indicate a measure which, so it appears to us, might be accepted at once by such Conservative Liberals as Mr Horsman and by such Conservative Liberals as Mr Forster; and if so, it of necessity would be very pleasing to all whose notions lie between them. But if this scheme, or any scheme of similar pretensions, is to be constructed, the Cabinet should at once begin to construct it. The old men now in office should not frame what the young men who may succeed them must carry or try to carry.

Digitized by Google

It is said that there are no young men of known ability in the Liberal party. We answer there are as yet no young men of sufficient eminence, because till lately there were old men of sufficient eminence. We once heard a London gentleman complain that emigration took away the best of the lower classes, and so impoverished the moral force of England. "No," answered a country clergyman, who knew something by eyesight of the matter in hand, "as "soon as the best man goes out of a parish, the "second best gets the opportunity to become the best, and "generally in a little while he is just as good as the man "who went away." So here there are many young Liberals who want only opportunity and trial to prove that they are as able as several Cabinet Ministers we need not name. Genius is everywhere rare, and the world but rarely needs it, but sound ability in the strong and grave sense necessary to a good administrator is happily common in England, or England would not be the country which we see she is. But if young men are to be introduced, they should be brought in to frame the new measures. Men with characters to make will hesitate to endorse the dubious bills of retiring ministers.

THE SHENANDOAH.

The Shenandoah has arrived in Liverpool, her commander has surrendered her to the British Government, and it was stated yeesterday that her officers and crew had been "uncondi-"tionally" released. Whatever are the grounds on which the Government have proceeded in the case of the Shenandoah, there can be no doubt that should the charges which have been so repeatedly urged against Captain Waddell prove to be true, namely, that he did continue to capture the New Bedford whalers long after he had reasonable evidence of the disappearance of a *de facto* Government in the South, the unpleasant dispute which we have had to carry on with America concerning the Alabama claims would be terribly aggravated by the impunity of the commander of the Shenandoah and his officers. It is said that Captain Waddell asserts that he made his last capture on the 28th June, and that he did not till August 2 know for certain of the suppression of the Government of Mr Davis. As the capture of Mr Davis occurred on the 10th of May, and was immediately telegraphed to San Francisco,—and as the North American papers asserted that the Massachussetts whalers did not venture to recommence their occupation in Behring's Straits till after the war was deemed by the North completely over, and must have carried their evidence with them, one would suppose that his *first* capture among that fleet might have convinced Captain Waddell that he had no longer a commission from any existing Government. Of course it is quite possible that Captain Waddell's statement may turn out to be strictly true, and in that case there will not only be no true ground of complaint against the English Government, but scarcely even a disposition to complain on the part of the United States. But it is certain that the impression in the North is very different. Already in August it was stated and believed there that Captain Waddell had been repeatedly informed by his victims of the end of the war, and had refused to believe it on any Northern authority, and had made many fresh captures afterwards. If it be true, as stated, that the first question put to the Liverpool pilot by Captain Waddell was "Whether the war was over?" there is a very suspicious air of theatrical innocence in the interrogation. And, should Captain Waddell's statement turn out to be false, of course the irritation already existing between the two countries will be indefinitely increased.

And yet, no doubt, the Government were placed in a very difficult position by the arrival of a vessel the officers and crew of which were, by common rumour, accused of piracy, none of the evidence for the accusation being accessible in England. There was, probably, no evidence to justify even a commitment, attainable in England, and therefore of course none to justify the surrender of the accused to the United States Government should they have demanded it, and should that have seemed, which in all probability it would not, the proper mode of procedure. The case *In re Ternan and Others* has been aptly cited in an able legal article in the *Pall Mall Gazette*, to prove that if Captain Waddell and his men be chargeable with piracy at all, they are liable to be tried in England, but not to be given up under the Extradition treaty with the Government of the United States. In that case it was clearly shown that, though piracy is mentioned in the list of crimes in our American Extradition treaty, we must presume that offences which are piracy by the municipal law of America but not by international law,—and there are several such,—must be intended. The Extradition Act refers to the case of criminals "seeking an "asylum" in the dominions of one Government for crimes committed within the jurisdiction of the other. But how could a man "seek an asylum" in a country where he was liable to be tried and condemned? And why should crimes committed within the jurisdiction of both England and America be referred to by the words "committed within the juris-"diction of *either* of the contracting parties." In short the case *In re Ternan and Others*, seems very nearly conclusive to show that if Captain Waddell and his officers are guilty of piracy at all, they are liable to be tried in England, but not to be given up under the Extradition treaty. The late Sir Cornewall Lewis, we may remark, held and expressed, if not the same view, one identical in result, in his pamphlet on the Extradition of Criminals in 1859. "The mention of piracy," he says, "in the Ashburton treaty must refer to constructive piracy, "of which there are many examples in our law. Piracy, pro-"perly so called, is not a territorial crime; it is a crime "which each nation can punish for itself. *A person accused "of piracy, in the strict sense of the term, need never be the "subject of extradition.*" If Captain Waddell is accused of any crime, it is certainly of "piracy in the strict sense of the "term." If he captured United States vessels under a flag which he believed to be the flag of no existing Government, he was clearly guilty of piracy in the strict sense of the term.

And unless some very unexpected evidence proving his innocence has been brought to light, though it may be impossible, without receiving evidence from the United States, to have him even committed for trial, it is certainly possible and our duty to keep him and his officers under pretty strict surveillance, so as to prevent their escape till we know whether evidence against them exists or not. Undoubtedly, they are in the same position as a man strongly suspected by the police, on evidence which it is not yet possible to produce in a legal form, of a grave crime. And it is pretty certain that such a man would be closely followed and kept in sight until the supposed evidence could be put together and sifted to see whether it justified a commitment or not. It is not mainly because the public feeling of America is excited against Captain Waddell's proceedings—and very justly excited, if their premisses be true—that it is important for us eventually to indict him for piracy, if there prove to be any evidence worth sending to a jury. Nor is it merely in order to disprove the absurd impression prevailing in the United States that English public opinion is so blindly prejudiced in favour of every man who struck a blow on the Southern side, that even the worst criminals who have *that* to say for themselves are excused their crimes. But it is because it is more important for the English nation than for any other in the world that we should not overlook private depredations on commerce committed on the high seas. Of course, even if the accusation against Captain Waddell be true, it would, though a case of common piracy, be a case, also, of less aggravated piracy than the same crime committed without the pretence of a vindictive war feeling to palliate it. Every one would feel that the penalty ought to be less severe than the penalty on mere freebooters. Still, no country is more interested in punishing private persons for indulging their passions by carrying on war after war is really over, than England. Such conduct is a blow to the confidence of nations which might seriously prolong the evils—and in some respects more than the evils—of war, always serious enough, beyond their natural term; for no war arouses vindictive feelings like those excited in America by the presumed, we hope it may prove mistaken, belief entertained in the Northern States concerning the conduct of Captain Waddell of the Shenandoah.

THE EXPORT OF BULLION TO THE EAST.

TO THE EDITOR OF THE ECONOMIST.

Sir,—I gather from your recent articles on the position and prospects of the money market, that you appear to consider an immediate drain of bullion to the East as inevitable, and as constituting the most unfavourable feature in our prospects.

In coming to this conclusion, I wish to ask if you have

Digitized by Google

taken into consideration the small cost of our cotton imports from India this year as compared with last. The cotton now arriving here from Bombay has only cost from 7d to 9d per lb. Last year our imports from that quarter at the same time had cost the importer from 20d to 22d per lb—a difference of 21*l* per bale! The cotton now in course of shipment from India has been bought at an average price of about 12d per lb. In 1864, at the same date, the price of cotton in Bombay was about 21d per lb. showing a difference of upwards of 14*l* per bale. The quantity of cotton afloat from India at this date last year was 295,000 bales; this year it is only 224,000 bales. The cost to Great Britain of the latter number of bales must be at least five millions sterling less than she paid for the former.

These facts lead me to believe that any shipments of specie to India at present will be quite inconsiderable in amount. Am I not right also in saying that the biddings for bills on India recently have been very small in extent compared with the same period in 1864?

With regard to Alexandria, the shipping season has only commenced, and it is certainly premature to anticipate any drain to that quarter. The fall of 10*l* per bale in Egyptian cotton which has taken place in the Liverpool market, will tend to check shipments from Alexandria for the present.

I trouble you with these remarks, as the monetary article of your valuable paper has a very powerful influence amongst business men, especially at such a time as the present. The daily papers give us only the state of the money market from day to day, and they are too often misled by idle rumours.—I am, &c., OBSERVER.

Liverpool, Nov. 8, 1865.

[We have given full attention to the facts stated in this very clear and intelligent letter; but the authenticated figures given by the Board of Trade tables fully bear out the opinion we have ventured to give. We have not said that the drain of bullion would be as great as last year, but that there would be from this country or from France—from Europe—some drain. The comparison of the cotton trade with the East during the last three years is for the eight months ending 31st August, all we yet exactly know:—

	1863	1864	1865
	£	£	£
Egypt	5,789,940	10,892,499	8,094,171
India	14,058,913	21,161,406	10,244,094
China	1,350,182	4,688,283	1,449,598
	21,199,035	36,742,188	19,787,863

It is of course evident from these figures that, in comparison with last year, our debt to India for cotton is comparatively small, but it is not small in comparison with 1863. In 1863 the drain for bullion to the East had a serious effect on the money market, though not so great as in 1864, and, therefore, there is a great probability that it will have *some* effect in 1865.

This probability is strengthened by the fact that the exports of silver up to the present time have not been as great as in 1863. The figures are—

EXPORTS OF SILVER TO EGYPT.

	1853	1864	1865
	£	£	£
Coin (chiefly for China, &c.)	1,667,412	1,285,151	692,597
Bullion (chiefly for India)	4,494,338	3,903,115	1,031,416
	6,161,750	5,188,266	1,724,013

The other exports to India are much as before, and, therefore, there is good reason for anticipating a certain drain of bullion to the East, though not a drain at all approaching to that of last year.—ED. ECON.]

THE COMMITTEE OF THE STOCK EXCHANGE.

IT is said, and we hope truly, that the Stock Exchange Committee intend to relinquish the singular and unusual powers which they have until now attempted to exercise. The ECONOMIST is not likely to be charged with the wish to spread wild speculation; we are generally said to be only *too* cautious and careful; and it is on this account that we cannot but oppose the well-meant efforts of certain members of the Stock Exchange who hope to accomplish a great end without having the necessary means for that purpose, and who thereby aggravate a great evil.

The real duty of the Stock Exchange Association is very simple; it should enforce *instantaneous* honesty among its own members. Those who belong to it should feel, and now feel, that they are under a jurisdiction far more potent and effectual than that of the law. If an ordinary man does not meet his debts, he can be sued, which takes a considerable time, or dealt with under the Bankruptcy law in a manner which may be ineffectual; but if a member of the Stock Exchange does not meet his debts, his position is forfeited; he is "read out"; he is a defaulter, and nothing is heard of him any more. This unusual check upon investing agents,—for this is what brokers are,—is well worth preserving, and exceedingly beneficial to the quiet part of the public.

But when the Stock Exchange Association step beyond their function of enforcing actual contracts, and assume to themselves the function of selecting contracts, their action ceases to be plainly good, and perhaps becomes plainly evil. Who can say what contracts ought to be enforced and what ought not to be enforced? The Stock Exchange Committee now undertake judicial duties without having judicial powers. They have to find out whether there is fraud or no fraud, but they cannot find it out. They cannot administer an oath; they are not used to judicial investigations; they are not assisted by advocates on either side. The most impartial decision on such a subject must always be a decision arrived at under unfavourable conditions, without those helps and aids which experience has shown to be the best.

We quite believe—we *maintain*—that the Committee of the Stock Exchange have acted in this difficult and annoying matter with a full regard to the public interest. But still they are not in the supreme and removed position in which judges ought to stand. Lord Cottenham stopped a canal case in the middle because it was suggested to him, as trustee or executor, he had a few shares in the canal. But who can say—who can presume even to conjecture—in what possible manner particular members of the Stock Exchange may or may not be interested in particular descriptions of shares?

Since the Committee of the Stock Exchange, though we believe in the main impartial, cannot be proved to be impartial; since many persons, especially aggrieved persons, believe that they are not impartial; since even if impartial they are not competent; since they investigate charges of fraud without the legal helps and safeguards which a court of law possesses, and which experience shows to be necessary; since they let through many bad companies; since they give a warranty to the bad companies they permit by their assumption to discriminate between good and bad;—it is plain that the Stock Exchange should relinquish their well-meant efforts to protect the public which will not be protected, and which after all probably will get on better without protection.

FISCAL ADMINISTRATION IN ITALY.

A CLOSER insight into the state of internal political affairs in the Italian Kingdom is in one sense very disheartening, and in another very reassuring. It is encouraging, because it becomes more and more clear that the special difficulties and failures which so retard her progress and so jeopardise her future are gratuitous and artificial, and that all might be avoided or remedied by men of the requisite experience, integrity, sense, and resolution. It is disheartening, because nowhere can men endowed with these qualities in sufficient affluence be found. Half-a-dozen statesmen like Cavour, with his splendid instincts and his moral ascendancy—nay, one Cavour with half-a-dozen adequate lieutenants—would suffice to change the whole aspect of affairs. But neither six nor one have yet appeared. Among all the rulers and leaders of Italian politics at present, there is not one man of clear and recognised superiority,—not one who sees a plain path and has nerve to take it and to draw others into it. Even in the absence of any such guiding and shining light, if there were a number of strictly honest and moderately capable *practical* men scattered over the country, who could be entrusted with administrative functions,—such as are to be found in abundance in lands accustomed to self-government and freedom like America and England,—all would go well. But these are precisely the men who it seems are not to be found. Italy is in the unhappy condition of being habituated to *a great deal of* administration, and of being very ill-provided with administrators;—of needing a strong hand at the centre, yet of being unable to procure one;—of wishing to abandon the system of centralisation, yet of wanting local authorities and capabilities among whom the decentralised functions could be distributed. The extent to which mismanagement

Digitized by Google

and mal-administration has gone is almost incredible;—the degree in which loyalty has spread and prosperity has advanced in spite of this mismanagement and mal-administartion is almost more wonderful still.

It is not surprising of course that a new country should not abound in qualified administrators. All that the Government could do was to select the ablest and honestest men it could find, and leave them to learn their business by practising it. For this purpose it was especially necessary that they should have some considerable tenure of office. This first condition of improvement has been almost universally violated. The provinces are administered by Prefects and Sous-Prefects, several of them men of talent and men of business, and most of them, we are assured, sincere and honourable men. They go down to their districts, and apply themselves diligently and conscientiously to the work before them. But as soon as they are beginning to know their provinces, to become personally acquainted with its wants and its resources, and above all to know on whom among the inhabitants they can rely for assistance and advice, they are summarily ordered off to another locality where their task has to begin afresh, and they are succeeded by others who are just as ignorant as they were on their first arrival. The mischief of this in a country where nothing can be done—not a road made or a town drained—without the approval and inspection of the central authorities, and seldom without reference to the Minister at Florence—whose answer only comes after the most tedious and heart-breaking delays—cannot be exaggerated. No sooner has an arrangement been completed, contracts made, authorisation promised, than the Prefect is changed and all has to be done over again. We could name one important province in particular which has had five Prefects since 1860, and where nearly everything is at a stand still in consequence.

It is, however, the fiscal administration which is most disastrously stupid and defective. The mode in which some of the taxes are levied is simply infamous—the income tax (or that which represents it here) more especially;—and this is about the best illustration that can be given of the evil arising from the want of decently qualified functionaries which we have just signalised. The Prefects and Sous-Prefects, as we have said, are usually men of integrity and decent sense, but changed too constantly to allow them to know their provinces. Yet it is on them, in conjunction with the notabilities of the province (who have a distinct interest in deceiving them), that lies the task of determining the amount to be levied on that province. It is to the Syndics of the several communes that is assigned the function of apportioning this contribution among the inhabitants and of levying it in the last resort. These Syndics are municipal officers, chosen by the proprietors, not appointed by the Government; and a more utterly unprincipled set of men, especially in the Neapolitan division of the Kingdom, can scarcely be found. It is natural enough that it should be so, for they were formed under the Bourbons and retain all the corrupt traditions and dishonest and oppressive practices of the old régime. But the effect is deplorable. They extortionise the poor and exempt the rich. They apportion the amount to be raised in the most flagrantly unjust manner. The poor fisherman or handicraftsman is questioned as to his earnings, which are easily ascertained, and taxed accordingly, while the Syndic's friends, so at least it is asserted on very good authority and generally believed, escape almost scot-free. In one district the richest proprietor was called upon to pay 60 centimes!—about 6d. Thus the Government is robbed, while the labourer is robbed;—discredit is brought upon the administration, and all that can be done is done to make the new régime unpopular. In the South of Italy the *burden* of the taxes has been doubled, while the *yield* is out of all proportion small.—Yet, while all these iniquities are going on, and, notorious enough, the Finance Minister, wanting more money, can think of no better means than devising new imposts! Those best acquainted with the country from long residence in it and knowledge of the character of the several classes, make no secret of their conviction that with an honest set of tax-gatherers and a decent system of taxation, the public revenue might be made to meet all wants without a single fresh duty being laid on;—while a few more main and communal roads, such as a judicious expenditure of another million on public works would suffice to construct, would make the resources of outlying districts so much more available that the burden would become comparatively light.

Yet in the face of facts like these, which might be multiplied indefinitely, the minds of Italian politicians—that is the public talkers and the public journals—speak of little but Rome and Venice—the suppression of convents and the expected struggle on ecclesiastical questions—the new elections, and the employment of the army. If only the Italians could be induced resolutely to shut their eyes to foreign politics for the next ten years, and to give that space of time with hearty and searching energy to reforming their internal administration in all its branches,—to setting free local enterprise,—to opening up remote and secluded districts,—to tempting out hoarded capital,—and above all to purifying the Augean stables of official and municipal corruption,—they might find themselves at the end of that period in a really secure and respectable position, their prosperity founded on a rock, their loyalty rivetted by the contentment of general well-being, their political and military strength needing neither to be boasted of, nor bolstered up, but recognised by all and trusted by themselves because based upon its only sure foundations—a happy people, a qualified and experienced Government, and *a full treasury*. Meantime, they ought to pray for peace as the most vital of blessings—peace to consolidate the nation—peace to educate themselves—peace for a long enough period to allow a generation to grow up under purer and more invigorating influences than those which trained and damaged the men now in middle life,—peace to form and discipline those administrative instruments without which the best Central Government is comparatively powerless.

THE CATTLE PLAGUE.

[COMMUNICATED.]

By an Act passed in 1848, and subsequently continued, it is enacted that "It shall be lawful for the Lords and other of "Her Majesty's Privy Council, or any two or more of them, "from time to time to make such orders and regulations as to "them may seem necessary for the purpose of prohibiting or "regulating the removal to or from such parts or places as "they may designate in such order or orders, of sheep, cattle ".....or other animals.....or parts of any ani-"mals.....and to make any other orders or regulations "for the purpose of giving effect to the provisions of this "Act, and again to revoke, alter, or vary any such orders or "regulations; and all provisions for any of the purposes "aforesaid in any such order or orders contained shall have "the like force and effect as if the same had been inserted in "this Act."

The provisions of the Act are so general that the power conferred by it upon the Government is nearly absolute as regards fairs and markets, and the exposure of animals for sale in any place whatever, but the power has not been used so fully as it might have been with advantage to the public. By the 19th section of the Order in Council, dated September 22nd, 1865, "Whenever any "local authority, as hereinbefore defined, declares, by notice "published in any newspaper circulating within his or their "jurisdiction, that it is expedient that animals, as herein-"before defined, or some specified description thereof, shall "be excluded from any specified market or fair within that "jurisdiction, for a time to be specified in such notice, it is "hereby ordered, that after the publication of such notice it "shall not be lawful for any person to bring or send such "animals or description thereof into such market or fair." The Government might have assumed the responsibility themselves of prohibiting not only fairs and markets, but *all public sales* of cattle, or they might have delegated this power to the local authorities, but they have done neither, and the consequence is that in many cases where the magistrates in petty sessions have suspended a fair or market, the prohibition has been evaded by the exposure of cattle for public sale in some neighbour's field. In one case in particular this was done with fatal results. A herd of cattle were bought at a public sale in Leicestershire, and were driven across Northamptonshire into Bedfordshire, some of them dying on the way, and all the rest falling sick on their arrival at their destination. Even had the Privy Council conferred full powers on the magistrates, the result would still have been less satisfactory than if the central authority had prohibited the exposure of cattle for public sale throughout the kingdom.

Digitized by Google

The matter is one of general interest, and general regulations would obviously have been better than the partial and local action of the country justices and mayors of boroughs. Little security can be derived from the suspension of fairs and markets by the magistrates of a county, if the mayors shrink from assuming a similar responsibility in the boroughs, and there can be little use in prohibiting the exposure of cattle for sale in one county, if they can be driven across it into the adjoining one. There has been a great outcry against the slaughter both of unsound and suspected cattle, but desperate diseases require desperate remedies, and it is better that in some instances even sound animals should be sacrificed through the blundering of unskilful inspectors, than that the contagion should spread without restraint, while the public wait in vain for the discovery of some infallible prescription.

The strongest argument against the use of the pole-axe, is that science is deprived of subjects for experiment, but this difficulty might be met by the establishment of a Government hospital, where every treatment might in turn be tested which offered any chance of success. If this were done, carriages should be constructed for the removal to the hospital of such subjects as it might be thought desirable to experiment upon, every precaution being taken against the spread of the infection along the roads by which they travelled. Rarely can a farmer afford to build an hospital at a distance from his homestead for the reception of diseased cattle, and even where he can do so, there is too much danger that a veterinary "general practitioner," if he were sufficiently enthusiastic to pass many hours a day amongst the plague-stricken beasts, would communicate the disease to his other patients. No doubt every quack has his nostrum, but their is little chance of a remedy being discovered accidentally, or by those who experimentalise unmethodically. A few intelligent and scientific men, working under the most favourable conditions, that is, with all such means as Government can place at their disposal, are more likely to succeed than all the veterinary surgeons in the country districts, who are often ignorant men, and are always without the advantages offered by hospitals, where cases can be scientifically treated and compared.

It is true that the press affords a means of communication between men of science, but it is a means that can only supplement and never be a substitute for the experience gained in central institutions. Whether it would be most desirable to establish veterinary hospitals not in, but within easy reach of London, Edinburgh, and Dublin only, or eventually in other parts of the kingdom likewise, is a question which it is unnecessary to decide at present, and the answer to which must depend very much on the funds which may be forthcoming.

It is sometimes argued that if it be necessary to slaughter cattle, the farmers ought to be reimbursed for their losses out of the national treasury, but it must be remembered that the proprietor of stock gains rather than loses by the slaughter of such of his cattle as may be diseased or likely to become so, and that though some individuals may suffer heavily, the class, as a whole, will be in a great measure compensated for their losses by the rise in the price of meat. The farmer whose cattle are infected has no more right to demand of Government an indemnity for the removal of the nuisance than a human sufferer from the small-pox would have for the losses he might sustain if prevented from passing through crowded streets to his daily avocations. The policy of granting indemnities should always be looked upon with suspicion by the public, but, in this instance, it would be obviously and fatally inexpedient. It would be expecting too much of human nature to hope that proprietors of stock, if they ran no risk of pecuniary loss, would be as careful to protect their herds from infection as they would be under the powerful stimulus of self-interest. One noble agriculturist, in a letter to the *Times*, though alluding to the appearance of the cattle plague more than a century ago, assumes it to be conclusively proved that its occurrence, in the present instance, is due to free trade, and the inefficiency of the inspectors of imported cattle. "It would almost appear," says Lord Winchilsea, "that the manners and customs of some "parental Governments are more calculated for the benefit of "the community than this unlimited free trade, conducted "upon the principle 'that any one is at liberty (in pursuance "'of his own interests) to make sure of an individual gain, "'regardless of the damage he may entail on his neighbours,' "and it would; moreover, appear that free trade has its duties "as well as its advantages, among the former of which may "well be reckoned the liability for losses clearly consequent on "its too careless development."

His Lordship does not venture to attack the principle of free trade, but he would like to fix on it the stigma of having introduced the rinder-pest; we never heard before either from the friends or opponents of free trade that it implied that every one was at liberty to disregard the damage he may entail on his neighbours; as well might it be argued that the liberty of travelling about the country without legal impediment, implied the right to annoy one's fellow-travellers by smoking or other practices offensive to them.

It is said that if we "*will*, however, insist upon death as "the only safeguard against further infection," the "Chan- "cellor of the Exchequer (a man, do doubt, 'equal to the "'occasion') should devise the means of including in his "budget for next year the necessary expenditure by which "the public may acquire the right of slaughter, and kill its "*own*, not other people's beasts."

We do not think of inquiring to whom a mad dog belongs, but shoot him without remorse or hesitation, whatever his previous value may have been, and equally without scruple should diseased cattle be destroyed for the protection of the public.

THE FLUCTUATIONS IN THE RESERVES OF BANKERS.

(COMMUNICATED.)

I SHOULD be glad, with your permission, to say a few words on the fluctuations in the reserves of bankers. Great importance has been attached to them lately, yet I cannot but feel that this is a subject on which considerable misapprehension exists.

Discount flies up in a few days from 4½ to 7 per cent.; the reserve of the Bank runs down by millions; bankers get frightened lest their means of payment should be exhausted. What can be more natural than the supposition that all this comes from a deficiency of currency, and that the thing wanted is more coin and more notes? With a larger supply of gold and bank notes, the labouring vessel must right itself soon, and the rate of interest return to reasonable dimensions.

But is this so in fact? Is a stationary reserve at the Bank a guarantee of a moderate rate of discount? Will the restoration of a diminished reserve reduce the price of loans? Is an augmentation of the stock of currency a certain specific for healing the wounds inflicted on reserves?

To these questions I return negative answers. They ignore the nature of the variations which befall the reserve of a banker. They elevate into a cause of the rise of interest what is only an effect of that sudden demand for capital, which kindles competition in borrowers, and justifies, and indeed compels, the banker to set a higher price on means which, after all, are but limited.

The business of a banker is to receive money from one set of persons and to lend it out to another. At all times he must have a certain supply of cash in his till, for he is always liable to immediate demands for repayment. When business is steady, he can form a very close estimate of the amount of this supply; it becomes a regular and matter-of-course element of his trade. But trade is by its nature very irregular: its requirements of capital are liable to very sudden fluctuations; and this suddenness of its demands exposes the reserve of bankers to very great and often embarrassing variations.

You have shown the public the sudden expansion which trade has lately received. We know that immense orders for English merchandise have rapidly poured in from America. What happens to the banker's reserve on such occasions? He is at once assailed by three forces. Accessions to his deposits and the balances of his customers come in more slowly. Then much of his previous deposits and balances is quickly withdrawn; cheques on him multiply, cheques in his favour diminish. Lastly, a larger number of bills are presented to him for discount, many of them by customers who think themselves entitled to accommodation, and whom he dares not offend. On the other hand, he cannot deal with equal rapidity with the loans which are due to him. On many he cannot accelerate the term of repayment; his assets cannot be realised with the promptness of the calls made upon his reserves. What does the anxious man do under

Digitized by Google

this pressure? He may often become a borrower himself, pledging Consols and Exchequer bills which he is unwilling to sell at depreciated quotations, but these weighing on the money market no less. But there is one temptation which is irresistible; nay, which at the moment is not a temptation, but a necessity: he encroaches on his reserve. He hopes that the morrow will bring relief. He keeps paying the cheques drawn on him with his currency, whilst his customers fail to fill up the gap with increased deposits. The reserve suffers; it dwindles away; whilst the fear of the banker and public wax in the same proportion. It all comes from there being too little coin and notes they impatiently cry; but it is nothing of the kind. It is a momentary destruction of the equilibrium between the lendings and the borrowings of the banker; and it is cured almost as rapidly as it came on. The banker lends less; he asks higher terms for accommodation; the loans due to him fall in, and he does not renew them; and so very quickly the balance gets restored.

But with this restoration of the reserve the rate of interest does not go back to its former figure. As regards the reserve, an incident of the banking trade got out of order and has been rectified; but the readjustment has been effected by processes which imply, not an increase, but a diminution, of the supply of capital in the money market. So long as the borrowers of loans are many and strong-willed, whilst lenders are relatively few and weak, so long must the price of capital rule high. An increase of capital is the only remedy.

It is obvious that currency has no part in this matter. The banker is weak in cash, not because there is a scarcity of money, but because he lends more than he gets. As long as he is forced to do this, the importation of all the gold of Australia would not save his reserve. BONAMY PRICE.

11 Prince's terrace, Prince's gate, Nov. 6, 1865.

SAVINGS' BANKS RETURN.

THE following return shows the amounts received from, and paid to, Savings' Banks, and Post Office Savings' Banks, in the United Kingdom, by the Commissioners for the Reduction of the National Debt, during the four weeks ending Nov. 4, 1865:—

	Total Amount received by the Commissioners.	Total Amount paid by the Commissioners.
SAVINGS' BANKS:—	£ s d	£ s d
In money and interest credited	36,912 13 4	110,343 1 9
To transfer certificates from Post Office Savings' Banks to Savings' Banks	311 16 2	...
By transfer certificates from Savings' Banks to Post Office Savings' Banks	...	7,993 14 7
Total	37,224 9 6	118,336 16 4
POST OFFICE SAVINGS' BANKS:—		
In money and interest credited	177,883 13 7	...
To transfer certificates from Savings' Banks to Post Office Savings' Banks	7,993 14 7	...
By transfer certificates from Post Office Savings' Bank to Savings' Banks	...	311 16 2

Agriculture.

A MODERN GATHERING OF THE CLAN.

WHILE preserving just a trace of the old spirit of clanship, the Duke of Argyll, in his occasional addresses to his tenantry, always contrives to broach some very useful and very modern views in regard to husbandry. It is truly wonderful that, when so much and such just influence a landowner may obtain by speaking and acting towards his tenants in the spirit and temper of the present age, so many landowners seem to be hankering after an impossible past, and to place their prejudices in antagonism to the interests and feelings of the farmers. There is nothing to prevent the farming classes accepting what might be called the natural leadership of the landowners but their own wilful disregard of the wants and circumstances of modern husbandry. But the time is coming—perhaps has come—when the landowners must choose between such a position of leadership and the downright hostility of the tenant-farmers. Landowners, generally, do not know what deep feelings of resentment on the part of great numbers of farmers are covered by outward manner of apparent and sometimes sulky respect. It may not be well for the privileges, nay, for the fair interests, of the landed proprietors, that—as was noticed with some surprise by a very eminent man during the anti-corn law agitation—some of their bitterest enemies should be found amongst their own tenants.

Now the Duke of Argyll in his addresses to his tenants offers an example in many respects worthy of imitation. He accepts sound general principles, and states his own opinions, not always very logically, but frankly. Yet we scarcely think the Duke has greatly progressed during the past four years, or that he now indicates the capacity for an agricultural leader he formerly promised to attain. Four years ago his tenants gave the Duke a dinner, and his speech on that occasion was noticed in these columns. Now the Duke has given a return dinner to his tenants, so long delayed, he said, that certain improvements on the estate might be completed. Then, having thanked the tenants, especially the smaller tenants, for the way in which they had seconded his efforts to improve their dwellings, and paternally admonished them against what seems to be a prevalent practice of placing their manure heaps close to the front doors of their houses, the Duke proceeded to congratulate the stock farmers—the breeders of cattle and sheep—"on a period of long-continued and increasing prosperity." Having referred to the high prices wool and meat had of late years obtained and referred to the probability of such prices continuing, he said: "To what are we to attribute this steady rise in the price of the commodities which you are chiefly concerned in producing? There can be but one answer to that question—the enormous increase in the consuming power of this country. And here again..... ...we come to see that our interests are coincident with the interests of all the rest of the world, because the increased power of consumption in this country is due to the enormous increase of its trade, and the enormous increase of its trade is ultimately connected and bound up with the peace and prosperity of all other nations of the world." This is just and true, and contrasts favourably with the jealousy of other countries which at one time it seemed to be the great aim of landowners to inculcate when addressing the tenantry. The conclusion drawn "that so long as trade is left entirely free, and so long as the capital of the country continues to be invested in the production of the goods which are necessary for consumption all over the world, and so long as peace and prosperity open to us the markets of the rest of the world, the consuming power of this country will and must go on increasing," is quite consistent with sound economy. Whether, when the Duke comes to practice details, and to advise on farm management, he is so successful, is to say the least doubtful.

After referring to the moist and comparatively mild climate of the Western Highlands of Scotland, as offering advantages for raising stock enjoyed by few countries in the world, he took three objections to the actual practice of husbandry there. First, he said, "I feel an innate conviction (whatever that may be) that there is a great deal too much land given to the production of corn." That it was often difficult to secure corn crops however good, and that the climate "is specially adapted above all things for the production of root crops and grass." And then we have a long story about growing roots directly after grass "without the intervention of any white crop." Here the Duke falls into the fashionable fallacy of the landowners. To grow grain in a moist climate, solely with a view to direct profit therefrom, may be, and usually is, a great mistake. But to ask stock-farmers to abandon grain crops, and depend solely on grass and root crops, is a still graver mistake, and is to recommend a decidedly retrograde course. Supposing the stock-farmer does not sell a bushel of grain, still he should grow every acre he can grow with a reasonable expectation of a good crop, for the sake of the benefits the grain and the straw will confer upon his stock. But this is a fallacy no practical farmer is likely to be deluded by. He knows too well the value of his grain crops to be much influenced by any such dilletanti advice.

Next, the farmers of the Inverary estate are advised to bestow their manure in top-dressing their grass lands, which doubtless is good advice if they can spare the manure for the purpose. This, however, is a question of capital, on which we shall have a word or two with the Duke presently. Lastly, he recommends them to cut their hay earlier in the season, so that, though the bulk may be less, there may be a better chance of fine weather for making it. This too may be good advice—it sounds like it—but we should like to hear what the practical farmer has to say on the subject.

The Duke afterwards referred to the law of hypothec, and the evidence taken by the Commission on that subject. He thought there was exaggeration in the views of the supporters and opponents of that law, but that in the main the law ought to be supported *in the interest of the poorer tenantry*. Now the law of hypothec may be shortly stated to confer on the landlord not only the power of distress for rent as in England, but to give him such a preferable claim over his tenants' effects for the rent as to prevent the tenant selling any of his stock or produce while any rent remains due. So much so that if a dealer should buy the corn or cattle of a farmer who owes any rent and pay him the price, the landlord can, notwithstanding previous payment to the tenant, compel the dealer to pay it over again. The mere statement of such a law is enough to "shock the conscience" of any one not hardened by custom. Yet this law is justified by the Scotch landowners, and by some others, upon the plea that the landlord having this preferable claim on the stock, can safely and

Digitized by Google

does permit a year and half or two years rent to remain constantly in arrear, and thus, it is said, tenants with little or no capital are able to hold on their farms,—that, in fact, it amounts to a loan of money by the landlord to the tenant for the purpose of stocking the farm. Never was there anything more fallacious. If there be any state of things more fatal to farming success than another, it is for the tenant to be in arrear of rent. Yet this is to be the normal condition of the smaller Scotch tenants under the law of hypothec, and to be deemed a most favourable law for them! See how a man usually so clear-headed as the Duke of Argyll can bemuddle himself by means of a class prejudice. He said, "I have very great doubts how far the abolition of the law of hypothec would be expedient.....It enables the landlord to give longer credit to his tenant. That is the way it operates. Now this is the very ground on which it is objected to by a certain class of tenants who are themselves large capitalists. They do not say it is unfavourable to the tenantry as a whole, but unfavourable to the men of large capital. And why? Because it is too favourable to the men of small capital." And then he refers to and misstates the evidence of Mr Henderson of Long Niddry, in East Lothian, whose argument in substance was, that this power over the tenants' stock induces landlords to admit as tenants persons who have not the means to farm with advantage to themselves, and who engage to pay rents extravagantly high, higher, in fact, than the land is worth in the hands of tenants of substance who can farm properly, and that while this unwholesome competition for farms has the effect of advancing rents nominally, these feeble tenants if pressed cannot pay their rents and meet their other necessary engagements. See how the Duke perverts this:—"He [*i.e.*, Mr Henderson] says it would drive out the men of small capital. But who are the men of small capital? Does he mean that it would drive out all that class of tenantry who have perhaps not much more than the stock on their farms, who do not happen to have 1,000*l* or 2,000*l* in the bank? Because if he means that, it would drive out of the market a very large body of the existing tenantry of Scotland." Of course it would. No opponent of the law of hypothec ever intended anything so nonsensical. What it meant is that the tenants have not sufficient capital to work their farms; that they necessarily get into debt with tradesmen and others, in order to scramble on even for a time; and that the landlord's preferential claim on the stock may at any time sweep everything away, leaving the tenant's other creditors wholly unpaid. This is not economically sound. It is not a prudent system of management. It is not honest.

Then the Duke says a doctrine commonly laid down is "that the relation between landlord and tenant is a thoroughly commercial relation.....Now I so far agree with this position that I think the basis of the connection between landlord and tenant is undoubtedly the simple basis of contract." Just so; and all that is asserted is that such contract should be rational and fair, not one-sided or fantastic as is too often the case. And in order to show that a farm lease *cannot* be a commercial contract, the Duke says: "Take the ordinary case of a man taking a farm for nineteen years from another, I say that of itself constitutes a connection which renders it impossible that the relation between them should be one of pure commerce. Why, just think what a nineteen years' lease involves. Nineteen years, counting from early life, carries a man to middle age. If a lease is given in middle age, it carries him on very far towards the decline of life. If it is given in the decline of life, no man can expect to see the end of it. I say, therefore, that the mere duration of the connection between those two persons—the man who lets his land, and the other who takes the land for nineteen years—constitutes a relationship which is necessarily more intimate and personal than a mere commercial relation between a manufacturer and those whom he employs, or between a shopkeeper and those with whom he deals."

Surely the Duke must have felt himself in the position of a preacher where no one could answer him, when he could venture on such reasoning—save the mark—as that. But in the next passage the truth comes out, for he said:—"It is well to have a written agreement—quite right to have a written agreement—and in Scotland, in nine cases out of ten, we have it; but I say that the relations between those two men cannot be exactly measured by what is written in the four pages of that lease. *There are generally some things in which the landlord wishes to be obliged by his tenant*; there are almost always many other things in which the tenant wishes to be obliged by his landlord." Here we have the feudal chief speaking. Depend upon it the less of obligation there is on either side, and the greater the certainty of stipulation in the relation of landlord and tenant, the better it is for the tenant.

Literature.

VANCOUVER ISLAND AND BRITISH COLUMBIA. Their History, Resources, and Prospects. By MATHEW MACFIE, F.R.G.S. Longman, Green, Longman, Roberts, and Green.

VANCOUVER ISLAND and British Columbia are not favourite colonies. According to the report of the Emigration Commissioners, out of a total of 223,758 emigrants who quitted England in the course of the year 1863, only 118 found their way to these our newest and most inaccessible colonies, and until some more convenient, expeditious, and cheaper route is provided than any of those at present open, the tide of emigration will still flow towards Australia, or stop short at Canada and the United States, in spite of the well-directed efforts of works such as this to draw public attention to the capabilities and attractions of the North-west coast of America. Mr Macfie is quite aware of this fact, and urges strongly the expediency of opening up at once the proposed communication between Canada and the Far West, by means of a railway if possible, but, since "it were Utopian to expect that it should take effect soon, though firmly convinced that in time it must become a reality," a good waggon road would in the interval be of great service. Our more enterprising neighbours in Minnesota are already, in anticipation of the projected railway, pushing on a line of connection to Fort Garry Under the impression that "the country from the Eastern shores of Lake Huron to the Red River being as yet unpopulated, and access to the latter settlement being already so convenient through Minnesota, the railway, when commenced, will be first opened from Fort Garry, and that the space intervening between the Red River and the present Western terminus of the Grand Trunk will be completed as settlement advances." We fear the hopes entertained by Minnesota of becoming the grand outlet of trade with the Pacific are somewhat distant and visionary as yet; but that some small step has been taken in this most needful direction we are glad to learn from the following passage:—"In conversation with the Hon. George Brown, President of the Legislative Council of Canada, last autumn, that gentleman informed me that 10,000*l* voted by the Colonial Parliament in the previous session would assuredly be expended without delay in *initiating* the route through Canada to communicate with Red River."

Mr Macfie places little reliance upon the Hudson's Bay Company's exertions in opening up or colonising its territories. Fur-bearing animals are not increased by cultivation, and the fur trade is still a lucrative one. The answer to the question propounded by Sir Edmund Head at a meeting of the shareholders in November last, "Were the proprietors prepared to sacrifice that trade producing a certain income, and to go headlong into another as a speculation?" is, we fear, scarcely doubtful.

Next to the want of means of communication with England and the Eastern coast, and the consequent shortness of both labour and capital, the disunion of the two colonies (or rather of the two portions of one and the same colony) operates as the greatest obstacle to the progress of the whole district. Its real interests are one and indivisible: in spite of sectional jealousies this truth must in time be recognised and acted upon, but in the meanwhile, we see traces of the very spirit our author justly deprecates in the tone of his own chapter on "The Relations of Victoria and New Westminster." The general aim and purport of that chapter are so good that the touch of local bitterness is the more to be regretted in a work which for its completeness is well fitted to become a standard work of reference on a topic of steadily if not very rapidly rising commercial interest. The disunion between the island and the mainland which now unfortunately prevails cannot last, since there are no permanent grounds for rivalry or ill-will. The one is a producing country, pre-eminently so of gold,—the other a commercial station and little else. Vancouver's Island is sufficiently fertile and has good land enough to support a far larger population than it at present possesses, but it can look only to trade as the real source of its future importance. "Were British capitalists," writes Mr Macfie, "alive to the commanding geographical position of Victoria as a free port in relation to the neighbouring coast of Western America on the one side of the Pacific, and to China and Japan on the other, I venture to believe that they could, in a short period, render the city a worthy rival of San Francisco. Persons accustomed to judge by the present infancy of Victoria may probably be disposed to smile at so bold an assertion; but it will not surprise those who have given attention to principles affecting the growth of commercial centres should this prediction be accomplished within the present generation."

"The value of imports into Victoria from all quarters in 1863 amounted to about 770,000*l*, showing an advance as compared with the imports of 1861, of about 368,000*l*, and with those of 1862 of about 260,000*l*."

It is not, however, only or chiefly as the importer of supplies to island and mainland, or as the exporter of their gold, timber, and furs, that Victoria will be known in future years, but as the centre from which our manufactures will be distributed along all the Pacific coast and all the islands of the Eastern Archipelago. To Mexico Mr Macfie looks as a principal customer. "A few months since a large buyer from that country made a visit to Victoria and selected the first parcel of goods ever sent thither from our port. His purchases amounted to $30,000. It is in the power of any large Victoria mercantile firm who will employ agents and distribute catalogues of their stocks in the new Empire (now, I trust, becoming rapidly consolidated under its first Sovereign), to build up a trade corresponding to that carried on by the great English houses in Hongkong." An extract from a Californian newspaper published some years since, serves to show that Americans are more alive to the possibilities of these latest born of all England's numerous and wide-spread progeny than she seems to be herself.

Digitized by Google

"That England has great purposes to effect in this part of the world is no doubt true. That she has grand projects on foot, looking to a union of her North American colonies and the opening of a highway from ocean to ocean, she does not seek to disguise. That these new settlements are yet to become competitors for the trade of the East, if not the commercial supremacy of the Pacific, it were useless to deny. Entrepôts are soon to spring up on those hitherto undisturbed waters; there will be shipyards and fisheries, and to these lands will a numerous people go to dwell and to mine beyond a peradventure.....But however we may regard the advent of England upon our shores, or whatever estimate we may set upon the value of her possessions in this quarter, one thing is certain:—we have now got to meet her on this side of the globe as we have met her on the other; and encountering her enterprise and capital, her practical, patient industry and persistence of purpose, dispute with her for the trade of the East and the empire of the seas."

Mr Macfie enters fully into the capabilities of the colony from every point of view. Its timber, which as far as fir and pine wood are concerned is unrivalled in quality and quantity,—its coal, which will prove of the utmost importance to our fleet, and will find a ready market in San Francisco, where the supply is at present chiefly drawn from such distant markets as England and New York. "The largest portion of the East side of the island," writes Mr Macfie, "may be described as a huge coal-bed; this mineral has, too, been found cropping out at various points on the West coast. Its copper,—"the average per centage of metal yielded by the copper of the island is 25 per cent. It is said that 8 per cent. is deemed a paying ratio in the ore of Wales and Cornwall." Its fisheries: salmon at certain seasons swarm to that degree that the narrows of the river are blocked up by them and navigation is impeded; sturgeon have been taken weighing from 100 lbs to 500 lbs, one fish yielding a bushel of caviare; good whaling grounds lie within easy distance; and cod are found off the Northern end of the island. Its advantages as a naval station and sanitarium for the Pacific fleet,—its healthy and pleasant climate, the fertility of its soil in those parts that are fitted for cultivation, which even in the island bears a larger proportion to the whole area, our author asserts, than is commonly supposed.

"A medical man, whose lengthened residence in the colony, and special inquiry into this department of farming statistics gives weight to his statements, writes:—'The average production of wheat is 25 to 30 bushels to the acre, 64 lbs to the bushel; of oats, 40 bushels to the acre, weight 36 lbs to 46 lbs per bushel; potatoes, 200 bushels to the acre, and of superior quality. All vegetables succeed much better in Vancouver than in Oregon or Washington territories. This remark applies also to butter. The potatoes grown in the colony cannot be equalled, and our turnips, carrots, onions, peas, cabbages, &c., cannot be surpassed for size and flavour in any part of the world.'" "Hops thrive in the colony, and find a ready sale among brewers, whose operations are lucrative and extensive;" the grasses of British Columbia are especially excellent for fattening stock, but, above all, its gold. On this point, British Columbia, in Mr Macfie's estimation, has never had justice done to it; the difficulty of access to the gold-bearing regions, the rigour of the climate at Cariboo, and the scarcity of provisions there, have done much to throw discredit upon the visions of wealth opened up by the first prospectors, and, on the whole, fully borne out by subsequent discoveries. Respecting the most recent, that on the banks of the Sooke river, he writes:—"These mines are not to be compared, for the present at least, with Cariboo, in respect to extent of yield, but they will afford occupation for the winter months to the miners of British Columbia, who have been in the habit of, in too many cases, spending that season in idleness and its attendant follies." He enters at large into the working and prospects of the diggings on the mainland, giving statements from reliable sources in support of his favourable anticipations. We will extract a few samples:—"The richest diggings hitherto explored are situated in the following creeks: Keighley's Goose, Cunningham's Lightning, Jack o' Clubs, Grouse, Chisholme, Sovereign, Fountain, Harvey, Nelson, Steven's, Snowshoe, Last Chance, Anderson, California, Thistle Sugar, Willow, McCallum, Jababoo, Couchlin, Williams, &c. Up to the present, the last named of these is acknowledged to have been the most productive. It takes its rise near the Bald Mountain, and, flowing swiftly down through a dry valley past the town of Richfield, reunites with Willow river, about six miles below the town, and thence winds towards the Fraser. Shortly after the exploration of William's Creek, a claim, owned by a person to whom I am indebted for this information, yielded in one day 1,300*l*. The entire sum realised from a space of 80 feet square was about 24,000*l*. Three partners in a certain claim (two of whom are well known to me) netted 8,000*l* each in a period of four or five months. Several partners in another claim (one of whom verified the statement to me personally) made 1,400*l* to their individual share." The following letter, addressed in December, 1864, to the author by "a representative of one of the largest mining concerns in British Columbia," will show with what difficulties miners have to contend and the need there is for a greater concentration of effort and capital:—"I had to rebuild our wheel, which was smashed at the beginning of last winter by the severe frost, and with a new shaft, much larger than the former one and superior in every point of view to any in the colony. We had every confidence of success; but the wooden pumps were our difficulty. I am now fully convinced, after the experience I have had, that no company of men, however skilful, will ever reach the bottom of our deep diggings here without the aid of powerful iron pumps and fixings, if not of steam power, which eventually must be got, as we have not *surface* water enough when it is *wanted* to work them efficiently. In the *meadows*, so called, on William's Creek, where so much was expected, and where operations have been going on on a very extended scale for the distance of about three miles, in every instance the mines have failed for want of adequate machinery and pumps. This will appear the more provoking, when I say that we do not require greater power than is found in ordinary mines in the old country. The waggon road is now complete to Cottonwood: fifteen or sixteen miles more will bring it to the bottom of William's Creek. Then machinery can be taken up the whole distance. We have lost the whole season in fighting with our difficulties; they are not difficulties had we the necessary appliances at hand to overcome them. Still *with all the disappointments, and they have been many this year, more gold was sent down from Cariboo than in any previous year.*"

One of the most amusing chapters, and in general we must advertise our readers Mr Macfie's book is more instructive than amusing, depicts life among the miners and "Society in Vancouver's Island." The mixture of races in these new countries must lead to some curious results, ethnological as well as social. "Among the many remarkable matrimonial alliances to be met with, I have known Europeans married to pure squaws, Indian half-breeds, and mulatto females respectively. One case has come under my observation of a negro married to a white woman, and another, of a man descended from a Hindoo mother, married to a wife of Indian extraction. A gentleman of large property, reported to be of humble origin, is married to a half-bred Indian." ....."Apart from the effect of intercourse between the Mongolian and other races in our midst, we may certainly calculate upon twenty-three *crosses* in different degrees resulting from the blending of the Caucasian, the aboriginal American, and the negro."

A wretched picture is drawn of the degradation of the Indians in the vicinity of Victoria and Esquimault. The presence of white settlers seems to act as a physical and moral poison to the weak and facile Indian. Mr Duncan, to whose successful exertions as a missionary among the tribes of the mainland we alluded some time since in a notice of Commander Maynes' book on Vancouver Island and British Columbia, preserves the lives and morals of his flock by removing them to a safe distance from the civilising influence of trade intercourse with whites. Some hidden and wise law of nature may lurk under this mysterious melting away of inferior races before the face of the white man, but its apparent workings are by no means creditable to our boasted civilisation. The concluding chapter on emigration reiterates the advice unfortunately so vainly given "to all clerks, poor gentlemen of education and breeding in quest of Government appointments, governesses, schoolmasters, adventurers without funds and trained to no particular employment, to remain at home." Rough labourers and skilled artizans are much needed, but even for these there can be no wide market till more capital is brought to bear upon the undoubted natural riches of the country. "We want capital," writes Mr Macfie, "to open the way for the wider and steadier employment of labour. The success of the few wealthy firms that have entered the field and engaged in large enterprises foreshadows the vast profits waiting to be reaped by those who are prepared without delay to follow their example. It is admitted that one or two English companies proposing to take up certain mining schemes have met with reverses. But it is well known that the failure of their plans has arisen mainly from the unsuitable character of the agents selected for carrying them out, or from not laying their basis of operations in an economical manner."

"Respectable females," he adds, "neither afraid nor ashamed to work as domestic servants are greatly in demand. So much is the want of this class felt, that if 500 girls, of good character and industrious habits, could be sent out in detachments of fifty in each vessel, at intervals of a month, they would be absorbed almost immediately on their arrival." Wages range from 4*l* to 5*l* per month, with board. The ill-success of a late tentative measure in this direction was owing to a want of care in selecting suitable women, and to the all but unavoidable evils of a long voyage to empty heads and idle hands. Without sufficient means for training and overlooking the emigrants on their tedious journey, female emigration on any large scale will always be worse than useless. We will conclude with an anecdote illustrating the former scarcity of women in the neighbouring colony of San Francisco.

News arrived to a company of miners "of a lady having come to a place twenty miles from were they were located. They instantly laid aside their picks and shovels, and agreed upon celebrating the event by enjoying a few days holiday. When they came to the longed-for spot, the poor fellows found their bright hopes baulked; no fair form such as their imagination had depicted was visible. But they were fortunate enough to alight upon a woman's bonnet, and soothed their disappointed feelings by forming a ring and dancing round it."

	1,421,090,295	4	.....	1,460,635,442	26

To-day's Bank return shows, compared with that of last week, a decline of 6,780,000f in the coin and bullion, of 19,222,000f in the discounts, of 14,569,000f in the circulation of notes, and of 11,096,000f in the deposits. In a commercial point of view, therefore, it is not satisfactory.

The principal operations on the Bourse during the past week have been in *rente*, but they have not been of any great importance, and have produced only an insignificant rise in that security. The following are the quotations:—that of the Credit Industriel is ex-coupon of 11f 25c, of the Mediterranean 25f, of the Eastern 20f, and the Lombards 20f:—

	Nov. 2. f	c		Nov. 9. f	c

The Emperor has at last issued to the public the pamphlet about Algeria, which he had printed for private circulation several months ago, and of which some account was given in the ECONOMIST. It presents His Majesty's views as to what should be and can be done for the colony, and his reasons for entertaining them. Among the measures he proposes are two which would be unquestionably useful—the establishment of discount banks and the abolition of customs. If they had been carried into effect years ago the trade of Algeria would have considerably exceeded the 9,000,000*l* sterling, or thereabouts, per annum at which it now stands.

M. Emile Pereire has appeared before the Superior Council of Commerce, charged with the inquiry respecting banks and currency, and his opinions were received with the same respectful attention as those of Baron de Rothschild and M. Pinard, though differing from them considerably. As we expected, he defended with much ability the peculiar theories in banking he has always entertained. He criticised the conduct of the Bank of France in times of monetary pressure, and expressed a wish to see the circle of its attributions enlarged, or, what he intimated would be better still, to see other banks of issue established.

The deputation of the Chamber of Commerce at Paris, which was mentioned last week as having figured before the Council, has thought fit to break through the rule of secrecy which that body has imposed on the inquiry: and it has published a summary of what it said. But it does not appear to have thrown much light on the matter, as its testimony was little more than a repetition of facts which everybody knows, and of opinions which, though accepted by some and regretted by others, are admitted by all to have fallen within the domain of common-place. Thus the deputation declared that the monetary crisis of 1863-4 was occasioned by the exportation of specie to pay for cotton, silk, and other goods, and for the foreign loans; that the Bank of France was not responsible for the crisis; that crises would probably become frequent in future, but less violent, because correct economic ideas were beginning to be more generally entertained, because free trade produced a juster equilibrium between production and consumption, and because the extension of banks would permit accounts to be settled by transfer instead of bank notes. The deputation explained the services bank notes render, and declared that it is indispensable that they shall be instantly convertible. It pronounced against the plurality of banks of issue, because, it said, plurality would create competition which would lesson the quality of paper discounted, and render variable the value of notes. The Bank of France, in the opinion of the deputation, conducts its operations in such a manner that they are out of the pale of criticism, and it is glorious for the country to possess such an establishment. The deputation declared against the sale of the *rentes* possessed by the Bank, which has been recommended by some reformers. No doubt, it said, its notes are guaranteed by the bills it discounts, but it is well to have the second guarantee of an investment in Government stock, against the double risk of political and commercial crises. If, besides, the *rentes* were sold, and the proceeds employed in banking operations, no more loans would be made, as already the Bank refuses no good paper, and discount would be dearer, inasmuch as it would be necessary to give the shareholders something for the use of their capital. Though considering the Bank perfect, the deputation suggested that it might do well to limit its advances on deposit of warrants and securities, such operations being more suitable for a bank of deposit than for a bank of issue, and being generally demanded more for speculative than commercial reasons. It would also do well to "create a portfolio of foreign bills, in order to reconstitute the stock of coin and bullion when necessary," to augment the number of branches, to increase the commercial element in the directory, and to make over to Chambers of Commerce, for purposes of public utility, all the profits realised by a rate of discount 6 per cent., in order that the Bank might never be exposed to the reproach, however unfounded, of raising the rate of discount without necessity for the mere profit of its shareholders. The deputation was besides of opinion that the system of the Bank of England was neither inferior nor superior to that of the Bank of France; but it pronounced against the separation in the latter of the issue department from the banking department, and against the notes of the Bank being made a legal tender as in England, and against the amount of issue being limited. The Bank, in the opinion of the deputation, ought to continue to require three signatures for bills discounted. The proportion to be maintained between the stock of coin and bullion in hand and the liabilities of the Bank could only, it said, be decided by experience. When a drain was caused by the state of internal commerce, the till must be reconstituted by a purchase of precious metals; but when the drain was for transactions abroad, the only efficacious remedy was the raising of the rate of discount. Changes in the rate of discount could not be avoided, but the bad effects they produce might be attenuated, if at the beginning of a crisis, or before a crisis, the rate were increased, and it it were afterwards gradually augmented. Lastly, the deputation declared that in the opinion of the Chamber of Commerce, the Bank of France ought to be maintained as it now exists, subject to the adoption of the modifications indicated, and that it was of importance that de-

Digitized by Google

posit banks should be multiplied, in order to improve the modes of payment.

The shareholders of the Ports de Brest, in a meeting held a few days back, pronounced the dissolution of the company, and appointed a committee of their body to wind up its affairs.

The coupons to be paid by the Northern Railway Company on the 1st January next are for the old shares 25f (8f for interest, and 17f on account of dividend), for the new ones 17f, for bonds 7f 50c; and they can be received at once on payment of discount of 4 per cent.

The Messageries Imperiales Company makes an issue of 10,000 bonds, half of the number authorised in 1861. They are to be of 500f each, and half of the amount is to be paid on subscribing. They are to bear 6 per cent., and to be reimbursed at par in 1880. Shareholders are to be admitted to subscribe in preference to the public, at the rate of one bond for ten shares. The Company also announces the payment of 20f per share on account of dividend for 1865.

A convention between France and Belgium, for the transmission of sums from one country to the other, through the post office, has been promulgated this day. It is very strange that a system of post office orders between France and England is not established.

In the event of the projected reforms of His Excellency M. Fould being carried into effect, the staff of the Customs department will be greatly reduced. It has, it appears, contrary to all reason, been considerably increased of late years, though the treaties with England, Belgium, Italy, and other countries, have greatly lessened the work to be done. But instead of reforming the Customs, would not the Minister do well to suppress them altogether? In preceding letters it has been demonstrated that they produce so little that they are really not worth retaining. The last return issued tells the same tale. Here it is:—

	First nine months of 1865. francs.		First nine months of 1864. francs.		First nine months of 1863. francs.
Foreign sugar	16301000	...	35006000	...	35325000
French colonial sugar	20803000	...	18944000	...	34935000

Olive oil	867000	...	564000	...	806000
Articles in metal	296000	...	319000	...	623000
Cotton yarn	441000	...	357000	...	312000
Cheese	469000	...	479000	...	428000
Brandy and spirits	293000	...	777000	...	398000
Rice	172000	...	287000	...	540000
Oil from grain	481000	...	210000	...	274000
Lead	41000	...	344000	...	389000
Flax and hemp yarn	494000	...	303000	...	373000
Woollen yarn	372000	...	...	...	...
Steel	93000	...	...	...	...
Tea	228000	...	...	...	...
Pottery and porcelain	617000	...	...	...	...
Other merchandise	10053000	...	13250000	...	11340000
	84140000	...	101663000	...	122446000

With such sums as these, reduced as they are by the expenses of collection, which is very heavy, it is clear that the Customs as a branch of revenue are insignificant; and it is not to be doubted that the abolition of them would give an impetus to trade, which in other forms would bring in far more to the Treasury, whilst the relief to the working classes in towns, and the labourers in the country, the special clients of the Emperor, would be considerable.

A large increase in the commerce of France in the month of September was noticed in last letter. In it the United States figured for an important sum, though not for so large a one as is generally thought. Thus, in imports from them for consumption, the principal increase was in tobacco for 1,797,286f, and in cotton for 749,945f; whilst the principal exports to the States of French production stand thus:—

	First eight months of 1865. francs.		First nine months of 1865. francs.
Wine, in casks, Bordeaux	4572000	...	5801680
Wine, in casks, of other places	1582555	..	1780805
Wine, in bottles, of Bordeaux	1885500	...	2574000
Wine, in bottles, of other places	1697625	...	2100375
Wines *de liqueur*, in casks	288400	...	328720
Wines *de liqueur*, in bottles	482000	...	552750
Brandy	296635	...	447515
Silk tissues	12957792	...	15274374

As it is only by frequent repetition redress of a grievance can be obtained, let me complain once more of the manner in which the Customs returns are presented to the public. They do not give the total trade of each country with France; and to ascertain it necessitates an amount of calculation from which the most industrious may well shrink. I wished to see from the returns what share England had in the increase of commerce in the last month of September; but after toiling for three hours I had to give up the task in disgust and despair, because I perceived that it could not be got through in less than an entire day. If the Customs are to be returned—(and it is to be feared there is not much chance of their being abolished, notwithstanding the little they yield)—the Board ought to remodel its tables. As they stand they are discreditable to it and of little utility to the public. But unless the Minister of Finance himself condescends to interfere, no reform is to be expected.

The following is a detail of the quantities of the principal goods in bond at the end of September, the latest date for which there is a return:—Coffee, 21,251 tons; cotton, 153 tons; pig iron, 6,296; hops, 62; coal, 87,644; bar iron and rails, 386; wool, 294; hides, 1,145; rice, 1,606; French colonial sugar, 22,055; foreign sugar, 44,013.

Messrs Arles Dufour and Co. of Lyons, in their last circular on the silk trade, say:—"The important rise which marked the end of last season presented from the beginning of this one a great impediment to the prosperous march of industry. Manufactures have not, up to the present moment, obtained from European consumers a rise at all comparable to that which the raw material has undergone. They have accordingly been obliged to reduce notably their production in the finer qualities, and to occupy themselves with commoner articles, for which North America, during some months, presented an important market. The consequence has been an active demand, followed by a marked rise for the current qualities of silk, particularly those of Asiatic production. If, as is almost certain, an importation of silk from China and Japan less considerable than was expected at the beginning of the season should justify this rise, we must nevertheless not lose sight of the fact that according to the last accounts the American markets begin to yield under the large imports of silk fabrics, which in the newly pacified States find a sale less active than had been hoped from such a prolonged interruption."

The market report is as follows:—

FLOUR.—At *Paris*, yesterday, the quotation was 49f to 54f the sack of 157 kilogs. Six marks, disposable, 52f 50c; current month and December, 52f 75c. Type Paris, the 101 kilogs, 32f 75c.

WHEAT.—At *Paris*, yesterday, choice white was 28f 50c to 29f the sack of 120 kilogs; choice red, 28f; first quality, 27f to 27f 50c; and other sorts, 26f to 26f 50c.

COTTON.—The market was calm at *Havre* in the week ending Friday, the sales being only 4,537 bales, and prices fell considerably: 15f to 18f for United States; 20f for Egypt, Peru, Terra Ferina, Porto Rico, Martinique, and Guadaloupe; 15f Brazil; 15f sawginned, 5f to 10f other sorts of Surat; 10f Kurrachee, Madras, Coconada, Bengal, and China; 5f Tinnevelly. Low New Orleans was consequently 277f the 50 kilogs; good ordinary qualities in Broach, Tinnevelly, and Madras, 220f; in China, 215f; Egypt, 218f. The arrivals of the week were 5,516 bales, and the stock 26,400. This week, the market has been calm, and yesterday Tinnevelly was 220f; Madras, for delivery, 165f to 195f; Salem, 190f; Rangoon, 180f; Bengal, 145f; China, 195f; Guadaloupe, 250f; Mobile, 265f.

COFFEE.—The market at *Havre* was less animated in the week ending Friday: 1,430 sacks Hayti Port-au-Prince, 82f to 84f the 50 kilogs in bond; 325 Cape, 85f; 116 Gonaives, 85f 50c; 1,200 Rio, not washed, disposable, 67f to 88f; 500 ditto, for delivery, 75f; 125 Rio washed, for delivery, 10f; 480 Malabar, disposable, 89f; 1,200 ditto, disposable and for delivery, 92f to 94f. By auction, some different sorts of damaged and 21 sacks Santos, sound, 53f. The arrivals were about 12,000 sacks and 246 casks. This week, Hayti, 82f to 84f; and indifferent quality, 78f; Cazengo, 86f; Port-au-Prince, 80f 50c to 84f; Cape, 85f; Bahia, 66f; Gonaives, 85f and 86f; Rio, 65f, 77f, and 78f, and at prices kept secret; Ceylon, 87f 50c. At *Bordeaux*, last week, 290 sacks Rio washed, 107f to 107f 50c; 200 ditto, not washed, 85f; 284 La Guayra at prices not stated; 13 casks Caracoly, 116f. By auction, 144 sacks La Guayra non grage, sound, 95f to 95f 50c. This week, ditto, 92f to 94f, and grage, 101f 50c and 102f 50c; San Yago prices not stated; Mysore, 107f to 119f. At *Nantes*, last week, there were no sales, but Manilla might have been had at 91f 50c and 92f 50c. This week, Reunion pointue, 142f 50c and at prices kept secret. At *Marseilles*, last week, 582 sacks Brazil at prices not stated, the rest at 60f to 85f; 550 Rio, for delivery, 80f. This week, Rio, 70f.

SUGAR.—At *Havre*, in the week ending Friday, prices improved. 715 casks West India went at 49f 50c to 50f, bonne quatrime, duty paid, and some usine at 54f to 58f 50c, on sample; 4,300 bales Reunion, 52f 25c, bonne quatrieme, duty paid; some Porto Rico, at 52f and 54f; 100 casks Havana, 34f, No. 12. The arrivals were 2,345 sacks from Dunkirk. No sales have been made this week. At *Bordeaux*, last week, 347 casks French West India, to take at Havre, and 35 at Nantes, on the basis of 48f, bonne quatrieme, but for the Bordeaux market the arrival quotation was 49f 50c; 9,338 sacks Reunion, 53f and 53f 25c, part to be taken at Nantes; 85 casks Santiago, 34f 50c, on sample. This week, French West India usine, 55f, 61f 50c, 62f 25c, on sample. At *Nantes*, last week, 1,258 sacks Rennion, 53f; 800 ditto, for Bordeaux, 53f 25c, and the entered cargo of the Osiris, 52f 25c; some French India, 48f and 49f, for bonne quatrieme, and usine, inferior, 49f 25c, on sample, and good, 59f 50c, on sample. At *Marseilles*, last week, 450 casks Martinique, 30f 75c, bonne quatrieme of Havre; 1,400 bales Mauritius, 33f 50c, No. 12; 350 casks Havana, by Spanish ship, 32f 50c, No. 12; 800 sacks Permambuco, 29f to 29f 50c, No. 10. This week, Havana, 32f 50c.

INDIGO.—The sales at *Havre*, in the week ending Friday, were 23 chests Bengal, 1 Java at prices kept secret. The arrivals were 33 casks and 17 serons. This week, Bengal at prices kept secret. At *Bordeaux*, last week, the sales were 61 chests Bengal, 9 Kurpah, and 1 Java at

Digitized by Google

established prices. This week, Madras and Kurpah at quotations not given.

HIDES.—The sales *Havre*, in the week ending Friday, were 1,460 La Plata dry ox, 95f; cow, 80f to 82f the 50 kilogs; 6,400 ditto, saladeros, 57f to 60f for ox heavy; 1,000 ditto, ox light, 45f; cow, 44f; 700 Monte Video, 60f ditto; 1,630 Rio Grande dry, 82f 50c to 85f; 100 ditto, salted ox, 55f; 787 ditto, 44f 50c, ox light; 428 Rio Janeiro salted ox, 52f; cow, 39f. The arrivals were about 16,000. This week, Bahia dry-salted 57f; ditto, dry, 103f 50c and 100f; Rio Grande salted ox, 50f to 62f 50c; Rio Janeiro salted cow, 39f; Buenos Ayres dry ox, 100f.

WOOL.—At *Havre*, in the week ending Friday, 312 bales La Plata unwashed went at 1f 22½c (lambs) to 2f 35c (merinos); 31 bales Monte Video washed, 2f 15c to 2f 50c; 3 bales sheepskin Buenos Ayres unwashed, 1f 10c. The arrivals were about 950 bales. This week, Buenos Ayres unwashed, 1f 90c to 2f 30c; Russian unwashed, 1f 75c; Monte Video ditto, 2f 10c to 2f 60c; Buenos Ayres unwashed, 215f the 100 kilogs.

TALLOW.—The market was somewhat calmer at *Havre*, in the week ending Friday, and prices fell. 750 pipes La Plata, disposable and for delivery, part at 63f, but the rest at 60f 50c; 24 casks New York, à la marque, 64f. The arrivals were 944 casks. This week, La Plata, for delivery, 60f 25c to 61f. At *Paris*, yesterday, the 100 kilogs were, octroi duty included, 126f 20c.

COMMERCIAL AND MISCELLANEOUS NEWS.

The whole sea-borne trade of India during the year ending April 30, 1865, amounted in value to more than 118 millions sterling, or nearly a fourth of that of Great Britain. Bengal comes first with 45½ million, Bombay with 41½, Madras with 17½, British Burmah with nearly 9, and Scinde with little more than 5.

The Bombay Committee of Weights and Measures has submitted its report to the local government. The decimal system is recommended for weights, liquid and dry measure, and square or land measure, and the English system for linear measurement. The units adopted should be, respectively, the avoirdupois pound, which exactly corresponds in weight to seventy of the copper pieces in common use; the English gallon, holding 10 avoirdupois pounds of clean water; the English gallon again, and the English acre. The names might be, in English, unit one pound, a decade of 10 lbs, a cental 100 lbs, and a millard 1,000 lbs; in Hindustani, unit *ek pound*, *ek duskee* 10 lbs, *ek sotee* 100 lbs, and *ek hazaree* 1,000 lbs, $\frac{1}{10}$th of a pound would be *ek dus ounsh pound*; $\frac{1}{100}$th *ek shut ounsh pound*, and so on.

In reference to the state of the money market at Bombay, during the fortnight ending Oct. 13, Messrs Stoehr, Prieger, and Co., write as follows:—The great activity in both exports and imports has naturally led to even a greater demand for money than what is annually experienced at the opening of the shipping season. The cash reserve of the bank of Bombay has been reduced in the two weeks ending the 10th inst. from 164 to 93 lacs and an advance of 3 per cent. all round in the rates of discount, which now are 10 to 12 per cent., has been the consequence. There has been a very large business done in exchange, which was characterised by the unusually great margin of $\frac{3}{4}$ to 1 per cent. between bank bills and credits. Banks came out as sellers at 2s 0$\frac{3}{4}$d, or $\frac{3}{4}$ per cent. above the closing rate of last mail, and gradually advanced to 2s 0$\frac{7}{8}$d, until the great decrease in the bank's cash reserve became known on the 10th, when the rate immediately jumped up 1 per cent. The closing rates are: Bank bills, 2s 1d to 2s 1$\frac{1}{8}$d; credits, 2s 15-16d to 2s 1$\frac{1}{4}$d; documents, 2s 1$\frac{1}{2}$d, and it is very probable that next fortnight will see a further rise.

The amount of Government currency notes in circulation, all over India on the 2nd of September, was 8,693,584*l*.

The following table shows the exports from Liverpool of British manufactures of cotton, wool, silk, and flax to New York, Boston, Philadelphia, and New Orleans, in packages:—

	1860.	1861.	1862.	1863.	1864.	1865.
January	23,449	17,436	14,381	12,622	16,669	6,735
February	15,762	7,324	12,742	12,634	16,125	9,921
March	14,153	10,699	9,228	13,078	13,054	10,362
April	11,038	2,595	6,861	10,200	9,595	6,716
May	15,189	2,627	7,286	5,925	11,857	7,423
June	24,078	1,445	8,369	5,747	13 269	10,969
July	24,136	2,740	15,237	11,535	10,586	15,708
August	19,975	4,105	13,206	9,864	5,941	18,850
September	13,641	4,451	11,176	12,468	4,361	20,481
October	14,890	6,990	10,950	11,820	4,234	24,855

Exports from Liverpool of foreign silks, dress stuffs, laces, and embroidery to New York, Boston, Philadelphia, and New Orleans, in packages:—

	1860.	1861.	1862.	1863.	1864.	1865.
January	6,029	5,110	1,175	2,760	5,662	4,527
February	3,392	2,524	2,722	2,931	6,629	3,345
March	2,212	1,245	1,534	952	4,688	3,545
April	1,377	1,120	2,017	922	4,742	2,646
May	1,460	1,929	2,505	1,354	6,338	2,428
June	3,666	1,042	2,841	2,911	7,031	4,755
July	3,813	1,893	5,485	3,304	5,430	8,101
August	4,060	2,200	3,055	3,708	1,409	8,820
September	2,093	935	2,576	3,834	1,305	6,921
October	2,068	1,328	1,677	3,729	1,759	13,438

The following are the returns of the circulation of the private and and joint stock banks in England and Wales four the four weeks ending he 14th of October:—

	Sept. 16, 1865.	Oct. 14, 1865.	Increase.	Decrease.
	£	£	£	£
Bank of England	21617745	21965514	347769	...
Private Banks	2861915	3122002	260087	...
Joint Stock Banks	2774785	2919154	144369	...
Total in England	27254445	28006670	752225	...
Scotland	4305561	4515404	209843	...
Ireland	5938593	6607715	669122	...
United Kingdom	37498599	39129789	1631190	...

And, as compared with the month ending the 15th of Oct., 1864, the above returns show an increase of 1,161,098*l* in the circulation of notes in England, and an increase of 2,170,888*l* in the circulation of the United Kingdom. On comparing the above with the fixed issues of the several banks the following is the state of the circulation:—The English private banks are below their fixed issue 1,017,467*l*, the English joint stock banks are below their fixed issue 307,103*l*,—total below fixed issue in England, 1,324,570*l*: the Scotch banks are above their fixed issue 1,766,133*l*; the Irish banks are above their fixed issue 254,221*l*. The average stock of bullion held by the Bank of England in both departments during the month ending Oct. 11 was 13,525,211*l*, being a decrease of 771,938*l* as compared with the previous month, and an increase of 451,028*l* when compared with the same period last year. The following are the amounts of specie held by the Scotch and Irish banks during the month ending the 14th Oct.:—Gold and silver held by the Scotch banks, 2,442,017*l*; gold and silver held by the Irish banks, 2,320,559*l*; total 4,762,576*l*; being an increase of 307,176*l* as compared with the previous return, and an increase of 410,533*l* when compared with the corresponding period last year.

For the year ending Michaelmas, 1865, the average prices of wheat, barley, and oats, were as follows:—Wheat, 40s 3¼d; barley, 29s 1d; oats, 21s 4¼d per imperial quarter.

During the week ending Nov. 8, the imports of the precious metals were:—Gold, 129,935*l*; silver, 168,840*l*. The exports were:—Gold, 66,180*l*; silver, 113,663*l*.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 8th day of November, 1865.

ISSUE DEPARTMENT.

	£		£
Notes issued	27,219 380	Government Debt	11,015,100
		Other Securities	3,634,900
		Gold Coin and Bullion	12,569,380
		Silver Bullion	...
	27,219,380		27,219,380

BANKING DEPARTMENT.

	£		
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	9,746 089
Rest	3,188 737	Other Securities	20.670 914
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	4,886,861	Notes	5,745,605
Other Deposits	13,148,786	Gold and Silver Coin	736.897
Seven Day and other Bills	522,121		
	36,299,505		36,299 505

THE OLD FORM

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	21 995.896	Securities	29.914 003
Public Deposits	4,886 861	Coin and Bullion	13,306,277
Private Deposits	13,148,786		
	40,031,543		43,220,280

Dated the 9th November 1865. W. MILLER, Chief Cashier.

The balance of Assets above Liabilities being 3,188,737*l*, as stated in the above account under the head Rest.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£399,430
An INCREASE of Public Deposits of	723,344
An INCREASE of Other Deposits of	168,996
An INCREASE of Government Securities of	505,125
A DECREASE of Other Securities of	72 664
An INCREASE of Bullion of	78,474
An INCREASE of Rest of	7,045
An INCREASE of Reserve of	452,004

The changes in the above account are again favourable. The large increase in the public and private deposits have caused an augmentation of 452,004*l* in the reserve, notwithstanding that the Bank has paid off fully half a million of the loans recently obtained on Government stock. The coin and bullion are 78,474*l* higher, owing chiefly to the return of sovereigns from the provinces. The decrease in the other securities is unimportant.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1855:—

At corresponding date with the present week	1855.	1862.	1863.	1864.	1865.
	£	£	£	£	£
Circulation, including bank post bills	20,705,840	21,234,960	22,115,423	20,919,333	21,995,896
Public deposits	3,605,358	6,928,047	5,624,389	4,560,836	4 886 861
Other deposits	11 166,069	14,738,147	13,664,311	14,438,480	13,148,786
Government securities	10,124,848	11,113,992	10,949.363	9,972,542	9,746,089

Digitized by Google

In the corresponding week of 1855, the action of the double standard in gold and silver on the French money market was attracting attention. Some diplomatic difficulties had arisen between England and the United States. Mr Cobden had published a letter condemning the Russian war. The London money market was steady, but the demand was sufficiently full to keep the general rate of discount equal to the Bank minimum.

In 1862, the large silver export of about 1,000,000*l* had taken place. The Bank of France had raised its rate of discount to 4 per cent. General M'Clellan had been removed from the command of the Federal armies. The voting in Lucerne and in other of the Swiss Cantons for totally revising the Federal constitution had resulted in the proposition being rejected.

In 1863, after serious efforts to induce the meeting of a Congress, the Emperor of the French had forwarded invitations to the different European Governments to send representatives to Paris with the view of conferring on public affairs. A new ministry had been formed in Greece by M. Bulgaris. The accounts from America stated that General Grant had been appointed to the command of all the Western forces, except in Louisiana. The Bank of France had raised its rate of discount to 6 per cent., and the Bank of Turin to 7. The Prussian and Belgian Chambers and Spanish Cortes had been opened.

In 1864, the London money market, after a period of severe tension had become slightly easier, and the Bank rate had been lowered from 9 to 8 per cent. The failure had been announced in Paris of M. Rougement de Lowenberg, a banker of high repute, with liabilities ranging from 600,000*l* to 720,000*l*. There was no political news of importance.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1855, a deficiency of 6,718,495*l*; in 1862, a deficiency of 4,656,150*l*; in 1863, a deficiency of 6,411,122*l*; and in 1864, a deficiency of 5,067,844*l*. In 1865, the deficiency is 6,922,128*l*.

Discount and Money Market.—The demand for money was active during the first three days of the week, owing to the general desire of the public to provide against the contingency of a rise in the Bank rate. Yesterday there was only a limited inquiry, and to-day the demand, although fair, has not exceeded the average. Annexed are the current terms of discount for paper of various dates:—

30 to 60 days	6⅞ per cent.
3 months	6⅞ per cent.
4 months	7 per cent
6 months—Bank bills	7 per cent.
6 months—Trade ditto	7½ per cent.

On the Stock Exchange money has become more plentiful, owing to the repayment of loans on stock by the Bank, and at one period advances were freely offered at 3 to 4 per cent. To-day, however, there has been a better demand, and the charge was 5 per cent. in the morning, and 5 to 6 per cent. in the afternoon.

The following are the rates of interest on deposits:—

Joint Stock Banks	*5 per cent.
Discount houses at call	5 per cent.
Do. with seven days' notice	5½ per cent.
Do. fourteen days	6 per cent.

* At the London and Westminster 4 per cent. only on sums below 500*l*.

About 18,000*l* in gold was sent into the Bank yesterday, and 26,000*l* to-day. On the other hand, there was a withdrawal this afternoon of 10,000 sovereigns for Alexandria.

The Stock Exchange Committee have appointed Monday, the 13th inst., a special settling day in the shares of the South of England Wagon Company (Limited) and Marseilles Extension Railway and Land Company (Limited), which, however, are not to be marked in the official list. The committee have also ordered the following securities to be officially quoted, viz.:—The 20,000 London Register shares of the National Bank of Australasia, and the Six per Cent. 200*l* Sterling Bonds, 1881, of the Philadelphia and Erie Railway Company.

The Bank of France return for the week shows the following changes:—

Decrease.	£
Bullion	272,000
Circulation	580,000
Bills discounted	770,000
Advances	50,000
Treasury balance	316,000
Current accounts	720,000

The following are the rates of discount in the chief cities of the continent:—

	Bank Rate. Per cent.	Open Market Per cent.
Paris	5	4½ ¾
Vienna	5	5 ½

English Funds.—Consols during the present month have shown increased firmness, although a partial relapse occurred this afternoon. The price for the new account was this morning 88⅛ to 88¼ ex dividend, equal to about a half per cent. higher than last Friday, the tone being firm on account of the favourable Bank return, but a decline subsequently took place to 87⅞ to 88 on discouraging reports respecting the disturbances in Jamaica and the adverse state of the foreign exchanges. For money, the last official price was 89 to 89⅛ with the dividend; but transactions were afterwards effected at 88⅞ to89. Reduced and New Three per Cents. left off at 87¼ to 87⅜, and India Five per Cents. 104¾ to 105.

Exchequer bills closed without change, the March issue at 6s to 2s discount and the June 8s to 4s discount.

The Government broker has continued his purchases of stock on account of the Sinking Fund, and also for the Savings' Banks.

Foreign Stocks.—The foreign market has responded only in a partial degree to the improvement in the funds, and in several cases there has been an actual decline. Mexican and Russian bonds, and Spanish Deferred and Passive, have been especially flat. A reaction has also taken place in Italian Five per Cents., but the original Sardinian stock is higher. The principal rise, however, has been in the Turkish loan of 1858, owing to the announcement that a separate account has been opened with the Imperial Ottoman Bank for the receipt of the special revenues required for the dividends and sinking fund of this issue. Other Turkish descriptions have also been firm, except the Consolides, which closed rather dull at 47. New Granada bonds continue in demand. There have been some inquiries for the Confederate Loan from speculative purchasers, and the price has nominally risen to 8 to 9. United States Five-Twenties are fractionally better, at 63¾ to 64. Brazilian scrip has declined to 2⅛ to 2⅜ premium.

The final price of French Three per Cent. rentes on the Paris Bourse this evening was 68f 45c, showing a fractional rise over yesterday and of fully a quarter per cent. since last Friday.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks on last Friday and this day:—

RAILWAYS AND OTHER SHARES.—As in the case of foreign stocks, the railway market has been comparatively unaffected by the improvement in the funds. Most of the leading descriptions are quoted lower than last week, Midland showing the chief reduction. Great Eastern, and Manchester, Sheffield, and Lincolnshire are exceptionally steady. Unlike former weeks, there have been no material fluctuations in Metropolitan. The general business continues limited, and there is an almost entire absence of the speculative movements which formerly characterised this department.

In colonial descriptions the chief alteration is a rise in Grand Trunk of Canada stock. Other Canadian securities were also better, particularly Great Western and Atlantic and St Lawrence shares. Indian guaranteed stocks were steady. Foreign shares have been dull at an occasional decline, especially those of the Belgian lines. Recife and San Francisco (Pernambuco) have also fallen.

In the miscellaneous market the late rise in Overend Gurney and Co. shares has been followed by a further reaction, the price leaving off this afternoon at 7¾ to 8 prem. Credit Foncier and Mobilier of both issues were last quoted 3⅜ to 3⅝ prem.

Subjoined is the usual list of the closing prices of the principal railway shares on last Friday and this day :—

FOREIGN EXCHANGES.—Bills were in greater demand to-day, but the rates remained generally steady.

BULLION.—The following is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper:—

Gold.—There has been no export demand for bar gold during the past week, and 259,000*l* has therefore been purchased by the Bank of England. 20,000 sovereigns have likewise been sent in. 300,000 sovereigns have been withdrawn for Brazil. The arrivals comprise 57,100*l*, per the Oneida, from Brazil; 130,500*l*, per the William Duthie, from Melbourne; 90,800*l*, per the City of Baltimore, from New York. The Poonah, which left Southampton on the 4th inst., took 2,000*l* for Alexandria, and 3,300*l* for Madras. Telegraphic advices from Melbourne report the shipment of 342,000*l* since the departure of the last mail; details have not yet arrived.

Silver.—A fair amount of business has been transacted in bar silver during the last few days at a trifling advance in price. This we now quote 61 5-16d to 61⅜d per oz standard. The market is firm, and the shipments via Southampton on the 12th, and Marseilles on 20th inst., will be considerable. The amount despatched per Poonah on 4th inst. was 26,200*l* to Madras, and 48,800*l* to Calcutta.

Mexican Dollars.—Transactions have been very limited, and the exceptional price at which a small shipment was made per Poonah has not been maintained. The nearest quotation we can give is 59¾d per oz. The Poonah took 12,100*l* to Hong Kong, and 300*l* to Shanghai. A large amount is expected per Mexican steamer due on 28th inst.

Exchange on India for drafts by the banks at 60 days' sight is 1s 11¾d to 2s 0⅛d Calcutta and Madras, and 2s to 2s 0⅛d Bombay.

Indian Government loan notes are 107 to 109 for 5½ per Cents., 100 to 102 for 5 per Cents., and 87 to 89 for 4 per Cents.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std, last price; ditto, refinable, 77s 11d per oz std, last price; Spanish doubloons, 74s to 74s 6d per oz; South American doubloons, 73s 6d to 73s 9d per oz; United States gold coin, 76s 2¾d per oz. Silver—Bar silver, 5s 1 5-16d to 5s 1⅜d per oz std; Mexican dollars, 4s 11¾d per oz, nominal; five-franc pieces, 4s 11½d per oz, last price. Quicksilver, 8*l* per bottle; discount, 3 per cent.

PUBLIC COMPANIES.—At the meeting of the Bahia Steam Navigation Company the directors' report was adopted. It drew attention to the improvement in the affairs of the undertaking, the amount of credit for the half-year ending June 30, notwithstanding the low rate of exchange, being 9,448*l*, as against 4,848*l* for the corresponding six months of last year. A dividend was declared for the six months at the rate of 5 per cent. per annum, leaving, after deducting 1,125*l* to be placed to the credit of the insurance fund, a balance of 4,591*l* to be carried to next account.

At a meeting of the London and Mediterranean Bank, it was resolved to voluntarily wind up the undertaking, in consequence of the amalgamation with the London and Bombay Bank.

The meeting of Hewett and Co. (Limited) took place on Monday, when an *ad interim* dividend was declared at the rate of 10 per cent. per annum, free of income tax, for the half-year ending Sept. 30.

The first ordinary meeting of the Imperial Austrian Gas Company (Limited) is convened for the 5th December, and will be made special, to alter the articles of association, in the sense of depriving the directors of power to invest the Company's funds in its own shares.

The second ordinary general meeting of the City of London Real Property Company (Limited) is called for the 4th December, when a dividend for the past half-year will be recommended.

The Metropolitan Sewage and Essex Reclamation Company have made a call of 2*l* per share, payable by Saturday, the 2nd December.

A call of 2*l* is to be paid on the extension share capital of the Metropolitan Railway Company by the 2nd December.

The directors of the Great Indian Peninsula Railway Company have announced a call of 2*l* as payable on the 19th inst., on both classes of the shares of the company—making 16*l* per share and 6*l* per share respectively called up.

The Master of the Rolls has appointed Mr George A. Cape, of Adelaide place, accountant, official liquidator of the Land Credit Company of Ireland (Limited).

An extraordinary meeting of the Tyne Iron Ship-building Company (Limited) is called for the 23rd inst., when the following resolution will be submitted, viz.:—"That it has been proved to the satisfaction of the members present that the company cannot, by reason of its liabilities, continue its business; and that it is advisable to wind up the same." In the event of this resolution being passed, a liquidator will at once be appointed. It is further notified that there will also be submitted to the consideration of the meeting a resolution for the reconstruction of the company and sale of the works and property to a new company to be formed, and for the appointment of a committee of shareholders to carry out the reconstruction of the company and sale of the property and works, upon such terms as the members of the above or any future meeting of the company may direct and determine.

The subjoined circular has been issued by the Otago and Southland Investment Company (Limited) :—"As no formal report or balance sheet will be submitted until the month of April next, when the second annual general meeting takes place, the directors think it will be agreeable to the shareholders to be informed by the present circular of the satisfactory progress of the company since their last meeting. The directors have pleasure in stating that they have received sufficient loans on debenture to enable them to proceed with the development of the business of the company in New Zealand, without making any further call upon the shareholders. The accounts for the half-year ending 31st July have been duly audited, and the result is so favourable, that the directors have resolved to declare an interim dividend at the rate of 8 per cent. per annum for that period, free of income tax, and in accordance therewith a warrant is enclosed for the dividend due upon the shares standing in your name this day, payable at the Imperial Bank (Limited), London, on or after 8th inst. The local committee in Dunedin, and the agent in Invercargill, report very encouragingly of the prospects of the company, and there is good reason to believe that by the increase of loans on debentures, and continued care in making investments in New Zealand, larger dividends will ere long be available for distribution among the shareholders. The direc

Digitized by Google

tors would again urge upon the shareholders the importance of their influencing loans to the company on debenture as opportunities offer, by which means the profits of the company will be materially augmented."

An extraordinary general meeting of the shareholders in the London and South African Bank is called for the 20th February, to confirm the resolution passed on the 1st inst., authorising the directors to accept the supplemental charter.

The second ordinary general meeting of shareholders in the Anglo-Egyptian Bank (Limited) is convened for the 23rd instant, when a dividend is to be declared.

The Ottoman Financial Association have made a call of 5*l* per share, payable on Thursday, the 30th inst. It appears that the extraordinary meeting of this company, fixed for the 21st inst., is "for the purpose of taking into consideration certain propositions for an amalgamation."

At a meeting of the London and Brazilian Bank, to-day, the resolutions passed at the meeting of the 10th October were confirmed.

W. B. Holdsworth and Company (Limited), capital 150,000*l*, in 15,000 shares of 10*l* each, with power to increase, is designed to purchase the mills and plant of Messrs Holdsworth and Co., of Leeds, flax spinners and thread manufacturers, and to continue their large and long-established business. No goodwill will be paid for the business, which has long been one of great profit.

The Matella Coffee Estates Company of the Island of Ceylon (Limited) is intended to purchase and work the coffee estates situated in the Matella district in Ceylon, which are of great value, and, as far as yet cultivated, yield a large net revenue. The capital of the company is 60,000*l*, in 6,000 shares of 10*l* each.

The Real Estate Company has been formed for the purpose of purchasing, selling, leasing, and dealing in freehold and copyhold land and estate upon an extensive scale and in a comprehensive manner. Several provisional contracts have been entered into for eligible sites near London and elsewhere. The shareholder in this company is practically a freeholder in the company's estates, and, considering the rise in the value of well-selected land in this country, cannot, if the purchases are made with discretion, help realising very considerable returns. The capital is 500,000*l*, in 20,000 shares of 25*l* each, first issue 10,000 shares. A minimum interest of 6*l* has been guaranteed by the vendors to the satisfaction of the directors.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 4 per mille premium, and the short exchange on London is 25.22½ per 1*l* sterling. On comparing these rates with the English Mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is nearly 2-10ths per cent. dearer in Paris than in London.

By advices from Hamburg the price of gold is 428 per mark, and the short exchange on London is 13.6½ per 1*l* sterling. Standard gold at the English Mint price is, therefore, about the same price in London and Hamburg.

The course of exchange at New York on London for bills at 60 days' sight is 109 to 109¼ per cent. At this rate there is no profit on the importation of gold from the United States.

COMMERCIAL EPITOME,

FRIDAY NIGHT

The supply of English wheat on sale at Mark lane, to-day, was very moderate. The trade exhibited less firmness, and the quotations had, in some instances, a drooping tendency. In foreign wheat a very moderate business was transacted, at about Monday's currency. Barley was very firm, and an occasional advance in prices was realised. Oats were in good supply, and the trade presented a less buoyant appearance, the quotations, in some instances, being somewhat in favour of buyers. Beans and peas fully supported late rates. The flour trade was steady, on former terms. This week's imports amount to 8,210 quarters of wheat; 1,540 barley; 37,680 oats; and 40 sacks of flour.

At Liverpool, this morning, wheat declined 1d per cental, and the value of flour was with difficulty supported. For maize, however, the trade was firm. The market at Wakefield was quiet, but firm, as regards wheat.

On Saturday the Liverpool cotton market became quiet, and prices assumed a somewhat downward tendency. The depressed feeling continued until Wednesday, when a decided turn took place in the market, and all cheap cotton was eagerly bought up. On Thursday the inquiry was on an increased scale, and a large business was done at higher prices. To-day the improved demand continues, and the market closes with every appearance of a further improvement. The total sales of the week have amounted to 56,600 bales, of which spinners have taken 29,600 bales, speculators 12,000 bales, and exporters 15,000 bales. The decline which took place at the commencement of the week has been nearly recovered, so that prices close about the same as on Friday last.

From New Orleans we have intelligence to Oct. 26. During the week, the cotton trade had been active, at 54c to 56c, for middling quality. The stock on hand was 117,000 bales.

Advices from Galveston are to Oct. 14. The receipts of cotton since Sept. 1, including the stock on hand at the opening of the season, as well as the arrivals at minor Texan ports, had been 34,315 bales, against 24,345 bales, whilst the exports had reached 24,264 bales, against 10,220 bales in 1860. The stock on hand and on shipboard at latest date was 10,051 bales, the supply at the corresponding period in 1860 being 14,125 bales.

At Savannah, the receipts of cotton since the opening of the season, including the stock on hand at that date, amounted to 36,151 bales, against exports to the extent of 34,453 bales, leaving a stock of only 1,698 bales.

According to a circular recently issued by Messrs Neill Brothers, it appears that the stock of cotton in Georgia, after careful inquiry at the close of the war, was 302,000 bales, and on the 15th of October 250,000 bales. As to the supply in other States no information has yet been received on which firm reliance may be placed. At the date of our latest advices, the stocks of cotton at Southern ports were as follows:—

At	Bales.
New Orleans	113,000
Mobile	54,000
Galveston	10,051
Savannah	1,698
Total	178,749

Postal advices from Bombay are to Oct. 13. As regards the state of the cotton trade during the preceding fortnight, Messrs Nicol and Co. write as follows:—"A further rise in prices in Liverpool and Manchester, with a largely increased demand for both cotton and goods, brought many buyers into the market, and prices, which at the issue of our last showed an upward tendency, immediately advanced considerably, until on the 6th instant messages were received quoting Dhollera 15½d per lb, with an active demand, when the market became very excited, nearly all the European houses being strong buyers at daily hardening rates. Prices show a large advance upon those ruling by last mail, but the last day or two there have been rumours in the bazaar of a fall in the Liverpool market, which had the effect of making dealers anxious sellers, causing in the absence of any demand a decline of from rs 50 to rs 60 from the highest prices paid during the fortnight. Cotton is now commencing to arrive pretty freely with the exception of Coompta, which comes slowly; there is some up, however, and the quality of what we have seen is good; the sawginned Dharwar, too, is of very fair quality, and has been in great demand. Dhollerah is pretty fair cotton, but there is a great deal of leaf in what is now coming forward. Of Broach there is little here now, and the quality is not good, the quality of the Oomrawuttee is also much complained of. The descriptions of cotton most in demand have been sawginned Dharwar, Dhollerah, and Coompta. Sawginned has been sold at from 370 rs to 500 rs, Dhollerah 330 rs to 490 rs, Coompta 355 rs to 410 rs. There have been small purchases also of Oomrawuttee at 341 rs to 425 rs, and Broach 350 rs to 425 rs.

The following tables of prices and exports are from the circular of the above-mentioned firm:—

Grand total	796,757½	825,616

Via the Persian Gulf, we have intelligence from Bombay to Oct. 28. The cotton trade ruled quiet, with limited shipments, the export since Oct. 14 having been only 15,000 bales. Broach was quoted at 13.473d, and Dhollerah at 14.679d per lb, with freight. Freight to England, 30s per ton.

We learn from Alexandria to Nov. 4, that the cotton trade was firm, but at full prices. Fair open-ginned produce was quoted at 22d on the spot, 21¼d for December, and 20½d per lb, free on board, for January shipment. Freight to Liverpool, ½d per lb.

The arrivals of colonial wool for the approaching public sales now amount to 53,035 bales, consisting of 11,766 bales from Sydney, 3,452 Port Philip, 406 Van Diemen's Land, 1,053 Adelaide, 2,567 New Zealand, and 30,790 bales from the Cape of Good Hope. The renewal of activity in cotton at Liverpool has given firmness to the trade, but the business doing is very moderate.

The sold stock of silk in London is now 11,355 bales, against 11,956 bales last year. The unsold stock is 14,542 bales. In 1864, it was 7,609 bales. The delivery in October amounted to 5,563 bales, against 3,527 bales in the corresponding month last year.

In the markets for colonial and foreign grocery produce there has, with the exception of sugar, been considerable firmness, with an upward movement in prices. Tea, coffee, cocoa, and rice have been very firm, and the quotations are decidedly higher than on Friday last, but raw sugar, notwithstanding that the stock here is about 40,000 tons less than at this period last year, commands but little attention, and prices exhibit a decline of 6d per cwt from this day week. The firmness of the rice trade is caused by the advance in the price of wheat, and by the small quantity afloat to Europe, viz., 25,529 tons, against 86,226 tons last year.

In reference to the state of the leather trade, last month, Messrs Powell and Co. write as follows:—An active demand has prevailed throughout the past month for most descriptions of leather; and, although very little variation has occurred in prices, the market is generally firm: heavy sole leather in particular has met an active inquiry, which has no doubt been stimulated by the wet weather. The stocks of all descriptions of goods are now limited, and as the supplies are ordinarily small at this season of the year, full rates at least may be confidently expected. In raw goods the transactions amount to a fair average. The imports have been considerable: the Rio Grande hides were, however, sold for arrival, and the stocks remaining on hand are moderate.

Hemp is quieter, but the market for flax, jute, and coir goods is very firm, at advanced quotations.

In metals, the leading change is in English tin, which has been raised 3*l* per ton. Scotch pig iron, however, is dull, and has fallen to 57s 1½d cash, mixed numbers. Oils continue to advance in price, linseed oil being worth 37s to 37s 6d; and foreign refined rape, 55s per cwt. Turpentine is firmer, at 47s for French spirits.

The tallow trade has been quieter this week, and P.Y.C. at one period sold as low as 49s 6d per cwt. The quotation on the spot, however, has since advanced to 50s per cwt.

Most descriptions of produce and manufacture at New York during the week ending Oct. 28 ruled firm, at full quotations, the exceptions being chiefly confined to flour and certain descriptions of provisions, in which a decline took place. Shipments of cotton to Liverpool continued on a moderate scale; but as regards breadstuffs, the export movement had been unimportant. The discount market had been very stringent at 8 per cent. for the best short-dated paper, at a current minimum quotation. The fluctuations in the premium on gold had been from 144⅞ to 146½. The stock of bullion in the banks Oct. 21 was 3,117,310*l*, and the balance in the Sub-Treasury, 12,994,710*l*. The shipments of specie since Jan. 1 had amounted to 4,850,640*l*. On the 1st of November gold was quoted at 145¾ per cent.

THE COTTON TRADE.

LIVERPOOL—Nov. 10.

On Saturday the cotton market became dull, and on Monday and Tuesday the sales were extremely limited, with lower and irregular rates; on Wednesday the decline attracted attention, the demand revived, and prices in some instances recovered; and a large business was done yesterday, with a decidedly advancing market, strengthened by advices tending to reduce previous estimates of supplies. Sea Island is nominally unchanged, but in limited request. American continues in general and increasing demand, and though

Digitized by Google

during the dulness of Monday and Tuesday a decline of fully ½d per lb was submitted to, prices have since rallied, and closed about ¼d above last week. Brazil has been freely offered throughout the week, and barely supports former prices. Egyptian fell 1d per lb in the early part of the week, but yesterday fully recovered former quotations, and is in increased request. The quotations of Smyrna are advanced ¼d to ½d per lb. The inquiry for East India was very limited in the early part of the week, and when sales were pressed a decline was submitted to of 1d to 1½d per lb; with an improved demand during the last few days a recovery has taken place, and prices may now be generally quoted only ¼d to ½d per lb below the currency of Friday last. Bengal and China are steady, at last week's rates.

The transactions, to arrive, were limited in the early part of the week, but were extensive on Wednesday and yesterday, at prices in proportion to the general market. The quotations yesterday were, for American, bales cotton, average middling, October or November shipment, 21d per lb; good ordinary, shipped, 18½d and 18¾d; New Orleans, average middling, ship named, 21d—Paraiba, first quality, ship named, 21d and 21½d—Maceio, fair average, at sea 20d—Egyptian, open, good fair, November or December shipment 22nd—fair, January delivery 21½d—Oomrawuttee, fair, September and October sailing 16d—Dharwar, fair, ship named 16d—Comptah, fair, October or November shipment 15½d—Western Madras, fair, ship named and sailed 16d—Tinnivelly Madras, good fair, August sailing 16¼d—Bengal, fair, shipments, September 11⅛d and 11½d; October 11d; November 10½d and 10¾d per lb.

The sales of the week amount to 56,640 bales, including 12,130 on speculation, and 14,890 declared for export, leaving 29,620 bales to the trade. The sales to-day amount to about 15,000 bales, at advanced prices, particularly for American.

LONDON—Nov. 10.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—The market continued very flat until yesterday, when an improved feeling was manifested, larger sales were made (chiefly in parcels afloat), and prices which had declined ½d to 1d per lb, in a great measure recovered.

PRESENT QUOTATIONS.

NEW YORK—Oct. 28.

The market recovered early in the week from the depression noted in our last. The steady reception of strong accounts from Liverpool and Manchester has given more confidence to holders. The arrivals have fallen off too; the large shipments from New Orleans to this market have nearly ceased. Florida and Virginia, as well as the railroads leading to the West, have rather increased their deliveries. The export movement at all the leading ports is now very active. It is estimated that about 100,000 bales are in process of shipment from the Atlantic and Gulf ports to Europe. To-day's market was dull, and closed heavily at the following quotations:—

	New York Classification. Upland. c	Florida. c	Mobile. c	New Orleans and Texas. c
Ordinary per lb	48	48	48	48
Good ordinary	52	52	52	53
Middling	58	58	59	59
Good middling	61	62	63	64
Middling fair	...	...	...	...

NEW YORK, Nov. 1.—The cotton trade is dull. Midland upland, 57c per lb.

The receipts for the week ending October 26, were as follows:—

	bales.		bales.
From New Orleans	1,809	From Charleston	1,325
— Galveston	2,875	— North Carolina	1,922
— Mobile	5,747	— Norfolk, &c.	738
— Florida	3,497	Per railroad	3,974
— Savannah	1,052	From foreign ports	531

Total for the week	23,470
Previously reported	337,325
Total since July 1	360,795
Same time last year	63,318

The exports were:—

To Liverpool	12,413
— Bremen	153
— Glasgow	21
Total for the week	12,587
Previously reported	65,887
Total since July 1	78,474
Same time last year	3,345

MARKETS IN THE MANUFACTURING DISTRICTS.

There has been only a moderate business doing in manufactured goods this week; nevertheless, the quotations may be considered steady. The iron trade has ruled very firm, at extreme rates. Coals have sold briskly, both for home use and export.

MANCHESTER, Nov. 9.—In the early portion of the week our market was depressed, but the reduced prices brought in buyers, and there has since been a decided revival of tone. Yarns, which had fallen 1d per lb on Tuesday, have since recovered to the full rates of last week, and there has been more business in them than for some week's past. In piece goods there has been a fair inquiry for 8¼-lb shirtings for China, and other markets, and for mulls and other light fabrics for India. In jacconets some low sales have been reported, and the sales in general, though exceeding in amount those of the last few weeks, have been below even the reduced costs of manufacturing. T'cloths and printers have been saleable for the Levant, but the American demand remains quiet.

BRADFORD.—The improvement in the Liverpool cotton market has favourably influenced our wool market. The principal purchases have been of matchings for assorting stocks, and we have also heard that some few sales of Down wools have been made. There is extreme flatness in the demand for yarns. Were it not that there continues to be a fair home trade, and the demand for Lancashire keeps up, the new business would be small. Prices are a little easier. Pieces—Foreign buyers are very slack, and are holding aloof from buying in the hope of yet easier prices. American merchants are doing very little, and the operations of the home houses are on quite a restricted sale. Prices generally are a shade easier.

LEEDS.—Very few new makes of meltons have yet met with encouragement, but there are probabilities that plain sorts will yet obtain a good footing. Buyers of ordinary market goods have only operated in a cautious manner. White goods were in little request.

ROCHDALE.—There was an excellent demand among the home buyers for figured and fancy flannels, the clearances of which have so far this season been most satisfactory. Yorkshire goods are so dear that the trade in them is most limited because of the check it gives to speculative operations. Sales of wool are on a limited scale, and prices are not such as to encourage larger transactions.

LEICESTER.—There is not much alteration in the hosiery trade. Business in some departments is less active, but this is usually the case at this time of the year. Worsted yarns are unchanged in value, and spinners are well engaged. Cotton yarns are quiet. Wools are without material change, the market being quiet, and the business done is for immediate consumption.

NOTTINGHAM.—There is not quite so much doing in the lace trade. Cotton goods, however, continue in rather more request than they usually are at this time of the year. The demand for all classes of hosiery goods in request at this season is brisk. There are numerous orders on hand. The yarn market is less firm, and some numbers are easier to buy.

HUDDERSFIELD.—For Bedford and woollen cords there is a good demand, but these goods are not easily obtainable in the market, in consequeuce of the manufacturers of these articles having large orders on hand. In fancies the parcels made up have not been large in extent, and have been principally composed of the medium and better descriptions.

BIRMINGHAM.—The trade of this town continues very healthy. Orders come in steadily on account of the country trade, and in the foreign department business is as active as it usually is at this late season. The American orders in are large.

WOLVERHAMPTON.—Rather fewer orders have been given out of manufactured iron. The ironmasters are well employed, and can readily tide over the lull which usually precedes Christmas. The hardware trades are all moderately active, and some decidedly busy. The orders from the United States are considerable, especially chains and other heavy articles. Tin is firm at the late advance, and rather tending to go up again.

GLASGOW.—Iron—G.M.B., No. 1, 57s; No. 3, 57s; Gartsherrie, No. 1, 67s; No. 3, 58s 6d; Eglinton, No. 1, 57s 6d; No. 3, 56s 6d; No. 1, Glengarnock, 60s; Calder, 59s 6d; Langtown, 59s; Kinniel, 58s 6d; Forth, 57s 6d; Carron, 58s. Middlesborough warrants, 52s to 52s 6d cash.

DUNDEE.—Our flax market has been very active, and prices have experienced a further advance. The continued unfavourable accounts as to the yield of last crop of flax, both from Ireland and Russia, and the high prices already paying in these markets, have induced consumers to operate more freely. The last accounts from Calcutta rei erate and confirm the previous statements as to the shortness of the last crop of jute, in consequence of which there has been considerable excitement in the market, and prices have experienced a fresh advance. There continues to be a brisk demand for linens.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Oct. 28.—With large deliveries by rail, flour has declined. There is a good deal on the market made from heated and otherwise unsound wheat, and the range for this grade of flour is unusually great. That of doubtful quality is pressed for sale, and causes irregularity in quotations. Wheat has improved materially on the week; the supply, both present and prospective, is very light—not equal to the wants of the millers, and they have been forced to pay advanced prices for lots in store. There has also been some speculation, but the close was inactive and irregular. Corn has steadily improved, buyers from the Eastern States and the British provinces having entered the market very freely. Distillers have also been large buyers of unsound corn, and the tendency is upward. The following are closing quotations:—Flour—Superfine State and Western, $7.70 to $8.10; extra State, $8 to $8.75; shipping roundhoop Ohio, $8.85 to $9.10; extra Western, common to good, $8.35 to $11.40; double extra Western and St Louis, $11.50 to $17; Southern, supers, $9.50 to $11.40; Southern, fancy and extra, $11.50 to $16; Canada, common to choice extra, $8.25 to $12.05; rye flour, fine and superfine, $6.50 to $7; corn meal, Jersey and Brandywine, $4.85 to $5.10 per barrel. Wheat—Chicago spring, $1.73 to $1.80; Milwaukee Club, $1.75 to $1.82; red winter, $2 to $2.25; amber Michigan, &c., $2.30 to $2.35. Corn—Western mixed, 78c to 91c; Western yellow, 82c; rye, North River, $1.17 to $1.20; Canada, $1.20 to $1.22; oats, Western, 50c to 57c; State, 55c to 59c; barley, $1.10 to 1.30; malt, $1.40 to $1.50 per bushel.

EXPORT of GRAIN, &c., from NEW YORK from Oct. 1 to Oct. 24.

	1865.	1864.
Flour.....bbls	83,040	60,667
Wheat.....bush	72,349	446.417
Corn.....	773,104	17,742

NEW YORK, Nov. 1.—The flour trade is firmer, and an improvement has taken place in prices. For wheat, the demand rules quiet. In the market for corn, there is less activity.

EXPORT of BREADSTUFFS from the UNITED STATES to GREAT BRITAIN and IRELAND since September 1, 1865.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Very little English wheat has been received fresh up to our market this week. The show of samples having been small, the demand has continued steady at, in some instances, a further advance in the quotations of 1s per quarter. There has been a moderate inquiry for foreign wheats at full prices. The imports have been very moderate. Malting barley has changed hands freely at very full prices. Grinding and distilling sorts have been held at extreme rates. The inquiry for them, however, has been by no means active. The malt trade has continued in a healthy

Digitized by Google

state, but no change has taken place in the quotations. The supply of English oats has been limited; of foreign, rather extensive. The oat trade has ruled firm at very full prices. Both beans and peas have met a steady sale at full currencies. The flour trade has been in a healthy state.

Nearly the whole of the country markets have been firm for produce generally, on higher terms. The quantities of wheat on offer have been only moderate.

The continental markets have been steady for wheat and most descriptions of spring corn, at advanced quotations. Advices from New York are to the effect that the exports of wheat and flour to England were on a limited scale.

In Scotland, fine wheat, barley, and oats have tended upwards in price, with a good demand. All other articles have commanded extreme quotations.

The Irish markets have been very moderately supplied with grain, in which a steady business has been passing, at very full prices.

The supply of wheat on sale at Mark lane to-day, was very moderate, yet the trade was slow, and prices, in some instances, ruled the turn easier. Foreign wheat changed hands to a limited extent, on former terms. For barley, the trade was very firm, at slightly enhanced quotations. Oats were in good supply, and the trade for them ruled less active, at barely late prices. Beans and peas were very firm, and Monday's currency was well supported. The flour trade was firm, at full quotations.

The state of the floating grain trade is thus reported by Mr George Dornbusch:—Arrivals at ports of call since last Friday, only three cargoes of wheat. The trade has been quiet, but steady on the whole. Wheat—Some resales have been made at a decline of 6d to 1s on the week. Sales:—Wheat—2 arrived cargoes, Ghirka Odessa, 45s and 45s 3d per 492 lbs, on passage; Ghirka Taganrog, Sept. shipment, 44s 3d and 46s 3d; Nicolaieff, Aug. shipment, 43s 9d; Odessa, Oct. shipment, 44s 6d per 492 lbs; Polish Odessa, Sept. shipment, 46s; Bourgas, Sept. shipment, 42s and 43s per 280 lbs; shipping, shipped, or to be shipped, Odessa, 44s 9d and 45s 6d; hard Taganrog, 45s per 492 lbs; and to be shipped, Banat from Trieste, 45s per 492 lbs. Maize, 3d to 6d dearer, closing quiet. Sales:—On passage, Odessa, Sept. and Oct. shipment, 32s 3d and 32s per 492 lbs; Ibrail, Sept. and Oct. shipment, 30s; and mixed American, from New York, Oct. shipment, 30s per 480 lbs; shipping, shipped, or to be shipped, Galatz, 32s 6d and 32s per 492 lbs; Ibrail, 30s; and 31,000 qrs Danubian from Ibrail, Kustendje or Sulina, 29s 6d and 30s per 480 lbs. Barley—On passage, Nicolaieff, Oct. shipment, 23s 9d; Azov, from Taganrog, Oct. shipment, 24s per 400 lbs; shipping, shipped, or to be shipped, new Danubian, 24s; Crimean, from Theodosia, 24s; and Odessa, 24s per 400 lbs. Linseed, 1s to 2s dearer. Sales:—Arrived, Moorschank, from St Peersburg, 59s 6d at per 424 lbs L.A.T.; on passage, Azov, from Taganrog, Aug. and Oct. shipment, 60s and 62s 6d per 424 lbs; East Indian and Patna, from Calcutta, July, Aug., Sept. shipment, 62s to 65s per 410 lbs L.A.T.; Moorschank, from St Petersburg, 59s 6d and 60s per 424 lbs; and Albanian, from Trieste, Oct. shipment, 62s per 424 lbs L.A.T.; shipping, shipped, or to be shipped, Black Sea, from Odessa or Nicolaieff, 61s 4½d and 61s 7½d per 424 lbs L.A.T. Cotton-seed dearer. Sales:—Shipping, shipped. or to be shipped, Egyptian, from Alexandria (1864 crop), at 7*l* 10s; and (1865 crop), at 7*l* 15s to 8*l* per ton.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market opened flatly, and the few sales made showed a reduction, making the fall 1s to 1s 6d per cwt from the late highest point. An active demand again sprung up this morning. The sales of Wets India in three days were only 170 casks. A few lots Barbadoes by auction obtained 34s to 41s per cwt. Grocery sugars are still dull. Large parcels of Madras Jaggery have sold upon reduced terms. The week's delivery was 4,570 tons, the landings 3,800 tons (including 530 tons beet-root), which leaves the stock 87,250 tons, against 118,300 tons in 1864; decrease of 31,050 tons.

Mauritius.—A floating cargo has sold for the United Kingdom, at 22s 3d per cwt. No sales reported on the spot.

Bengal.—540 bags sold at 34s to 34s 6d for middling soft Gurpatta date. Business has been done in good, privately, at 36s to 36s 3d per cwt.

Madras.—6,760 bags grainy Jaggery sold at and after the sale, the bulk at rather under 29s, with some very good at 29s 6d per cwt.

Guatemala.—Of 4,004 bags, the greater part sold at, and afterwards at 30s 6d to 34s per cwt for muscovado sorts.

Refined.—Dry goods have been extremely dull of sale, and prices are almost nominal.

RUM.—The market is steady, with a good demand for Demerara and Jamaica.

COCOA is steady at previous rates. 417 bags Trinidad offered by auction, chiefly sold in small lots at 64s to 90s per cwt for ordinary to good quality. Grenada continues scarce and high in price.

COFFEE.—The market has been very firm. 122,000 bags Java, &c., will be offered by the Netherlands Trading Company at their usual sale this month. 1,750 casks 1,008 barrels and bags plantation Ceylon in the public sales here, sold at full rates to some advance for the better qualities; good to fine, 84s to 97s; palo and mixed to middling coloury, 76s to 84s. 2,932 bags native sold at the recent advance: ordinary to good, 69s to 72s. 194 casks at 68s to 68s 6d for good ordinary. 1,600 bags East India went at about the valuations, including good to fine Mysore, &c., at 84s to 93s 6d. A few lots Singapore at 58s. 30 barrels of Berbice sold at 67s 6d to 79s 6d. 38 half-bales Mocha were sold at 95s 6d for good long berry. A floating cargo of Rio has sold at equal to 60s 6d per cwt for a near continental port. The exports show an increase of 6,520 tons over last year's, and notwithstanding the recent heavy landings, the stock is nearly the same.

TEA.—The market continues to show an improving tendency. Fine grades of congou have been sold for shipment to Russia. Common to medium kinds are still in demand, the advance upon these being in most cases fully 1d per lb from the recent lowest point. The public sales on Tuesday and Wednesday went off with fair spirit, at steady prices. Of 19,287 packages brought forward, 13,723 packages sold, chiefly teas printed "without reserve."

SAGO.—71 cases extra bold offered by auction were withdrawn at 30s. 600 bags sold at easier rates for small grain: middling to fair, 19s 6d to 20s 6d. Medium bold, at 21s 6d to 22s 6d per cwt, realised full prices.

SALTPETRE.—There has been a better demand for Bengal, and at firmer prices. 6,500 bags are reported sold on the spot, at 24s 3d to 24s 9d, refraction 16½ to 3½, cash or short prompts. 600 tons, to arrive or in course of landing, at 25s to 25s 6d per cwt.

IMPORTS and DELIVERIES of SALTPETRE to Nov. 4, with STOCKS on hand.

SPICES.—There has been less inquiry than of late. 917 bags Ponang, offered by auction, were bought in at 3½d for Trang, and since sold at about the current market value. 1,626 bags Singapore went steadily, and part sold at 3¼d to 3⅜d. 60 bags heavy shot Malabar realised 4½d. Of 696 bags white, a fair portion found buyers at full rates: Singapore, 5¼d; Penang, fair to good, 5½d to 6d. 24 cases brown nutmegs and 25 cases mace sold at extreme rates, the latter being now very scarce. 500 bags Zanzibar cloves sold at 3d to 3⅛d. 19 cases Penang at 11¾d to 1s per lb. 387 barrels Jamaica ginger, at 3*l* 3s to 10*l* for ordinary to fine. 828 bags Bengal were bought in at 26s 6d per cwt.

RICE.—The sales in soft grain descriptions have been very extensive at rather higher rates: new Necrancie Arracan, 12s 3d to 12s 6d; fine new Rangoon, 13s to 13s 6d. Old imports, 11s to 11s 9d. 200 tons Moonghy, to arrive, at 12s 6d per cwt. White Bengal sells slowly.

IMPORTS and DELIVERIES of RICE to Nov. 4, with STOCKS on hand.

COCHINEAL.—Of 603 bags brought to auction on Wednesday, about 500 bags sold at full prices: Honduras silver, 2s 1d to 3s 5d; black, 3s 8d to 4s 4d; Teneriffe silver, 3s 4d to 3s 5d; black, 3s 6d to 4s 2d; Mexican silver, 3s 3d to 3s 5d per lb.

OTHER DRYSALTERY GOODS are quiet. Safflower firm: 123 bales of the new crop sold at full prices, from 5*l* 10s to 7*l* 7s 6d per cwt.

METALS.—Scotch pig iron has further declined, owing to forced sales. The last transaction in mixed numbers was at 57s 6d cash. British manufactured kinds remain steady. There have been a few sales made in spelter, at 21*l* 10s to 21*l* 15s. English tin has been raised 3*l*, and foreign is dearer. Straits, 95*l* paid for cash. A parcel to arrive, 97 per ton.

Digitized by Google

JUTE.—The demand continues active, and considerable business is reported privately, at higher rates. On Wednesday, 5,780 bales, by auction, sold at 15*l* 10s to 26*l* per ton.

IMPORTS and DELIVERIES of JUTE to Nov. 4, with STOCKS on hand.

	1865	1864	1863	1862

Stocks	21550	25000	8530	20710

HEMP.—Some business has been done privately in Manilla, at 42*l* to 43*l* for roping sorts, which are full prices. 1,430 bales offered by auction were taken in at 44*l* to 45*l*. A few lots East India Sunn sold at 20*l* 15s to 22*l*. Petersburg clean, steady at 34*l* 10s to 35*l* per ton.

LINSEED.—The market continues very active, with an upward tendency in prices. Calcutta, on the spot, 63s to 64s; Bombay, 66s per quarter. Extensive transactions in East India, Petersburg, and Black Sea afloat.

OILS.—Common kinds of olive have sold more freely. Rape oil is advancing, owing to the scarcity of seed. Foreign refined, 54s to 55s. Linseed has advanced to 37s 6d on the spot, partly from the above cause, and 38s paid to arrive. Fine palm commands 44s 6d to 45s. Cocoa-nut in active speculative demand: Ceylon, 48*l* to 48*l* 10s; Cochin, 51*l* 10s per ton. Fish oils active: colonial and Sperm sold at 118*l*; cod quoted 50*l* per tun.

PETROLEUM.—Refined quoted 3s 2d per gallon for immediate delivery.

TALLOW.—For several days the market was very flat, with the sales of foreign at lower rates in all positions. Yesterday and to-day the demand improved, with advanced prices. 1st sort Petersburg Y.C., 51s; to the end of the year, 51s 3d to 51s 6d; January to March, 52s 6d per cwt.

PARTICULARS OF TALLOW.—Monday, November 6, 1865.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—A much better demand prevails to-day, the sales including 300 tons grainy Jaggery, at 29s, and 4,000 bags soft brown ditto, at 27s 6d per cwt, besides other transactions, including 6,000 bags clayed Mauritius, at 33s 6d per cwt. The week's business in West India amounted to 457 casks.

COFFEE.—579 casks, 51 barrels, 1,266 bags plantation Ceylon, by auction, sold at full prices. A floating cargo of Rio, at 49s 9d per cwt, for a near port.

SALTPETRE.—1,866 bags Bengal, offered by auction, were part sold: refraction 5½, at 25s per cwt.

RICE.—2,117 bags Bengal were bought in; white, at 15s to 17s 3d; low Ballam at 13s. Privately, 35,000 bags Bassein sold at 12s 9d to 12s 10½d per cwt.

OIL.—460 casks cocoa-nut, offered by auction, sold: Ceylon, 47s 9d to 48s; Cochin, 51s 6d to 52s 3d. 82 casks palm sold at 39s to 43s 6d.

TALLOW.—341 casks Australian beef, offered by auction, sold at 48s 3d to 49s per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar has been very quiet this week, prices in some instances rather easier. Dutch crushed remains steady.

GREEN FRUIT.—Demand for all kinds continues good. Almeria grapes of good quality are in request; a parcel sold by Keeling and Hunt at public sale realised a high figure. Messina lemons are freely taken by the trade. French chesnuts and walnuts have a good sale. Some limited arrivals of Lisbon, Palermo, and Madeira oranges. Barcelona and Paras nuts held firmly for an advance in price.

DRY FRUIT.—No new feature to report in this market, which has been quiet during the week.

FLAX.—Market very firm.

HEMP.—A very quiet market during the week.

TOBACCO.—The market has not presented any change in character, and sales have been effected to a full average extent in all descriptions.

METALS.—We have found less doing again this week than for several weeks past. Copper is quoted firm, but there is no great demand. Iron is in good inquiry, and some kinds of manufactured are a shade dearer to buy. Scotch pig has receded fully 9d per ton. Tin is again 3*l* per ton up in English prices, but a quiet market rules in all kinds. Lead is firm, and rather dearer. Spelter is steady. Tin plates continue to be in request.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	54	3
Fat by ditto	2	8½
Yellow Russia	52	0
Melted stuff	41	6
Rough ditto	23	6
Greaves	2	0
Good dregs.....	6	0

METROPOLITAN CATTLE MARKET.

MONDAY, Nov. 6.—The total imports of foreign stock into London, last week, amounted to 19,909 head. In the corresponding week in 1864 we received 13,674; in 1863, 10,896; in 1862, 11,890; in 1861, 12,755; in 1860, 6,824; and in 1859, 6,294 head.

There was a large supply of foreign stock on sale here to-pay chiefly in middling condition. The trade was slow, at prices barely equal to last week. A few prime beasts from France realised 5s per 8 lbs. The arrivals of beasts fresh up from our own grazing districts were on the increase, but their condition was by no means first-rate. The supply from Ireland and Scotland was moderately good. The quality of the stock from Aberdeen was remarkabley prime. Good and prime beasts commanded a steady sale, at full prices; but inferior animals changed hands slowly, at barely late rates. The best Scots and crosses sold at from 5s 2d to 5s 4d per 8 lbs. From Lincolnshire, Leicestershire, and Northamptonshire, we received 1,800 Snorthorns, &c.; from other parts of England, 750 various breeds; from Scotland, 121 Scots and crosses; and from Ireland, 250 oxen, cows, and heifers. The supply of English sheep on sale was but moderate. The few prime Downs in the pens produced 6s 6d to 6s 8d; and the top price of half-breds was 6s 6d per 8 lbs. at which the trade was inactive. Middling and inferior sheep moved off slowly, and prices were 2s per 8 lbs beneath the late highest point. Calves were in short supply and slugish request, at about stationary prices, —viz., from 4s 6d to 5s 6d per 8 lbs. The supply of pigs was on the increase, and sales progressed slowly, on rather lower terms. The day appointed for holding the great Christmas market is Monday, the 11th of December.

SUPPLIES.

	Nov. 7, 1864.	Nov. 6, 1865.
Beasts.....	7110	5050
Sheep.....	21330	27220
Calves	266	148
Pigs	350	320

THURSDAY, Nov. 9.—The supply of beasts on sale here to-day was moderate, but chiefly in middling condition. All breeds were in fair request at Monday's currency. The best Scots and crosses realised 5s 4d per 8 lbs. With sheep we were fairly supplied. The sale for them was by no means active; nevertheless, the quotations were well supported. The best Downs sold at 6s 8d per 8 lbs. Calves, the show of which was rather limited, were unaltered in value. The currencies for veal ranged from 4s 6d to 5s 6d per 8 lbs. The sale for pigs was heavy, at about stationary prices—viz., from 4s to 5s 8d per 8 lbs. Milch cows were very dull.

Per 8 lbs to sink the offal.

HOP MARKET.

BOROUGH, Friday, Nov. 10.—The market for good and fine hops is firm at full quotations. Inferior hops are dull at about previous rates. New Mid and East Kents, 80s to 190s; new Weald of Kents, 70s to 126s; new Sussex, 60s to 115s; Yearlings, 95s to 135s per ton.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, Nov. 10.—The supplies of potatoes on sale are moderate, and the trade is steady as follows:—Kent and Essex Regents, 70s to 90s; Yorkshire ditto, 60s to 85s; Flukes, 70s to 100s; Rocks, 50s to 65s; Scotch Regents, 70s to 80s; Foreign ditto, 45s to 55s per ton.

COAL MARKET.

FRIDAY, Nov. 10.—Wallsend Haswell, 21s 6d—Hetton, 21s 6d—Tees, 21s 3d—Eldon, 20s—Pensher Primrose, 20s 6d—Russell's Hetton, 20s 3d—Tunstall, 20s—West Hartley, 19s—Holywell Main, 19s. Ships at market, 61; sold, 10; gas contracts, 19—29; unsold, 32; ships at sea, 20.

HAY MARKETS.

THURSDAY, Nov. 9.—The supplies on offer have increased, and the trade is dull, at drooping prices.

Per load of 36 trusses.

	Smithfield.	Cumberland.	Whitechapel.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Nov. 10.—Our market has been rather quiet since the close of the public sales here; still prices are pretty well supported, as consumption continues to go on at an unabated rate.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Nov. 10.—The market moderately attended. Slow sales in wheat, at barely Tuesday's rates. Flour dull, and 1s lower. Indian corn remains steady: American, 31s 6d. Beans firm. Oats and oatmeal steady.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, Nov. 6.—In the share market to-day the transactions were few but there was a rather general slight tendency to improvement in the closing prices, the exceptions being English and foreign railways, which showed no average change. In English railways, Caledonian and Great Northern (A stock) recovered ½ each; ditto (original) and Blackwall receded 1 each, Midland ½, Great Western a further ½, Metropolitan (new) ¼, and ditto (extension) a further ⅛; and Metropolitan District (paid up) were steady at 102 to 104. In colonial, Grand Trunk of Canada advanced 1½, ditto (first and fourth preference) ½ each, ditto (fourth preference deferred) 1, and Great Western of Canada (shares of both descriptions) ⅝ each. In American, United States (5-20) improved ¼. In British mines, Wheal Seton advanced 5, Providence 2, Margaret 1, Clifford Amalgamated and Tin Croft ½ each, and Drakewalls and Marke Valley ¼ each; and East Wheal Russell declined ¼. In foreign mines, Cape Copper recovered ½, St. John de Rey improved 1, and Washoe Gold (of both descriptions) declined ½ each.

TUESDAY, Nov. 7.—In the share market to-day English railways and the banks were again disposed to flatness, but mines and miscellanous shares were rather firmer. Of the English lines, Metropolitan and South-Eastern declined ½, Lancashire and Yorkshire and North-Western ¼ each, and Great Western and Midland a further ¼ each; and Metropolitan District were steady at 102 to 104. In colonial, Grand Trunk of Canada (1st preference deferred) advanced 2½, ditto (4th preference) relapsed ½, ditto (deferred) 2, and Great Western of Canada (shares of both descriptions) ¼ each. In foreign, Great Luxembourg receded ⅝, and Eastern of France, Paris and Mediterranean, and Lombardo-Venetian are now quoted ex dividend. In American, Erie debentures declined ¼. In British mines, East Bassett improved 1, East Lovell and Great Wheal Vor ½ each, Hingston Downs and North Wheal Bassett ¼ each, Drakewalls a further ¼, and Providence a further 1. In foreign mines, Fortuna improved ¼, and Cape Copper a further ¼, and Worthing receded ⅛.

WEDNESDAY, Nov. 8.—In the share market to-day dulness was the prevailing feature, and although in foreign railways there was no alteration of tone, all the other descriptions closed with a slightly depressed appearance. In English railways, Great Eastern (East Anglian) improved ¼; Bristol and Exeter declined 1, and Midland a further ¼; and Metropolitan District (paid up) are unaltered at 102 to 104. In colonial, Grand Trunk of Canada, and ditto (1st preference) declined ½ each, and Great Western of Canada shares (of both descriptions) a further ¼ each. In foreign, Northern of Buenos Ayres advanced 1, and Pernambuco receded ½. In American, Erie shares (paid up) and Illinois Central shares declined ¼ each, and United States (5-20) a further ¼. In British mines, Clifford Amalgamated and East Caradon declined ½ and 1 respectively. In foreign mines, Panulcillo improved 1; and St John del Rey declined 1, and Washoe Gold (of both descriptions) ½ each.

THURSDAY, Nov. 9.—In the share market to-day very few transactions occurred, and the variations from yesterday's closing prices only showed a slight tendency to firmness in Canadian railways and British mines, and to further weakness in American railways and miscellaneous shares. In English railways, North-Western and Metropolitan closed ¼ and ½ better respectively, Great Western ¼ lower, and Metropolitan District (paid up) unaltered at 102 to 104. In colonial, Grand Trunk of Canada and Great Western of Canada (of both descriptions) recovered ⅛ each. In foreign, Dutch-Rhenish, Namur and Liege, and Lombardo-Venetian improved ⅛ each, and Central Argentine declined ½, and Great Luxembourg ⅛. In American, Erie shares (paid up) and Illinois Central shares further declined ¼ each. In British mines, Clifford Amalgamated recovered ½, and North Wheal Crofty and West Seton advanced ¼ and 5 respectively. In foreign mines, Washoe Gold (of both descriptions) further receded ½ each.

FRIDAY, Nov. 10.—There was a demand to-day for British railway securities, and the general course of prices was favourable. Metropolitan stock rose ½ per cent.; London and North-Western, Midland, South-Eastern, and Great Northern A, ¼; and Great Western and Lancashire and Yorkshire, ⅛. Grand Trunk of Canada Railway stock was in demand. Great Western of Canada and Great Luxembourg shares were also inquired for.

DEANE'S TWO-HOLE BLACK PENS which are unequalled for the durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped.

"G. and J. Deane, London bridge,"

and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed.

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

WESTERN GRAMMAR SCHOOL, Brompton, S.W., in union with King's College, London.—The system pursued at this school is eminently practical, and calculated to prepare pupils for the competitive examinations and the various pursuits of life. Three pupils successfully passed the Oxford Local Examinations this year. The Head Master takes a few boarders.—For terms and prospectus apply at the school.

TO GENTLEMEN SEEKING preparation for Woolwich, the Civil Service, and the Line.—A Graduate of Oxford, who has had long experience in preparing for the competitive and University examinations, and has three students at present, wishes to receive two more. Delightful situation, great educational and domestic advantages, and moderate terms.—Address, L. L. D., 9 Leighton resoent, Tufnell park West, N.W.

PROPRIETARY SCHOOL, GRAVESEND.

Head Master, Mr M. GUTTERIDGE, B.A.

The course of study combines the main features of the best middle schools with the distinctive characteristics of our ancient classical schools, and is such as to fit a boy either for business or professional life. It includes the Classics and Mathematics; History, General and Sacred; Geography, Physical and Political; English Grammar and Composition, Spelling and Arithmetic, Drawing and French and the practice of good Handwriting.

Pupils are prepared for the Civil Service Examinations, for the Oxford and Cambridge University Local Examinations, and for Matriculation at the London University.

For terms and prospectuses, apply at the School.

SAUCE.—LEA AND PERRINS' WORCESTERSHIRE SAUCE.

This delicious condiment, pronounced by connoisseurs is prepared solely by Lea and Perrins.

"THE ONLY GOOD SAUCE."

The public are respectfully cautioned against worthless imitations, and should see that Lea and Perrins' names are on wrapper, label, bottle, and stopper.

Ask for LEA AND PERRINS' SAUCE.

*** Sold wholesale and for export by the Proprietors Worcester; Messrs Crosse and Blackwell; Messrs Barclay and Sons, London; &c., &c., and by Grocers and Oilmen universally

NOTHING IMPOSSIBLE.—The greatest and most useful invention of the day, AGUA AMARELLA.—Messrs JOHN GOSNELL and CO., Three King court, Lombard street, perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it, on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price one guinea per bottle; half bottles, 10s 6d. Testimonials from artistes of the highest order and from individuals of undoubted respectability may be inspected. Messrs John Gosnell and Co. have been appointed perfumers to H.R.H. the Princess of Wales.

IMPORTANT ANNOUNCEMENT.—JOSEPH GILLOTT, METALLIC PEN MAKER to the QUEEN, begs to inform the commercial world, scholastic institutions, and the public generally, that by a novel application of his unrivalled machinery for making steel pens, he has introduced a new series of his useful productions, which, for the excellence of temper quality of material, and, above all, cheapness in price must ensure universal approbation and defy competition'

Each pen bears the impress of his name as a guarantee of quality; they are put up in boxes containing one gross each, with lable outside, and the fac-simile of his signature.

At the request of numerous persons engaged in tuition, J. G. has introduced his warranted school and public pens, which are especially adapted to their use, being of different degrees of flexibility, and with fine, medium, and broad points, suitable for the various kinds of writing taught in schools.

Sold retail by all stationers and booksellers. Merchants and wholesale dealers can be supplied at the works, Graham street, Birmingham; at 91 John street, New York; and at 37 Gracechurch street, London.

NEW OPERA AND FIELD GLASS and the Reconnoitrer Glass, price 10s 10d (sent free). This "TOURIST'S FAVOURITE," through extraordinary division of labour, distinctly shows small windows ten miles off, landscape at 30 miles, Jupiter moons, &c. The Marquis of Carmarthen—"The reconnoitrer is very good." Earl of Breadalbane—"I find it all you say, and wonderfully powerful for so very small a glass." Earl of Caithness—"It is a beautiful glass." "Rev. Lord Scarsdale approves of it." Lord Gifford—"Most useful." Lord Garvagh—"Remarkably good." Sir Digby Cayley—"It gives me complete satisfaction, and is wonderfully good." Captain Sendey, Royal Small Arms Factory, Enfield, "found it effective on the 1,000 yards range." F. H. Fawkes, of Farnley hall, Esq.—"I never before met, although I have tried many, a glass combining so much power, for its size, with so much clearness." THE FIELD—"We have carefully tried it at an 800 yard rifle range against all the glasses possessed by the members of the corps, and found it fully equal to any of those present, although they had cost more than four times its price." NOTES AND QUERIES—"What intending tourist will now start without such an indispensable companion to a pleasure trip?" The celebrated Hythe Glass shows bullet marks at 1,200 yards, and men at 3½ miles, 31s 6d. All the above glasses, respectively bearing the registered Trade-Marks, "Salom," "Reconnoitrer," and "Hythe," are only to be had direct from Salom and Co., 98 Princes street, Edinburgh. No agents of any kind anywhere.

TO MERCHANTS AND SHIPPERS.

The increased demand for

DINNEFORD'S FLUID MAGNESIA (for thirty years highly approved by the Faculty, and extensively used in hot or tropical climates) recommends it to the attention of Shippers. A very liberal discount is allowed on export orders by the manufacturers, DINNEFORD and CO., Chemists, &c., 172 New Bond street, London.

THE LAND MORTGAGE BANK OF INDIA (CREDIT FONCIER INDIEN), Limited.

The first drawing on account of the issue of 1864 of £500,000 Five per Cent. Debentures of this Bank, redeemable at par within 30 years, by half-yearly drawings, will take place on the 24th instant. Notice of the numbers drawn will be duly advertised.

DEBENTURES OF THE LAND MORTGAGE BANK OF INDIA (CREDIT FONCIER INDIEN) Limited.

Subscribed capital £2,000,000. Paid up £400,000.

Debentures of this Bank are issued in Bonds to Bearer, or Registered Proprietor, of £20. £100, £500, and £1,000 each, Redeemable at Par within 30 Years, by Half-yearly Drawings.

Interest, £5 per Cent. per Annum,

Payable Half-yearly or Quarterly, as stated below.

The Price of Issue is £87 for every £100.

The debentures of the Bank are secured by the whole of its invested funds and by the additional guarantee of the uncalled capital, which at present is £1,600,000, represented by a proprietary of 1,500 shareholders. The investment of the Bank's funds is restricted, by the articles of association, to real estate in India and Government Securities, and the issue of debentures can never exceed the sum so invested. The amount of debentures already issued exceeds half a million sterling, and the amount invested on mortgage of real estates in India is upwards of three quarters of a million sterling.

The above price of issue gives to the subscriber 5¼ per cent. interest on the amount invested, and a cash bonus of £1 4 18s 10d per cent. on the redemption of the bonds at par by the half-yearly drawings, which (averaging the period of drawing) yields a return of 6¼ per cent.

The Bank also issues debentures at par for fixed periods of three, five, seven, and ten years, bearing 5½ per cent. interest.

The Bonds are payable either to bearer—transfers passing from hand to hand without endorsement and free of further stamp duty—or to persons duly registered in the debenture books of the Bank, ownership changing only by transfer deed. Coupons for the half-yearly interest are attached, payable either 1st January and 1st July, or 1st April and 1st October, by which means investors have the option of drawing their interest half-yearly or quarterly. The quarterly receipts of interest are secured by part of the investment being made in bonds, with interest payable January and July, and part in those the interest of which is payable April and October.

Applications to be made at the Offices of the Company, 17 Change alley, Lombard street, E.C., where any further information may be obtained.

THE LONDON AND VENEZUELA

BANK (Limited), 9 Tokenhouse yard, REQUIRE the services of a Gentleman as ASSISTANT CASHIER and BOOKKEEPER in Venezuela.—Address, stating qualifications and salary expected, to the Secretary. Previous experience in a bank is indispensable, and a knowledge of Spanish desirable.

SECRETARY.—Charles Snowin, Esq.

Offices—160 Gresham house, Old Broad street, London, E.C.

ABRIDGED PROSPECTUS.

This Company has been formed for the purpose of purchasing a freehold estate in the neighbourhood of Arundel, in the county of Sussex, on which has been discovered a valuable deposit of fine "Plastic Clay" well adapted for the "Manufacture of Bricks, &c.," not only on account of the superior quality of the material itself, and the ready means of obtaining lime and sand in the immediate neighbourhood, but also on account of the very great advantage which the site offers for the carriage of the manufactured goods either by water or railway.

The Company will commence operations forthwith. The series of dividends of 15 per cent. will be payable the 1st April, 1866, the 1st July, the 1st October, the 1st January, 1867, and afterwards in quarterly succession each year, on the same day of the month.

One-half the required capital has been subscribed by the Directors and their friends, and the Directors will allot the remaining shares in the order in which applications are received. If no allotment is made, the deposits will be returned in full.

Particulars, with prospectuses and forms of application, may be obtained at the Company's offices, also from the bankers and solicitor.

WHERE SHALL WE DINE? Go to DEACON'S COFFEE HOUSE, WALBROOK, where the "Economist" and all other newspapers in the world are taken in and file. Directories for every county in England, also for Canada and Australia. Advertisements inserted in any papers English or foreign.—Wm. Howell, proprietor.

N.B.—Lists of Heirs at Law, Next of Kin.

LOANS ON DEBENTURES.

JOHN BROWN AND COMPANY (Limited).

Capital, One Million, in 10,000 shares of £100 each.

The Directors are prepared to receive LOANS, for periods not exceeding seven years, at five per cent., on security of their DEBENTURES.

The security consists of uncalled capital, to the extent of £600,000, with all the extensive and valuable property belonging to the Company. It affords a most ample and safe investment for trust and other moneys, all the shares being held by responsible persons. Interest payable half-yearly.

Apply to the Secretary, at the Company's Offices, Atlas Steel Spring and Iron Works, Sheffield.

JOHN HEWETT, Secretary.

W. B. HOLDSWORTH AND CO., LIMITED.

To be Incorporated under the Companies Act, 1862.

Capital £150,000, in 15,000 shares, of £10 each, with power to increase the Capital.

£5 per share to be paid up as follows:—

£1 on application, £1 on allotment, and £1 at the expiration of two, four, and six months respectively, after allotment.

PROVINCIAL COMMITTEE.

John Chalk Barrett, Esq., formerly of the firm of W. B. Holdsworth and Co.

William Wailes, Esq., Leeds.

Joseph Wilkinson, Esq., flax spinner, Leeds.

BANKERS.

The Bank of Leeds, Limited, Leeds;
London and Westminster Bank, London; and
Merchant Banking Company, Cannon street, London.

SOLICITORS.

Messrs Nelson, Bulmer, and Nelson, Leeds.

AUDITORS.

Messrs Price, Holyland, and Waterhouse, 12 Gresham street, London.

BROKERS.

Messrs Ridsdale and Wailes, Leeds.
Messrs Rhodes and Atkinson, Leeds.
Messrs Brunton and Son, 32 Cornhill, London.
Messrs Horsfall and Penny, Liverpool.
Messrs Speakman and Lee, Manchester.
Messrs Kerr, Anderson, and Brodie, Glasgow.
Messrs J. Cunningham and Co., Belfast.
Mr John Gaskell, Bradford.

This Company is intended to be formed for the purpose of purchasing the mills, machinery, plant, and manufactured stock of Messrs W. B. Holdsworth and Co., of Leeds, flax spinners and thread manufacturers, and for continuing the extensive business which has been carried on by them for more than thirty years.

The yarns and thread manufactured by this firm at their establishments at Hunslet and Burley, near Leeds, are well known both in home and foreign markets as excellent in quality and finish; the demand is now considerably in excess of the present power of production.

The mills, extensive premises, steam engines, and all the necessary appliances, are well adapted for the purposes of the business, and Messrs W. B. Holdsworth and Co. have availed themselves of the latest improvements in the machinery, driving at present about 15,000 spindles, which may be considerably increased: the Company has the opportunity of purchasing the whole on advantageous terms.

The Company will, without any payment for promotion, or otherwise, acquire from Messrs W. B. Holdsworth and Co. the goodwill of the business and the right to adopt their firm; the importance of which is of no small value in the sale of thread, and is attested by their having obtained the first class medal in the Exhibition of 1851, and various other medals and certificates both at that time and at the Exhibition of 1862.

There is no reason to doubt that the long established business connexion will also be secured to the Company, without interuption, ensuring the continuance of a large remunerative trade, of which the gross returns have averaged £150,000 to £200,000 per annum.

The Directors will have the benefit of such of the present establishment, and such additional assistance as may be necessary, for securing efficient management and gradual extension of the business.

The success achieved by other similar Companies, established under less favourable circumstances, might be referred to, but this undertaking partakes so little of the nature of a speculation as to render that unnecessary.

The shares have been fixed at a low sum to afford an opportunity for investment to all classes.

The sanction of a meeting of shareholders will be required to any proposed increase of the capital.

Prospectuses, and forms of application for shares, may be had of the bankers, solicitors, auditors, and brokers of the Company; and deposits may be paid to any of the bankers, with whom the form of application must be left.

In case shares should not be allotted to any applicant, the deposit will be returned in full, without interest; and if a less number of shares should be allotted than the number applied for, the surplus deposit will be applied to the payment due on allotment in respect of the shares allotted.

Leeds, November, 1865.

THE GREAT JEWELLERY ROBBERIES.

GEORGE PRICE'S TREBLE AND QUADRUPLE PATENT PRIZE-MEDAL FIRE-RESISTING (212 deg.) and BURGLAR-PROOF SAFES, are made of half-inch boiler plate, with one inch case-hardened doors, drill-proof, gunpowder-proof, picklock proof, violence-proof. New illustrated price lists, with testimonials, may be had post free, from the sole Patentee and Manufacturer, George Price, Cleveland Safe and Lock Works, Wolverhampton; Blackfriars street, Manchester; and Wade lane, Leeds.

SECRETARY (pro tem.)—Charles Muspratt, Esq.
Temporary Offices—30 Nicholas lane, Lombard street, E.C.

This Company has been formed for the purpose of purchasing, selling, leasing, advancing or borrowing money on mortgage of, and generally dealing in freehold and copyhold land and estates, in Great Britain, in a more extensive and comprehensive manner than has yet been adopted by any existing company.

The enormous profits which similar companies, with a comparatively small basis of operations, are known to have made, and the large dividends which have been paid to their shareholders, are sufficient evidences of the fact that a Company with an extended area of operations, must, if judiciously conducted, achieve an amount of success even greater than the most favourable example of those referred to.

Provisional contracts have been entered into for the purchase of four estates; one at Fulham, within three and a half miles of Hyde Park corner, about 40 acres in extent, and offering most eligible sites for building operations. The second estate is known as the Banstead Park estate, close to Banstead, Surrey, only 16¼ miles from town, and consists of 350 acres. The London, Brighton, and South Coast Railway Company have a branch near the estate, and, ultimately, there will be a station upon the estate. The third estate is at Lowestoft, in Suffolk (which has become the most fashionable watering place in the East of England), and known to be the finest site in the town, commanding most beautiful views, and in every respect well adapted for building purposes; and the fourth estate is the well-known Cosham Park estate, near Portsmouth, and comprises 34 acres of park land, with mansion. It has been secured on very advantageous terms, and offers have been made to erect houses thereon as soon as the Company has laid out the roads and drainage.

With regard to the Fulham estate, no more eligible suburb of London offers such facilities for building, it being beautifully situated on the banks of the river, surrounded by gentlemen's seats, and within a short time it will be brought into communication with almost every part of England by means of the railway now in course of construction adjoining this estate. This property is well timbered, and the splendid mansion upon it is comprised in the terms of purchase.

The Banstead Park Estate—one of the most beautiful localities in the neighbourhood of the metropolis, offers great building facilities; and there can be no doubt that the estate will be speedily covered with houses. This estate is also finely timbered.

The demand for houses at Lowestoft has become so great that it is at the present time impossible to get them. The Company have had several offers from eminent builders to lease the land in plots for building leases, at rentals which will pay 20 per cent. per annum on the purchase money.

At Cosham, there is an immediate demand for private house accommodation; and there can be no doubt that this estate will form one of the principal suburbs of Portsmouth.

It is universally admitted that, as an investment, a Company of this nature is of a superior description to any other, as each shareholder is, practically, a freeholder in the Company's estates to the amount of his shares, and taking into consideration the rapid rise in the value of land for building purposes (resulting from the increase in the population and wealth of the country and the decrease of the area of land available for building operations), it will readily be seen that this Company offers to investors an unusually wide margin for profit in the shape of large dividends, in addition to the most substantial and permanent security, a security constantly increasing in value.

Forms of application for shares may be obtained from the Bankers, Solicitors, Brokers, or at the temporary offices of the Company.

Application for shares must be accompanied by the deposit of £1 per share, to be paid to the Bankers of the Company. Should no allotment be made, the deposit will be returned without deduction or delay.

A copy of the articles of association is now lying at the temporary office of the Company for inspection.

THE MATELLA COFFEE ESTATES COMPANY OF CEYLON, (Limited).

Incorporated under the Companies Act, 1862, by which the liability of each shareholder is limited to the amount unpaid on his shares.

Capital £60,000, in 6,000 shares of £10 each.

Power is reserved for the Company, by special resolution, to increase the capital.

The Directors and their friends subscribe for 4,000 shares, leaving 2,000 to be offered to the public.

£1 per share payable on application, and £1 10s on allotment, the remaining £7 10s by calls not exceeding £2 10s per share, at intervals of not less than three months.

The vendor guarantees, and secures to the satisfaction of the Directors, dividends upon the paid-up capital of £12 per cent. per annum, by half-yearly payments, during the three years next after the allotment. The guarantee may be inspected at the Solicitors' office.

The vendor bears all the preliminary expenses.

AUDITOR.

Joseph Sawyer, Esq., Fenchurch street, London, Accountant.

SECRETARY—C. E. Banks, Esq.
Offices—70 Cannon street west, London.

The objects of this Company are the acquisition and working Coffee Estates in Ceylon, and the selling of their produce.

The Directors have purchased three valuable Coffee Estates, situated in the Matella district; the contract may be seen at the Solicitor's office. These estates are known as the Beredewelle Delagahoya and Oodasgeria Estates, and contain about 1,010 acres,—825 of which are freehold, and 185 leasehold, at a nominal rent, held for the unexpired term of 46 years. The Directors are making arrangements for an extension of the term to 96 years. 614 acres are planted—552 are in full bearing, and the remainder will be so next year. 55 acres are in guinea grass, for cattle. 200 acres of very fine forest land are to be planted this year, which will leave about 140 acres to be brought into cultivation at a later period.

The crop for 1864-5 (when the full bearing coffee was only 455 acres) amounted to about 4,000 cwts, which, after deducting the merchant's commission of about £420, being two-and-a-half per cent. on gross proceeds, will give a net profit of about £6,000. The Company will sell without the intervention of the merchant, and thus save the above commission.

The crop for the year 1865-6, and which is now partly picked, is estimated between 5,000 and 5,500 cwts, and as the vendor bears all expenses of upkeep to the 30th June last, 5,000 cwts should give a net profit available for dividend and reserve fund of more than £10,000.

When the whole acreage, exclusive of the 140 acres, is in full bearing, the estimated profit available for dividend would, at present prices, amount to about £12,000, or at the rate of 20 per cent. per annum on the entire capital.

The Directors consider that the present prices will certainly be maintained, if not exceeded, seeing that the demand for coffee is greatly on the increase, whilst the Brazil and Java crops are annually decreasing, and that the re-opening of the Southern ports of America cannot fail still further to stimulate the trade, and that there is little good land now procurable in Ceylon to be brought under coffee cultivation.

The before-mentioned estates have advantages which few properties in Ceylon can command: they are within a few miles of Matella Town, the great depot for labour and draft cattle, the Government road from the coast, by which most of the coolies travel, is the Eastern boundary of the Beredewelle estate. This estate has a contract with Government for cleansing the town of Matella by which much valuable manure is obtained at a trifling cost, and being situated on the high road from Colombo, the owners of these estates, instead of incurring a heavy loss (as many proprietors do), on the rice which they supply to coolies at fixed prices, have in most seasons actually derived a profit upon it, and whilst the cost of transit of coffee to the port of loading from many estates ranges between 5s and 12s 6d per cwt, the cost from these estates averages about 3s 6d per cwt.

The railway from Colombo to Kandy is now partly open, and the contemplated extension to Matella will bring it within two miles of the Beredewelle Estate; this will greatly reduce the expense of transit.

All the buildings are substantial and in good repair; there is an ample supply of water, cattle, carts, and machinery driven by water-wheels, and all necessary appliances for taking in and pulping the crops.

It is proposed to retain the present manager, who has had upwards of ten years' experience in the district.

The Directors and their friends take 4,000 shares, leaving 2,000 for the public.

During the period of the guarantee, the Directors will place to a reserve fund all profits beyond £12 per cent. per annum on the paid-up capital; at the expiration of that period, this fund will be distributed pro rata amongst the then holders of shares to which the guarantee extends.

The Ceylon Coffee Estates Company's success shows what large profits are derivable from coffee cultivation. The Directors of that Company, which has a capital of £60,000, out of the profits on their first year's operations, paid a dividend of £10 per cent. and carried to the reserve fund, £4,757 5s, equal to about £8 per cent. more.

Prospectuses and forms of applications for shares may be obtained at the offices of the Company, and of the Bankers, Brokers, and Solicitors, where the contract for purchase may be seen.

Copies of the memorandum and articles of association can be had at the offices of the Solicitors, or at the temporary offices of the Company. Copies will be forwarded by post without charge on application to the Secretary.

THE TYNE GENERAL ENGINEERING COMPANY (Limited).

Capital £100,000, in 10,000 shares of £10 each.

Incorporated under the Companies Act, 1862, whereby the liability of each member is limited to the amount of his shares.

Deposit on application £1, and £4 on allotment.
First issue of shares, 5,000.

DIRECTORS.

Isaac Charles Johnson, Esq., manufacturer, Gateshead-on-Tyne (Mayor of Gateshead), Chairman.
John Braithwaite, Esq., C.E., 14 Abingdon street, Westminster, Deputy Chairman.

SECRETARY—James Isaake, Esq., A.I.A.
Temporary Offices—London: 13 Moorgate street, E.C.; Newcastle: No. 15 Dean street.

ABRIDGED PROSPECTUS.

The Tyne General Engineering Company is projected to supply the daily increasing demand for marine engines and hydraulic and other machinery consequent on the rapid development and growing importance of the port of Newcastle, and which the available engineering power of the district has so little capacity to satisfy, that serious loss, by unavoidable delay, not only in the performance of original contracts, but also in the execution of complicated and extensive repairs, is of frequent occurrence.

The Directors have secured, at a moderate rental and option of purchase, premises at South Shore, Gateshead, having the advantage of buildings originally erected at great cost, well suited for the operations of the Company, comprising a river frontage of 350 feet, a roadway, and with easy access by tramway to the North-Eastern, North British, and Newcastle and Carlisle Railways; thus placing the works in ready communication with all parts of the kingdom by sea and by rail.

The Directors are justifiably sanguine of securing success for this undertaking, for already the offer of a large number of orders indicates that an ample and lucrative business will be readily obtained. The determination of the Directors being, however, to assure to the shareholders, from the commencement of operations, liberal dividends, it is not intended to encumber the profits with an outlay for works and plant beyond that which may be deemed immediately necessary.

In view of the limited expenditure contemplated, the Directors do not intend to call up more than £25,000 of the capital of the Company. This amount is estimated to be ample to meet the cost of buildings and plant, and to provide the working expenses.

Calculations, based on the results of similar enterprises on the Tyne and Clyde, the well-known success of private firms, and the reports of eminent engineers having been considered, the most moderate computation justifies the expectation of dividends at the rate of not less than £20 per centum per annum.

A large number of shares have already been applied for and taken up.

The Directors having engaged a competent manager and experienced staff, and having completed their negotiations for the site for the works, will so soon as possible commence operations.

Full particulars may be obtained and the articles of association inspected at the temporary offices of the Company, London, 13 Moorgate street, E.C.; Newcastle, 15 Dean street.

Full prospectuses and forms of application for shares may also be obtained from the brokers and the secretary, in London, as above.

THE TYNE GENERAL ENGINEERING COMPANY (Limited).

Notice is hereby given, that the Lists of Application for shares in this Company will be Closed on Thursday, the 16th current, for London, and on Monday, the 21st current, for country applications, before the expiration of which time all applications must be made.—By order of the Board,

JAMES ISAAKE, Secretary.

Temporary offices, 13 Moorgate street, E.C., London, November 9, 1865.

COFFEE ESTATES FOR SALE, comprising about 1,370 acres of Plantation, nearly the whole of which is in full bearing, and very extensive tracts of Jungle, Forest, and Grazing land, estimated to comprise several thousand acres.

To be Sold by Auction, unless previously disposed of by private contract, at Bombay, early in the month of January, 1866, subject to the conditions to be then and there produced, to be first offered in the entirety, and, if not sold, in the following eight lots:—

Lot 1.—All that very valuable Estate called "LACKADIE."

Situate at the head of the Tamboocherry Ghat, about 30 miles from Calicut, comprising about 250 acres, more or less, of Coffee in full bearing. Also, a large tract of rich Forest and Grazing Lands.

The Estate is well supplied with permanent buildings, and the most approved machinery, including a first-class water-wheel; is thoroughly roaded and well laid out.

Lot 2. THE CULLOOR ESTATE,

Situate about 2¼ miles from the head of the Tamboocherry Ghat, and connected therewith by a good road, comprising about 200 acres, more or less, of coffee in full bearing, a large and very rich forest and grazing lands.

The estate is well furnished with permanent buildings, and the most approved machinery, driven by water power for curing the crops.

The habits of the plant on this estate is most luxuriant, and its bearing capacity of the highest order.

The crops of the estate may be safely estimated at 10 cwts an acre.

Lot 3.—THE CHARLOTTE ESTATE,

Is a young and very promising Property, cut out of the Harnooth Valley, is distant about 4½ miles from the head of the new Tamboocherry Ghat, and is connected therewith by a good road. The Estate contains about 150 acres, most of which is in bearing, and possesses excellent permanent buildings.

Lot 4.—THE ANNETTE ESTATE,

Is bounded by the Culloor and Harnooth, and comprising about 240 acres in full bearing, a large tract of unopened Forest and some Grass Lands, and is furnished with all requisite buildings and machinery.

Lot 5.—THE ADELAIDE ESTATE,

Comprising about 180 acres of Coffee in full bearing, and sundry Swamps and Grazing Lands.

This estate is well furnished with permanent buildings of all kinds of the best description, and is amply supplied with the best machinery and working plant.

It is opened on the most productive description of soil in the Wynaad, and is in all points second to no estate yet opened in the Wynaad District.

The first opening was made in 1857, and the last in 1859, so that it is just acquiring its fullest bearing capacity.

The crop of 1863-4 was 110 tons, and the crop now on the trees is estimated at 150 tons.

Lot 6.—THE FIELD ESTATE,

Comprising about 150 acres of coffee in the most luxuriant and promising state of growth, is well supplied with permanent buildings, machinery, and working plant, is well roaded, and otherwise well laid out. The estate is formed on the same description of soil as the Adelaide, has been well managed, and will become a very productive property.

Lot 7.—THE WALLACE ESTATE.

Opened in 1859, comprising about 150 acres of Coffee in full bearing, and a large stretch of Jungle, Forest, and Bamboo and Grazing Lands. It is well roaded and well laid out, and possesses a first-class bungalow and other permanent buildings; also, in conjunction with the Field Estate, the most approved machinery and buildings for curing the crops.

Lot 8.—TWO UNCULTIVATED JUNGLES,

Called "Palakomda" and "Muddikah Mullil," of fine forest land, and in the vicinity of the above estates.

For particulars, and to view the Estate, apply in London to Messrs Hughes, Masterman, and Hughes, solicitors, 17 Bucklersbury, and to Messrs Fux and Argles, Solicitors, No. 1 East India Avenue; and in Bombay to Messrs Kelly, Hore and Manisty, and to Mr James Boosey, on the Adelaide Estate.

EDUCATION IN GERMANY.—ANGLO-GERMAN ESTABLISHMENT, Bonn-on-the-Rhine, founded in 1847.—Herr THOMAS prepares Young Gentlemen for the Army, Navy, Civil Service, and Mercantile pursuits. German and French only are spoken in the establishment, where the Pupils enjoy all the comforts of an English home. The highest references given.—For particulars, apply to the Director, THEODORE THOMAS, Baumschule Allée, Bonn.

DR DE JONGH'S
(Knight of the Order of Leopold of Belgium)
LIGHT-BROWN COD LIVER OIL,
Prescribed by the most Eminent Medical Men as the safest, speediest, and most effectual remedy for
CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,
Is incomparably superior to every other kind.

Dr EDWARD SMITH, F.R.S., Inspector of Poor Laws, Late Physician to the Hospital for Consumption and Diseases of the Chest, Brompton, in his Work on "Consumption," writes: "It is impossible in private practice to determine whether the Oil which we prescribe is genuine Cod Liver Oil or not, and hence we think it a great advantage that there is one kind of Cod Liver Oil which is universally admitted to be genuine—the Light Brown Oil supplied by Dr de Jongh."

Dr BARLOW, Senior Physician to Guy's Hospital, states: "I have frequently recommended persons consulting me to make use of Dr de Jongh's Cod Liver Oil. I have been well satisfied with its effects, and believe it to be a very pure oil, well fitted for those cases in which the use of that substance is indicated.

Sold only in capsuled Imperial Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; by respectable chemists.

Sole Consignees,
ANSAR, HARFORD, and CO., 77 Strand, London, W.C

MARINE MANSIONS AND GENERAL HOUSE INVESTMENT COMPANY (Limited.)

Capital £100,000, in 10,000 shares of £10 each.
Of which 2,000 shares may be paid up in full.
First issue, 4,000 ordinary shares, and 1,000 paid-up shares.
Deposit £1 per share on application, and £1 per share on allotment.
It is not comtemplated to call up on the ordinary shares more than £5 per share.

DIRECTORS.

William Laurance Banks, Esq., F.S.A. (Chairman of the Brecon and Merthyr Railway), Watton house, Brecon, and National Club, Whitehall gardens, S.W.
Thomas Campbell, Esq. (Director of the Metropolitan and Provincial Bank), 5 Westbourne street, Hyde Park, W.
James W. Dixon, Esq., Chase house, Clapham common.

J. H. Rowley, Esq., 35 Poultry, E.C.

AUDITORS.

Richard Buller, Esq., 63 Queen street, Cheapside, E.C.
George Whiffin, Esq., 17 Gracechurch street, E.C.

SECRETARY (pro tem.)—George Leman, Esq.
Temporary Offices—32 Queen street, Cheapside, E.C.

ABRIDGED PROSPECTUS.

The objects of this Company are to provide a superior style of accommodation for visitors at a moderate rate of expenditure, and with this view to combine under one system of management various boarding houses and private hotels, principally at watering places on the coast, as well as at other suitable localities where the connections and co-operation of one establishment will tend to the advantage of the others.

The Directors feel every confidence that a properly regulated scale of charges will give satisfaction to visitors, and at the same time yield a highly remunerative rate of profit to the shareholders, estimated at from 20 to 25 per cent.

The business of the Company will be forthwith commenced at Brighton and Sydenham, where arrangements have been concluded for the immediate possession of the following extensive and valuable properties, including the leases, good-will, furniture, fixtures, &c., viz.:—Belvidere Mansion, Brighton; Victoria House, Brighton; and the Longton Hotel, Sydenham. The above premises have all been surveyed and valued by the Company's architect, and his report, together with the agreement for sale and the articles of association, may be inspected at the offices of the solicitors.

Applications for shares are to be forwarded in the usual form through the bankers, brokers, solicitors, architect, or secretary of the Company.

MARINE MANSIONS AND GENERAL HOUSE INVESTMENT COMPANY (Limited).

Notice is hereby given, that the Share List of this Company will be Closed on Saturday next, Nov. 11, for London, and on Monday, the 13th, for the country.

By order, GEORGE LEMAN, Secretary pro tem.

Just published, 1s., Illustrated, Second Edition,
THE HEAD AND HEART LEGACY.

"Po assessed of a Head, and a Heart, and a business education, I should not be grieved did circumstances compel me to take thee by the shoulder, pat thee on the back, bless thee, put £50 in thy pocket, and say to thee, Go, my son, thou art a rich man, wherever thou goest prosperity will be in thy track.'"—HEAD AND HEART LEGACY.

OPINIONS OF THE PRESS.

The book is clear and simple, highly moral in tone, and most encouraging to the young aspirant. It is interesting as a biographical sketch of a life struggle, and contains many observations on men and manners which it would be profitable for every one to know who has the least ambition or desire of having a soul above his buttons, and a good account at the bank."

"This is a work quite sui generis. It is quaintly written, but is full to an overflow of the wisdom of experience and the impulse of virtue. To all who have heads and hearts' we commend this singular 'legacy.'"

"The author of this legacy has put together some very touching stories of his chequered life intending to stimulate the rising generation to good conduct and honourable dealing, by showing how an untaught boy rose step by step to a high position. He enjoins patience and vigilance, honesty and sobriety, in every path of life, and teaches what is so little practised—that a man should do what his hands find for him to do. The lessons are alike honourable to the head and heart of the writer."

"Besides the autobiographical sketch, Pamphilius supplies a variety of spirited literary specimens, the principal of which, however, is an ingenious manual of French Grammar, as used by the author when teacher of the French language, designed for the use of self-instruction."

Any one acquainted with the current literature of the metropolis, or its littérateurs, will have no difficulty in identifying the author of this interesting volume. The pages abound with sensible observations, attention to which will be found absolutely necessary to gain even a moderate share of success in this busy world of ours."

The Political Economist.

TO ADVERTISERS.—To secure insertion, advertisements for the ECONOMIST must be forwarded to the office by 5 o'clock p.m. on Fridays.

The Investor's Manual *is now sold separately, price 9d stamped, 8d unstamped. If taken as a* Supplement *to the* Economist, *it remains at its former price, 6d. In addition to the information formerly given, it gives a concise summary of the Reports of the Companies for the present year as will enable Investors to judge of their position.*

THE BANK RETURN OF THE WEEK.

The Bank return is this week very favourable; but two circumstances have counteracted the effect which it would naturally have had upon the money market. 1st, the business doing has been very large; 2ndly, the foreign exchanges have become weak. Some silver is likely to go to the East, —not an enormous amount, but still some,—and there are signs for the moment of a demand elsewhere.

The result, therefore, is that it is quite certain money will not be cheaper for a week or two to come. We do not expect it within that time to become dearer; but further than that, in so changing a market and with so many subtle causes at work, it is *charlatanerie* to predict.

THE CATTLE PLAGUE.

TRUE AND FALSE MODES OF DEALING WITH IT.

The Report of the Commissioners on the Cattle Plague is a very remarkable document. They were appointed to investigate the nature of a new, sudden, and insidious malady. The majority of them have agreed on a recommendation so stringent and pervading, that it is puzzling to conceive of it at work; all but one of them concur in recommending measures less severe indeed, but still severe. There are believed to be 7,000,000 of horned cattle in England. Their value is estimated at 60,000,000*l*. Is it desirable to adopt the steps which are thus authoritatively recommended, or is it not? The question thus broadly opened is so important economically, that we shall not apologise for treating it at considerable length.

The discussion naturally takes three divisions; and, though it seems formal not to mix them, it saves trouble in the end. We have three questions to ask and and answer. First, what is the disease? Secondly, what is the cause of it? And thirdly, what is the nature of the remedy or remedies to be applied?

As to the disease itself, we have not to examine it medically; we have no concern with its physiological nature; we care only for its effects. It is a highly contagious but, like most contagious diseases, seemingly capricious disorder, which appeared in this country about the middle of June last, has been very destructive in the metropolitan markets, has been propagated into several important cattle-breeding counties, and is still at work and formidable. The amount of its ravages is shown by figures better than by any thing else. Up to October the 28th, it attacked 17,673 animals, of whom

Those which died amounted to	7,912
Those which were killed	6,866
Total lost	14,778

and the others are still alive. In comparison with the 7,000,000 of horned cattle in the country, this amount is very small and contemptible. Mr Maclean, the commissioner, who dissents from the severe recommendations of his colleagues, says up to a date shortly preceding the 21st of October, owing to the continuance of the importation, 166 sound cattle have been added to the stock of the country for every one which had died of the disease. There is as yet, therefore, nothing appalling or terrific in the magnitude of the calamity; but any contagious disease is a great evil. Our knowledge of such maladies is so meagre, and their occasional effect is so great, that as soon as we hear of them we begin, and begin reasonably, to be frightened. The Commissioners believe it to be the same malady which was here for twelve years in the last century, from 1745 to 1757, and then did great, though from the imperfection of the statistics we do not know how great, damage. They also identify it with the rinderpest of Russia, which has occasionally there and on the Continent destroyed very large numbers of cattle,—though from our knowledge of the treacherous nature of such inquiries, we are a little sceptical as to the precise accuracy of the figures which the Commissioners derive from erudite, but not always critical, German sources. On the whole, we are attacked now by a disease which has not done extreme harm as yet, but which has done great harm elsewhere, and, therefore, may do us equal harm before long.

It may seem needless to discuss the cause of the malady very particularly, but under one aspect it is a most critical inquiry. We want to know whether this peculiar contagion is an exceptional malady which has now broken out after more than a century of extinction, and which may not break out again, if once we are rid of it, perhaps for another century, or whether it is a malady which may happen to us any moment, which is brought to our doors by inevitable conditions, which may recur at any moment even if by a spasmodic effort we get rid of it for a time? The answer of the Commissioners is on this point most unfavourable. They pronounce an opinion, of which, we presume to say, they do not seem to perceive the full practical consequence. They

Digitized by Google

say we probably received the poison from the South-East of Europe. Large quantities of cattle now come to London from Gallicia and Hungary, in consequence of the opening of certain new lines of railway, and these provinces have been attacked this year by an identical malady, and are in the very vicinity of those Russian provinces which are the normal seat and constant home of the rinderpest.

The inference is evident, though the Commissioners do not draw it. We are always liable to this disease. We are partially subsisted on imported cattle; we have ceased to be able to live on our own cattle; we shall year by year import more and more cattle; year by year the price of our meat will adjust itself more and more nearly to the continental price; year by year more and more distant countries will be ransacked for our supplies. It was ascertained, the Commissioners tell us, that on former occasions "Europe "usually received the infection through Russian steppe cattle "sent to Poland and Hungary. These cattle feed in vast "numbers on the luxuriant herbage of the steppes of the "Russian provinces, watered by the lower part of the Dnieper "and its tributaries. Large herds of them are annually "driven to Prussia, to Poland, Gallicia, and Hungary, and "often carry the seeds of disease in their train." But it is with these very districts of the South of Europe that new railways are daily bringing us more into communication; it is there where meat is a "drug in the market" that the influence of our protracted and extreme high price is progressively making itself felt. Do what we will, we shall always have a cattle trade with these countries. We cannot subsist without imported cattle, and we cannot have a "certificate of origin" for every beast. Part of the price which the world pays and will pay for free trade, is the augmented difficulty of isolating transmissible maladies. Movement is the essence of commerce, and where locomotion brings infection, the greater the commerce the more likely the infection. We must carefully bear in mind, though the Commissioners have not, that if their account of the matter be right the present cattle plague is not an isolated accident to be got rid of anyhow and for the moment, but a natural calamity happening in the due and expected course of things, and sure to happen hereafter, more or less often, while we keep that course. We must prescribe not for a single instantaneous paroxysm, but for a recurring, if happily not a chronic, malady.

What, then, is the remedy? It is obvious that there are only two methods of meeting such a disorder—the prohibitive and the eradicative. We must either aim at preventing the disease reaching a place, or else at getting rid of it by gradual cure or instant slaughter when it has arrived. No third expedient is possible.

The majority of the Commissioners recommend the prohibitive treatment. They suggest, with a boldness which we do not remember to have seen equalled in a deliberate and official document, that all circulation, all movement of domestic cattle be stayed at once, till the disease is gone, and that all foreign cattle imported alive be slaughtered as soon as they come ashore. Every beast is to be kept where it is, and so prevented from carrying infection by its transit. The Commissioners are pleased at the plainness of their suggestion. "The mere presence of any beast on a highway will "be sufficient to prove the infraction of the rule." If you begin to inquire what cattle may be moved, you fall, they say, into nice distinctions and argumentative discussions, but if you say that no beast is ever to be seen on a road at all, you lay down a rule which no man can misunderstand and even the rural authorities can scarcely mistake.

The first objection to this plan—the objection which renders all others needless—is that it is not possible. We cannot watch all the roads of England. We have not the police, nor the soldiers, nor the local organisation to do so. On the Continent, where the population is used to a half military Government, defers to it, crouches under it, the difficulty, though still vast, might be surmounted. It might be possible to induce a very deferential population to obey such a *ukase* for the most part; and it might be possible by a network of *espionage* and police to detect and punish exceptional and casual offenders. But in England we have neither the same sentiment of obedience nor the same engines of detection. No one who knows the rural districts of England will imagine that the small farmers, the small drovers (and these are the persons with whom we must practically deal), will abandon all their old habits, will change their usages of trade, will submit to certain loss and often instant ruin, because a rule of law says they must. And if they do not submit, if they drive their cattle as before, where is the detective force to discover them, or the compulsory force to prevent them? There is in counties so fortunate as to possess a rural police, perhaps one policeman to five or six square miles of ground. How is he to look after all the bulls, all the bullocks, all the cows, and all the heifers within his beat? All that would in fact happen would be that one offender in three hundred would be detected, and be brought up at petty sessions. The justices, who know their own localities, and are ruled by the feelings of those localities, would say, "This is a hard case. Parliament "was led away by medical men, by people who did not know "the rural districts; it is impossible to enforce this Act. As "the police have very properly, and in the discharge of their "duty, brought this offender before us, we shall also do what "is required of us, and inflict the *minimum* penalty permitted "by the Act." And after a few such cases and such observations from the local ruling powers, the police would soon cease to detect any offenders.

No doubt if there were a general panic, if everybody in the country believed there would be no meat to eat unless the locomotion of horned cattle were stopped, that locomotion might be stopped. Everybody would then turn informer; every one would then turn policeman; the whole body of the people would try to ensure the enforcement of the law. But such is the unfortunate structure of the human mind, this persuasion, in a case like this, could hardly be produced, except too late, and when it would be useless. When the disease had reached their own locality, when it had got pretty near, when it had killed half the cattle a county off, then the sluggish mass of common Englishmen would be aroused and awake. But not till then. Even distant calamities of great magnitude would not move them to the constant exertion, the perpetual watching, the diffused and never resting care which would be needful; and as the disease now is, when its ravages are a matter of figures, and but a small matter, you might as well expect aid from the English cattle, as from the English peasantry, or the smaller English farmer. England is a country, not like France or Prussia of central and single despotism, but of scattered and local freedom. The price which we pay for this diffused liberty is that we must persuade each fragment of our free people when we wish to enforce a careful observance of searching and minute restrictions in every corner of the country.

Next, this remedy, though so stringent, does not adequately meet the case. We do not lay too much stress on the inconsistency in the Commissioners' report which was elsewhere indicated. They have suggested that Ireland, where cattle cannot be imported, should still take minor precautionary measures, because *people* may carry the plague about them as well as beasts; and some Irishmen accordingly have suggested that no Irish pig-drover should be allowed to return to Ireland. The *Times* justly urged that if we take so stringent a remedy as the prohibition of cattle-locomotion, we ought at least to be sure it would be effectual, and that it would not be effectual if a man, a sheep, or even a pig, might still bring in the plague. But, setting this aside, there is another and far graver reason why the suggested remedy, though very violent, will yet be insufficient. It is a remedy too severe to be tried often. Were we quite sure that if we trod out the disease by a spasmodic effort now, we should not again see it for ten years, we might make that effort. But it is part of the finding of the Commissioners, part of their principal doctrine and imperative teaching, that the cattle plague is identical with the rinderpest; that the rinderpest has its "constant home" in the South-East of Europe, with which we are now by diffused railways and perpetual trade coming more and more into communication. How can we be sure that if we prohibit all locomotion now for six months, say till May, 1866, we shall not in June, 1866, have to begin again. There may be another "cargo from Revel," or "beast from Gallicia." The greater the trade in continental cattle, the further we search the Continent for our cattle—in a word, the more perfect and progressive this kind of commerce—the more sure are we to have periodic attacks of this disease;—what then is the use of proposing now a remedy so stringent that it can only be used at an exceptional crisis—which might be inflicted once in a century if that were all,

Digitized by Google

but which, on the face of it, cannot be tried ever and anon when occasion requires?

The interference with trade, and especially with local and petty trade, which such a remedy would cause is incalculable. The more we examine it, the more important we shall find it. A most obvious though minor question occurs: what is to be done with the drovers? Their trade—their living—is to drive cattle. On a sudden the Legislature says it shall be illegal for six months to drive cattle. On principle you ought to compensate these ruined persons—these persons whose trade you destroy—out of the consolidated fund. A question has been raised on the necessity of compensating the cattle owners for an occasional beast slain here and there by an inspector, and the Commissioners seem to be in favour of such compensation. But their loss is nothing to the loss of those whose whole existence is destroyed by your sudden legislation, whose trade you eradicate, whose calling you make illegal.

The locomotion of cattle is ultimately to the butcher's shop no doubt, but it takes several stages on the way. The first stage is often from barren land to good land. Suppose the case of a farmer on poor and out-of-the-way land, who can bring up cattle, but not fat cattle. At present he sells his lean cattle to the dealers, and they are driven off to better pasture; out of the proceeds he pays his rent. But the Commissioners say you shall not sell to the dealer; at least, the dealer shall have no power of removal. The cattle are to be tied to the locality. The butcher may attend and kill them, but nothing else shall be done. This would be ruin to many an out-of-the-way farmer. *His* market is gone. It is no recompense to say he can sell to some butcher who is to come ten miles from the market town, and kill his lean beasts. Instead of selling marketable cattle where he likes, he has to sell unmarketable, because premature and unfatted, *meat*, at one place, his own farm, to the few butchers who come to buy it. He may be ruined by the change; he will certainly lose by the change. Who is to bear the loss? Is the nation to bear it, or is the farmer?

A whole network of complicated relations exists for the supply of our great towns. This is mainly a live meat trade, and in part a dead meat trade. But the live meat trade, besides being the great trade, is also in a certain sense the insurance trade. You need not kill more than you want; if there is much dead meat, you need kill little; and if little dead meat, you may kill much. The live stock is a sort of suspense fund which may be adjusted on occasion. If you say that on the 1st of December the metropolis shall be fed with dead meat only, you run a great risk of having very dear meat one day, because the country has sent up too little, and next day very cheap meat, because the country has sent up too much. In time no doubt the trade would adjust itself; all sorts of middle men would come in, but then all that adjustment would soon be destroyed at once; the legal prohibition of cattle movement would be removed, and all would go back again to its old channel. The prohibition of animal locomotion amounts to a change in the whole trade of animals. At present it is based on their power of moving and their power of keeping alive, and therefore edible, till required. Once reverse this and half the people about the trade are ruined. It would hardly be possible to do this once, considering the compensation which would be needed, but it would be impossible to be always doing this—to be one week destroying the live meat trade and another destroying the dead meat trade. A single dislocation might be possible though total, but a series of total dislocations cannot be imagined.

We must refuse therefore to attend to the recommendations of the Commissioners, and it is evident that the Government have so refused. If they had intended to act on it Parliament must have been called together—and, Christmas or no Christmas, have passed the necessary acts, but no such step is taken, and when Parliament meets, if the Commissioners are right, it would be too late to do what they advise, and if the Commissioners are wrong, it will be absurd to do what they advise. Several modifications of the prohibitive principle have been suggested; it has been recommended that the locomotion of certain cattle should be stayed, and the locomotion of certain other cattle permitted.

But in confuting these milder suggestions, the majority of the Commissioners show a knowledge of the real world, which should also have been applied to the criticism of their own recommendation. They say:—"The mere presence of a beast on any highway will be sufficient to prove "the infraction of the rule. Any plan which, while laying "down the general prohibition, admits exceptions in favour of "cattle removed to particular places or for particular purposes, "must rest upon the ascertainment of facts more or less com-"plicated, to be proved by certificates from local authorities, "upon the accuracy of which, experience warns us, little "reliance can be placed. The liberty to remove cattle for "particular purposes is sure to be extended and abused for "other purposes. A man has only to profess an intention in "accordance with the law in order, by a little dexterity, to "obtain under such a system the utmost facility for violating "the law. It will be a long time before the rules are under-"stood, and the period in which they are violated through "ignorance will be succeeded by the period in which they are "evaded by design. England is probably the worst country "in the world for the working a system of certificates, per-"mits, licences, and passports, and the temptation to violate "the rules will be very great, for the thought that naturally "occurs to every one whose herd is attacked is to conceal the "existence of the disease until he has got rid of those animals "which do not yet show symptoms of its presence." The difficulties which apply to a total prohibition of cattle locomotion, for the most part apply to a partial locomotion, and there is, in addition, that we have no rural authority capable of deciding off-hand what cattle shall be passed on and what shall not. The matter would have to be settled by the magistrates at petty sessions, an occasional tribunal meeting once a fortnight, which will decide one thing in one district and quite the opposite in the next district, or else it must be left to an individual magistrate, a chance person whom the accidents of rural society have called to the dispensation of justice. It is absurd to expect the effectual insulation of a subtle contagious malady from an administration by its intrinsic nature so various and so lax.

We are left therefore to methods of eradication. The most trusted of these is inspection, but to this there are many objections. Good inspectors of so nice a matter do not exist in the vast majority of country districts, and the inspectors selected, though in general the best that could be found, have exercised their powers sometimes with incautious vigour, and sometimes with over-cautious laxity. They show the defects of all English local organisations made on a sudden; the materials are very rough, and their is no despotic central system compelling the rules and organisation of one place to be uniform and to harmonise with that of any other place.

It is evident also that preliminary inspection and consequent slaughter are very rough modes of dealing with a contagious disease. How can you be sure that a foolish or malicious inspector does not destroy valuable animals? How, even more, can you be sure that a veterinary surgeon, who lives by the patronage of farmers, does not, when suddenly given unexpected authority as a Government inspector, try to please those farmers? Who is to be sure he will kill the beast of Farmer A, a large man who employs him so readily as he destroys the beast of Farmer B, an insignificant man who has a feeble liking for his opponent? A few cases might be got rid of by such means. A slightly contagious malady might be suppressed at an early stage, but it is absurd to suppose that a malady so virulent as this plague is said to be can, now that it has penetrated into many counties and even acquired a footing in many important districts, be suppressed by the casual severity and optional laxity of ignorant farriers.

The true mode of eradication is *cure*. It is true that medical science is still imperfect in its treatment of these diseases. But there has been no necessity to make it perfect. Scientific men do not frequent the pastures of South-Eastern Europe, and they have no occasion, and, indeed, no opportunity, to treat the cattle there. They cure rich men in cities; not poor cattle in prairies. There has been no motive to study this disease, and, therefore, it has not been studied. The adjacent countries have met its inroads by methods of prohibition, and, being ruled by despotic Governments, and having only a sparse and obedient population, they have in some degree succeeded; there has never been a real application of English science to cure this malady. Mr Caird, one of the best authorities on the subject, says that in Holland 73 per cent. are cured, and every presumption indicates that a little experience will reduce this unknown, and therefore terrific malady, within ascertained limits and acknowledged principles.

Digitized by Google

The great preliminary is to be sure that there is no other expedient than cure; then perhaps we shall cure, before that we certainly shall not. Let Government offer prizes for the best cure. Prohibiting cattle locomotion is impracticable and barbarous; it won't be done, and it can't be done. Relying on the ignorant inspection and arbitrary slaughter of country farriers is equally treacherous; they will not do what you want, and they cannot do what you want. If commerce brought us this disease, commerce may do it again. Whatever may have happened in this case, in the long run commerce is sure to transmit the maladies and transmit the blessings of the civilised world. Trade is the contagion of civilisation; it touches what it likes, and it carries with it what it likes; all we can do is to apply the science of civilisation to remedy its evils. Let us try to cure the cattle plague, for perhaps we shall always have it; and certainly we shall be always liable to have it, even if for a time we escape it.

CONDITIONS AND PROSPECTS OF COTTON.

THE cotton market has for some time been, and still continues, in a most feverish and uncomfortable state. The fluctuations of price have been so rapid and excessive as to entail ruinous losses on many, and great perplexity on all. Between January and March there was a fall of about 50 per cent., implying a loss of from 20*l* to 25*l* a bale; while between the middle of April and the middle of October there was an advance of 100 per cent. in Surat and 70 per cent. in other sorts. Within the course of twelve months we have seen the following changes in selling values:—

	Middling Orleans. per lb d		Fair Egyptian. per lb d		Fair Surat. per lb d
November, 1864.....	27½	.....	28½	.....	20
April, 1865.....	13½	.....	18	.....	10
November, 1865.....	20	.....	21	.....	16½

These fluctuations are very grievous things, and people are naturally asking with great anxiety how long they are to continue, and what direction they are likely to take in future.

In the beginning of the year (January 21) we ventured on an estimate of the supply and consumption of the coming year, on the assumption—then entertained by nearly every one—of the indefinite prolongation of the American war, and the consequent unavailability of the American crop. The British consumption we calculated at 40,000 bales a week: *it has proved to be up to this date* 39,500. We pointed out the reasons which led us to regard the anticipations of a greatly increased supply from India as unlikely to be realised, and what portions of the supply from other quarters must be looked upon as precarious. On April 15, when it appeared almost certain that the war between the Federals and Confederates was drawing to a close, and that whatever accumulations of cotton might exist in the South would therefore be liberated and in time forwarded to our markets, and when, in the prospect of such arrivals, prices fell rapidly and largely, we expressed our conviction that the reduced supply from the East, consequent upon these circumstances, would in all likelihood far more than counterbalance the increased receipts from the States, and that we might even be threatened with another cotton famine. *All our prognostics have been realised.* China and Japan have ceased their exports and have begun even to divert the supplies from Madras and Bengal; while Bombay, alarmed at the tremendous fall of price, has sent us far less than even *we* were disposed to expect; and the arrivals from America are still scanty, and very disappointing to those who believed in the existence of large stocks in the interior and who anticipated heavy imports. We place side by side our estimate of January last with what it now appears will be the receipts of the year from the several sources of supply.

	Estimate in January. bales.		Actual supply. * bales.
America	150,000	.....	350,000
Egypt	300,000	.....	340,000
Brazil	250,000	.....	300,000
India	1,500,000	.....	1,200,000
Peru, &c.....	100,000	.....	110,000
Turkey	100,000	.....	75,000
China and Japan	500,000	.....	150,000
	2,900,000	.....	2,525 000

* Calculated from the 10 months already known, and the probable arrivals in November and December.

Thus, in consequence of the derangement caused by the termination of the war and the ensuing fall of prices, we shall have received 300,000 bales less from India and 350,000 less from China and Japan than was calculated at the beginning of the year;—while to set against this deficiency we receive only 200,000 more than we calculated from America. As, however, the American bales are much heavier than the Chinese and somewhat heavier than the Indian ones, the aggregate supply in pounds weight will not be so short of our estimate as it appears to be when stated in bales. It will be 867,000,000 lbs, instead of 988,900,000 lbs.

Our readers—our Liverpool readers more especially—will do us the honour of remembering the earnestness with which, during the depression of last April, we wrote to warn them not only that there was nothing to warrant the panic then prevailing, but that it was certain to produce a violent reaction and likely to cause something like an actual renewed scarcity of cotton in 1866. We pointed out that we possessed no trustworthy information as to the quantity of cotton, the remains of former crops, stored in the interior of the Southern States; that in the face of the various and widely divergent *guesses* that were put forward (for they were nothing more), it would not be safe to base practical action on any estimate which placed this residuum much higher than a million of bales; that the last crop planted was notoriously and unprecedentedly small—as in the confusion and disturbance then prevailing was sure to be the case; that no large quantities *could* come forward till the autumn of 1866—that is, till the first crop planted *after the re-establishment of peace* had been gathered in; and that even that crop must be a scanty one when compared with the yield of 1859, 1860, and 1861. We suggested that it was by no means improbable that, even when cotton did once again begin to come forward from the United States, it would come with the price enhanced by a considerable export duty, and that under any circumstances we could never expect that it would be produced at the same low rates as formerly—at least not for years to come. As a result of all these considerations, it seemed reasonable to expect that, though the extravagant prices of the last two years could not be maintained, the value of cotton would for some time remain high enough to repay producers both in India and Egypt, and perhaps in other countries also, for sending us as much as they could grow without the derangement of their ordinary industry or the abandonment of their staples. Much mischief, not easily reparable, had however been wrought by the sudden fall which took place in March;—India producers were disheartened; China ceased to sell and began to buy; manufacturers, tempted by the unusually low prices, increased their purchases; the drop checked production and stimulated consumption; a rapid reaction, and on the whole a steady one, set in; till now prices are only about 20 per cent. below their highest point; manufacturers are perplexed and endangered, and a recurrence to short time seems imminent. Every one is anxious to know what lies before him.

We have stated repeatedly, what indeed is obvious enough, that until industry and production in the Southern States of the Union shall be once more *settled*, there can be no *certainty* nor much comfort for either spinners or importers. Till we know how much cotton America will send us, and at what prices under the altered state of affairs she can produce it, neither Egypt nor India will be in a position to determine to what degree they can safely or profitably extend their cultivation of the article; nor will manufacturers know what prices to ask for their fabrics. America must always determine and rule the cotton market; and the question for consideration, therefore, now is what are the prospects of her cotton cultivation in the immediate and ensuing future. What *stock* has she now on hand? What quantity will she be able to grow the next year or two? And how rapidly will she be able to recover her old rate of production?

As to the first point, even parties on the spot appear to have given up the attempt to form any decided judgment. All that can be said is that cotton is coming forward to the ports faster than many persons expected; that the rivers are still low, and the railways, though repaired, still only half re-organised; yet that notwithstanding these obstacles to transmission, 255,000 bales reached the ports between Sept. 1 and Oct. 25. Probably, the old estimate of 1,000,000 to 1,500,000 is as good as any other; and is not, at all events, likely to be exceeded. The present crop is described as wretched: some calculating it at 750,000 bales; some as low as 350,000.

With respect to the second point, we adhere to the opinion

Digitized by Google

we have always expressed, that cotton will continue to be the main production of the Southern States; that they will return to it as speedily and push it as extensively as they can. Those who bear in mind that under the old *régime* it was, at 5d a lb in Liverpool, the most paying and the favourite crop of those districts, may estimate the inducement to recur to it which will have been afforded by such figures as 28d—or even 14d. Of course, it will not be produced under freedom as cheaply as under slavery; it is probable even that an average price of 6d or 7d for middling may be needed instead of 4d or 5d; but no prices that appear likely for years to come will be inadequate to stimulate the Americans to *grow all they can*. How much can they grow? That is the question. Before the war the rough and usually pretty accurate calculation was a bale per negro:—that is, that 4,000,000 blacks *in all* (not merely those on the plantations) gave about 4,000,000 bales of cotton for each crop. We apprehend that after making allowance for the terrible mortality which has prevailed among the negroes and the numbers who have left the country, scarcely more than 3,000,000 could now be found;—of these we must suppose far fewer than formerly will be induced or compelled (indirectly) to work on cotton plantations; and of these we can scarcely, on the most sanguine calculation, suppose that two-thirds can be organised again into the habits and arrangements of regular industry in time for the crop that must be planted in February next. Is it then reasonable to believe that the crop of 1866-7—that which begins to be gathered in September, and reaches us in driblets towards December—can exceed, even if it reaches, 2,000,000 bales? Scarcely we think.

After next year we entertain little doubt that the increase of the crop will go on at a very rapid rate. The most remarkable feature of the American people is their wonderful power of speedy *recovery* from the greatest disasters and the direst confusion. Reconstructions, which would take any other nation five years, they manage to effect in two. *How* the negroes will be "regimented," as Mr Carlyle calls it, into industrial gangs or squadrons again, does not seem clear. That in some way or other they *will* be so "regimented"—and either induced to work, or "persuaded" to work, we entertain little doubt. The belief appears to be general that they *will* work; that they will grow cotton as heretofore; that they will be "supplemented" both by machinery and white labour in a fashion quite unprecedented before the war; and that, in a period of time the shortness of which will astonish the slow minds of Europe—say in four or five years—the old staple production of the South will have resumed its old dimensions.

Our conclusion on the whole, therefore, is that the quantity of cotton we shall receive from the States during the next twelve months will be by no means large; that the crop of 1866-7 cannot exceed and will perhaps not reach one-half of the amount usual before the war; but that from that period we must expect a rapid and continuous annual increase of supply. There will be time enough for both India and Egypt to reap vast profits on the cotton they may send us forward next year, and time enough also for them gradually, after that date, to reduce their production within such moderate and normal limits as the demand for their special qualities shall show to be needed. We have no idea of middling Orleans falling below 8d,—or fair Egyptian below 9d—or fair Surat below 5d—for an indefinite period; and a very considerable time must elapse, we apprehend, before they even approach these prices. But that the prices of to-day are warranted by any thing except the dread of an immediate though very temporary scarcity, we cannot believe.

THE INSURRECTION IN JAMAICA.

There is up a certain point a striking analogy between the insurrection in Jamaica and the Fenian movement. In each case the persons engaged in the plot were, with one or two exceptions, men of no standing, of little education, and of very slender resources. In each the leaders relied upon the poverty and misery of certain classes and their rooted distrust of the law to furnish the stimulus to insurrection, and in each they proposed to divide the land as the legitimate spoil of victory. In Jamaica, too, as in Ireland, a few of the leaders entertained plans of murder, and there is some evidence—not much in either case, but still some—that entire classes had been marked out for massacre. Finally, there was in the grievances of each an element of vagueness rarely discovered among men irritated enough to threaten insurrection. It is very difficult in Ireland to discover the precise complaints of the Fenians further than that they have to pay rent, that they receive too little wages, and that they are governed by men of another race; and in Jamaica also these are the only tangible subjects of complaint. There, however, the analogy ends. The Fenian movement was arrested in time, the negro insurrection was not. It might have been, as it was not intended to break out till Christmas, but Paul Bogle, the "Stephens" of the negro Fenians, was a man of action, and hurled the parish of St Thomás into a revolt before the rest were ready. The injudicious severity of the Custos or unpaid Prefect of the parish—a parish in Jamaica is the equivalent in size of an English county—set the accumulated fuel on fire. He ordered a small body of volunteers to fire from the Court house on a mob of blacks who were threatening vengeance for some arrests, and the fire produced one of those mad bursts of fury which with Asiatics and Africans supply the place of anger among Northerns, and the inmates of the Court house were all put to death with the exception of a doctor. The negroes round the neighbouring plantations then rose, and attacked the whites, who fled in a panic, suggested as much by the history of Jamaica as by the visible facts, towards the towns. Many of them, it seems probable, were put to death,—though distinctions were drawn, one gentleman escaping because he had been only two months in the island,—and many more of the quadroons, who are very obnoxious to the negroes from their social pride. It seems highly probable, from the imperfect information as yet received, that the slaughter was not directed against white men and brown men as races, but against such white men as owned land, and either white or brown men when acting as the landowners' agents, these latter in Jamaica, as in Ireland, being the objects of a bitter local hostility not always without reason. Some atrocities also were probably committed, black men in insurrection not being scrupulous, but it is probable that the stories of mutilation are either inventions or generalisations from a single instance, and it is certain that an order had been circulated to kill no women or children, and that the order was obeyed. The officials on the spot appear to have acted with a good deal of energy and a very great deal of severity, more energy than we should have expected and more severity than we quite like to believe. The few troops in the island, English and Krooman, were instantly under arms, the disaffected parishes were placed under martial law, the troops sent into those parishes, more troops summoned from Barbadoes, Halifax, and Nassau, the merchantmen directed to warn any men-of-war in their neighbourhood, and the whites of the district and of Kingston formed into volunteer corps. Every negro caught red-handed, and we greatly fear every negro strongly suspected, was tried by drum-head court martial, and the number of executions is variously estimated at from two to four hundred, a prodigious number in so limited a population as that of Eastern Jamaica. The active leader, Paul Bogle, was under trial when the news left, without a chance of escape, and another man, Mr Gordon, whom the colonists evidently hate as a leader of "revivalists," and a negro member of the Assembly as well as a promoter of insurrection, was already hanged. There must be hereafter an inquiry into the reasons of the severity displayed, and especially into the conduct of Colonel Hobbs; but the rebellion is plainly suppressed, and the only task remaining to Mr Cardwell is to prevent the recurrence of scenes so discreditable to the British name.

He will not, we fear, find it a very easy one. It is always difficult to form an opinion as to the reality of grievances existing in a colony many thousands of miles distant, among a people of a lower civilisation, and under circumstances which suggest little analogy in home life. When, however, the race is one over which philanthropists and politicians have for half a century made war, and each morsel of evidence affects the policy of a great country, and each act is discussed with the virulent perverseness excited by race feeling, the difficulty becomes almost insuperable. Nevertheless there are some few facts in Jamaica which can be proved almost to demonstration. First, that the immense majority of the population—thirty-two in every thirty-three—are exceedingly discontented, so discontented, that any change seems to them as if it would be a relief. Secondly, that the island does not advance either

Digitized by Google

in wealth, productiveness, or any department of civilisation. Thirdly, that these evils are not inherent either in soil, or race, or relation of employer to employed, as they are not found under the same conditions of soil, race, and employment in Barbadoes. Fourthly, that the system of government is not one under which the discontent can be removed, or the retrogression in any degree arrested. If these four points are conceded, and they are really beyond argument, it follows that unless some insuperable obstacle exists, a new and better form of local government ought to be devised.

It is not necessary, we imagine, to waste space in proving the first point. Black persons without bayonets do not hurl themselves upon white persons with bayonets without some cause and very serious cause of discontent, nor does a free population discuss schemes of murder and rapine without some reason real or imaginary. It may be imaginary like the grievance of the Sepoys or exaggerated like the irritation of the Fenians, but still it demands treatment, just as much as hypochondria in the individual patient, though in its manifestations unreal, demands treatment. The second fact is admitted, or rather urged, by all planters, all travellers, and the negroes themselves, and is demonstrable by statistics. The third is known to all who know the West Indies, and it is only the fourth upon which a few words are required. The governing power in Jamaica resides, and for two hundred years has resided, in an elective Assembly, created under a Royal Charter, and as independent as any Canadian or Australian Parliament. The members of this Assembly are forty-seven in number, and are elected by all classes alike if possessed of a freehold of 6*l* a year. This franchise would not include a great number, the negroes seldom owning land, but lest it should include too many the Assembly, soon after emancipation, passed a law compelling every voter to register himself every year, and pay a registration fee of ten shillings. This rule, which would check English voters, has almost stopped negro voting till the Assembly is almost entirely in the hands of persons who vote for the sake of retaining power. The majority are whites, with a few coloured members, and we believe two negroes, one of whom has just been hanged by Colonel Hobbs, and their capacity may be best estimated from Mr Trollope's masterly sketch of their proceedings. In capacity the Assembly is about equal—to put it at its highest—to a country vestry in a remote district, while in character it is much lower, its proceedings being characterised by selfishness, and it is greatly to be feared by venality. The greater planters will not enter it, the negroes detest it, and it has since emancipation raised the tariff to an enormous height, rendered the colony almost insolvent, and completely neglected education, public works, and the administration of justice. In particular it has left the administration of justice to the custodes and justices of the peace, the former of whom are appointed for life, but unpaid, while the latter have interests strongly opposed to those of the population among whom they have to carry out the law. It seems clear, alike from its constitution, from the contempt in which it is held, from the accounts of travellers, and from the reluctance of the best whites to enter it, that this Assembly is not an efficient governing body, but there is no other. If the island were independent another would be created in a month by a revolution, but English authority is too strong for that, and the population look for redress to the Crown, which cannot legally interfere. Even an Act of Parliament must have the sanction of the local Assembly before it is law, and no taxes can be raised without its authority. No change of Government can, therefore, be made except by the Assembly, which is incompetent to make any such as are required, and affairs therefore must, if strict legality is preserved, go on from bad to worse. The case, however, would seem to be one of those in which the strict legal rules ought not to be observed. The great planters and the negroes alike disliking the Assembly, it may be quite possible to persuade the members—a great number of whom are placeholders—to vote the suspension of the Constitution for a period of five years, leaving the Queen's Representative during that period to make the best laws he can. He is sure, having no interests in any other direction, to be at all events fair, and will probably, if a man of energy, devise some endurable system of land tenure, parcel out waste land justly, and construct necessary roads. He is nearly sure also to be popular, for the better whites are tired of the Assembly, while the negroes believe so entirely in the Queen's Government, that these very insurgents proposed, after dividing all the lands, to send a delegation to London to obtain Her Majesty's sanction to the arrangement. Instead of looking to a local Assembly, he would look to the Colonial Office, and, being independent, take some pride in the prosperity of the island and the content of its population. Should the Assembly finally refuse, then it will be questionable whether the time would not have arrived for extra legal measures, whether the Colonial Minister, for example, might not be justified in informing the Assembly that he deems a temporary dictatorship necessary, and that if it is not established he must increase the garrison of the island, and impose the cost of the troops upon the island revenue. as has just been done in Ceylon. Clearly this country cannot be at the expense of constantly repressing insurrections caused by mismanagement over which it has no control. The Assembly would not like that menace; and pressed, as it would be, by the "aristocracy" and the population, its consent might, we should imagine, be obtained. If not, and Parliament declines for the sake of the Anglo-Saxon colonies to assert its omnipotence, we see no prospect for Jamaica except increased discontent, diminished revenue, and greater necessity for military garrisons.

SIR MORTON PETO ON AMERICA.

Sir Morton Peto's speech at Bristol last Thursday bears important testimony to the astonishing prosperity and almost undiminished elasticity of the Northern States of America, under the enormous burden which, as it seemed to us, has been imposed upon its resources in the last few years. Nothing can be more clear than that those who predicted before the war, that the North must win by the sheer economical superiority of free labour, even more than by the numerical superiority of larger population, have had their prediction still more wonderfully verified than they themselves expected. The South was much more utterly exhausted, and the North much further from even the verge of exhaustion than we had any idea of, when the end came. There are not very many points on which the testimony of a traveller passing rapidly through a great country like America is worth very much, for he sees, of course, only a very small specimen of the society of any given town or State, and what he gathers in conversation is, therefore, necessarily gathered from too limited an experience to be of any great value. But there are a few specific points on which an intelligent man of business, who knows the language and modes of thought of men of business, is entitled to considerable respect, and amongst these is, we think, the tone of feeling in that society on which ultimately the solvency of the Union depends with regard to sustaining the national credit and good faith about the debt. "No person," says Sir Morton Peto, "who has the least information on the "subject can doubt the ability of the Americans to "pay their national debt, and any one who expressed "a doubt of their willingness to do so would be treated "with merited contempt." On such a point as this Sir Morton Peto's impression is worth a good deal. The ability to pay the debt being granted,—and this few doubt,—that state of the social mind to which voluntary repudiation is an *impossibility*, cannot well be mistaken by a shrewd man of business, and Sir Morton Peto seems to feel no kind of doubt that such is the state of the social mind in all those Northern States which he has recently visited.

Moreover, Sir Morton Peto has seen not only what convinced him that America need not, and would not, disclaim her obligations, but also what has convinced him that she will have very little difficulty in discharging her obligations. He has seen, in short, that the war, even while it lasted, did not visibly diminish the resources of the Free States engaged in it, or produce that disposition to postpone every costly municipal improvement and curtail every list of voluntary subscriptions which a war of much less magnitude would certainly have produced in England. In Boston, Sir Morton Peto found that no less than five millions sterling had been spent in improvements since the beginning of the war. And he related a fact which tells even more strongly on the condition of the North, for sometimes (as was the case recently in Lancashire) municipal improvements may be undertaken on loans raised to aid the people in their poverty, while voluntary subscriptions are never very easily raised in a time of great pressure. Sir Morton Peto says that in four days' time Mr George Court Stewart raised no less than

Digitized by Google

92,000*l* sterling in Boston, New York, and Philadelphia for a society whose object was to provide the wounded and dying men before Petersburg with religious aid. These are but slight indices, but slight indices will often tell more of the real wealth of a people than the legislative discussions on tax bills and expenditure, which are so much influenced by political considerations. The truth is, we have absolutely *no idea* in England of the wealth of a population whose average means are probably over 100*l* a year for every family in the land. With a very wealthy upper class and a very comfortable middle class, we are yet quite unable to realise the condition of a people, the great masses of whose labourers are all as comfortable as our best paid operatives in Manchester. It is the enormous multiplication of small but adequate resources in the United States which has produced that wonderful financial elasticity we are almost unable to understand. Sir Morton Peto gives us a still more striking illustration of this in describing the cheerfulness with which disbanded officers had returned from the field to their old civil duties. In a compositor's office Sir Morton Peto saw "a major, a captain, a lieutenant, a serjeant," all cheerfully at work at their types; indeed their places had been waiting for them. Instead of the labour market being drugged by the disbanding of nearly *a million men*, productive occupations had all been waiting, with plenty of capital behind them, to spring into still greater life and energy so soon as the labour should be again at their disposal. We happen to know another still more remarkable illustration of the abundance of civilian work, and the preference of the men for it. Towards the end of the war, a reserve corps was formed expressly as a sort of reward for the men who had conducted themselves most gallantly. It became a question whether this corps should or should not be disbanded. The Government wished to reduce expenditure and get rid of it, but hesitated, as it was composed of men who had done great service and been placed in it expressly as a mode of giving them a permanent reward for that service. The officers decidedly objected to being disbanded, and some of the military authorities rather wished to keep up the corps. But the matter was decided by the universal *demand* of the men that they should be disbanded. They said they wanted no reward of this kind, nor any pension, "that they could do "much better for themselves" than the Government could do for them, and by their own urgency decided the case in favour of disbanding.

Sir Morton Peto's information on the state and temper of the South, and the probability of getting good work out of the negroes without any infringements of their rights, is cerainly less important than what he tells us of the state of the North, as it depends upon a few individual sources of information which, though doubtless trustworthy, tell us absolutely nothing of the *extent* to which the dispositions described actually prevail in the South. Still, so far as his information goes, it is interesting, and shows that the cases in which the planters have accepted the abolition of slavery most frankly are also the cases in which they are least likely to suffer. "I wrote," says Sir Morton Peto, "to a friend whom I know very well, asking him, a "Southern man, what his views on this question were. I "will read you his answer:—'Born in Louisiana on my "'father's sugar plantation near New Orleans, I have known "'slavery in all its phases, though I have had no connection "'with it for twelve years. Two years ago, after the eman-"'cipation of the slaves, one of my father's plantations in "'Louisiana came into my hands. There were 150 negroes "'on the plantation. From that day to this I have not "'heard an instance of difficulty among the workmen. The "'gentleman who leased the property for a series of years is "'a Southerner, and was a very ardent Secessionist. He is "'also a truly Christian man; he writes me that he has "'had no difficulty with his workmen that was not "'very easily arranged by conversation. They have been "'paid regularly every month their full wages; their chil-"'dren go to school; and the work of the plantation "'goes on with greater alacrity than when the negroes were "'slaves. The same may be said of several plantations in "'the neighbourhood, where the workmen are regularly paid "'and kindly treated. I have no fears for the future of the "'freed men unless they are driven by harsh laws to array "'themselves against the whites, and if the South produces "'less in the future than she has done in the past, it will be "'because she does not legislate wisely. The barrenness of "'Jamaica is due to the harsh legislation which drove the "'negroes from their plantation to the mountain patches, "'where what they produced was their own.' But I have "not only my friend's evidence, I have more. I will mention "one fact, and as in cases of this kind it is desirable that facts "should be verified, I will say that it refers to Colonel Drury, "who was one of the foremost men of the South. On the "day that Lee surrendered he called together 1,000 slaves, "and said to them—'You all know that I have done my "'best to keep you as slaves, but you are now freemen. If "'you will continue to work for me I will give you as high "'wages as any one else. I will put your children to school, "'and do what I can to make you comfortable.' I have "reason to know that only three out of the 1,000 left Colonel "Drury."

We fear that these instances of complete and humane acquiescence in the system of free labour are comparatively rare, but we may hope that they are more common in the South than in our own West India islands after emancipation. One of the most curious modifications effected in our character by the transfer of the Anglo-Saxon race to the American continent is a certain wonderful flexibility and adaptability to new circumstances, even in cases certain to rouse the temper and excite the obstinacy of Englishmen. It is a most useful modification of character for the pioneers of civilisation in a new world, and though it is probably less true of the Southern character than of the Northern, we may hope it is sufficiently true of it to prevent the fearful blunders of which British planters were guilty in Jamaica.

Foreign Correspondence

(FROM OUR OWN CORRESPONDENT.)

PARIS, Friday.

The *Moniteur* has published the following return of the Bank of France, made up to the 16th inst. The return for the previous week is added:—

DEBTOR.	Nov. 16, 1865. f	c		Nov. 9, 1865. f	c
Capital of the bank	182,500,000	0	.....	182,500,000	0
Profits, in addition to capital	7,044,776	2	.....	7,044,776	2
Reserve of the bank and branches	22,105,750	14	.....	22,105,750	14
New reserve	4,000,000	0	.....	4,000,000	0
Notes in circulation and at the branches	879,420,775	0	.....	875,073,825	0
Drafts drawn by the bank on the branches of the bank payable in Paris or in the provinces	7,731,925	93	.....	7,835,709	26
Treasury account	110,251,419	46	.....	124,837,499	65

	1,395.799,890	35	.....	1,421,090,295	4

Compared with last week, the Bank return of to-day shows an increase of 4,347,000f in the notes in circulation; and a decline in all the other principal items, that of discounts being 13,437,000f, of deposits 14,837,000f, and of coin and bullion 12,647,000f.

The Bourse has been somewhat depressed during the week. But a better spirit has been manifested to-day in consequence of the reduction in the army decreed by the Government, which will not only enable savings to be effected but is a guarantee of peace. Prices have consequently improved compared with those of yesterday, but the advance has not been so great as was expected. The operation of converting the 1864 Mexican loan, which was undertaken by the Comptoir d'Escompte, has been brought to a close, and has obtained all the success counted on. The following are the quotations of the week:—

	Nov. 9. f	c		Nov. 16. f	c

The Comptoir d'Escompte of Paris has undertaken another great operation—the raising of a loan of about 80,000,000 florins for Austria. Associated with the Comptoir are several important continental houses,—Messrs Fould and Co., Messrs Hottinguer and Co., Messrs Pillet, Will, and Co., Messrs Marcuard, André, and Co., Messrs Hentsch, Lutscher, and Co., &c., &c. The Austrian Credit Foncier, which is chiefly in French hands, is also interested in the affair. One or more London houses will likewise take part in it, but the Comptoir up to the present moment has not, I believe, decided which of them shall be accepted. Messrs Baring have been mentioned, but, as I have reason for believing, erroneously. The loan will be offered almost immediately for public subscription at Paris, London, Frankfort, and Amsterdam. It is to be in 500 franc bonds, bearing 5 per cent. interest, reimbursable in 37 years. The bonds will probably be issued at 345f, but the precise figure has not yet been definitively settled. The Austrian Government was for some time in negotiation with Baron James de Rothschild about this loan, and it was not doubted that he would contract for it. But as the Baron wanted, for the South Austrian and Lombard Railway Company, a prolongation of the period for which it is to be exempted from certain taxes, and as the Austrian Government seemed reluctant to make such a concession, the negotiations were broken off.

This will be a memorable day in the career of M. Fould, the Minister of Finance. The *Moniteur* contains a decree of the Emperor ordering a sweeping reduction in the effective of the army, and it is to His Excellency that it is owing. The public knew that he had represented to the Emperor, for perhaps the hundreth time, that economies were absolutely necessary, but they also knew or at least had reason to believe that he was opposed by the majority of his colleagues,—some protesting energetically, others presenting *vis inertia*, and consequently only faint hopes of his success were entertained. It was, therefore, both with surprise and pleasure that the decree in this morning's *Moniteur* was read. The general impression appears to be that M. Fould, by the firmness he has displayed in obtaining it, has rendered a service to France which it will be difficult for her adequately to acknowledge. For not only is the cutting down of the army an immense thing in itself, but it will facilitate the lessening of expenditure in every other department of the State. On Europe also the Minister has conferred a vast benefit, as her "bloated armaments" were maintained solely because France was armed to the teeth, as if watching an opportunity of carrying slaughter, pillage, and desolation among her peaceful neighbours, so now that France brings down her army to reasonable limits, Italy, Prussia, Austria, Russia, and other States can largely reduce theirs, and England can spend less in plated ships and in fortifications.

The decree orders the suppression of two companies in each of the hundred regiments of infantry; of a squadron in every regiment of cuirassiers, dragoons, and lancers; of four batteries in each of the four regiments of foot artillery; of a battery in each regiment of horse artillery, &c., &c. In addition, the regiments of infantry of the Imperial Guard are to be reduced to three battalions of seven companies; that of gendarmerie to two battalions of six companies; whilst a squadron in each regiment of cavalry and two batteries in the regiment of horse artillery, also the divisions of foot artillery and engineers, are to be suppressed, &c. These measures will cause a reduction of about 25,000 men and 4,500 horses in the infantry and cavalry; what it will be in the artillery is not exactly known.

The Superior Council of Commerce is continuing to display much activity in the inquiry respecting banks and currency; and, the public is continuing to complain that no detailed reports of the depositions are given. A portion of what M. Pinard, President of the Comptoir d'Escompte, said, has, to be sure, been printed; but I am told that it contains many inaccuracies, and besides, a fragment cannot give a correct idea of the whole. I may notice, however, that M. Pinard did not take a very hopeful view of the introduction of cheques into France. "It must be admitted," said he, "that in this country the bank note is the veritable instrument of circulation. All other modes of payment, such as cheques, transfers, &c., are very little in use, and are even completely unknown in certain parts of France. Our people will with difficulty be persuaded to adopt the system which prevails in England." He pronounced against plurality of banks of issue. "They would," he said, "present more inconveniences than advantages. If they followed faithfully the principles of the Bank, discounting only on three signatures, and issuing notes only on conditions of complete security, they would render exactly the same services as the branches of the Bank; if, on the contrary, they quitted her path of prudence, they would become dangerous, and would cause commercial catastrophes. No doubt by competition they might produce a lowering of the rate of discount, but that would be excessive, would carry credit beyond reasonable limits, and a reaction would soon arise." He considered the Bank of France one of the most complete establishments that exist, but thought it capable of improvement. If, for example, its capital were employed in good bills bearing three or four signatures on London or Amsterdam, it would always be certain to be paid integrally, whereas when its capital is invested, as now, in Government stock, it is liable to sustain loss by selling at a given moment; besides which, in the former case the Bank would get back a sum which had gone abroad, whereas in the latter it would only get notes, which would not add to its active resources. He thought, too, that the Bank ought to be made to purchase the precious metals as the Bank of England is, and that it should cease to make advances on deposits of securities, with, however, the exception of accepting in the seaports bills of lading as security for bills discounted. But these are only some of the points touched on by M. Pinard, and it will be necessary to return to his deposition.

Of the opinions expressed by Baron James de Rothschild before the Council the public yet knows nothing, though naturally they were of the highest importance; and of those of M. Emile Pereire, all that is known is that they were in accordance with the views he has all his life entertained. Baron d'Audiffrel, President of the Credit Industriel, whilst expressing the conviction that the bases of credit were well organised in France, suggested that it might be desirable to substitute for the branches of the Bank establishments less dependent on it, and not obliged to follow all its movements. M. Gouin declared against more than one bank of issue, thought that the Bank did well to invest its capital in *rente*, instead of employing it in operations, because it was a guarantee, and said that there are no means of fixing the rate of interest. M. Garnier Pages, who was in 1848 Minister of Finance, was in favour of one bank of issue, thought that the capital of the Bank ought to be gradually employed in purchasing bullion as a reserve for a crisis, and said that in moments of difficulty he should prefer declaring a forced currency to raising the rate of discount. M. Horn, the well-known economist, declared decidedly for the liberty of banks (meaning thereby the liberty of issue), and consequently against the monopoly of the Bank of France; and in support of that doctrine he dwelt on the advantages which the free banks of Scotland have produced to the country; or the success which the eight provincial banks in Prussia gain by the side of the great national bank; and on the manner in which the departmental banks in France worked previous to 1848. In contrast with this he noticed the financial and monetary embarrassments which are, so to speak, the normal state of Austria and Russia, each with only one bank of issue; and to show that one bank is not able to do all the issuing business of a country, he drew attention to the fact that though under the law passed eight years ago for prolonging the privilege of the Bank of France that establishment is expected to set up, before 1867, a branch in each of the 89 departments into which France is divided, there are at present 38 departments, containing a third of the population of the country, and being 44 per cent. of the superficies, which are without any. In case, however, liberty of banks should not appear to the Council the best solution possible, even though the banks should be subjected to strict regulations as regards issues, M. Horn submitted that the Bank of France ought to be required to effect various reforms; and among them he indicated—1, the mobilisation of its capital by the sale of its *rente*, which he said would enable it, in times of difficulty, to make 200,000,000f additional discounts before raising its rate of interest; 2, to abstain from making advances on deposits of securities, the said advances being generally required for Bourse speculations, and to employ its resources exclusively, or nearly so, in discounts; 3, not to require as a rigorous rule three signatures to bills, experience proving that two are sufficient, inasmuch as the Comptoir d'Escompe from 1848 to 1863 discounted to the amount of 9,000,000,000f (360,000,000*l*) on two signatures with a loss of only 1f per 10,000f; 4, that the Bank should be made to fulfil the obligation of establishing a bank in each department; and 5, that its directory and general meetings should be made more democratic. Finally, on the subject of rendering the rate of discount invariable, or of fixing a maximum to it, M. Horn declared that he did not think either measure desirable, or indeed practicable.

The Bank of France has published a notification that for fraudulent purposes certain persons have cut several 1,000f notes in two, and have by means of pieces of paper pasted on the back joined two odd halves. The Bank describes the appearance the notes pre

Digitized by Google

sent after the junction; warns the public against taking them; and requests the persons who happen to hold any, to present them to the Bank forthwith. From the terms in which the notice is drawn up, it does not appear what is the sort of fraud committed, two halves forming only 1,000f as each note did before it was cut.

Reports have for some days been current that an eminent Spanish speculator is in embarrassment; but they have not been confirmed, neither on the other hand have they been contradicted.

The conversion of the Ottoman debt has not obtained the success what its promoters anticipated, and in consequence a notification has been issued that the sort of penalty imposed on the bonds not presented within the time specified will not be enforced, and that, besides, the period for converting, which had expired, is extended to the 31st December.

Several newspapers put the public on their guard against a singular Bourse speculation. An advertisement appeared in the newspapers offering to pay for the loan for a given period of bonds of the South Austrian and Lombard Railway, French *rente* to be deposited as guarantee for the loan, and it appears that the object was to obtain a fall in such bonds on the Bourse by selling largely and offering to deliver at once, whereby a panic would be created, then to buy up at a low rate, and return the borrowed bonds, retaining those purchased for sale at a better amount. Bondholders would thus have been unwittingly made the instruments for effecting a temporary depreciation in their property.

A company for the construction of a small railway from Vitre, near Rennes, on the Western, to the town of Fougeres, has been formed. Its capital is 1,800,000f, of which 1,100,000f have been promised in the locality, and the public are requested to subscribe the rest.

The Orleans Railway Company announces the payment of 25f on the 1842 4 per cent. bonds (second series), and on those of 1848, and of 7f 50c on the Orleans and Grand Central 3 per cent. bonds.

An official report just published shows that the total operations of the colonial banks from 1st July, 1863, to 30th June, 1864, amounted to 84,474,382f, which was 2,631,635f more than those of the year preceding; and the dividends earned were rather more than 7 per cent. by the Bank of Martinique, 10½ by that of Guadaloupe, nearly 12 Reunion, 21 Guiana, 7½ Senegal. With the exception of Martinique, all were somewhat greater than in 1862-3. Why the report was not published earlier is not stated. That for 1864-5 will certainly be less favourable, at least for the West India islands.

The market report is annexed:—

FLOUR.—At *Paris*, yesterday, the quotation was—choice, 53f the sack of 157 kilogs; first marks, 52f; good, 51f; other sorts, 49f to 50f; six marks disposable, 52f; current month, 52f 25c; December, 52f 50c. Type Paris, the 101 kilogs, 32f 50c.

WHEAT.—At *Paris*, yesterday, sales were only possible with a reduction of 50c in prices. Choice white accordingly was 28f to 28f 50c the sack of 120 kilogs; choice red, 27f 50c to 28f.

COTTON.—The market at *Havre* in the week ending Friday was again calm, and prices again fell. The sales were 5,471 bales, and the arrivals 3,581. The closing quotations, compared with those of the preceding week, were 12f lower for the United States and Brazil; 10f lower for Egypt, Peru, Surinam, Cayenne, Cumana, Carthagena, Porto Rico, Hayti, and Bengal; 5f lower for Martinique, Guadaloupe, Surat, Kurrachee, Tinnevelly, Madras, Coconada, and China. Low New Orleans was consequently 265f; good ordinary in Broach, 215f; in Tinnevelly and Madras, 215f; in China, 210f; and in Jumel, 270f. This week, the market has been very quiet, and yesterday New Orleans was 260f down to 240f; sawginned, 220f; Oomrawuttee, 207f 50c and 187f 50c; Madras, for delivery in February, 175f; China, 195f.

COFFEE.—At *Havre*, in the week ending Friday, the demand was regular and prices firm. 4,175 sacks Port-au-Prine, part at 78f 25c to 80f 50c the 50 kilogs in bond, the rest at 82f to 84f; 1,675 Cape, 85f; 2,100 Gonaives, 85f 50c to 87f; 1,600 Rio, not washed, disposable, 65f to 88f; 1,775 ditto, for delivery, 76f to 83f 50c; 100 Bahia, 66f; 38 Cazengo, 86f; 1,250 Ceylon native, 87f 50c to 90f; and 189 Malabar triage, 55f. The arrivals were 800 sacks. This week, La Guayra, 90f to 93f; Hayti Cape, 85f; Bahia, 65f to 80f; Gonaives, 86f to 87f; Malabar, 89f 50c; Port-au-Prince, 84f 50c; San Thome, 79f; Rio, 75f 50c and 79f 50c. At *Bordeaux*, last week, upwards of 2,000 sacks La Guayra grage, 92f to 100f; 108 Santiago, 107f; 650 Mysore, 120f; 100 at 119f; 56 casks Santiago, 107f to 109f; 75 Rio, not washed, 87f 50c; some Guadaloupe habitant, 139f and 140f. The arrivals were unimportant. This week, Mysore, 120f; La Guayra non-grage, 91f and 91f 50c. At *Nantes*, last week, some lots of Reunion at 142f 50c to 152f 50c, and at prices not stated. This week, some damaged Manilla, Java, and Ceylon, by auction. At *Marseilles*, last week, 5,740 sacks Rio at 70f to 81f 75c; 114 Maracaibo, 80f; Rio, 75f. No sales this week.

SUGAR.—Little was done at *Havre* in the week ending Friday, and prices were lower: 176 casks French West India usine, 60f the 50 kilogs, duty paid; 149 casks Havana, 33f 25c, No. 12 in bond. The arrivals were 800 sacks native. This week, French West India, bonne quatrieme, 49f and 50f; usine, 54f and 55f; Havana, No. 12, 33f 25c and 32f 75c; Reunion, for delivery, 52f 25c. At *Bordeaux*, last week, some French West India, 50f 50c the 50 kilogs, bonne quatrieme, and usine, 55f to 62f 25c; 6,075 sacks Reunion, 53f 50c, bonne quatrieme; 334 gros grain to take at Nantes, 53f. This week no sales. At *Nantes*, last week, 400 sacks Reunion, 52f 50c, bonne quatrieme; some French West India, 48f and 49f, bonne quatrieme; usine, 49f 25c (inferior), and 59f 50c. This week, usine, 59f 50c and 56f. At *Marseilles*, last week, 500 casks French West India, 30f 50c, bonne quatrieme of Havre; 5,000 Pernambuco, at prices not stated; from 700 to 800 casks Havana, Spanish flag, 32f 50c, No. 12. This week, French West India, 30f 50c, bonne quatrieme of Havre.

INDIGO.—The sales at *Havre*, in the week ending Friday, were 6 chests Bengal, at 8f 40c the ½-kilog; 53 ditto, of which the greater part at 27c to 40c above the estimates. The arrivals were 14 chests. No sales this week. At *Bordeaux*, last week, 26 chests Bengal, at established prices; 38 Madras at irregular prices; 2 Kurpah, quotations not given. Nothing done this week.

HIDES.—The demand was not active at *Havre*, in the week ending Friday. 1,252 Buenos Ayres, dry, 100f to 102f 50c the 50 kilogs; 1,330 Monte Video salted saladeros, 60f 50c for ox, heavy, 47f 50c for cow; 1,030 Rio Grande salted ox, 50f to 54f; 190 Rio Janeiro salted cow, 39f; 1,000 Bahia drysalted, 57f; 117 Valparaiso salted ox, 47f. By auction, 100 Rio Grande salted ox, 52f 25c; 82 ox and cow, 43f 75c; 300 Valparaiso, damaged, 45f; 4,400 Buenos Ayres salted cow, 46f to 47f. The arrivals were about 14,500. This week, Buenos Ayres salted cow, 46f 50c: horse, 6f each; Monte Video salted cow, 47f; ox, 60f.

WOOL.—At *Havre*, in the week ending Friday, the demand for La Plata unwashed was rather animated, on account of news from Antwerp. 560 bales Buenos Ayres and Monte Video unwashed, 1f 72½c to 2f 60c the kilog; 99 Russia unwashed, 1f 75c; 22 bales La Plata sheepskin unwashed, 1f 30c (still-born lamb) to 1f 40c. The arrivals exceeded 600 bales. This week, Buenos Ayres unwashed, 2f.

TALLOW.—At *Havre*, in the week ending Friday, sales were not active, and prices declined: 50 pipes La Plata disposable or in the port 58f 50c the 50 kilogs, and 450 ditto, for delivery, 60f to 61f. The arrivals were 120 pipes from Monte Video. This week, La Plata, 59f. At *Paris*, yesterday, the 100 kilogs were 126f 70c.

SPIRITS.—At *Paris*, yesterday, 3-6, first quality, disposable, 45f the hectolitre. At *Bordeaux*, the day before yesterday, 3-6 Languedoc, 86 deg., 57f; beetroot, first quality, 90 deg., 57f.

Correspondence.

THE BOROUGH OF CAMBRIDGE.

TO THE EDITOR OF THE ECONOMIST.

SIR,—You will, perhaps, permit one, who has minute knowledge of the borough of Cambridge, to remark on an incidental statement about that borough in your article on Reform on the 4th of November. It is there said that, while a reduction of the franchise would be good in Birmingham, "in Cambridge it would tend to prevent the class which has already ideas of its own from getting for those ideas an honest representation."

Now, it so happens in Cambridge that, while the Conservatives obtain the Parliamentary representation by a small majority (35 at the last election), the Liberals always have a decided majority among the town councillors and aldermen through the operation of the town franchise.

A large class among the Parliamentary voters—indeed, the largest distinct class—is that of college servants. An analysis of the last poll shows that of college servants, 114 voted for the Conservatives, only 33 for the Liberals, and 22 remained neutral. Here, then, among the college servants was a majority of 81 for the Conservatives, while their majority in the total number polled (between 1,400 and 1,500) did not exceed 35. Influences similar to those used on college servants are brought to bear also on college tenants and college tradesmen.

The Report of the Cambridge Bribery Commission of 1853 proved that in a long series of elections there had been uninterruptedly extensive and systematic bribery by the Conservatives; and witnesses, thoroughly versed in the secrets of the Conservative party, stated that no election had ever been won, or ever would be won, by the Conservatives in Cambridge without bribery. The number usually bought was estimated at 100, more or less. It is matter of general statement and belief that from 80 to 100 were bribed at the last election. I do not wish or expect you to take this as a fact on my statement; but proved antecedents render it not improbable. Add a probable moderate number of bribed to the results of college influences, and I think you will agree with me that a reduction of the Parliamentary franchise may, as in the municipal elections, enable honest independent electors, who have ideas of their own, to obtain expression for them.

I write merely to state facts as to Cambridge. I do not object to your general argument. Every constituency has its peculiar circumstances, and I am one of those who think that a general inquiry by a commission should precede any measure of Parliamentary Reform.—Your obedient servant,

C.

Nov. 15, 1865.

COMMERCIAL AND MISCELLANEOUS NEWS.

The following observations from Messrs Dymes and Co.'s circular relate to the money market at Madras during the fortnight ending Oct. 13:—Money—The pressure noted in our last still continues, and without any prospect of abatement. The Bank of Madras has again raised its rate one per cent. all round, and as the demand for accommodation is, if anything, on the increase, a further advance seems probable. Present rates are 10 per cent. for loans on Government securities, and 12 per cent. for 3 months' date private bills. Madras Bank Shares—We have again to report a dull market for this stock. Early in the fortnight, a few transactions took place at 73 premium for the old stock and in the new at 70 premium. Latterly there has been no demand, and prices close at our quotations. Government paper s lower. We quote 5½ per Cents. 8½ to 9 premium; 5 per Cents., 3 to 3¼ premium; and 4 per Cents., 11½ to 12 discount. These securities

Digitized by Google

occupy but little attention at present. Exchange—Shipments of produce have been made with more than the usual celerity during the fortnight, in order to get ships away before the North-East monsoon, and in consequence the demand for accommodation at the exchange banks has been very great. Considerable transactions are reported at 2s 1 7-16d for 6 months' sight document bills, with credits attached, but a further advance, say to 2s 1½d, appears inevitable before the mail closes. First class agency and credit bills, at 6 months' sight, 2s 1¼d to 2s 1 5-16d. The banks' advertised drawing rate is unchanged at 2s 0⅞d for 6 months' sight bills. Sovereigns are worth rs 10s 3-9d for English, and rs 10-3-3 for Australians.

Messrs Sharp and Co., writing from Hong Kong, on the 27th of September, thus allude to the bullion movements during the preceding fortnight:—Gold.—The imports have been $480,000 value, against $520,000 of exports, including the shipments per Orissa, on the 11th instant, and excluding those to leave to-morrow. The demand has been good, and prices have slightly improved. Silver—Our supplies of bar silver and Sycee have been on a more liberal scale than for some time past, and these have been eagerly purchased for remittance to India; the receipts amount to $510,000 and the exports to $160,000. The steamers leaving to-morrow for Calcutta and Bombay will take some quantity. Dollar Currency—Arrivals, $2,600,000; shipments outward, $1,590,000. Defaced coin is fast disappearing, to be converted into rupees, and clean dollars have returned to us in large quantities from Shanghai: this fact may be rather significant, as affecting the introduction of the new coinage shortly to be issued by the Hong Kong mint. Discounts and Mortgages—7 to 8 per cent. is still the rate for first class securities. Mortgages stand at 10 per cent. Exchange has fluctuated but little during the mail, and the business especially in rupees has been very limited. Since the arrival of the Ganges this morning, however, rates have improved, and we close with an advance of 1 per cent. on last mail's quotations. Shares of all kinds have been quite neglected, and the transactions are unimportant. Closing Quotations:—On London, 6 months' sight, 4s 6d; on Calcutta, 3 days' sight, 219 rs; on Bombay, 3 days' sight, 219 rs; on Shanghai, 60 days' sight, bank, 73½ tls; on Singapore, 15 days' sight, private, par; on Foochow, 15 days' sight, 1 per cent. dis.; on Amoy, 15 days' sight, 1½ per cent. dis.; on Swatow, 15 days' sight, 1½ per cent. dis.; bar silver, 10¾ per cent. prem.; Sycee, 8¾ per cent. prem.; Mexicans, ¼ per cent. prem.; gold leaf, $22.80 per tael; sovereigns, Australian, $4.50 each; Chilian gold dollars (20 soles), $17.50 each; Hong Kong and Shanghai Banking Company shares, 7 per cent. prem.; Hong Kong and Whampoa Dock Company, 40 per cent. prem.; Union Dock Company, 2 per cent. prem; Hong Kong Gas Company, 30 per cent. prem.; Steamer Express, 35 per cent. dis.

The following is a statement of the business at the United States Assay Office at New York, for the month ending Oct. 30, 1865:—

	dols	c	dols	c
Deposits of Gold.				
Foreign coins	12,000	0		
Foreign bullion	5,000	0		
United States bullion	483,000	0		
			500,000	0
Deposits and Purchases of Silver.				
Foreign coins	14,000	0		
Foreign bullion	8,000	0		
United States bullion (contained in gold)	5,000	0		
United States bullion (old coins)	1,500	0		
United States bullion (Lake Superior)	500	0		
United States bullion (Nevada)	3,000	0		
			32,000	0
Total deposits payable in bars	300,000	0		
Ditto ditto coins	232,000	0		
			532,000	0
Gold bars stamped			292,439	26
Transmitted to U. S. mint, Philadelphia, for coinage			135,604	41

During the week ending Nov. 15, the imports of the precious metals were:—Gold, 341,039*l*; silver, 78,771*l*. The exports were:—Gold, 334,792*l*; silver, 450,555*l*.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the Gazette.)

An Account pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 14th day of November, 1865.

ISSUE DEPARTMENT.

	£		£
Notes issued	27,509,995	Government Debt	11,015,100
		Other Securities	3,634,900
		Gold Coin and Bullion	12,859,995
		Silver Bullion	...
	27,509,995		27,509,995

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	9,741,100
Rest	3,197,785	Other Securities	19,308,882
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	5,690,148	Notes	6,357,870
		Gold and Silver Coin	817,103
Other Deposits	12,275,016		
Seven Day and other Bills	509,006		
	36,224,955		36,224,955

THE OLD FORM

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	21,661,131	Securities	29,146,982
Public Deposits	5,690,148	Coin and Bullion	13,677,098
Private Deposits	12,275,016		
	39,626,295		42,824,080

Dated the 15th November 1865. W. MILLER, Chief Cashier.

The balance of Assets above Liabilities being 3,197,785*l*, as stated in the above account under the head Rest.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A decrease of Circulation of	£334,765
An increase of Public Deposits of	803,287
A decrease of Other Deposits of	873,770
A decrease of Government Securities of	4,999
A decrease of Other Securities of	762,032
An increase of Bullion of	270,821
An increase of Rest of	9,048
An increase of Reserve of	692,471

The above return is again favourable. Owing to the reduction in the other securities, a large increase has taken place in the reserve. The augmentation in the bullion also indicates a steady reflux of the coin lately withdrawn for internal circulation. The changes in the public and private deposits very nearly balance each other.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1855:—

At corresponding dates with the present week	1855.	1862.	1863.	1864.	1865.
	£	£	£	£	£
Circulation, including bank post bills	20,404,449	21,080,182	21,778,354	20,750,500	1,661,131
Public deposits	4 1.0,130	7,354,390	6,451,850	5,142,368	5,690,148
Other deposits	10.886,746	14,004,015	13,403,442	14,426,234	12,275,016
Government securities	10,124,848	11,113,992	10,810,330	10,734,542	9,741,100
Other securities	17,787,150	19,1.1 851	20,499,915	19,305,241	19,308,882
Reserve of notes & coin	5,840,994	9,502,241	6,972,132	8,307,970	7,174,973
Coin and bullion	11,263,224	15.164,571	13,4 9,602	13,852,355	13,677,098
Bank rate of discount	6 & 7 o c.	3 p. c.	6 p. c.	8 p. c.	7 p. c.
Price of Consols	88¾	92¼ xd	91⅝ xd	91	89½
Average price of wheat	80s 10d	49s 4d	39s 10d	38s 9d	45s 3d
Exchange on Paris (shrt)	25 27½ 32½	25 10 17½	25 27½ 35	25 17½ 25	25 12½ 22½
— Amsterdam ditto	11 17⅞ 18⅛	11 12⅛ 13	11 17 18	11 15 16	11 18⅛ 19
— Hamburg (3months)	13 9⅛ 10½	13 6¼ 6⅝	13 8⅛ 9	13 9 9½	13 9½ 10

In the corresponding week of 1855, continued uneasiness was felt at the unsatisfactory state of the relations between England and America, owing to the difficulties caused by the Russian war. The London money market was extremely stringent, and the exchanges were turning against this country.

In 1862, the bullion movement to the East was operating upon the discount market, both in London and Paris, and an advance to higher rates was expected in both cities. The advices from America announced the election of Mr Seymour, the Democratic candidate, to the Governorship of New York. General Burnside had succeeded General McClellan in the command of the army of the Potomac. Despatches had been published from the Russian Government, containing a virtual refusal to join in the intervention in America proposed by France.

In 1863, news had been received of the death of King Frederick VII. of Denmark, and Prince Christian had been proclaimed his successor. Prince Frederick of Augustenburg had issued a proclamation declaring that he assumed the Government of the Duchies, a claim recognised by the petty German State of Saxe-Coburg Gotha. In Italy, a general amnesty had been promulgated in the Neapolitan provinces. The Bank of Holland had raised the rate of discount from 4 to 5 per cent., and the National Bank of Turin from 7 to 8 per cent.

In 1864, a new Egyptian loan of 5,704,200*l* had just been issued on the London market. Some rather large mercantile failures had been announced both in London and in the provinces. The proposal for a federation of the British North American colonies was attracting much attention.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1855, a deficiency of 6,900,404*l*; in 1862, a deficiency of 5,157,836*l*; in 1863, a deficiency of 7,096,473*l*; and in 1864, a deficiency of 4,879,007*l*. In 1865, the deficiency is 7,033,866*l*.

Discount and Money Market.—The demand for money during the week has been rather active, especially to-day, when nothing was done at less than 7 per cent., the Bank minimum. The causes for the increased stringency are the unfavourable movements in the foreign exchanges and consequent withdrawals of gold from the Bank, and the circumstance that a large amount of Australian and China paper falls due to-morrow. The large arrivals of specie appear hitherto to have exercised little effect. Annexed are the rates of discount for bills, with various periods to run:—

30 to 60 days	7 per cent.
3 months	7 per cent.
4 months	7 per cent.
6 months—Bank bills	7 per cent.
6 months—Trade ditto	7½ per cent.

Digitized by Google

The charge for four months trade bills is also as high as 7½ per cent.

On the Stock Exchange money has been more wanted, owing to the heavy withdrawals to meet the requirements in the discount market for to-morrow, and loans on Government securities this afternoon commanded 6 per cent.

The following are the rates of interest allowed on deposits :—

Joint Stock Banks	*5 per cent.
Discount houses at call	5 per cent.
Do. with seven days' notice	5½ per cent.
Do. fourteen days	6 per cent.

* At the London and Westminster 4 per cent. only on sums below 500*l*.

About 38,000*l* in gold was withdrawn from the Bank yesterday and to-day, while 54,000*l* was sent in this afternoon.

The biddings for bills on India took place on Wednesday at the Bank of England. The proportions allotted were—To Calcutta, 26,38,000 rs; to Madras, 15.000 rs; and to Bombay, 10,00,000 rs. The minimum price was as before—1s 11½d on Calcutta and Madras, and 1s 11¾d on Bombay. Tenders on Calcutta and Madras at 2s will receive in full, and on Bombay at 2s 0¼d, about 20 per cent. Above these prices in full.

The General Credit and Finance Company of London (Limited) have received the following notice from the Imperial Ottoman Government for publication. It will be perceived it allows an extension of time for the progress of the conversion. It is stated that the conversion of the internal debt of the Ottoman Empire had reached nearly 21,000,000*l* sterling on Tuesday evening :—

(TRANSLATION.)

Conversion and Unification of the Internal Debts of the Ottoman Empire.

Official Notice.

The Imperial Government, taking into consideration the circumstances which have impeded the progress of the conversion, principally the cholera, which has scourged Constantinople, and the unforeseen delay in the fabrication of the bonds of the general debt, has determined not to enforce the reduction of 10 per cent. which was applicable in virtue of the terms of Article 11 of the law of the 19th (31st) March, 1865, to the securities presented for conversion after the period of three months, and during the second period of one month and a half determined by said article.

In consequence the securities of the internal debt will continue to be received for conversion, without reduction, up to the 19th (31st) December, 1865, on the same terms, in the same form, and at the same places, as before.

At the expiration of this last period the operations of the conversion will be closed irrevocably.

Five days after the definitive closing the coupons for interest due on the non-converted securities will be paid at Constantinople, and the bearers will be entitled to interest on those coupons from their due date to the day of payment at the rate of 6 per cent. per annum.

(True copy.)

(Signed) ABRO, Commissioner.

Nov. 15, 1865.

The negotiations for the issue of an Austrian loan in London are understood to have completely broken down. A disagreement having arisen between the Austrian Minister of Finance and the Messrs Rothschild, who, in concert with Messrs Baring Brothers and Co., and the Anglo-Austrian Bank, contemplated bringing it out, the loan has gone to the Paris market, and, it is said, will be brought out by a party there represented chiefly by the Comptoir d'Escompte. It is rumoured that the loan will take the form of a 5 per cent. stock, and that the price of issue will be 62 per cent. The amount is not precisely stated, but is believed to be 6,000,000*l*, it being affirmed that this sum will place the Austrian Government in a position to meet all its engagements.

The return of the Bank of France for the week shows the following changes :—

	£
INCREASE.	
Circulation	173,000
DECREASE.	
Bullion	506,000
Bills discounted	528,000
Advances	50,000
Treasury balance	586,000
Current accounts	592,000

The following are the rates of discount in the chief cities of the continent, showing a rise at Amsterdam and Hamburg :—

	Bank Rate. Per cent.	Open Market Per cent.
Paris	5	4½ ¾
Vienna	5	5 ½
Berlin	7	6½
Frankfort	5½	5
Amsterdam	6	6
Turin	5	4½ 5
Brussels	5	5
Madrid	9	...
Hamburg	...	6¾ 7
St Petersburg	6	6½ 7

ENGLISH FUNDS.—The favourable character of the Bank return and the news of the suppression of the negro insurrection in Jamaica, at one period caused an advance in Consols, but a relapse subsequently took place, partly from the effect of the declaration of war between Spain and Chili, and partly from the general absence of business. The closing quotation this evening for the account was 87⅞ to 88 ex dividend, or the same as last Friday. For money, the final price was 89⅛ to 89¼ with the dividend. Reduced and New Three per Cents left off at 87⅛ to 87⅜; and India Five per Cents., 104⅞ to 105⅛, being in the latter case rather firmer.

The increased demand for money has caused a renewed flatness in Exchequer bills, the March issue closing at 6s to 3s discount, and the June 10s to 5s discount.

FOREIGN STOCKS.—The principal change this week has been a fall in Spanish securities, especially the Passive and Certificates, on the announcement of the outbreak of the war. Several other descriptions have also receded, particularly Egyptian, Greek, Venezuelan, and Turkish bonds. The new Five per Cents. of the latter are quoted 41¾ to 42¼, equivalent to 8 per cent. discount. A good demand on the other hand has prevailed for Mexican, although the full rise has not been maintained, owing to the better prospects of the new Empire, and also from the approach of the dividend. Brazilian scrip is also higher. The United States five-twenty bonds have receded to 63⅜ to 63⅞. To-day the market has been generally heavy, sales predominating both on Dutch and Greek account.

The final price of French Three per Cent. rentes on the Paris Bourse this evening was 68f 35c, showing a fractional decline compared with yesterday and last week.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks on last Friday and this day :—

RAILWAYS AND OTHER SHARES.—The railway market has been flat, with few transactions. Nearly all the leading stocks are quoted lower, especially Great Northern, Midland, Great Western, and Metropolitan. On the other hand, there were some inquiries for Great Eastern, and North-Eastern descriptions likewise fractionally improved. The fall in Metropolitan is in some degree produced by the decision of the Regent's Canal proprietors to apply in the next session for power to construct a railway from King's Cross to Limehouse.

In the colonial department there has been a decline in Great Western of Canada shares. Other descriptions were steady. Foreign securities were mostly dull.

The principal movement in miscellaneous descriptions has been a fall in Imperial Ottoman Bank shares on the result of the meeting. The quotation was at one period as low as 15¼, but a rally afterwards occurred, and after some fluctuations the price left off this evening at 15½ to 15¾.

Subjoined is the usual list of the closing prices of the principal railway shares on last Friday and this day :—

Foreign Exchanges.—A further adverse change has taken place this week, and the rates are generally quoted lower.

Bullion.—The following is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper:—

Gold.—At the beginning of the week there was not much demand for gold for export, and about 120,000*l* in bars and coin were sent into the Bank. The foreign exchanges have, however, exhibited a tendency to decline within the last few days, and all gold that might now be offered would be taken for abroad; indeed, an order to-day could only be executed by withdrawing about 27,000*l* from the Bank. The Borussia has brought 43,000*l* from New York; the Scotia has brought 14,000*l* from New York; the City of New York has brought 4,000*l* from New York; the Mongolia has brought 42,700*l* from India and Alexandria; the Ethiope has brought 27,000*l* from Africa; the Tasmanian has brought 40,100*l* from the West Indies; the Pera has brought 59,000*l* from Australia. The Ripon has taken 14,000*l* to Alexandria. The screw-steamer London is bringing 342,000*l*, and the Cornwallis 61,500*l* from Melbourne.

Silver.—The demand for silver has continued very good, and owing to the scarcity of fine bars on the continent, prices have again improved, and we now quote 61⅜d per oz standard for shipment from Southampton, and 61½d per oz standard from Marseilles. The Ripon took on the 12th instant 392,000*l* from this country, and this amount will be largely increased by the addition from Marseilles on the 20th instant. The Tasmanian has brought about 100,000*l* in Doré and fine bars, but this arrival remains to be dealt with.

Mexican Dollars.—There has not been any demand for shipment of this coin to China. The price of silver has, however, risen so high as to improve the price of dollars to about 60d per oz, being about their intrinsic value as compared with fine bars. The Tasmanian has brought about 120,000*l* of Mexican and Bolivian dollars, and they will be deliverable in a day or two.

Exchange on India for banks' drafts, at 60 days' sight, is on Calcutta 1s 11⅞d to 2s, and on Bombay 2s to 2s 0¼d per rupee. The Council drafts on India disposed of yesterday realised as follows:—Tenders on Calcutta and Madras, at 2s, received in full; and on Bombay, at 2s 0¼d, 20 per cent. On 1st November the allotments were—to Calcutta and Madras, at 1s 11⅞d, 52 per cent.; Bombay, at 2s 0⅛d, 17 per cent.

Indian Government Loan Notes are 107 to 109 for the 5½ per Cents., 100 to 102 for the 5 per Cents., and 86 to 88 for the 4 per Cents.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std, last price; ditto, refinable, 77s 11d per oz std, last price; Spanish doubloons, 74s to 74s 6d per oz; South American doubloons, 73s 6d to 73s 9d per oz; United States gold coin, 76s 2¾d per oz. Silver—Bar silver, 5s 1⅞d to 5s 1¾d per oz std; Mexican dollars, 5s 0d per oz, nominal; five-franc pieces, 4s 11¼d per oz, last price. Quicksilver, 8*l* per bottle; discount, 3 per cent.

The Holmesdale has arrived from Australia with 428,000*l* in gold.

Failures and Mercantile Embarrassments.—The following is from the *Leeds Mercury*:—

We understand that Messrs Jonas Josephy and Co., woollen merchants, Aire street, Leeds, have found it necessary to call their creditors together. The liabilities of the firm are estimated at 40,000*l*, and the loss will fall principally on houses in Dewsbury, Batley, Ossett, and Gelcar. The meeting will be held on Friday (to-day).

Public Companies.—At a special meeting of the shareholders of the Imperial Ottoman Bank, a resolution was proposed, on the part of the directors, to the effect that the capital of the company should be increased by the issue of 67,500 new shares of nominally 20*l* each with 10*l* paid, and that those shares be issued to the existing proprietors at a premium of 2*l* 10s. The great majority present intimated their approval of this proposal for the creation of the new shares, but strenuously insisted that they ought to be issued at par. After an animated discussion, it was agreed that the meeting should adjourn to the 29th instant, in order that the directors might in the meantime have an opportunity of consulting the representatives of the Paris shareholders with respect to the course it would ultimately be desirable to adopt.

At a special assembly of the proprietors of shares in the Regent's Canal, a resolution was passed enabling the company to apply to Parliament in the ensuing session for an Act to authorise the company to improve the canal, and to construct a line of railway from King's cross to Limehouse (with branches) in conjunction therewith. An amendment, that the scheme was unnecessary and uncalled for, was negatived by 15 to 9.

A meeting of the bond and shareholders of the Atlantic and Great Western Railway is convened for Thursday, the 23rd instant, to receive a report on the position and prospects of the company from Sir Morton Peto and the other gentlemen who have just returned from a close investigation of its condition.

At the half-yearly meeting of the Trust and Agency Company of Australasia a dividend was declared of 1s per share, being at the rate of 10 per cent. per annum.

The directors of the Asiatic Banking Corporation have declared an interim dividend for the half-year ended 30th June at the rate of 5 per cent. per annum, free of income tax, on the original shares.

A general meeting of the Panama, New Zealand, and Australian Royal Mail Company (Limited) is convened for the 24th inst., when a dividend is to be declared.

The Bombay Gas Company (Limited) have announced the half-yearly interest at the rate of 5 per cent. per annum as payable on their shares on the 1st Dec.

Creditors of the Metropolitan Paper Making Company (Limited) are required to send the particulars of their claims to the voluntary liquidator by the 10th Dec.

Creditors of the Trent and Humber Ship Building Company (Limited) are required to send the particulars of their claims to the official liquidator by the 2nd Dec., Vice-Chancellor Wood having appointed the 12th Dec. for adjudicating upon them.

It is stated that the accounts of the Blakeley Ordnance Company have just been examined by Messrs Chatteris and Nichols, the accountants, and they show a profit of 56,982*l* 11s 9d for the year ending June 30 last.

The following is the report of the directors of the Anglo-Egyptian Bank (Limited), to be presented at the ordinary meeting on the 23rd inst.

The directors have much pleasure in presenting to the shareholders their balance sheet for the first financial year. It shows a net profit of 67,344*l* 8s 11d, or more than 16 per cent. per annum on the paid-up capital, which, on the average, has been only ten months in the hands of the directors, and they have divided it in the following manner:—1, interim dividend paid for the first half-year, at 8s per share, 16,000*l*; 2, declared dividend for the second half-year, at 18s per share, 36,000*l*; 3, repayment of preliminary expenses, 10,703*l* 6s 8d; 4, balance carried forward, 4,641*l* 2s 3d; total, 67,344*l* 8s 11d. The shareholders will no doubt consider this result satisfactory, especially when it is remembered that the prevalence of cholera in Egypt was so great that business there was almost at a stand still for some months. It will be gratifying to the shareholders to be assured that the bank has made no bad debts, nor experienced any losses whatever in its extensive transactions, notwithstanding the monetary crisis which caused so many failures in Europe, and more particularly in the East. The directors are glad to be able to state that the business of the bank progresses steadily; and as the prosperity of Egypt is largely increasing under the liberal and enlightened rule of his Highness Ismail Pacha, the Viceroy, it is obvious that the prospects of the bank are most encouraging.

The share list of the Real Estate Corporation (Limited) closes this day for London, and on Monday the 20th instant for the country. The shares are 3 to 4 premium.

Miscellaneous.—The following, relating to the Venezuela loan of 1864, is from the General Credit Company:—

The General Credit and Finance Company of London (Limited) are in receipt of advices from their agents, Messrs H. L. Boulton and Co, dated La Guayra, October 25, 1865, of duties collected (and remitted) as follows: On account of the above loan, per statement No. 32, from Ciudad Bolivar, 272 dols; ditto No. 33, ditto, 1,185.33 dols; ditto No. 34, ditto, 268 dols; ditto No. 35, ditto, 4,303.76 dols; ditto No. 36, ditto, 393.90 dols; ditto No. 52, from La Guayra, 3,951.04 dols; ditto No. 63, from Puerto Cabello, 7,834.60 dols; ditto No. 64, ditto, 4,241.55 dols: total, 22,450.18 dollars.

The mail from Guayaquil has brought a remittance of 1,008*l* 7s 5d, on account of the dividends on the debt of Ecuador.

The Government have decided that the departure of the royal mail steamer Seine for the West Indies shall be postponed for twenty-four hours; she will consequently sail to-morrow, the 18th.

The Ottoman Company (Limited) have invited subscriptions for the Bank of Turkey, with a capital of 1,000,000*l*, in 20,000 shares of 50*l* each, of which the first issue is to be 10,000. The bank is said to have been formed at the express solicitation of merchants and others in the Ottoman Empire for the purpose of developing its commerce and enlarging its resources. The operations will be confined to those of pure banking, and the success of the Ottoman Bank is cited as a proof of the need for banking in this improving part of the world.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 3 per mille premium, and the short exchange on London is 25.20 per 1*l* sterling. On comparing these rates with the English Mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is nearly 2-10ths per cent. dearer in Paris than in London.

By advices from Hamburg the price of gold is 428 per mark, and the short exchange on London is 13.6 per 1*l* sterling. Standard gold at the English Mint price is, therefore, about 2-10ths per cent. dearer in Hamburg than in London.

The course of exchange at New York on London for bills at 60 days' sight is 108½ to 108¾ per cent. At this rate there is no profit on the importation of gold from the United States.

Letters for Switzerland, when prepaid, will, in future, be liable to postage at the rate of 5d for every quarter of an ounce, instead of 6d as heretofore. When the postage is not prepaid such letters will be liable to an extra charge on delivery. The above reduction will apply only to letters sent via France, which is the ordinary route for letters addressed to Switzerland. Any letters which may be specially addressed to be forwarded via Belgium, will continue chargeable with the present postage of 8d the single rate.

CORN IMPORTED AND EXPORTED.

COMMERCIAL EPITOME.

FRIDAY NIGHT

The supply of English wheat on sale at Mark lane to-day was very moderate. The trade, however, was in a most inactive state, and sales could only be effected by submitting to lower prices. Foreign wheat, of which there was a fair supply on offer, was heavy at about Monday's currency. The barley trade ruled quiet on former terms. For malt, the demand was less active, at barely late rates. Oats were in good supply, and the demand was in a sluggish state, at Monday's quotations. Beans and peas ruled firm at full currencies. The demand for flour was quiet at late rates. This week's imports amount to 7,400 quarters of wheat, 3,780 barley, 24,870 oats, and 520 sacks of flour.

A meeting of influential members of the corn trade was held this afternoon to consider the question of metage dues claimed by the Corporation of London. Against those dues, a strong opposition has been organised, and efforts will be made in the ensuing session to obtain their abolition.

At Liverpool, this morning, wheat met a slow sale, at barely late rates. Flour declined 6d per barrel. For Indian corn the trade was dull, on rather easier terms.

The tone of the Liverpool cotton market during the present week has been very depressed, and the sales amount to the limited number of 45,700 bales only, of which spinners have taken 28,350 bales, speculators 8,300 bales, and exporters 9,050 bales. To-day's stock is estimated at 294,130 bales. Quotations for the week are reduced from ½d to 1d per lb, according to description, the longer-stapled kinds having suffered most in the decline. To-day there is a decided improvement in the tone of the market.

Advices from New Orleans are to Oct. 23. The cotton market during the preceding week had been greatly depressed, and a very moderate business had been transacted. The week's receipts had amounted to 23,216 bales, whilst the clearances had reached 20,293 bales. The stock on hand at latest date was 115,508 bales. Ordinary quality was quoted at 43c to 47c; good ordinary, 49c to 50c; low middling, 51c to 53c; middling, 54c to 56c; and strict middling, 57c per lb.

From Savannah, we have intelligence to Oct. 28. In the early part of the week, prior to that date, the cotton trade was firm, and prices had an upward tendency. The market, however, closed heavily at a decline in the quotations of 4c to 6c per lb. Low middling was quoted at 50c; middling, 52c; strict middling, 55c; and good middling, 56c per lb. The stock on hand was 6,431 bales.

According to Messrs Neill Brothers' circular, the receipts of cotton at United States ports, from Sept. 1 to latest dates, had amounted to 365,000 bales, against 534,000 bales during the corresponding period in 1860; 645,000 bales in 1859, 500,000 bales in 1858, and 249,000 bales in 1857. The total stock at those ports is estimated at 332,000 bales, against 446,000 bales in 1860, 450,000 bales in 1859, 308,000 bales in 1858, and 169,000 bales in 1857. The exports, since Sept. 1, had been as follows:—

	Great Britain. bales.	France. bales.	Other Foreign Parts. bales.	Total. bales.
1865—1866.....	136,000	7,000	2,000	145,000
1860—1861.....	121,000	35,000	19,000	175,000
1859—1860.....	179,000	50,000	20,000	249,000
1858—1859.....	103,000	54,000	12,000	169,000
1857—1858.....	87,000	19,000	16,000	122,000

From Alexandria, to Nov. 13, we learn that the cotton trade was very active, at enhanced rates. Fair open-ginned produce was quoted at 22¾d, on the spot, 21¾d for December, and 21¼d per lb, free on board, for January shipment. Freight to Liverpool, ½d per lb. The first bale of the *new* Egyptian crop has been received this week.

Via the Persian Gulf, we have information from Bombay to Nov. 4. During the preceding week the cotton trade had been quiet, with shipments of only 2,800 bales. Dhollerah produce was quoted at 425 rupees per candy.

Postal advices from Madras are to Oct. 12. The cotton trade had been very firm, and all descriptions had changed hands at enhanced rates. Western produce was quoted at 14½d per lb. The stock on hand was exceedingly small. Official returns give 1,23,640 acres under cultivation in the month of August last, against 1,13,790 same period the year before. The export from this port for the nine months ending 30th ult, was bales (300 lbs) 135,835, against 100,889 same time last year. The export from Coconada for the month of August was, bales 2,350, against 4,007 same month 1864. From Tuticorin, the export for August was, bales 3,944, against 10,231 same period 1864. From Madras the export last month was, bales 26,719, almost all of which went to Great Britain. The following table, from Messrs Dymes, Cartwright and Co.'s circular, shows the export of cotton from Madras for nine months:—

	Great Britain. cwts.	France. cwts.	Elsewhere. cwts.	Total. cwts.
In Sept., 1865	71,138	...	431	71,569
In previous eight months.....	283,184	7,556	1,848	292,585
Total for nine months	354,322	7,556	2,279	364,154

Against the whole of 1864.....	297,235	15,819	2,557	315,601
— — 1863.....	422,111	35,177	6,741	464,019
— — 1862.....	234,745	11,475		246,220

The markets for colonial and foreign grocery produce have been very firm this week, and in several articles an advance in price has taken place. The leading changes are in Indian tea and raw sugar. As regards the former, the quotations show an improvement from last week of from 1d to 4d per lb. In the latter, the rise is considerable, prices being now only 6d to 9d per cwt below those current previously to the late decline. Coffee, cocoa, and rice have changed hands at the extreme rates of Friday last. Last week, duty was paid in London on 1,363,074 lbs, whilst the export for the week ending Nov. 9 was 668,196 lbs, making a total of 2,031,270 lbs, against 1,867,246 lbs last year.

At the date of our latest advices from China, considerable business was passing in most descriptions of tea. These transactions, however, were chiefly the result of concessions made by holders, the principal dealings being at reduced prices. At some ports, however, good and fine teas had changed hands at full quotations. The export to Great Britain, since June 1, had been 57,347,900 lbs, against 61,195,100 lbs last season.

In reference to this year's vintage, Messrs Matthew Clark and Sons write as follows:—"The favourable result of the vintage this year is generally confirmed from all parts, and the aggregate yield must be very large, and the quality good; already in many parts of France purchases of new wine have been made at higher prices than were expected. From Portugal, however, we hear that Oporto shippers have nearly all abstained for the present making contracts for this year's produce, waiting to see the course of prices, and development of quality."

The public sales of colonial wool were commenced yesterday. The arrivals amount 58,839 bales, consisting of 12,993 bales from New South Wales and Queensland; 3,071 Victoria; 414 Tasmania; 1,175 South Australia; 3,333 New Zealand; and 30,853 bales from the Cape of Good Hope. There has been a good attendance of home and foreign buyers, and the biddings have ruled active, at enhanced rates. As compared with last series, Australian wool shows an advance of 1d; Port Philip, 1½d to 2d per lb. For Cape wool there is an active demand, and a few lots have been taken by American buyers. Prices show an average improvement of ½d per lb. Privately, the English wool trade is quiet, but firm.

In the silk trade, a quiet feeling has prevailed. Sound qualities, however, are firm in price, whilst inferior samples exhibit a slight decline. A report from Shanghai, dated Sept. 20, says:—The settlements of silk for the past fortnight are estimated at about 2,000 bales, consisting chiefly of medium and inferior grades of Tsatlees and Taysaams. Good silks continue scarce, and in some instances show an advance of 5.00 tls to 10.00 tls per picul; the higher classes of Teatlee, however, remain nominally the same as last quoted. The late arrivals from the interior have proved drier and free from mildew. The receipts for the interval amount to about 1,000 to 1,500 bales; and from Ningpo 26 bales have been received. The Japan mail steamer arrived on the 18th inst., and brought 177 bales of silk. From Yokohama we have dates to the 12th inst., reporting the settlements for the month to be about 700 bales, and the unsold stock about 1,500 piculs. Prices had declined $20 to $25 per picul. The shipments since July 1 have been 23,544 bales, against 11,138 bales last year. The estimated stock is 2,500 bales, against 6,500 bales last year, and 13,500 bales in 1863. The prices current are as under:—Tsatlees, chop No. 1, 30s; No. 2, 28s 11d; No. 3, 27s 11d; market, No. 3, 26s 6d to 27s 4d; No. 4, 25s 2d to 25s 11d; No. 5 and common, 23s 11d to 24s 11d; Taysaams, chop No. 1, 25s 5d to 25s 11d; No. 2, 23s 11d to 24s 5d; No. 3, 22s 10d to 23s 5d; Nos. 4, 5, and common, 20s 1d to 22s 4d; Yuenta, No. 1, 25s 5d to 25s 11d; No. 2, 24s 5d to 25s 2d; No. 3, 23s 5d to 23s 11d; No. 4 and common, 20s 10d to 22s 4d; Hainings, 20s 10d to 25s 5d; Hangchow Tsatlees, 24s 2d to 25s 2d; Sewhings, 20s 7d to 22s 10d; Laeyongs, 19s 9d to 20s 4d per lb.

From the 11th of October to the 11th of November the silk trade at Lyons was somewhat active, and an advance took place in the value of all descriptions of Eastern produce. European silk, however, was in slow request, at about stationary prices.

At Zurich, during the month ending November 7, the silk trade

Digitized by Google

was rather quiet. The demand was chiefly confined to the best qualities of China and Japan produce, for which higher prices were obtained. From January 1 to October 31, 719,273 lbs passed the condition house, against 829,721 lbs last year, and 831,852 lbs in 1863.

Owing to the nature of the news from Chili, the price of English copper has been raised to the extent of 20*l* per ton; Scotch pig iron is quoted at 58s cash, mixed numbers. Most other metals rule firm.

The oil trade continus firm, at advancing prices. Linseed oil is worth 40s, and foreign refined oils, 57s per cwt. In turpentine, considerable business has been transacted, at 47s to 48s for French spirits. Petroleum is very firm, at 3s 4½d for American refined. Tallow moves off slowly, at 49s 6d to 50s for P.Y.C. on the spot.

Trade at New York, during the week ending Nov. 4, was very dull, and both in dry goods and general merchandise, a decline in prices was the result. Wheat and flour, however, though in by no means active request, commanded more attention, at slightly improved rates, the demand being chiefly created by the intelligence of an upward movement in prices in this country. The money market has been very firm, the lowest rates for accommodation being from 8 to 9 per cent. The fluctuations in the premium on gold had been from 45½ to 46⅞ per cent. The stock of bullion in the banks, on the 28th ult., amounted to 2,458,750*l*, the balance in the Sub-Treasury on the same date being 12,031,540*l*. The shipments of specie from Jan. 1 to Oct. 28, were 5,086,900*l*; against 7,471,030*l* last year; 7,690,500*l* in 1863; 9,910,120*l* in 1862; 658,890*l* in 1861; and 8,284,940*l* in 1860. The total debt was officially estimated at 2,740,854,758 dols.

Sea Island has been in fair demand, but freely offered, and the common qualities are 1d per lb lower, while fine descriptions command extreme rates. American is in steady request, but after some advance in the early part of the week closed at a decline of ½d to 1d per lb. The demand for Brazil has been very limited, and though the quantity offering is not large, prices have given way from 1d to 1½d per lb. Egyptian recovered 1d per lb on Friday, but has since been in comparatively limited demand and freely offered, and is now quoted ½d to 1d below last week. East India has been in moderate request; prices have shown much irregularity, and the market is very freely supplied at a decline of ½d to 1d per lb. Bengal has declined ½d to ½d per lb. China and Japan have been only saleable in small parcels, and the quotations show a reduction of ½d ¾d per lb.

The transactions to arrive have been to a considerable extent, induced chiefly by the decline submitted to. The last quotations were to-day, for American, average middling, October or November sailing from New York 20d per lb—Egyptian, fair new open, January delivery 20¾d; November or December shipment 21d—Western Madras, fair, October sailing 15d—Bengal, fair, from quay 11d per lb.

The sales of the week amount to 45,720 bales, including 8,300 on speculation, and 9,070 declared for export, leaving 28,350 bales to the trade. The market to-day opens with a firmer feeling, and the sales will probably amount to about 8,000 bales.

PRICES CURRENT.—NOVEMBER 20, 1863.

LONDON—Nov. 17.

Annexeed is a portion of the circular issued this week by the London Cotton Brokers' Association :—

There has been a dull and drooping market throughout the week; prices have been irregular, and the average decline is about ¼d per lb. Tinnivelly, from its comparative scarcity, has suffered least, being only ½d lower, while long-stapled kinds have fallen 1½d per lb. For arrival there has been a fair demand, at a decline of ½d to 1d per lb from the closing quotations of last week; late shipments, being in most request, have suffered the least depreciation.

NEW YORK—Nov. 4.

The market opened this week pretty firm, but on the arrival of the City of Boston's advices from Liverpool, the market fell off one to two cents per lb. But the advices by the Damascus immediately after restored tone and prices. Wednesday was a very active day, at about the highest point of the week, but on Thursday it declined and fell off, and the market closed quietly.

NEW YORK CLASSIFICATION.	Upland. c	Florida. c	Mobile. c	New Orleans and Texas. c

Savannah	1,367	From foreign ports	...

The exports last week were:—

To Liverpool	12,450
Cork	1,741
Hamburg	430
Total for the week	14,621
Previously reported	78,474
Total since July 1	93,095

MARKETS IN THE MANUFACTURING DISTRICTS.

About an average business has been transacted in goods, this week, both for home use and export, and prices have been well supported. The coal trade continues remarkably active. Iron moves off steadily at full quotations.

MANCHESTER, Nov. 16.—This market has continued dull, with little business offering, buyers being apprehensive of a decline. Yarns have receded about ½d per lb, and in some instances 1d, from the rates of last week. Manufacturers are, and have been for some weeks, reducing their contracts, and now they cannot obtain orders for renewal. But they are not disposed to press for sales, as such would only entail greater loss on the present costs of working. A slight diminution in the hours of working has therefore been shown in several places.

BRADFORD.—We have to report an extremely flat market for wool. Considering the flatness, there is remarkable firmness. There is almost an entire stagnation in the demand for yarns. Pieces—Buyers are operating very sparingly, and in face of a drooping cotton market, cannot be tempted to place fresh contracts. Prices, though not quotably changed, are slightly in favour of the buyer.

LEEDS.—There is nothing of importance to note in the woollen cloth trade. The country clothiers and manufacturers keep well employed, many being engaged on orders for spring fabrics, and others preparing their own stocks for that season.

ROCHDALE.—Manufacturers are not so busy as they could wish. It is anticipated that when severer weather becomes constant a much stronger demand will arise.

DUNDEE.—Our flax market has continued very firm, and the tendency of prices is still upwards. Jute continues active, and holders show increased firmness. The yarn market has been quiet, and prices of flax and tow kinds are firmly maintained. Linens are still in good demand, but there is scarcely such a pressure of orders on the market as there was a short time ago.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Nov. 4.—Flour has come forward more freely than grain, but, nevertheless, the prices for the past three or four days have been working upward. The demand has been very general, including some for London. The only exception to the buoyant tone has been in good medium Western, which were previously advanced largely, and are now rather slow of sale. Wheat has been in steady ruling demand, and shippers to Great Britain have been looking about: prices have steadily advanced since Tuesday, when new No. 2 Club sold for steamer shipment to Liverpool at 70c, freight 6d. Corn has been in good Eastern and local demand, with some export business. Receipts are quite moderate, and there is little probability of any considerable increase via canal, but the Southern coast and New Jersey promise to make good the deficiency at once. The crops of corn at the East have been very fine, and were harvested in unusally good condition. The following are closing quotations:— Flour—Superfine State and Western, $7.85 to $8.20; extra State, $8.35 to $9; shipping roundhoop Ohio, $9 to $9.25; extra Western, common to good, $8.40 to $11.35; double extra Western and St Louis, $11.50 to $16; Southern, supers, $9.50 to $11.40; Southern, fancy and extra, $11.50 to $16; Canada, common to choice extra, $8.40 to $12.25; rye flour, fine and superfine, $6.50 to $7; corn meal, Jersey and Brandywine, $4.50 to $4.85 per barrel. Wheat—Chicago spring, $1.75 to $1.83; Milwaukee Club, $1.75 to $1.85; red winter, $2 to $2.25; amber Michigan, &c., $2.30 to $2.36. Corn—Western mixed, 78c to 91c; Western yellow, 92c per bushel.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The arrivals of English wheat up to our market, this week, coastwise and by land-carriage, have been on a limited scale, and in but middling condition. Selected samples have changed hands steadily at full quotations; but inferior kinds have moved off heavily, and, in some instances, prices have had a drooping tendency. The supplies of foreign wheat brought forward have not increased, as a portion of the importation has gone direct to the millers. On the whole, the trade has been in a very inactive state at barely last week's currency. Both English and foreign barley has come slowly to hand. Malting parcels have changed hands freely at very full prices. Grinding and distilling sorts have supported former terms. There has been a steady, though not to say brisk, demand for malt at quite previous rates. The supply has continued seasonably good. The sale for oats has been inactive at 6d per quarter less money. Beans and peas have sold steadily at full quotations. We have no change to notice in the value of flour. The trade may be considered somewhat heavy.

Most of the continental markets have been firm for nearly all kinds of produce, and the quotations have been well supported. American advices bring high rates for both wheat and flour. The stocks at the various ports are represented as very moderate.

In Scotland, wheat and nearly all kinds of spring corn have been in steady request, at very full prices. The shipments to the South have been on a limited scale.

The Irish markets have been tolerably firm for most descriptions of produce at full quotations. Increased shipments have been made to England.

Ploughing and sowing have progressed steadily, with the land in good condition for the reception of the seed.

At Mark lane to-day, the supply of English wheat on sale was very moderate. The trade, however, ruled heavy, and sales could only be effected by submitting to lower prices. In foreign wheat, a limited business was transacted, at Monday's currency. The trade for barley was light, on former terms. Malt was less active, and, in some instances, rather cheaper. Oats were in good supply, and a fair business was transacted on former terms. Beans and peas ruled firm, at full prices. The flour trade was quiet, at late rates.

Mr George Dornbusch reports the floating grain trade as follows:—Arrivals at ports of call, since last Friday, only 4, viz., 1 wheat, 1 maize, 1 barley, and 1 mille seed. The trade has been dull and depressed. Wheat—Second-hand cargoes 2s to 3s down from the recent highest point. Sales:—1 arrived cargo, San Domingo, at 47s per 480 lbs; Ghirka Odessa, on passage, Oct., 43s; shipping, or shipped, 44s 6d; and shipping, or to be shipped, Dec., Jan., 43s 6d per 492 lbs. Maize 6d to 1s dearer. Sales:—

Digitized by Google

Ibrail and Wallachian, on passage, Aug., Sept., and Nov., 30s to 30s 6d; and mixed American, from New York, Oct., 30s 6d per 480 lbs; Wallachian and Ibrail, shipped, or to be shipped, 25,000 qrs., Oct. to April, 30s 6d to 31s per 480 lbs. Barley firm. Sales:—Nicolaieff, on passage, Oct., 24s 3d; and Black Sea, from Nicolaieff, shipping, or shipped, 24s 3d per 400 lbs. Rye—1 one cargo Enos, on passage, Oct., 29s 9d per 480 lbs. Linseed—Arrived, Moorschank, from St Petersburg, at 60s 6d, and on passage, 61s 9d and 62s per 424 lbs L.A.T.: Azov, from Taganrog, on passage, 62s 6d per 424 lbs L.A.T.; and East Indian and Mirzapore, from Calcutta, June, Aug., Sept., 63s to 68s per 410 lbs L.A.T.; Berdianski, shipping, 64s 9d per 424 lbs L.A.T. Cotton-seed—Egyptian, 1864 crop, from Alexandria, on passage, 8*l*; shipping, 7*l* 15s to 7*l* 18s 9d; 1865 crop, 8*l* 5s; and to be shipped, Dec. to Feb., 1865 crop, 8*l* to 8*l* 5s per ton.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT"

MINCING LANE, FRIDAY MORNING.

SUGAR.—The improvement referred to last Friday was maintained at the commencement of this week, indeed in some cases the prices nearly equalled the highest lately attained. A very quiet tone again prevails, and the public sales have gone off without much animation. The refiners have taken very moderate supplies. 1,300 casks West India sold in three days, including the portion by auction. Crystallised Berbice, 38s to 43s per cwt. The deliveries last week showed a marked decrease, being 3,300 tons. There were 2,965 tons landed; consequently the stock has further diminished, being 86,910 tons. Last year it reached 115,730 tons.

Mauritius.—1,881 bags offered by auction were sold: brown 28s 9d to 33s 6d; grey and yellow muscovado, 34s 6d to 37s 6d; crystallised, 39s 3d to 39s 9d. About 5,000 bags have changed hands by private contract.

Bengal.—550 bags low Gurpatta date were bought in at 33s 6d to 34s 6d per cwt.

Madras.—6,000 bags soft Jaggery sold last Saturday, at a price not allowed to transpire, but over 28s 6d per cwt.

Manilla.—5,000 bags clayed are reported at 34s per cwt.

Other Foreign.—The sales this week have been very limited.

Refined.—The market was active at the close of last week, but has since been dull.

MOLASSES.—120 puncheons Antigua have sold at 16s per cwt.

COCOA.—372 bags Trinidad offered in the public sales, partly sold at full quotations: ordinary to good, 68s to 77s per cwt.

RUM.—Advanced rates have been paid for Jamaica, and common kinds are rather dearer; Demerara 1s 8d to 1s 9d. 400 puns Cuba at 1s 8d to 1s 9d. 200 casks Mauritius at 1s 7½d per proof gallon.

COFFEE.—The demand has been active, and the large supplies brought forward have chiefly found buyers. Plantation Ceylon has sold at full prices to a slight advance for coloury sorts. 2,440 casks 1,570 barrels and bags went as follows: pale, mixed and unclean, 75s to 77s 6d; low middling to good, 78s to 87s. 188 casks 3,727 bags native brought 68s to 72s 6d for ordinary to fine quality. 90 cases 75 casks 780 bags East India chiefly sold at 73s 6d to 82s 6d per cwt for pale to good. The export deliveries have increased 6,695 tons in contrast with last season's, while the home deliveries have fallen off nearly 1,500 tons.

TEA.—The public sales of Indian growths have gone off with spirit, and 3,719 packages sold at full prices to 3d and even 4d per lb advance. Most kinds of congou are still in demand by private contract, with prices showing an upward tendency, and business is restricted only by the reduced quantity or the further enhanced rates demanded. Canton gunpowder has risen 2d per lb.

RICE.—Transactions in soft grain descriptions have been upon a very extensive scale, at advancing prices. By private treaty, new Rangoon has commanded 13s 3d to 13s 9d; new Necrancie Arracan and Bassein, 12s 6d to 13s; other soft grain of old import, 11s 3d to 12s 3d. 2,421 bags Bengal offered by auction went as follows: old imports, 14s to 15s; very low and broken, Dacca sort, 12s 6d to 13s 6d per cwt. The total stock is further reduced to 26,560 tons, against 33,250 tons last year, and 40,100 tons in 1863 at the same date.

SAGO.—362 boxes part sold at 22s 6d to 23s 6d for fair bold grain.

SALTPETRE.—A large business has again been done in Bengal at advancing prices. 2,000 bags, on the spot, refraction 5¾ to 3, at 25s to 25s 3d. 400 tons, to arrive, at 25s 9d to 26s 3d. 270 tons in course of landing, at 25s 6d per cwt.

DRYSALTERY GOODS.—Gambier has been steady, at 20s 6d to 21s. A parcel of cubes has sold at 27s. Turmeric sold at 25s to 25s 6d per cwt for Bengal. Safflower steady.

LAC DYE.—177 chests about half sold at from 11½d to 1s 6½d per lb.

SHELLAC.—319 chests, offered by auction, were chiefly bought in.

METALS.—The principal feature in the markets this week is the large advance established upon British copper, owing to the speculation in foreign, based upon the news of the Chilian ports being blockaded by the Spanish fleet. The smelters have raised their prices 20*l* per ton. Cake 116*l*; sheet, 121*l* per ton. Spelter is quiet at 21*l* 10s. Quotations of iron are well maintained. The last sale of Scotch pig was at 58s 1½d mixed numbers. Foreign tin has been steady, with sales of Straits at 93*l* 10s to 95*l*. One contract made, to arrive, at 96*l* 10s per ton.

JUTE.—A large business has been done on the spot and to arrive at the recent advance. On Wednesday 7,800 bales by auction half sold at 15*l* 5s to 26*l* 5s per ton.

OILS.—Some few sales have been effected in the lower qualities of olive. Cocoa-nut has been steady at former quotations: Ceylon, 47*l* to 48*l* 10s, according to conditions, 49*l* 10s paid for distant arrivals; Cochin firm, and may be quoted 51*l* 10s to 52*l*. Palm rather quiet at 44*l* 10s to 45*l*. Linseed has advanced, seed being again dearer and the production of oil curtailed. The last sales on the spot were at 39*l* for delivery, in the first four months of 1866 at 39*l* 10s. The best foreign refined rape oil on the spot has commanded 56*l* and 57*l*; brown is worth about 52*l* 10s, and English 1*l* per ton less.

LINSEED has commanded a further advance in many cases, and the market is still very firm. Calcutta seed, 66s to 67s; Bombay, 68s. A floating cargo of Azoff has sold at 64s 9d per quarter.

TALLOW.—A quiet tone pervades the market. This morning the quotations are as follows: 1st sort new Petersburg Y.C., 49s 6d to 50s; to the end of the year, 49s 6d to 49s 9d; January to March, 50s 3d to 50s 6d; March, 51s 6d to 52s per cwt.

PARTICULARS OF TALLOW.—Monday, November 13, 1865.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market closes flatly, at a reduction of 6d to 1s per cwt. 1,351 mats Mauritius and various parcels of West India by auction partly sold. 333 bags Gurpatta date Bengal partly sold at 36s to 37s 6d. The week's business in West India amounts to 2,385 casks.

COFFEE.—366 casks 265 barrels and bags plantation Ceylon by auction sold at full prices, including fine at 107s. 49 casks 497 bags native sold at 69s to 72s per cwt.

BLACK PEPPER.—2,575 bags Singapore were bought in at 3⅜d per lb.

SALTPETRE.—A parcel of Bengal to arrive obtained 26s 3d per cwt.

TALLOW.—Town unchanged. 970 casks Australian by auction sold at easier rates, from 46s 9d to 48s 9d per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar this week has been very languid: for unstoved goods prices are rather easier. In Dutch crushed sales have been made of different parcels, viz., G.O., at 30s 3d: I.S.R., 30s 10½d; H.R.I. at 31s, in barrels, f.o.b. in Holland.

DRY FRUIT.—All fruits are dull. Valencias have fallen 3s to 4s on some sorts, while currants, though neglected, show only a slight declension on common qualities. Figs and sultanas are easier.

ENGLISH WOOL.—Market very quiet.

FLAX.—Market unaltered

HEMP.—The damaged hemp saved from the late fire, 350 tons, sold this week well, the slight damaged at 31*l* 10s to 32*l* 15s; two lots at 34*l* 5s, without discount. The market is very steady.

SILK.—Steady business doing, with very firm rates; best thirds, 31s.

TOBACCO.—A steady and regular demand has been experienced for most descriptions of American and other growths suitable for home trade purposes. A few limited sales were effected for exportation. Prices unchanged, excepting for Virginia, which is quoted at a decline.

LEATHER AND HIDES.—There has been no alteration to note in the leather market since our report of last week. There was not a large supply of fresh leather at Leadenhall on Tuesday, and only a small attendance of buyers; a moderate business was transacted without change in prices. Prime crop hides, 40 lbs to 50 lbs, East India kips, and light calf skins were in request.

METALS.—A moderate business only has prevailed in metals during the week, with the single exception of copper, and in this metal an unprecedented excitement has occurred,—two advances of 10*l* per ton each having been made in prices of English on 13th and 16th instant respectively. Much speculation has been the result, the cause being war between Spain and Chili. Tin has been steady, and at close

Digitized by Google

showed signs of further improvement in prices. Lead is fully maintained in late improvements. Spelter steady, and iron the same. Tin plates in good demand at the highest.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	54	3
Fat by ditto	2	8½
Yellow Russia	51	3
Melted stuff	41	6
Rough ditto	23	6
Greaves	20	0
Good dregs	6	0

METROPOLITAN CATTLE MARKET.

THURSDAY, Nov. 16.—Our market was well supplied with beasts to-day, but the general quality of the stock was inferior. In all breeds the transactions were only to a limited extent, and the quotations ruled slightly in favour of buyers. Prime Scots and crosses realised 5s 4d per 8 lbs. There was only a moderate show of sheep in the pens; nevertheless the demand for them was inactive, and in some instances the prices obtained were somewhat below those of Monday. The best Downs sold at 6s 10d per 8 lbs. Calves were in good supply and slow request. The currencies realised showed a decline of 4d per 8 lbs compared with late rates. The top figure was 5s per 8 lbs. The pork trade was heavy, and the quotation had a drooping tendency. The top price was 5s 4d per 8 lbs. In milch cows very was doing at about late rates.

Per 8 lbs to sink the offal

HOP MARKET.

BOROUGH, Friday, Nov. 17.—The demand for hops is by no means active as regards good and fine produce, however the market is firm, at full currencies. In the value of inferior produce, very little change has taken place. new Mid and East Kents, 80s to 190s; new Weald of Kents, 70s to 126s; New Sussex, 60s to 115s; Yearlings, 95s to 135s per cwt.

HAY MARKETS.

THURSDAY, Nov. 16.—The trade is firm, on higher terms. Straw is very scarce.

Per load of 36 trusses.

	Smithfield.	Cumberland.	Whitechapel.
	s s	s s	s s
Hay	90 to 115	85 to 115	80 to 115
Clover	90 to 135	95 to 140	90 to 135
Straw	36 to 42	38 to 45	36 to 45

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Nov. 17.—Our market shows no great activity; but there is a fair amount of business doing at firm prices both for home consumption and export, and as the sales of fine colonial wool in London, have opened at an advance upon last September rates, prices generally are likely to continue steady.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY Nov. 17.—The market thinly attended. Wheat slow sale, and prices are nominally unaltered. Flour dull and 6d lower. Indian corn quiet and rather easier; prime mixed 31s. Beans, oats, and oatmeal exceedingly dull.

GAZETTE OF LAST NIGHT.

BANKRUPTS.

J. Watson, Dalston, assistant—J. Nichol, Horsleydown, straw bonnet manufacturer—R. H. Couper, Langley—A. Rodburn, Hatton wall, dairyman—D. H. King, Camden town, traveller—W. W. Redgrave, South Hackney, builder—S. Davis, Mile end—J. Hastings, Ore, farmer—R. Tindal, New Broad street, auctioneer—S. Head, Bayswater—A. Spashett, Barking, licensed victualler—C. EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic receipts of railways in the United Kingdom amounted for the week ending the 4th of November on 12,299 miles, to 676,804*l*, and for the corresponding week of last year, on 11,889 miles, to 635,495*l* showing an increase of 410 miles and of 41,309*l*. The gross receipts on the 14 principal railways amounted in the aggregate, on 8,808 miles, to 559,319*l*, and for the corresponding week of 1864, on 8,489 miles, to 528,381*l*, showing an increase of 319 miles and an increase of 30,938*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, Nov. 13.—In the share market to-day mines and Canadian railways left off with a firm tendency, but banks and English railways were disposed to flatness, and the other discriptions were without material average alterations. Of the English railways, Great Northern declined 1, ditto (A stock) ½, Midland ¾, Great Western, North-Western, and South-Eastern ¼ each, and Metropolitan a further ½. In colonial, Grand Trunk of Canada and ditto (4th preference of both descriptions) advanced ½ each, and Buffalo and Lake Huron further ⅜. In foreign, Lombardo-Venetian improved ⅛, and Dutch-Rhenish relapsed ½. In American, United States (5-20's) recovered ¼, and Erie (debentures) receded ¼. In British mines, Wheal Buller improved 3, Grambler and South Wheal Frances 1 each, and Grenville ¼. In foreign mines, Frontino Gold and Linares improved ¼ and ½ respectively.

TUESDAY, Nov. 14.—In the share market to-day the transactions were not numerous, and were about equally divided between dealings for money and for account, this being the day of the preparation for the account in the middle of the month. The variations from yesterday's closing prices were generally in advance, and English railways and mines, particularly the latter, showed a considerable tendency to improvement, foreign railways and American securities being the only exceptions to the general upward tendency. Of the English lines, Great Northern (A stock) and Midland recovered ½ each, and Great Western and North-Western ¼ each; Manchester, Sheffield, &c., advanced 1, North British, North-Eastern (Leeds), and ditto (York) ½ each, and Lancashire and Yorkshire ¼; and Chatham declined ½, and Metropolitan a further ½. In colonial, Great Indian Peninsular recovered ½; Bombay and Central India, Eastern Bengal, and Madras (5 per cent.) improved ½ each, and Grand Trunk of Canada a further ½; and Great Western of Canada (new shares) receded ⅛. In foreign, Lombardo-Venetian relapsed ¼. In American, United States (5-20) relapsed ¼.

WEDNESDAY, Nov. 15.—In the share market to-day the actual transactions were again few, and in British mines there were several instances of a further rise; all the other descriptions, except English and foreign railways, also closed with average firmness. Of the English lines, Metropolitan recovered ¼; ditto (new) receded ⅛; and Lancashire and Yorkshire and Midland relapsed ¼ each, and Great Western ½. In colonial, Scinde, Delhi (stock), and Punjaub improved ¼ each; Grand Trunk of Canada relapsed ½; and Great Western of Canada declined ⅝. In foreign, Great Luxembourg and Dutch Rhenish (paid up) advanced ⅜ and ½ respectively. In American, Erie shares (paid up) declined ¼. In British mines, Hingston Downs improved ¼, Wheal Trelawny ⅛, and Stray Park 1; and South Wheal Frances further advanced 7, Wheal Seton 2½, North Roskear 2, East Bassett and East Caradon 1 each, Clifford Amalgamated ½, and East Carn Brea and Marke Valley ¼ each. In foreign mines, Frontino Gold improved ½, and St John del Rey further 2; and Washoe Gold (of both descriptions) declined ¼ each.

THURSDAY, Nov. 16.—In the share market to-day there was again a flat tendency in English and colonial railways and American securities, but mines, banks, and miscellaneous shares again closed with firmness. Of the English lines, North London improved 1; Metropolitan relapsed 1; and ditto (Extension) receded ⅛, ditto (new) a further ⅜, Lancashire and Yorkshire a further ¼, North Staffordshire ½, Great Northern 2, ditto (A stock) and Midland (Birmingham and Derby) 1 each, and Great Western a further 1. In colonial, Buffalo and Lake Huron improved ⅜; and Great Western of Canada declined 3, ditto (new shares) ¼, ditto (paid up) a further ¼, and Grand Trunk of Canada a further ½. In foreign, Antwerp and Rotterdam declined ⅛, West Flanders improved ⅛, and ditto (preference) are now quoted ex dividend. In American, United States (5-20) improved ¼, and Illinois Central (sterling bonds) declined 1, ditto (shares) ½, and Erie debentures ¼. In British mines, Grambler advanced 1, Grenville ½, South Condurrow ¼, Clifford Amalgamated further 2, North Roskear a further 1, and East Barn Brea and Marke Valley a further ¼ each; and West Chiverton declined 1½. In foreign mines, Washoe Gold (of both descriptions) recovered ⅛ each; and Cape Copper and Cobre Copper advanced ¼ and 2 respectively.

FRIDAY, Nov. 17.—There was little business in the railway market to-day, and the tone was dull. Metropolitan stock continued heavy, and experienced a fresh reduction of ½ per cent. Lancashire and Yorkshire and London and North-Western receded ⅛. Great Western, on the other hand, improved ⅛. Grand Trunk of Canada (4th preference), Great Indian Peninsula Railway, and Great South of India were flat. Great Western of Canada and Indian Branch shares also exhibited a drooping tendency. West Flanders were firm.

DEANE'S TWO-HOLE BLACK PENS which are unequalled for the durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped.

"G. and J. Deane, London bridge,"

and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed.

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

WESTERN GRAMMAR SCHOOL, Brompton, S.W., in union with King's College, London.—The system pursued at this school is eminently practical, and calculated to prepare pupils for the competitive examinations and the various pursuits of life. Three pupils successfully passed the Oxford Local Examinations this year. The Head Master takes a few boarders.—For terms and prospectus apply at the school.

TO GENTLEMEN SEEKING preparation for Woolwich, the Civil Service, and the Line.—A Graduate of Oxford, who has had long experience in preparing for the competitive and University examinations, and has three students at present, wishes to receive two more. Delightful situation, great educational and domestic advantages, and moderate terms.—Address, L. L. D., 9 Leighton rescent, Tufnell park West, N.W.

PROPRIETARY SCHOOL, GRAVESEND.

Head Master, Mr M. GUTTERIDGE, B.A.

The course of study combines the main features of the best middle schools with the distinctive characteristics of our ancient classical schools, and is such as to fit a boy either for business or professional life. It includes the Classics and Mathematics; History, General and Sacred; Geography, Physical and Political; English Grammar and Composition, Spelling and Arithmetic, Drawing and French and the practice of good Handwriting.

Pupils are prepared for the Civil Service Examinations, for the Oxford and Cambridge University Local Examinations, and for Matriculation at the London University.

For terms and prospectuses, apply at the School.

COFFEE ESTATES FOR SALE,

comprising about 1,370 acres of Plantation, nearly the whole of which is in full bearing, and very extensive tracts of Jungle, Forest, and Grazing land, estimated to comprise several thousand acres.

To be Sold by Auction, unless previously disposed of by private contract, at Bombay, early in the month of January, 1866, subject to the conditions to be then and there produced, to be first offered in the entirety, and, if not sold, in the following eight lots:—

Lot 1.—All that very valuable Estate called "LACKADIE,"

Situate at the head of the Tamboocherry Ghat, about 30 miles from Calicut, comprising about 250 acres, more or less, of Coffee in full bearing. Also, a large tract of rich Forest and Grazing Lands.

The Estate is well supplied with permanent buildings, and the most approved machinery, including a first-class water-wheel; is thoroughly roaded and well laid out.

Lot 2. THE CULLOOR ESTATE,

Situate about 2½ miles from the head of the Tamboocherry Ghat, and connected therewith by a good road, comprising about 290 acres, more or less, of coffee in full bearing, a large and very rich forest and grazing lands.

The estate is well furnished with permanent buildings, and the most approved machinery, driven by water power for curing the crops.

The habits of the plant on this estate is most luxuriant, and its bearing capacity of the highest order.

The crops of the estate may be safely estimated at 10 cwts an acre.

Lot 3.—THE CHARLOTTE ESTATE,

Is a young and very promising Property, cut out of the Harnooth Valley, is distant about 4½ miles from the head of the new Tamboocherry Ghat, and is connected therewith by a good road. The Estate contains about 150 acres, most of which is in bearing, and possesses excellent permanent buildings.

Lot 4.—THE ANNETTE ESTATE,

Is bounded by the Culloor and Harnooth, and comprising about 240 acres in full bearing, a large tract of unopened Forest and some Grass Lands, and is furnished with all requisite buildings and machinery.

Lot 5.—THE ADELAIDE ESTATE,

Comprising about 180 acres of Coffee in full bearing, and sundry Swamps and Grazing Lands.

This estate is well furnished with permanent buildings of all kinds of the best description, and is amply supplied with the best machinery and working plant.

It is opened on the most productive description of soil in the Wynsad, and is in all points second to no estate yet opened in the Wynsad District.

The first opening was made in 1857, and the last in 1859, so that it is just acquiring its fullest bearing capacity.

The crop of 1863-4 was 110 tons, and the crop now on the trees is estimated at 130 tons.

Lot 6,—THE FIELD ESTATE,

Comprising about 150 acres of coffee in the most luxuriant and promising state of growth, is well supplied with permanent buildings, machinery, and working plant, is well roaded, and otherwise well laid out. The estate is formed on the same description of soil as the Adelaide, has been well managed, and will become a very productive property.

Lot 7.—THE WALLACE ESTATE,

Opened in 1859, comprising about 150 acres of Coffee in full bearing, and a large stretch of Jungle, Forest, and Bamboo and Grazing Lands. It is well roaded and well laid out, and possesses a first-class bungalow and other permanent buildings; also, in conjunction with the Field Estate, the most approved machinery and buildings for curing the crops.

Lot 8.—TWO UNCULTIVATED JUNGLES, called "Palakomda" and "Muddikah Mullil," of fine forest land, and in the vicinity of the above estates.

For particulars, and to view the Estate, apply in London to Messrs Hughes, Masterman, and Hughes, solicitors, 17 Bucklersbury, and to Messrs Flux and Argles, Solicitors, No. 1 East India Avenue; and in Bombay to Messrs Kelly, Hore and Manisty, and to Mr James Boosey, on the Adelaide Estate.

EDUCATION IN GERMANY.—

ANGLO-GERMAN ESTABLISHMENT, Bonn-on-the-Rhine, founded in 1847.—Herr THOMAS prepares Young Gentlemen for the Army, Navy, Civil Service, and Mercantile pursuits. German and French only are spoken in the establishment, where the Pupils enjoy all the comforts of an English home. The highest references given.—For particulars, apply to the Director, THEODORE THOMAS. Baumschule Allée, Bonn.

DR DE JONGH'S
(Knight of the Order of Leopold of Belgium)

LIGHT-BROWN COD LIVER OIL,

Prescribed by the most Eminent Medical Men as the safest, speediest, and most effectual remedy for CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS, Is incomparably superior to every other kind.

Dr EDWARD SMITH, F.R.S., Inspector of Poor Laws, Late Physician to the Hospital for Consumption and Diseases of the Chest, Brompton, in his Work on "Consumption," writes: "It is impossible in private practice to determine whether the Oil which we prescribe is genuine Cod Liver Oil or not, and hence we think it a great advantage that there is one kind of Cod Liver Oil which is universally admitted to be genuine—the Light Brown Oil supplied by Dr de Jongh."

Dr BARLOW, Senior Physician to Guy's Hospital, states: "I have frequently recommended persons consulting me to make use of Dr de Jongh's Cod Liver Oil. I have been well satisfied with its effects, and believe it to be a very pure oil, well fitted for those cases in which the use of that substance is indicated.

Sold only in capsuled Imperial Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; by respectable chemists.

Sole Consignees,
ANSAR, HARFORD, and CO., 77 Strand, London, W.C

HARPER TWELVETREES'

(Limited.)
Imperial Works, Bromley-by-Bow, London. Capital, £200,000 in 20,000 of £10 each. First issue of 10,000 shares. Deposit on application, £1 per share. Bankers,—Union bank of London, Princes street. WHERE SHALL WE DINE?

Go to DEACON'S COFFEE HOUSE, WALBROOK, where the "Economist" and all other newspapers in the world are taken in and file Directories for every county in England, also for Canada and Australia. Advertisements inserted in any papers English or foreign.—Wm. Howell, proprietor.
N.B.—Lists of Heirs at Law, Next of Kin.

Just published, 1s., Illustrated, Second Edition,

THE HEAD AND HEART LEGACY.

"Possessed of a Head, and a Heart, and a business education, I should not be grieved did circumstances compel me to take thee by the shoulder, pat thee on the back, bless thee, put £50 in thy pocket, and say to thee, Go, my son, thou art a rich man, wherever thou goest prosperity will be in thy track.'"—HEAD AND HEART LEGACY.

OPINIONS OF THE PRESS.

The book is clear and simple, highly moral in tone, and most encouraging to the young aspirant. It is interesting as a biographical sketch of a life struggle, and contains many observations on men and manners which it would be profitable for every one to know who has the least ambition or desire of having a soul above his buttons, and a good account at the bank."

"This is a work quite sui generis. It is quaintly written, but is full to an overflow of the wisdom of experience and the impulse of virtue. To all who have 'heads and hearts' we commend this singular 'legacy.'"

"The author of this legacy has put together some very touching stories of his chequered life intending to stimulate the rising generation to good conduct and honourable dealing, by showing how an untaught boy rose step by step to a high position. He enjoins patience and vigilance, honesty and sobriety, in every path of life, and teaches what is so little practised—that a man should do what his hands find for him to do. The lessons are alike honourable to the head and heart of the writer."

"Besides the autobiographical sketch, Pamphilius supplies a variety of spirited literary specimens, the principal of which, however, is an ingenious manual of French Grammar, as used by the author when teacher of the French language, designed for the use of self-instruction."

Any one acquainted with the current literature of the metropolis, or its littérateurs, will have no difficulty in identifying the author of this interesting volume. The pages abound with sensible observations, attention to which will be found absolutely necessary to gain even a moderate share of success in this busy world of ours."

Ward, Lock, and Tyler, 158 Fleet street; and all booksellers.

PRACTICAL OBSERVATIONS

on the CAUSES and TREATMENT of CURVATURES of the SPINE. Third edition, price 6s.
AND
Just published, second edition, price 1s 6d,
CASES and OBSERVATIONS illustrative of the beneficial results which may be obtained by close attention and perseverance, in some of the most compromising instances of Spinal Deformity; with numerous Engravings. By SAMUEL HARE, F.R.C.S., &c.

"We unhesitatingly commend this work as a truthful and trustworthy statement of the power of scientific surgery and medicine over some of the most grievous hindrances to human activity and industry."—MEDICAL GAZETTE.

"Mr Hare is, we think, a sound and successful practioner.'—MEDICAL CIRCULAR.

"The author has had much success in his plan of treatment, and we are of opinion that the principles on which he acts, in the treatment of these affections, are correct."—LANCET.

"Mr Hare may take credit to himself for having effected much good in the treatment of the cases described."—BRITISH MEDICAL JOURNAL.

London: John Churchill; and may be had of all booksellers.

SECRETARY (pro tem.)—B. Lambert, Esq.
Temporary Offices—City Bank chambers, Threadneedle street, London.

PROSPECTUS.

This Company is formed at the express solicitation of merchants and others engaged in trading and monetary operations in the Ottoman Empire, for the purpose of extending to the mercantile community of Turkey that legitimate aid, which, in more favoured countries, is rendered to commerce by well-conducted banking institutions.

The enormous development of the trade of Turkey within the past few years, has not been met by any continuous increase of banking facilities; and when it is considered that the total imports and exports have risen from £20,000,000 in 1852 to upwards of £80,000,000 in the year 1864, some idea may be formed of the vast and profitable field which is open to a bank, conducted upon English principles, and managed by gentlemen possessing a local and practical knowledge of the country.

In the year 1851, the total number of vessels that entered and cleared at the port of Constantinople was only 13,069, tonnage 2,397,316; while in the year 1864, the number rose to 48,949, tonnage 7,433,063. At the port of Smyrna, the total imports and exports in the year 1854 amounted only to £2,464,525; while in 1864 they increased to £8,668,502. In these great centres of Turkish commerce, there is but one joint stock bank in existence.

The Ottoman Bank (La Banque Impériale Ottomane) is the only bank in Turkey, and the profitable nature of its operations is evidenced from the price of its shares, which with £10 paid are quoted at £16, while the last dividend amounted to 15 per cent. per annum.

The operations of the Bank of Turkey will be strictly confined to banking business, to the exclusion of anything connected with the business of a merchant. It will assist commerce, while at the same time, it will avoid on its own part, all interference with, or competition in trade. This feature in a bank for Turkey is of peculiar value and will secure at once for the Company a clientelle of the most unexceptionable and profitable character.

The bank will afford facilities to merchants in this country and on the continent, for the negotiation of their drafts on correspondents in Turkey.

Applications for shares may be addressed in the annexed form to the Directors, and copies of the prospectus may be obtained at the offices of the Ottoman Company, 20 Threadneedle street, or at the offices of the Bankers, Brokers, and Solicitors; but no application will be considered unless a deposit of £1 per share on the number of shares applied for has been paid.

Copies of the memorandum and articles of association may be obtained at the offices of the Solicitors, or at the temporary offices of the Bank. Copies will be forwarded by post, without charge, on application to the Secretary.

FORM OF APPLICATION FOR SHARES.
(To be retained by the Bankers).

No.——

To the Directors of the Bank of Turkey, Limited.

Gentlemen,—Having paid to your bankers the sum of £ , being a deposit of £1 per share on shares in the above Company, I hereby request that you will allot me that number, and I agree to become a member of the Company in respect of such shares, or in respect of any less number you may allot me, and to execute the Articles of Association when required; and I request that my name may be placed on the Register of Members for the shares so allotted.

SECRETARY (pro tem.)—Charles Muspratt, Esq.
Temporary Offices—30 Nicholas lane, Lombard street, E.C.

ABRIDGED PROSPECTUS.

This Company has been formed for the purpose of purchasing, selling, leasing, advancing or borrowing money on mortgage of, and generally dealing, in freehold and copyhold land and estates, in Great Britain, in a more extensive and comprehensive manner than has yet been adopted by any existing company.

Provisional contracts have been entered into for the purchase of four estates; one at Fulham, within three and a half miles of Hyde Park corner, about 40 acres in extent, and offering most eligible sites for building operations. The second estate is known as the Banstead Park estate, close to Banstead, Surrey, only 16½ miles from town, and consists of 350 acres. The London, Brighton, and South Coast Railway Company have a a branch near the estate, and, ultimately, there will be a station upon the estate. The third estate is at Lowestoft, in Suffolk (which has become the most fashionable watering place in the East of England), and known to be the finest site in the town, commanding most beautiful views, and in every respect well adapted for building purposes; and the fourth estate is the well-known Cosham Park estate, near Portsmouth, and comprises 34 acres of park land, with mansion. It has been secured on very advantageous terms, and offers have been made to erect houses thereon as soon as the Company has laid out the roads and drainage.

Full prospectuses and forms of application for shares may be obtained from the bankers, solicitors, brokers, or at the temporary offices of the Company.

Application for shares must be accompanied by the deposit of £1 per share, to be paid to the Bankers of the Company. Should no allotment be made, the deposit will be returned without deduction or delay.

THE REAL ESTATE

CORPORATION (Limited).

Notice is hereby given, that the LIST of APPLICATIONS for SHARES in this Company will be Closed this day, the 18th, for London, and on Monday, the 20th, for the country.—By order.

C. MUSPRATT, Secretary pro tem.
Temporary Offices, 30 Nichols lane, Nov. 15, 1865.

KINGDOM OF ITALY.

CONTRACT for TEAK.

Notice is hereby given, that tenders will be received on the 4th December next, at noon, in the Auction room, near the principal entrance of the Royal Dockyard at Genoa, for the supply of 1,000 Cubic Metres of first-class quality MOULMEIN TEAK, for the Royal Italian Navy.

The conditions of contract, measurement, description of quality, and terms for delivery of the wood required, may be seen at the Commissariat General in the Royal Dockyard of Genoa, and also at the Italian Consulate in London.

London, 13th November, 1865.

For the Italian Consul General,
ROBERT A. HEATH, Vice-Consul.

THE LONDON ENGINEERING AND IRON SHIPBUILDING COMPANY (Limited),

60 Fenchurch street, London, E.C., Nov. 7, 1865.—Notice is hereby given, that the ANNUAL GENERAL MEETING of the shareholders of this Company will be held at the Offices of the said Company, at their Works, situate at the Isle of Dogs, Poplar, in the county of Middlesex, on THURSDAY, the 23rd day of November instant, at One o'clock p.m. precisely, for the purpose of receiving and adopting the Directors' report and accounts, the declaration of a dividend, and the general business of the Company.—By order of the Board of Directors,

ALFD. E. LOVELL, Secretary.

LOANS ON DEBENTURES.

JOHN BROWN AND COMPANY

(Limited).

Capital, One Million, in 10,000 shares of £100 each.

The Directors are prepared to receive LOANS, for periods not exceeding seven years, at five per cent., on security of their DEBENTURES.

The security consists of uncalled capital, to the extent of £600,000, with all the extensive and valuable property belonging to the Company. It affords a most ample and safe investment for trust and other moneys, all the shares being held by responsible persons. Interest payable half-yearly.

Apply to the Secretary, at the Company's Offices, Atlas Steel Spring and Iron Works, Sheffield.

JOHN HEWETT, Secretary.

THE EAST INDIA IRRIGATION and CANAL COMPANY.

Notice is hereby given, that the Ninth Ordinary General Meeting of the Shareholders of the East India Irrigation and Canal Company, will be held at the Company's offices, 8 and 9 Queen street place, Southwark bridge, in the City of London, on Thursday the 30th day of November instant, at One o'clock precisely, for the general business of the Company, and for the purpose of confirming a declaration, made by the Directors, of forfeiture of certain shares for nonpayment of calls.

The Transfer Books of the Company will be Closed from the 20th to the 30th instant, both days inclusive.—By order of the Board of Directors,

JOHN WESTWOOD, Secretary.

8 and 9 Queen street place, Southwark bridge, London, E.C., November 4, 1865.

THE MADRAS IRRIGATION and CANAL COMPANY.

Notice is hereby given, that the Thirteenth Ordinary General Meeting of the Shareholders of the Madras Irrigation and Canal Company will be held at the Company's offices, 8 and 9 Queen street place, Southwark bridge, in the City of London, on Wednesday the 29th day of November instant, at One o'clock precisely.

The Transfer Books of the Company will be Closed from the 20th to the 29th instant, both days inclusive.—By order of the Board of Directors,

JOHN WESTWOOD, Secretary.

8 and 9 Queen street place, Southwark bridge, London, E.C., November 4, 1865.

EAST INDIAN RAILWAY COMPANY.

The East Indian Railway Company is prepared to receive Tenders for the supply and delivery of the

IRONWORK,

The Political Economist.

TO ADVERTISERS.—To secure insertion, advertisements for the ECONOMIST must be forwarded to the office by 5 o'clock p.m. on Fridays.

The Investor's Manual *is now sold separately, price 9d stamped, 8d unstamped. If taken as a* Supplement *to the* Economist, *it remains at its former price, 6d. In addition to the information formerly given, it gives a concise summary of the Reports of the Companies for the present year as will enable Investors to judge of their position.*

THE REDUCTION IN THE BANK RATE OF DISCOUNT.

There can be no doubt that after the sudden and unexpected increase in their resources, the Bank of England were quite justified in reducing their rate of discount. No one contests it, and therefore it is needless to argue it. It is more useful to correct over-sanguine anticipations which natural but mistaken parallels suggest.

There is a great difference between this year and last. Last year at this time industry and trade underwent a signal diminution. The credit of the country was not radically hurt; there was no panic; but, nevertheless, credit was *revised*. A good many people who used before to enjoy excellent credit afterwards only enjoyed moderate credit, and some got altogether out of credit. There was a period of suspense last year in mercantile operations analagous to, though less than, the great periods of languor after 1847 and 1857. But there is no reason this year to expect any lull or any cessation. Credit has not even been talked of; conversation in such matters, the beginning of evils, has not begun. The trade of the country was a little checked, and wisely checked, by the great rise in the value of money; it only waits cheaper money to restore its full activity, and that readiness for business is the greatest antagonist of cheap money.

Secondly. There is great danger in drawing a close analogy between the present times and times even recently past. The capital of the country goes abroad now much sooner than is did formerly. It goes into trade now much more easily and quickly than it did formerly; and therefore that capital is much more closely used up. We must be very cautious therefore of expecting cheap capital when our surplus stock is very small, and the demands upon it very sudden and very great.

Whether the Bank of France was wise in reducing its rate so readily may admit, we think, of question; and in addition to the demands on our capital which we have indicated, there will certainly be a demand of *some* magnitude, though how great is uncertain, for bullion to pay for cotton. On this account we must caution our readers against the sanguine predictions of cheap money which are in the mouths of many, and which the late influx both into the Bank of England and that of France has naturally suggested.

MR GOSCHEN'S ACCEPTANCE OF OFFICE.

As we not long since expressed a hope that office would be offered to Mr Goschen, and that he would accept it, it might seem that we had now merely to express our satisfaction when it has been offered to him and he has accepted it. And, as far as he is personally concerned, there is nothing more to say. Mr Goschen's presage for the future is his history during the last four years; in that time he has written an excellent book on one of the most complicated topics of political economy, in which he had very peculiar means of information; he has made several good speeches, and, what is much more difficult, gained a wide and deep influence in Parliament; he has put himself at the head of the poll in the City of London against a very formidable opposition, and in preference to three colleagues, all much respected and all much older than he is. Such a career as this, though so brief, shows a variety of mind and a stability of character which must gain him future eminence, and which makes present eulogy unnecessary.

We refer to Mr Goschen's change from the City to Whitehall, because it indicates a growing modification in the constitution and structure of our political class which is not always sufficiently observed, and which will produce very grave effects when it has attained its full development. The common sense of Englishmen looked especially for two things in a political class. First, *ease* in money matters. They wished and wish that the emoluments of office, though a good make-weight, and a desirable accessory, should not be the main object of a politician's life. If a man now serve the Queen for money, he had better serve the City. There is far more hard cash to be made by the same mind and the same effort East than West of Temple Bar. Probably, though this is not the time to pursue the subject, we have gone too far in this direction; the usages of our politics and the expensiveness of our society have too much restricted politics to very rich men. But though we may have exaggerated the idea, it was, when limited, an invaluable idea. The first thought in a Minister's mind, at a crisis, ought not to be "Shall or shan't I lose my salary?" It was said that if Mr Pitt had been obliged—as seemed likely—to leave office in 1787, he must have gone back to the Western circuit. Mr Pitt's contempt of money was so well known, that no one suspected him of clinging to office to keep it, or of wishing office to gain it. But all men are not like Mr Pitt, and looking to the upshot of his money matters, it is as well

Digitized by Google

they are not. The sound judgment of Englishmen wisely exacts that conspicuous statesmen shall give security for their political independence by the known possession of a large and sure income. Secondly, we require of our statesmen what a Catholic theologian would call *detachment* in their money matters. They must not be mixed up in the changing money market of the world, nor even much in its shifting industry. At the outbreak of the American war, we remember recalling this to our readers' memories. Here was a case in which one of the most considerable industries in England—what was then thought to be a vital industry—was popularly imagined to be ruined, and was in fact deeply impaired, by a political cause; yet all the political questions relating to it were considered by officials, not one of whom could be suspected of a sinister interest in cotton. Whether Sea Islands were 8d a pound or two shillings did not matter, and was not fancied to matter, to a single member of Lord Palmerston's Cabinet. The curious gulf that separates our Treasury from the City is still more useful. Certain French Ministers are said to see a stock-jobber or two every morning: and the large fortunes they gain are attributed to the skilful use of official knowledge and State influence. But the very accusation could not be made in England; the wildest satirists would not so slander any now conspicuous politician. We exact not only ease in money matters, but fixity in money matters, from our statesmen, and we get it.

Till lately, people of large landed property were the only persons who could fulfil these strict conditions. There was little other fixed settled wealth, except the funds; and large fundholders have always been very few: if people want a small interest for a large capital, they generally choose to get it from land, where they get social consequence into the bargain. Most other wealth was, in the French phrase, "mobile," depending on passing events, imperceptible circumstances, here to-day but gone to-morrow; it was, to use the vague, but yet useful word, *unrealised*. Now, a vast mass of industrial property exists which is quite as certain as anything in this world can be certain. A man may have property in railway debentures, canal shares, in nine-tenths of the many thousand securities enumerated in the INVESTORS' MANUAL, and yet be as independent of political events, as careless whether he goes out or stays in, as if he owned half a county. The new sort of realised property is as politically serviceable as the old sort.

Mr Goschen is an instance to prove that it is even better, and this is his exceptional peculiarity. He comes out of the City to take office, and he brings to office what nothing but the City could have taught him. There is a tinge of the amateur about every man of business who has not lived by business. There is a want which is hard to describe and impossible to define about him. A coarse attorney once said of a delicate advocate fresh from University honour, "Ah, dear "me! he is a good young man, but he has never tasted blood." And a certain indistinctness, a certain tendency to fall short on a sudden and when you least expect it, a diffidence at heart often contrasting with an outward audacity, characterise as a rule and as a class those who have not known real business—the getting a livelihood by business. Those whose fortunes, great or small, have depended on the correctness of their decisions, acquire a correct decisiveness which does not waste time in irrelevant details, which is often even careless of accessory order, but which smites to the root whatever is most critical and needful in the topic on hand. It is because Mr Goschen has had in high perfection this consummate training, that we expect far more from him than if he had been reared in the external technicalities of a public office, or belonged to the rank of the county aborigines.

THE LESSON OF THE INCIDENT AT VALPARAISO.

IT is easy to write denunciations of over-much meddling, or even to find arguments for a steady policy of non-interference, but it is not so easy to see how, without interference, the high police of the world is to be maintained. If all the states of earth were tolerably equal in power, there might be no necessity for any such police, for the consequences of outrage would be always too serious lightly to be risked. Unfortunately, however, the disproportion in the strength of states is very great, and it happens that some of the very weakest offer great temptations to very powerful opponents. Turkey holds the gate of two continents, Belgium the French side of the Rhine, Holland the great exit of Germany towards the sea, Egypt the key to India, Peru the manure depot of the world, and Chili the most solvent treasury among the Spanish Republics. If the protection of the "high police" were withdrawn, any one of these states might be attacked with impunity, and if we may reason from the incidents which have recently occurred at Valparaiso, would be so attacked. There was no apparent reason why Spain should declare war on Chili. Spain had no interest in so doing, and Chili had given no valid provocation. Admiral Pareja, in his statement of grievances, had nothing more serious to allege than that Chili had, in the recent dispute between Spain and Peru, declared herself neutral and made coal contraband of war. It may be admitted frankly that as Peru did not want coal and Spain did, this amounted in practice to an act of friendliness to Peru, but such friendliness was perfectly natural, and the act itself quite within the limits of the legal right of Chili. Indeed, the Spanish Envoy at Santiago, M. de Tavira, himself thought the conduct of Chili excusable, and put his signature to a final and apparently fair arrangement of all matters in dispute between his Sovereign and the Republic. No Spaniard, however, can ever be quite just to a revolted colony, and M. Pareja, the admiral commanding the Spanish fleet in the Pacific, felt a trifling injury done by Chili as he would not have felt a greater one inflicted by any other power. He therefore took his squadron to Valparaiso, cancelled M. Tavira's arrangement, and demanded that the Chilian Government should first salute his flag with 24 guns, in acknowledgment of wrong-doing, and then pay 60,000*l*. being the difference between the cost of coal at Valparaiso and San Francisco. The Chilian Government refused, and had the "high police" been available, the matter would have been referred to arbitration. Unfortunately, none of the greater powers had a fleet at hand, and Admiral Pareja, in spite of the remonstrances of all the European Ministers and the Minister of the United States, declared Valparaiso blockaded, and threatened, if his demand were not conceded in forty-five days, to use still stronger measures.

The blockade was, however, strong enough. The policy of Chili in matters of commerce has not been so unwise as that of some of her sister Republics, and her external trade, though in foreign hands, is very large. Her exports in 1860, the latest official statistics before us, amounted to 5,000,000*l*, and her imports to little less, and the trade has since that time increased to nearly 16,000,000*l*. Her credit is excellent, the debt being quoted, with the Spanish fleet in the harbour, at 73, and she is engaged in very large public works, all executed by time contracts. The blockade of course arrested this trade, stopped the arrival of ships already entering the harbour, threatened to make the execution of time contracts impossible, and caused a rush upon the banks for specie. They were obliged to suspend payment, and so complete became the monetary disorganisation, that in several of the mines the labourers appear to have abandoned work because hopeless of their wages. A great commerce which belonged to Europe rather than to Chili is seemingly brought to a close, in order that a great country may not feel that it has suffered an unintentional slight from a very little one. Moreover, Chili, conscious of her wealth, and doubtful of the protection of the "high police," has issued letters of marque, and thus opened questions which it may be not only difficult, but impossible to close. Even if it be true, as reported, that Spain has accepted the mediation of the Great Powers, and that Admiral Pareja will wait for orders before he bombards Valparaiso, almost irreparable mischief will have been done. Not only must Chili bear the actual loss inflicted by the disturbance to her trade, and the inevitable compensation to her contractors, but the revelation of her weakness will induce her to purchase and keep up a fleet, and thus inflict a new, and it will probably prove a useless *annual* expenditure on her treasury. Her credit will diminish, and thus a single high-handed act will have injurious effects which may last for generations.

It is extremely difficult to see how occurrences of this kind can be prevented except by maintaining the undefined and perhaps illegal, but hitherto very effective, authority exercised by the Five Powers. From 1815 to 1854 these Powers by virtue of an arrangement, acknowledged but never precisely formulated, contrived to maintain the peace of the world, to establish as it were an informal tribunal to which all minor quarrels could be referred. Of late years, however, owing partly to mutual jealousies, partly to the rise of ideas about

non-interference, and partly to the growth of the mighty American Republic—a new power of immense force not yet assimilated into the world's system,—this authority has declined and no other has taken its place. Indeed, it is doubtful if any other can, for no other would have the material weight necessary to make its decisions respected. The change has not been one for good, and we question whether the great politicians of Europe will not in the end find it easier to admit the United States, and with that addition to their strength revive the old irregular, illegal, but still most efficient tribunal. It is, we are well aware, exceedingly difficult at the present moment to revive it, as the establishment of a regular Court of Arbitration, so often recommended by Mr Cobden, would be resisted both by England and America; by America, from fear of prejudice excited by her Republican institutions—by England, from dread of a new system of maritime law. But it must, nevertheless, be possible for statesmen to devise some system under which, while each State is left perfectly independent *when determined to go to war rather than not carry its point*, there shall still be a tribunal to which questions not involving a necessity of war, questions like this between Spain and Chili, could honourably be referred. We at all events do not dream, and have no hope of a day when all possibility of war shall cease; but it is monstrous that in this nineteenth century every difference between States, however trivial, should be brought to the arbitrament of force—that it should, for example, be legal to arrest a trade like that between Europe and Chili in order to recover the price of some coal. It may be hard to devise a remedy, but it cannot be impossible, and it must not be forgotten that while the existing system is unendurable, an agreement between three Cabinets only, those of Paris, London, and Washington, would secure any needful change. Six powers, or indeed eight, must be in accord to frame any new law for land operations, but at sea England and France and the Union, if but once in accord, are absolute. Their faintest hint, for example, if in unison, would have compelled Chili to give reparation, if she owed it, or Spain to abstain from menace, if she were not justified in employing it.

MR MOFFAT ON THE LAW OF BANKRUPTCY.

Mr Moffat, who was Chairman of the Committee of the House of Commons which reported upon bankruptcy last session, and to whom the appointment of that Committee is almost entirely owing, has published in the *Law Magazine* the very clear and interesting address which he delivered at the Social Science Association. In it he describes very lucidly the growth of the law of bankruptcy and its principal enactments at successive times, and sums up by describing what he would recommend in future. In all his ideas we cannot bring ourselves to concur, but we have no doubt that some of them are quite true, and that all have a basis of truth.

There are two topics in bankruptcy—1st, what is to become of the bankrupt himself? and 2nd, what is more interesting, what is to become of the bankrupt's assets? Mr Moffat very justly says, that half the complexity of the discussion, and many of the errors of legislation, arise from not keeping the two questions thoroughly separate. What then should a good code of bankruptcy provide as to the bankrupt? And the answer must, of course, be different in case the bankrupt has committed actual and proveable fraud, or in case he has not done so.

In case of fraud, the committee which sat last session most justly said that the bankrupt ought to be arraigned before and be punished by the ordinary civil courts of this country. There is nothing peculiar in the offence; nothing which needs a special tribunal. A court of Nisi Prius, which is competent to try other cases of fraud is equally competent to try this one. At present, the money of the creditors—the estate which should pay a dividend—is wasted in deciding on the moral qualities of the debtor. When there was a nice classification of certificates the most delicate differences on ethical excellence were daily weighed in the bankruptcy court; how much the bankrupt had been to blame, and how his conduct compared with other delinquents to whom the court had adjudged such and such certificates used to be elaborately argued, and the creditors paid to decide whether the man who had injured them should have a first, a second, or a third certificate. Now these distinctions are abolished, but the essential error remains; the question whether the bankrupt has or has not been fraudulent is decided in a special and expensive court provided for the purpose, and the cost is debited to the bankrupt's assets.

The only excuse for permitting this even for a day is the imperfection of our entire system of criminal procedure. It is no doubt true that if a bankrupt's frauds were left to the common tribunals, many such frauds would pass unpunished. But of all other kinds, even of gross fraud, innumerable cases now go unpunished. We leave it in the discretion of the person defrauded to prosecute or not to prosecute; and most quiet people say "it is bad enough to lose our money, and it "would be absurd to lose our time and labour beside in a mere "effort to punish the wrong-doer." All great frauds as such should be prosecuted by the State as such; and if we had a proper system for accomplishing this in general, we should have no difficulty in the case of a bankrupt. We should be able to punish his misdemeanours on the criminal side of Nisi Prius just as other men's misdemeanours. As we should be glad to see this great reform quickened and brought nearer, we should not mind the gross frauds of a conspicuous bankrupt passing now and then for a short time unpunished, because they are the sort of offences which advertise the subject, which ensure attention, and compel a remedy.

But this is not the most difficult part of the subject. There is here at least a fundamental agreement of opinion. We are all agreed that a fraudulent bankrupt should be punished; we only disagree who is to punish him. The controversy is as to means; we are of one mind as to the end. But as to the non-fraudulent, as to the so-called innocent bankrupt, there is a grave difference of opinion.

The present law, as we all know, not only does not punish an insolvent against whom no legal offence can be proved, but as compared with other debtors it favours him; it says he need not pay though all other debtors must. And this it does, no matter how imprudent, how wild, how reckless the debtor may have been, so long as his misdeeds stop short of absolute legal fraud. Speaking generally and practically, the bankrupt is all but sure to get off, and not to pay his debt, while the non-bankrupt, the honest struggling trader, is obliged to pay his debt. As a rule, the present law says, we will let off any one who for a time cannot pay, no matter (within certain very wide limits) by what absurdities, or by what misconduct, he came not to be able to pay.

The evil influences of this mischievous laxity are to be seen in every corner of our commercial system. "He won't "care much about going through the Court" is a common saying, not used as a grave moral reproach, but only as a mark of venial weakness—as a departure from the first excellence. It is still more common to hear it said of a man who has failed, "Ah, we can trust him now, he is good for three "months at all events." How little it is worth while to look after a bankrupt's estate is matter of common notoriety; no sensible man with a profitable business leaves that business for a day to look after such rubbish.

"The bankruptcy return of last session," says Mr Moffat, "strikingly illustrates the action of the law as regards bank-"rupts. According to that, there appear to have been, in "round numbers, in the year ending October 11, 1864, 7,224 "bankruptcies, the total amount collected being only 677,000*l*, "the official costs upon which amounted to 140,000*l*, leaving "530,000*l* for division among the creditors. It is further "shown that out of these 7,200 bankrupts, 6,600 were made "bankrupts on their own petition, and that, out of these, "5,324 paid no dividend, and in other 848 cases, the divi-"dend was less than 2s 6d in the £. But out of all this vast "crowd of 7,224 bankrupts, only eighty were refused their "discharge on application—a proof either of the marvellous "laxity of the law, or of wonderful honesty in the bankrupts." And it is most just, therefore, to describe the present law as one which *favours* almost all temporarily insolvent debtors by giving them a permanent discharge from such debts as all other debtors have to pay

Against this extreme laxity Lord Westbury and Mr Moffat have commenced a reaction. As is natural with the eager reformers of a great abuse, they wish at once to sweep it away altogether. They say *no* insolvent or bankrupt debtor ought *ever* to be discharged by operation of law. If his creditors voluntarily and of their own liking give him a discharge, well and good, but the law has nothing to do with it. The business of the law, they say, is to enforce contracts and not to amend contracts. The debtor said he would pay, and

Digitized by Google

if he is able to pay he should pay. The law should make no distinction between property acquired after bankruptcy and property acquired before bankruptcy, all should be alike liable to the payment of debts; the law should take all a man has no matter after what lapse of time. As Lord Westbury puts it, "on a man becoming bankrupt, grant him, on his surrender, "protection from imprisonment for debt (so long as that ab- "surdity continues), but let his future estate remain liable to "his debts until he gets a voluntary discharge from his creditors. "Let it be his business to obtain such discharge. If he does "not succeed in obtaining a discharge from all his creditors, "let him stand, as to his future estate, in the shoes of those "creditors who have signed his discharge. All other enforce- "ment of penal law, or infliction of penalties, is a mistake. "At present, two separate functions are confounded, the civil "and the criminal. The Court of Bankruptcy properly has "but one function, the collection and distribution of the "debtor's assets, present and future. The law, as it stands, "first assumes that it is its duty to provide the honest bank- "rupt with a discharge. It has no duty, but having begun "with this false principle, it is then entangled in the necessity "of inquiring into the man's honesty or dishonesty, by artificial "rules, which it has constructed for this purpose. All this is a "gross mistake, and has been the fruitful source of the expense, "uncertainty, and dissatisfaction that now attend the adminis- "tration of the bankrupt law."

We fear this sweeping reform, like most sweeping reforms, would be hard to carry. Like most of such measures, it promises much, but like them also, it might do much which it does not promise If carried, it would kill many tares, but might it not also destroy some wheat? The ordinary mercantile mind shrinks, and is likely to shrink, from a change so instantaneous and so contrary to its inbred notions. Does it shrink justly? Is there any foundation of justification in any case for the favour to insolvents which our law now makes it a rule in all cases?

We believe that there is such a justification, and that it is this. In matter of law, the creditors have it entirely their own way; but, in matter of fact, the debtor has it very much his way. He is the master of the situation at the critical moment. After adjudication, after any declaration of insolvency, he is of course nobody; his estate is or ought to be taken completely out of his hands. But the instant on which the dividend particularly turns is commonly then past. The bankrupt has known, or suspected or feared, or apprehended his insolvency months before. In ninety-nine cases out of every hundred, if he had suspended payment two months earlier, he would have paid twice as much. Every banker knows that the first loss is the least, and there is a further maxim that no banker has ever been ruined by a bad debt, but hundreds have been ruined by steps taken to retrieve a bad debt; in order to get back money already lost, they part with more, and more money still good, and so are ruined. The same principle runs through the whole of trade. When a man's affairs are once in real difficulty, when he can only pay 15s in the pound, he commonly has not capital to retrieve them. The more business he does, the worse he is. He naturally catches at the most promising business, that which will bring most in least time; and this is usually the sort which employs most capital for that time. Day by day the strain augments. Bills that come due have to be met. They cannot be met by good means, and so they are met by bad means. Goods are pawned in the hope the money so gained may relieve everything, or at any rate stave over the crash till something else retrieves it. At last, after months of ineffectual and painful struggle in the best cases, and of wild and reckless gambling in the worst cases, the trader fails, paying two and sixpence in the £, having, during the interval, lost *for his creditors* 13s 6d in the £.

The creditors have no remedy. All that they can do after the critical time is useless to mend what the debtor misdid during the critical time. Months of after care would not approach to curing the calamitous errors of former single moments. But though they can do nothing, the law can do a little. The law has, as we have seen, a favour to bestow on the debtors, and it should bestow it on those who have done their duty in the greatest measure, and in contrast to those who have neglected their duty. The great test of a debtor's conduct is the state of his affairs. How much can he pay? If he can pay much, it is next to certain he stopped early; and if he pays little, he doubtless went on more or less recklessly and faultily after he knew he was insolvent. We would propose to graduate the favour of the law towards the debtor according to a scale of comparative demerit or merit to be tested by results. We say let the future property of a creditor

Who pays 15s	in the £	be free	from liability	at once.
— 10s	—	—	—	after three years.
— 6s 8d	—	—	—	six —
under 6s 8d	—	—	—	ten —

or some similar scale. The law will then have given its best aid to the persons whom it ought to aid, the bankrupt's creditors, for it will have made it the plain and palpable interest of the bankrupt to make his estate good and pay much, and not let his estate waste away and pay little.

If this scheme were adopted as to the bankrupt's after acquired property, and the person of the non-fraudulent bankrupt were freed as that of other debtors from all restraint, the law would have done all that the law can do as far as he and his liabilities are concerned. What we would propose to do with his assets, and how far we coincide with the valuable suggestions of Mr Moffat on that subject, we will at an early opportunity endeavour to explain.

SPAIN AND ITS FINANCE.

At the present time, when the wanton aggression made on Chili by Spain is attracting universal reprobation, it will not be amiss to inquire into the present position of Spain. We have seen that country successively engaged in costly operations in Morocco, in St Domingo, and in Peru, and it is natural to expect that matters must be well ordered at home to justify such activity abroad.

To aid us in this task we have before us two reports, the one from Mr West, the British Secretary at Madrid, the other from Mr Dunlop, the British Consul at Cadiz; and it appears from both of these reports that there exist satisfactory features in the general position of Spain during late years, which, were it not for an unfortunate policy in fiscal and commercial matters, would afford just grounds for congratulation and hope.

As regards population, the census of 1850 gave the number as 10,942,280, whilst the census of 1857 increased that number to 15,464,340, and as the effect of this increase Spain is now reported to produce 66 millions of hectolitres of grain in place of 38. The superficies of the continental provinces and of the Balearic and Canary Islands is calculated at 126,759,000 acres, but of this enormous extent, after deduction for mountain and waste lands, 60,971,200 acres are stated to be still unproductive. Of the productive lands, 37,500,000 acres are stated to be under grain cultivation, but the actual production is small, averaging, according to Mr West's calculation, about 10 bushels per acre, a result which he attributes to paucity of labour, to waste, to deficiency in internal communication, and to want of irrigation.

The attention of the Spanish Government appears to be directed to the improvement of internal communication, and during the years 1861 and 1862 nearly three millions sterling of public money were devoted to this purpose. Since the conclusion of the civil war, the Spanish Government have constructed over 10,000 English miles of turnpike roads; whilst between 1851 and 1864 over 3,000 miles of railroad have been opened by public enterprise, assisted by Government subventions. The want of feeders in the shape of roads has, however, acted disastrously on these undertakings, which have as yet comparatively failed in realising a profit to their projectors, and the shares of many of the Spanish railways are consequently worth little more than so much waste paper.

So far, however, there are signs of hope—an increasing population, an increase in the grain production, and systematic attempts to develop and improve the internal communications of the country. It is not surprising, then, to learn from Mr Dunlop, that "the value of land has been raised, "wages as well as agricultural produce have risen in value, "mining districts have been opened up, additional land has "been brought into cultivation.....and the working classes "were never so well off as during the last three or four "years."

Coming now to the consideration of the Spanish revenue, we find that it has largely increased during the last few years, and continues to increase. Mr Dunlop states that in 1822,—the period when the loans were incurred, in regard to which the Spanish Government have since acted in a manner dis

Digitized by Google

astrous to their credit,—the total revenue of Spain was about 6,000,000*l*:—

	£
In 1850 the revenue was	12,722,000
— 1855	14,914,979
— 1860	18,920,000

Besides an extraordinary revenue from the sale of national property of 3,039,247*l*.

And the estimated revenue for 1864-5 was 26,275,932*l*, including a sum of 4,733,736*l* from a like source.

With this increasing revenue the actual deficits of the last twenty years are small as compared with those of many other European countries:—

	£
Deficit previous to 1849	1,082,097
—— 1850 to 1859	3,513,745
—— 1859 to June, 1864	5,900,000
	10,495,842

During this period only one foreign loan for 3,000,000*l* has been negotiated; and the total capital of the public debt of Spain at the close of 1864 was 146,541,760*l*, including the following items:—

	£
Railway subventions	7,652,720
Bonds given in payment for public roads	2,722,590
Stock created for civil and ecclesiastical purposes, in exchange for property sold for the public benefit	17,737,068

These charges, at all events, have been incurred for national purposes; and the nation have something in hand in return. But the total interest on the Spanish national debt only amounts to 3,809,799*l*—a state of things which, were it not for other causes, to which we shall allude on another occasion, cannot be considered as unfavourable in view of the enormous resources of the country.

Such are the principal facts in the position of Spain during late years which are indicative of national prosperity. We have now to reverse the picture, and to show how a perverse and short-sighted policy is affecting the well-being and progress of the nation.

And first, as to the financial position, it is acknowledged that the breach of faith which the Spanish Government have committed towards its creditors, and which has virtually excluded Spain from the great money markets, has negatived the favourable circumstances in which Spain, as has been seen, is at present situated, and has made it impossible for the Spanish Government to raise the loans urgently required by the necessities of the State, the most important of which arises from the course pursued as to the State savings' bank funds.

The Spanish Government have treated these funds, which in January, 1865, amounted to 15,330,000*l*, as a floating debt available for current purposes. In this way the capital has been absorbed, and the period has now come when more profitable investments have diverted money from this channel; a deficit has thus to be made good, and the Government are deprived of a resource which was most convenient in view of the nearly equal balance of the ordinary income and expenditure. This is a principal cause of the present financial embarassment in Spain, but it is one from which the Spanish Government could easily escape, considering the small annual charge for the interest of the public debt (3,809,799*l*), if only they could restore their credit by an honourable fulfilment of their obligations towards the public creditors.

We come now to another cause which is operating fatally as regards Spanish prosperity, namely, the restrictions which fetter trade and intercourse with foreign countries. With an enormously high tariff, the Customs revenue is less than 2,500,000*l*: there is a great excess in the value of imports over exports, and, as the result, there has been such a turn of the exchanges against Spain as to occasion a heavy drain on her specie resources. The navigation laws of Spain, moreover, are stringent and protective, and give a differential treatment to goods imported under the Spanish flag; whilst, as if to negative this protective policy, the high duties levied in Spain on materials for ship-building has established a marked increase in the proportion of exports from Spain conveyed in foreign as compared with national bottoms.

But how has this policy of protection succeeded in so far as Spanish interests are concerned? From every quarter we learn of the failure of the system which has had for its object to stimulate manufactures, by means of protection against foreign competition. The British trade with Barcelona, which may be considered the commercial capital of Spain, has, as Mr West reports, fallen off, and the imports, with the exception of iron and coal, are small. The great trade consists of French smuggled goods. The whole country is affected by a system based upon fraud and venality, by which the financial position of the Government is seriously compromised. The manufacturing industry which formerly existed in many quarters has disappeared, and, with the exception of foundries and refining establishments in the mining districts and a few manufactories of china and crockery, there is no other national industry worth naming. As Mr West states, "manufacture "in this country is synonymous with the creation of monopo- "lies by the imposition of exorbitant Customs dues, and the "enriching of the few at the expense of the many."

It is, however, with the fixed purpose of benefiting this manufacturing industry that the Spanish Legislature persists in adhering to a policy which limits the increased development of the natural resources and productions of Spain, by precluding a natural and beneficial exchange with the produce and manufactures of other countries. It is to be hoped that such a state of things may not be allowed much longer to exist. It is impossible for the example of France to be lost on the minds of thinking men at the other side of the Pyrenees; and although the difficulties which arise from established interests are, perhaps, greater in Spain than in other countries, we have great confidence in the ultimate triumph of the principles of free trade and common sense.

THE COMPULSORY METAGE OF GRAIN IN LONDON.

We beg to call particular attention to two letters, which appear elsewhere, on the claim of the Corporation of the City of London to levy metage dues upon the measurement of grain. A very influential meeting has lately been held in the City of London. Now that the grain duties are levied not by measure but by weight, metage is altogether useless, and the attempts to levy it inflict a severe burden on the corn trade of London, without conferring upon them any compensating benefit.

THE CATTLE PLAGUE.

It was by no means our wish in our article of last week to suggest or hint that the cattle plague was of little importance. On the contrary, we maintained that it was not only of great present but also of permanently recurring importance. Even if it passed away now, very possibly it might recur again; if the Commissioners are right in their diagnosis of the disease, it will be sure to recur again. We objected to the remedies proposed by the Commissioners, because we thought them impossible, and because we thought them futile; we thought they could not be adopted, and, that even if adopted, they did not suit the occasion. They were remedies for a single paroxysm which if cured would not be repeated. The disease, according to their own description, was one which was almost sure to hang about us and to return to us times without number.

But we were anxious to impress on our readers that the disease was of grave magnitude, and the returns last issued certainly confirm it:—

In the week ending Nov. 18, there were attacked...	2,669
— Nov. 4 — ...	1,765
	904

being an increase of more than 50 per cent.

The table appended to this article shows the whole details, both in what new districts the disease has gained intensity, and in what old districts it has gained or lost influence.

The only true remedy is, as we observed last week, *cure*. The Order in Council, just consolidated and amended, only prevents, or endeavours to prevent, the communication of infection in extreme and marked cases, and so is only auxiliary to cure. The system of the Government does not, like that of the Commissioners, profess to prohibit the disease; it only aids the remedies for the disease. A still more important step has been taken by several very influential noblemen and gentlemen, who formed a society to investigate, encourage, and apply the appropriate remedies for the disease. If we once understand that the disease is very dangerous, and also that its only remedy is cure, the first step will be over. Most likely it will be cured: till then it never will.

CATTLE PLAGUE RETURNS.

Veterinary Department of the Privy Council Office,
2 Victoria street, S.W., Nov. 23.

These returns do not profess to give the total number of cases which have occurred in Great Britain, but only those which have been ascertained from the official information received at this office from inspectors, whether appointed by the Clerk of the Council or by the local authorities. Column 1 only records the cases reported as having commenced during the weeks indicated by the headings, "back" cases being added to column 2:—

Census Divisions.	1 Attacked. Week ending Nov. 18.	Attacked. Week ending Nov. 11.	Attacked. Week ending Nov. 4.	2 Result of reported Cases from the Commencement of the Disease. Attacked.	Killed.	Died.	Recovered.	Remaining.
1. Metropolitan Police District	216	77	49	6031	2837	2436	181	577
2. South-Eastern Counties	92	137	74	3609	1318	1796	279	216
3. South Midland Counties	211	345	74	1563	574	718	102	169
4. Eastern Counties	212	214	124	3675	1359	1685	251	380

Agriculture.

GAME: IS THE TIDE TURNING?

THERE is a fashion in manners and in morals as well as in clothes and equipages; and, should the price of corn continue to be moderate, and the pressure of public opinion against game-preserving somewhat increase, we do not altogether despair of seeing it become fashionable amongst landowners to deal rationally with their tenants in regard to game. And such a fashion would have the eminent advantage of increasing at once the income and the just influence of the landed gentry.

Foremost in this common sense movement stands the Earl of Southesk. The plague of game on the Southesk estate formed the subject of much complaint on the part of the tenants, and was often commented upon in the local newspapers. At last, things having come to the worst, an amendment took place by means of an arrangement between the Earl and his tenants which is said to be working satisfactorily to both parties. Though the Southesk tenants, as is usual in Scotland, have leases, all their leases contained conditions binding them to submit without compensation to any amount of damage by game. Some of these include rabbits in the same protection as hares and winged game. This estate lies in one of the most fertile and best cultivated districts of Angusshire and Forfarshire, where of course the depredations of game were most injurious to the crops and most galling to the farmers. The subject having been discussed between the Earl and his tenants in the most friendly spirit, the following arrangement was made. The Earl reserves to himself the game on the lands around his mansion, Kinnaird Castle, in the deer park, and in Montreathmont Moor—all in his own occupation—to which there could be no possible objection on the part of his tenants. As to all the rest of the estate, the only reservation by the proprietor is the right to himself and his friends of occasionally shooting over it; but the game killed is to be paid for to the tenants on whose farms it may be shot. "With these reservations," (we quote from the *Montrose Standard*, which account we learn from a private source is correct) "the whole game on the property—and its extent may be inferred from the fact that it represents a rental of about 12,000*l*—is let to the tenant-farmers themselves, at a rent of 200*l* a year, apportioned among them at so much for each farm. Out of this 200*l* a year the wages are paid of two game-keepers, *who are entirely under the direction and control of the tenant-farmers*. The rent in fact is almost nominal; and the tenant-farmers are formed into an association, and elect three of their members to be a managing committee on behalf of the whole. Any farmer not wishing to exercise sporting privileges may sub-let his right to members of the association, but not to others, unless with the consent of the proprietor; and each farmer is entitled to shoot only on his own farm, unless where a special agreement is made to extend the privilege. The arrangement is to last for ten years, and has been approved of by the proprietor and the tenants; the latter being of one mind regarding its beneficial nature."

It is true this seems to be a somewhat complex mode of effecting that which would be more simply done by giving up to each tenant the game on his farm, with an agreement that the proprietor should be at liberty to shoot over the land. However, as a mode of abating an evil and alluying a grievance the arrangement is probably a judicious one, and offers a good example to game-preservers generally. We learn from the *Standard* that the example is operating beneficially, that "in the Mearns and elsewhere rigorous game-preserving has in several instances been recently relaxed." And it is due to Mr Lyall the Earl's factor to say, that he exerted himself "in a spirit of conciliation to carry into effect a novel and difficult arrangement." Not the least valuable part of this arrangement is that which, though gamekeepers are to be employed, they are to be entirely under the direction and control of the tenants. The best plan would be to get rid of gamekeepers altogether; the next best, if they must be retained, is to place them under the exclusive control of the tenants who feed the game.

Some of the Berwickshire landowners have also made or professed to make arrangements with their tenants for the mitigation of the injuries they have hitherto suffered from the game; and there is little doubt that the energy and combination recently shown by the Scotch farmers and their Chambers of Agriculture will ere long have considerable effect in lessening the game nuisance in that part of the kingdom.

Nor is the effect confined to Scotland, for it has been recently announced that the Earl of Dudley has given up to the tenants of his estates in Worcestershire the game on their respective farms, the only condition being, it is said, that they shall not sell any game they may kill. This looks like the setting in of a reasonable fashion in this matter of game. And as the smaller proprietors have followed the pernicious example of the landed magnates in preserving game, so they will probably follow their better and more profitable example of giving up the game to the tenant-farmers. Here is a case in point. We are told that "Mr Hunter, of Thurston, has given Mr Smith, tenant of the farm of Hoprig, Berwickshire, liberty to shoot over his farm."

So again, Mr Nisbet Hamilton, of East Lothian, in a characteristically ungracious way has acknowledged the force of local opinion by at once destroying the hares he had preserved, and taunting his tenants with the loss of sport—as coursers—they will thereby sustain. Thus, in a letter of excuse for not attending the Dirleton Coursing Club, he said—"You must expect a scarcity of hares. Hitherto, as you are aware, I have preserved hares solely for the recreation of the tenants on the estate and their friends who keep greyhounds; but in consequence of the pointed remarks of Mr Sadler and others at the Haddington Club and elsewhere, I have shot about 200 during the last few weeks, and have requested my friends when in pursuit of partridges to kill as many as they find. These hares afford me very little amusement, and I am ready either to preserve them or to destroy them, in compliance with the wishes of the tenants." How exquisitely spiteful! Why not give up the hares to the tenants that they may preserve or destroy them as they think fit? Probably this sour-minded game-preserver will eventually find it necessary to make some such compromise with his tenants as the more genial-tempered Earl of Southesk has found so satisfactory. There can be little doubt that the tide is turning, and that the vice of game-preserving—like hard drinking and duelling—will at no distant period go out of fashion.

Foreign Correspondence

(FROM OUR OWN CORRESPONDENT.)

PARIS, Friday.

The *Moniteur* has published the following return of the Bank of France, made up to the 23rd inst. The return for the previous week is added:—

DEBTOR.	Nov. 23, 1865. f	c		Nov. 16, 1865. f	c
Capital of the bank	182,500,000	0	.....	182,500,000	0
Profits, in addition to capital	7,044,776	2	.....	7,044,776	2

The Bank of France has this day reduced its rate of discount from 5 to 4 per cent., and the interest for advances on deposit of securities from 5½ to 4½. It has taken this measure in consequence of its coin and bullion having increased since last week by 13,568,000f, and of the deposits having declined by 7,128,000f, the notes by 3,813,000f. It has now 412,667,000f of bullion and coin, to liabilities of 875,607,000f in notes, and 146,545,000f in deposits. Many persons say that the Bank might safely have reduced the discount last week, and even sooner; others hold that in putting it lower to-day, it does not, in spite of its own sound situation, display proper prudence as regards the higher rates which prevail at London and in the leading continental markets. In this city there is a class of financiers who deny the truth of the theory (and fact) that a high rate of interest in one country attracts the precious metals from another; and they affirm that, notwithstanding the value of money is now lower in Paris than elsewhere, there will be no drain on the Bank of France. *Nous verrons.*

A better tone has prevailed on the Bourse during the last few days, and to-day the reduction of discount by the Bank of France has given general confidence. The following are the quotations:—

The new Austrian loan, which the Comptoir d'Escompte has undertaken to raise, has just been announced. As stated in my last, it is to be represented by bonds of nominally 500f (20*l*), issued at 345f (13*l* 16s), bearing 5 per cent. interest, and reimbursable at par by annual drawings in thirty-seven years. The number of bonds is to be 734,694, so that the nominal amount of the loan is to be 367,347,000f (14,693,880*l*), and the effective, 253,469,430f (10,138,773*l*). The subscription is to be opened at Paris, on Monday, the 27th, and is to be closed on Wednesday, the 29th, or sooner, if completed. All demands are to be admitted, except on the last day, when, in the event of their exceeding the amount to be accorded, they are to be reduced proportionally. On subscribing, 25f are to be deposited, and the remainder of the 345f are to be paid thus:—50f from the 10th to the 15th December, 90f from 1st to 10th February, 1866, 90f from 1st to 10th April, and 90f from 1st to 10th June. After payment of the call of the 10th December, discount of 6 per cent. is to be allowed on all those paid in advance. The subscription is to be opened at the same time, and of course on the same terms, at London, Amsterdam, Brussels, Hamburg, Frankfort, also at Vienna, Prague, and other great towns in Austria. At London, it is the Agra and Masterman's Bank which has undertaken the subscription. Some surprise is felt here at this establishment having been selected, seeing that there are at London numerous houses which are better known in connection with foreign loans, and which, consequently, would have greater influence. The drawings by which the loan is to be paid off are to take place half-yearly, at the rate of 9,928 bonds per drawing, and are to be made at the Austrian Embassy in Paris. The first drawing is fixed for the 1st May, 1868. That the subscription to the loan will be effected with great alacrity, is considered certain here. Any affair brought out under the auspices of the Comptoir d'Escompte is indeed sure of success, owing to immense mass of the trading community, and of small capitalists being customers of, or having the greatest confidence in, that institute. Added to this, the new loan, on the terms offered, is a very good investment, being at the rate of 8½ per cent., when account is taken of the discount to be allowed on payment of calls in advance, and of the mode of reimbursement; besides which the determination of Austria to conclude treaties of commerce with England and France naturally gives rise to the hope that she is about to enjoy greater material prosperity than she has hitherto known. The loan is to be employed in paying off the debt (about 151,000,000f in French money, and some smaller items) due to the National Bank of Austria. This will relieve the budgets of 1865 and 1866 very considerably, and will enable the bank to resume payments in specie. The Government will besides have a sum in hand, and it will get back the national domains it made over to the bank as security for its advances. In connection with the loan, it has been ascertained that the total debt of Austria may be counted at 7,630,000,000f in French money. The interest on it is put down in the budget of the present year at 292,702,450f, and the sinking fund at 52,451,071f.

The reduction in the army, which, as stated last week, His Excellency M. Fould had succeeded in obtaining, will, it now appears, not be so large as from the tenor of the decree ordering it the public had supposed. According to a note in the *Moniteur*, it will only be 10,936 men, and 12,645,000f. This result will give an idea of the terrible difficulties against which an economical Minister of Finance has to contend in this country, where every man thinks himself entitled to live more or less sumptuously on the Budget, and where the delusion that the "resources of France are inexhaustible" extensively prevails. The 12,654,000f, however, are an item of some importance, and M. Fould will probably be able to add to it by savings in the marine and other departments.

Among the witnesses heard since my last by the Superior Council of Commerce charged with the inquiry relative to banks and currency, have been M. Bechet Berhomas, banker, M. Bischoffsheim, banker, and M. Ducuing, journalist. The former declared that the raising of the rate of discount is the only means the Bank of France has of filling its till; but that the measure might be delayed by the timely purchase of precious metals in the countries which produce them. He condemned the increase of Finance Societies, because they absorb capital and encourage gambling. M. Bischoffsheim thought variation in the rate of discount inevitable, but said that instead of imposing a uniform rate on all bills, the rate might be modified according to the value of the signatures they bear. He expressed the opinion that the utility of bank notes is much exaggerated, the necessity of insuring convertibility exceeding the advantages they present to banks of issue. M. Ducuing said that the Bank of France ought to restrict its operations to discount of commercial bills, and that by so doing it might keep the rate low.

The unexpected conflict between Chili and Spain has produced almost as much sensation in this country as it has done in England, and the conduct of Spain is almost as generally condemned. At Havre, the principal merchants have already sent a petition to the Emperor, in which after thanking him for having given orders for efficacious protection of French interests at Chili, they pray him to employ his influence to get the question between the two countries submitted to arbitration. In the other parts the merchants intend to address the Emperor either directly or through their Chambers of Commerce. The direct trade between France and Chili was in 1864 16,861,133f in imports, and 22,415,407f in exports. Some trade is, however, carried on between the two countries *via* England: last year, for example, France received from the latter 22,680,000f of copper, of which a large portion was Chilian.

The Ministry of Public Works has issued a return relative to French railways for the first nine months of the present year, compared with the corresponding period of last year. It appears that the total of the old network opened for traffic on the 30th September last year was 7,782 kilometres, and of the new network (that on which the Government guarantee a certain amount of interest), 5,531—total, 13,313 (8,320 miles). On the corresponding date of 1864, the length of the former was 7,677 kilometres; of the latter, 4,909—total, 12,586 (7,866 miles). The receipts of the different lines in the nine months of the two years were as follow:—

OLD NETWORK.

Names of Railways.	Nine months of 1865. francs.		Nine months of 1864. francs.
Northern	56,107,306	...	52,021,709

	82,485,291	...	72,839,287

Digitized by Google

The total of the two networks for 1865 was 410,484,611f; for 1864, 386,550,580f. Taking the average length of railway worked, it will appear that the receipts per cent. per kilometre in the first nine months of the present year, compared with the corresponding period of 1864, were:—*Old Network*—An increase in the Northern of 7.85; Eastern, 6.65; Western, 3.16; Southern, 3.54; Ceinture, 11.24; Anzin, 21.39; Carmaux, 1.68: a decline in the Orleans of 2.44; in Lyons and Mediterranean, 0.70; Victor Emmanuel, 1.63; Epinac, 4.44; Graissessac, 5.18; Besseges, —; La Croix-Rousse to Sathonay, 5.23; Lyons to La Croix-Rousse —. *New Network*—An increase in the Northern of 6.88; Eastern, 2.27; Western, 6.75; and Southern, 7.56: and a decline in Orleans of 5.70; and in Lyons and Mediterranean of 9.87.

The annual volume of commercial statistics, entitled "Tableau General du Commerce de la France," has just been issued for the year 1864. It shows that the total value of all the imports into France in that year was 3,407,400,000f, of which 2,528,200,000f were taken out of bond for consumption; and that the total value of all the exports was 3,921,200,000f, of which 2,924,300,000f were French productions. The difference between the larger and smaller items of the imports and exports consisted in the value of goods remaining in bond, and of those that passed through France to or from foreign countries. In English money the imports for consumption were 101,128,000*l*; the exports of French productions, 115,972,000*l*.

The increase in French trade during the last six years has been very considerable. In 1859, the last of the old Protectionist *regime*, the imports for consumption were 1,640,700,000f; 1860, 1,897,300,000f; 1861, 2,442,300,000f; 1862, 2,198,600,000f; 1863, 2,426,400,000f; and 1865, as above mentioned, 2,528,200,000f. The exports of French productions were, 1859, 2,266,400,000f; 1860, 2,277,100,000f; 1861, 1,926,300,000f; 1862, 2,242,700,000f; 1863, 2,642,600,000f; and 1864, as above, 2,924,300,000f. The following is a comparison of the imports from and the exports to the principal countries with which France traded in 1859 and 1864. The extraordinary influence of the new commercial treaties will be seen in the items of England, Belgium, and Italy. In that of the United States will be remarked one of the deplorable effects of the civil war. Those of Mexico show that the military adventure of France in that country, however sad it may be in a political point of view, has produced considerable commercial advantages. The comparative insignificance of the items of Austria will attract attention. In case any of your readers should notice that the figures of English imports for 1864, though large, are not equal to those that have been printed in England, it must be remarked that English statistics, like Mr Gladstone in his speeches, include the transit trade, which is entirely omitted in what follows. As to the exports to England, many of them of course went there *en route* to other countries, though the French Customs had to enregister them as destined exclusively for her.

The Austrian Government, after settling the bases of treaties of commerce with England and France, intends, I am informed, to appoint a commission, composed of Englishmen, Frenchmen, and Austrians, to fix the details of the tariff. The maximum of the duties is, it appears, to be 25 per cent. *ad valorem* for certain descriptions of goods, and 15 for others. Mr Somerset Beaumont, who took an active part in the negotiations for the English treaty at Vienna, has arrived in Paris on his way to London.

The French Government continues to take tender interest in the Mexican loans. It announces in the provinces that receivers of taxes are charged, in conjunction with the Comptoir d'Escompte, to sell without commission or brokerage at the average price of the Bourse of Paris, bonds of the second series of the Mexican loan, —those that is that were given in the conversion of the 1864 loan (Glyn's).

Several societies of wine producers of the provinces of Le Beaujolais and Le Maconnais demand a reduction of the duty on wines in England to a fixed one of one shilling a gallon. At that rate they say they could supply good wholesome wine at the moderate price of 10d to 1s 3d the bottle delivered in London. Being bottled, the wine would not need the addition of alcohol, which is generally made to all foreign wines in England, and which spoils their quality; and the inconveniences presented by the bad cellars of England would be obviated.

The market report is annexed:—

FLOUR.—At *Paris*, business is inactive, and millers seem disposed to make concessions. Yesterday, choice was 52f 50c the sack of 157 kilogs; first marks, 51f; good, 50f; other sorts, 48f to 49f; six marks, current month, 51f 75c; December, 51f 75c; four months of January, 53f.

WHEAT.—At *Paris*, yesterday, prices fell 50c, and for some lots 75c and even 1f. Choice white, 27f 50c to 28f the sack of 120 kilogs; choice red, 27f to 27f 50c; first quality, 26f to 26f 50c; other sorts, 25f to 25f 50c.

COTTON.—The sales at *Havre*, in the week ending Friday, were 5,716 bales, and the arrivals 5,108. The stock was estimated at 25,530 bales. The closing quotations were 3f to 7f lower for United States, 3f lower for Brazil, 5f lower for Peru, Martinique, Guadaloupe, Hayti, Coconada, and China. Other sorts unchanged. Low New Orleans was consequently 260f the 50 kilogs; good ordinary qualities in Broach, 215f; in Tinnevelly and Madras, 215f; in China, 205f; and in Jumel, 270f. The market has been calm this week. Yesterday, New Orleans was 247f 50c and 245f; American, 227f 50c; Ingelghaut, 215f; Oomrawuttee, 200f; and for delivery, 175f; Madras, 170f; Bengal, 137f 50c.

COFFEE.—Sales were active at *Havre* in the week ending Friday, and prices were firm. 565 sacks Hayti Port-au-Prince, 82f 50c to 84f the 50 kilogs in bond; 1,144 Cape, 85f to 86f; 3,934 Gonaives, 85f to 85f 50c; 4,000 Rio not washed, 70f to 79f 50c; 400 ditto washed, at prices kept secret; 868 Bahia disposable, 65f to 69f; 400 Moritiba, for delivery, 75f to 80f; 300 La Guayra, non-grages, 90f; 192 ditto, grages, 93f; 500 San Thome for delivery, from Lisbon, 79f; 862 Malabar disposable, 89f 50c. In addition, there were two further auctions of different sorts of damaged. The arrivals exceeded 16,500. This week, Rio, disposable, 67f to 82f, for delivery 87f; Bahia for delivery, 69f to 71f; Gonaives, 85f 50c; San Thome, 79f; Hayti, 83f. At *Bordeaux*, last week, 1,600 sacks Mysore for delivery, 120f, 200 at 121f; 1,358 La Guayra, non-grage, 91f 50c to 92f; 60 casks Santiago, 109f to 139f 50c; 300 Rio washed, 106f; some Guadaloupe habitant, 140f. This week, Rio unwashed and washed, 80f to 107f 50c; unwashed, 78f; Mysore, 121f to 121f 50c; La Guayra, grage, 104f. At *Nantes*, last week, 270 bags Reunion *feve pointue*, 142f 50c. By auction, some lots of different sorts of damaged. No sales this week. At *Marseilles*, last week, 3,600 sacks Rio, 75f; 1,000 at 80f. This week, no sales.

SUGAR.—At *Havre*, last week, prices of West India rose, the quotations being 49f to 50f (for 433 casks) the 50 kilogs, duty paid; some usine, 54f to 57f; 400 bales Reunion, for delivery, 52f 25c, bonne quatrieme; and 505 casks Havana, 32f 75c to 33f 25c, No. 8 in bond. The arrivals were 3,389 sacks and about 250 casks. This week, West India usine, on sample, 55f to 57f 50c, bonne quatrieme; 50f Havana, No. 12, 37f. At *Bordeaux*, last week, calm prevailed. 52 casks French West India, for delivery, 51f, bonne quatrieme; and 10 usine, disposable, at different prices. This week, Reunion, bonne quatrieme, 52f 50c, to take at Nantes; gros grain, 54f; French West India, 50f and 53f, bonne quatrieme. At *Nantes*, last week, 4,305 sacks Reunion, 52f 25c, bonne quatrieme; 2,696 for delivery, 52f; some French West India usine, 53f to 61f. This week, Reunion, for delivery, 52f and at prices kept secret. At *Marseilles*, last week, 719 sacks French West India, 39f 50c, bonne quatrieme of Havre; 1,200 bales Reunion, 52f 25c, ditto of Nantes; 800 casks Havana, by Spanish ship, 32f, No. 12. No sales this week.

INDIGO.—The market was calm at *Havre* in the week ending Friday, only 13 chests Bengal being sold, but there were no changes in price. The arrivals were only 3 chests. This week, Bengal at prices not stated. At *Bordeaux*, last week, 12 chests Madras, 5 Kurpah, at established prices. This week, Bengal, Madras, and Kurpah at prices not stated.

HIDES.—Calm prevailed at *Havre* in the week ending Friday. 280 Monte Video dry heavy, 95f; 3,100 La Plata, salted, were 45f 50c to 47f; 227 ditto ox, heavy, part at 60f in bond, and part at 61f duty paid; 100 Monte Video horse, dry, 6f each. The arrivals exceeded 36,000. This week, Buenos Ayres dry cow, 85f; Monte Video salted horse, 41f 50c and 43f 50c; salted ox, 60f; Rio Grande salted horse, 40f 50c.

Digitized by Google

WOOL.—At *Havre*, last week, 24 bales Buenos Ayres unwashed went at 2f to 2f 10c the kilog. By auction, 1,075 bales Buenos Ayres were sold out of 2,452 offered. The unwashed merinos went at 145f to 237f 50c the 100 kilogs; prima, 122f 50c to 220f; secunda, 127f 50c to 212f; 50c; tertia, 110f to 200f; quarta and quinta, 62f 50c to 172f 50c lamb, 127f 50c to 232f 50c; Buenos Ayres washed, 142f 50c to 210f; other sorts, and damaged, 30f to 217f 50c. Of Monte Video, in the same auction, 691 bales sold out of 1,174 offered. The unwashed merinos went at 215f to 230f; prima, 165f to 232f 50c; secunda, 150f to 207f 50c; tertia, 120f to 202f 50c; quarta and quinta, 100f to 165f; lamb, 125f to 212f 50c; other sorts, 90f to 165f; damaged, 60f to 217f 50c; washed, 235f to 262f 20c; La Plata washed, 550f; Rio Grande unwashed, 167f 50c to 212f 50c.; Russian unwashed, 170f; washed, 520f; Chili unwashed, 150f to 210f; Portugal unwashed, 35f to 210f; La Plata sheepskin, 75f to 127f 50c; washed, 185f to 215f. The arrivals were 1,674 bales. This week, Monte Video unwashed, 117f 50c to 150f; Buenos Ayres unwashed, 155f to 205f; Monte Video sheepskin unwashed, 120f to 155f.

TALLOW.—Prices, at *Havre*, fell in the week ending Friday: 120 pipes La Plata, disposable, 58f to 60f the 50 kilogs, the latter price, however, only for a small quantity; 100 demi-pipes, 59f 50c. The arrivals were 1,147 casks. This week, La Plata, 58f 25c. At *Paris*, yesterday, the 100 kilogs, octroi duty included, were 124f 20c.

SPIRITS.—At *Paris*, yesterday, 3-6 deg., first quality, disposable, 44f the hectolitre.

Correspondence.

METAGE OF GRAIN.

TO THE EDITOR OF THE ECONOMIST.

SIR,—On Friday last, a largemeeting of gentlemen engaged in the grain trade, was held at the Corn Exchange Subscription Rooms, and the following resolutions were adopted unanimously:—

"That the charge for compulsory metage of grain and seed, when not required, is unjust and oppressive, and that it is desirable to take measures to resist the claims made by the City to enforce payment of the same;" and, "that a subscription be entered into to pay for legal and other expenses, the parties subscribing naming the largest sum for which they will be liable, and one-fifth be paid at once to an account, to be opened as a 'Compulsory Metage Resistance Fund' at the Consolidated Bank, in the names of Mr Stephen Ralli, Mr Millis Coventry, Mr Henry Frederick Harks, and Mr J. B. Perks, who shall be authorised to make needful payments as ordered by the Committee."

This question being of great importance to the grain trade of the port of London, I shall feel obliged by your granting me some of your valuable space, in order to explain it to the public, and to show the powerful reasons which induced us to pass the above resolutions unanimously.

Formerly, all corn imported was sold by measure: freight and duty were also paid by measure. As frauds occurred in measuring, Government granted to the authorities of the City of London, about two hundred years ago, the exclusive privilege of measuring all corn and seeds imported, with the view as expressed in the Charter, of putting a stop to such frauds; and this was effectually accomplished, the City meters being acknowledged by every impartial man as very honest and competent. During late years, however, measure having been found to be a very defective mode of carrying on the corn and seed business, weight was substituted for measure, and now, almost all corn and seeds imported are sold by weight, so much so, that Government was induced last Session, on the representation of the trade, to alter the system of levying grain duties, from measure to weight; we now, therefore, pay duties by weight, and sell by weight. After the Bill, altering the system of corn duties, was passed, metage having become quite superfluous and useless, and the City authorities having, as they pretend, the right to make us pay metage, whether we require to have our corn measured or not, a committee of the corn trade conferred with the City authorities, in order to arrive at an amicable settlement and a suitable compromise. We must acknowledge that every facility was given to this committee; everything was thoroughly explained to them, and the result was a very satisfactory compromise, which was embodied in a Bill, the object of which was to reduce the profit of the City out of the metage from 16,000*l* to 6,000*l*, and to render the City meters very useful and acceptable to the trade, by making them City weighers, and perform the last useful work instead of measuring, which had become useless. The City meters have the power to enter the docks to measure all corn and seeds imported into London, but they have not the power to weigh in the docks, and as weighing appears to be a very profitable operation, the City meters have not been allowed to enter the docks to weigh corn discharged there, and the dock interest was powerful enough to defeat in Parliament the Bill embodying the compromise made between the corn trade and the Corporation. The Bill having been thrown out, the Corporation, in order to maintain intact its pretended privilege to measure all corn and seeds imported, and to be compensated in due time for the concession thereof, insists on making importers pay metage, besides the dock charges, this metage being, as stated before, quite useless; and claims the right to make us pay metage, even when we object to have our goods measured, and when, in fact, they are not measured. This metage amounts to about 60,000*l* per annum, out of which the Corporation gets a net profit of 16,000*l*, which they were induced last year to agree to reduce to 6,000*l*. To get, therefore, their 16,000*l* profit, 44,000*l* are paid for a useless and uncalled for operation. As the Corporation is very powerful, many importers and dealers have paid, and are paying, the metage, fearing the great expense of a law-suit with the Corporation; some of them, however, have, and with very good reason, refused to pay; and the City Solicitor has intimated that proceedings will be taken against them, stating that, as the majority continue to pay, the remainder must pay, which certainly is not a very strong argument. This becoming known, the matter was more fully discussed; a powerful opposition was formed; the more timid, who were paying metage from fear, took courage; the above resolutions were passed in a crowded meeting unanimously, and the subscriptions amount already to a considerable sum. The gentlemen engaged in the corn trade appear willing either to allow the Corporation to levy a direct tax on all corn imported into this port, equal to their reduced profit of 6,000*l* agreed upon last year, or to favour a compromise between themselves, the Corporation, and the Docks, the understanding being that the Docks should do all the work, such to be superintended by the City weighers, who would issue certificates of weight, which would be a protection to the trade, and the Corporation to receive a remuneration for such supervision, which would give it, after deduction of expenses, the income of 6,000*l*, to which amount the Corporation previously agreed to reduce its profits.—I remain, Sir, your obedient servant,

STEPHEN A. RALLI.

25 Finsbury Circus, London, Nov. 23, 1865.

CITY CORN METAGE DUES.

TO THE EDITOR OF THE ECONOMIST.

SIR,—Since the Weighing of Grain Act of last session came into operation regulating the duty on all imported corn by weight, a contest has arisen between the Corporation of the city and the buyers and sellers of grain that has now assumed great commercial importance. The City authorities have for many years claimed the sole right of measuring all grain and seeds brought by water into this port, by virtue of a charter believed to have been granted to the Corporation for the purpose of protecting both buyer and seller from frauds, for which the circumstances of the times afforded great facilities. This right has hitherto not been controverted, because when the measurement of corn was necessary, the City rendered a service that, although much overpaid, was in some sort an equivalent for the charge it imposed; but an announcement that the Corporation would strictly enforce their right to metage dues, *where no service is required or given, that is, solely as a means of swelling their revenues by a vexatious interference with trade*, showed a determination so utterly opposed to the modern enlightened course of commercial freedom that it naturally produced astonishment and provoked resistance. When the new law came into force there was no longer any necessity for the measurement of foreign grain. A ship laden with wheat, let us say, enters one of the docks to discharge; the dock companies, on their part, claim the undisputed privilege and profit of weighing on their own premises; and the company's servants, therefore, when the cargo is delivered, weigh the grain by the direction of the consignee, and with the consent of the buyer and of the officer of the Customs. All parties showing any claim in the cargo are satisfied. The weight thus ascertained determines the amount of freight, the sum to be received by the seller, and the duty to be paid to the Government. But the Corporation step in and say we come to measure the wheat imported in this ship. In vain the shipowner, the importer, the miller, and the Customs' officer protest that they have no interest whatever in knowing the quantity by measure. No matter, say the Corporation, the wheat shall be measured, and measured by us, and at our rate of charges; or if we do not measure, we must, nevertheless, be paid metage dues as if we had actually done the work. We interfere against your will, and impose on you this expense for our profit, because "it is so nominated in the bond;" that is to say, a privilege invested in the Corporation some hundreds of years ago, to prevent injustice, when circumstances rendered the privilege a boon to the honest trader, is converted into a right to oppress him, and to tax the bread of the community in the nineteenth century, and in the most palmy days of unfettered trade. This proceeding seemed so preposterous that men of business living abreast of the times regarded the declaration of the City as harmless thunder. They could not believe that the Corporation of the greatest commercial city in the world, the city that ascribes much of its increasing prosperity and the growing advancement of the kingdom to the encouragements which modern legislation has afforded to all industrial enterprises by delivering trade and commerce from the fetters that formerly impeded and oppressed them; they could not believe that the Corporation of London, trusting to the legal or technical interpretation of an old charter, would appear openly in the face of the world to support a demand that would bring such a stigma upon their proceedings and policy. Several cargoes, therefore, have been put into granary without the intervention of the City meters, and a considerable quantity of English grain has passed from the farmer to the buyer

Digitized by Google

without the meter's assistance. For the English farmer has also to complain of this City impost. The practice of substituting weight for measure in all grain transactions is gradually becoming general. Weighing by the farmer, all that is now required in trade, costs him nothing; but weighing grain on board a barge in the river involves considerable expense. Were it not, then, for the City claims for metage dues, the farmers of Essex and Kent, who use the river, would be enabled to send their produce to London free of a charge that in a year amounts to an important sum. And there is also this anomaly and injustice in the City pretensions. English growers, to whom railways are most convenient, escape metage dues; for although the quantity of English grain brought to London by rail is greater than that which enters by the river, the City obtains no dues at the railway; meters are not admitted on that property; and in practice no inconvenience arises, but a gain is derived from the absence of the Corporation. The Corporation, however, resolved that dealers in grain shall not have that liberty of action accorded to every other section of the community, the liberty of weighing or measuring, or of doing neither, as it may suit their convenience or requirements,—the Corporation have determined not to relax their hold on the river metage; and a notice from the City Solicitor to several merchants and factors who resisted the City claims, declares that they are prepared to brave the obloquy of defending their obsolete policy in a court of law. A body of traders, whose dealings are of some importance even among the transactions of the merchant princes of London, say to the civic rulers of the great metropolis of commerce, you hamper our trade, and restrict the commerce we would attract to the capital by insisting on a useless and expensive interference; and it is given out on authority that these rulers are prepared to incur the odium of legally enforcing compulsory metage, that by a superfluous tax on the trader of 60,000*l* a year they may exact a profit of 12,000*l* as metage dues. A feeling has thus been aroused which has brought about a strong combination that will contest the legal right; and if the Corporation carry their cause into Chancery, and even succeed in establishing their plea, they will have the satisfaction of bringing themselves into evil odour with an influential class of citizens, and create an agitation that must speedily sweep away every vestige of a vicious monopoly so repugnant to the spirit of the age.—I am, Sir, your obedient servant,

FREE-TRADER.

COMMERCIAL AND MISCELLANEOUS NEWS.

The following report is in reference to the state of the money market at Calcutta during the fortnight ending Oct. 20:—The resumption of business after the holidays has been marked by a considerable advance in value of money at all the Presidencies; bank rates are 2 per cent. higher at Bombay, 3 per cent. higher at Madras, and 3 per cent. higher here than they were on 9th instant, and from all quarters we have reports of increasing tightness in the money market. The tide has turned more rapidly than was anticipated, which may be chiefly attributed to the sudden revival of demand for cotton for Great Britain. The bank rate of interest at Bombay is 10, at Madras 12, and here 7 per cent., but money is easily obtainable at 6 per cent. outside. Government securities have declined in value to an extent corresponding to the advance in bank rates. On the 9th instant 5½ per cents. were taken at 10-12, premium, on the 12th at 9-12, on the 18th at 8-12, and to-day there are sellers at 8-2. The supplies for sales are understood to be very heavy, and the fear of a further advance in bank rates continues to discourage buyers. Exchange—The market opened about the 12th at 2s 0¾d for bank paper 6 months' sight with very few buyers, and since then the rate has steadily advanced to 2s 1d for bank bills, and 2s 1 1/16d for 1st class credits. The bank returns, for the weeks ending Oct. 10 and Oct 17 are as under:—

Liabilities.	Oct. 10.	Oct 17.
Proprietors' capital, paid up	£2,200,000	£2,206,060
Reserve fund	172,797	172,797
General treasury balance at head office	558,505	735,214
Do. at branches	861,363	702,618
Other deposits at head office and branches	2,975 785	2,837,668
Bank post bills, &c.	28,983	24,243

Treasury reserve in coin at head office & branches	...	35,244
Cash and currency notes at head office	2,911,702	2,703,918
Cash and currency notes including Treasury balance at branches	1,466,572	1,336,703
	6,886,680	6,762,732

In reference to the state of the money market at Bombay, during the fortnight ending Oct. 28, Messrs Stoehr, Prieger, and Co. write as follows:—Money has been in good demand since the holidays, and particularly during the last few days. As large balances on cotton are due from England, it is expected that the next steamers will bring us large imports of bullion, and it is probably owing to this circumstance only that no further advance of the Bank rate has yet been resolved on. Exchange—All the banks having been closed during almost the whole of last week, the business of the fortnight has been compressed into the present one, and the bulk of it has been done at the following rates:—Bankbills, 2s 1 1/16d to 2s 1⅜d; credits, 2s 1½d to 2s 1⅝d; documents, 2s 1⅝d to 2s 1⅞d. We close rather easier, and an impression seems to prevail that we shall see lower rates during next fortnight; but this will depend to a great extent upon the amount of silver we receive by the incoming steamer.

Annexed are the traffic returns of some of the American railways for October:—

	Miles open.	1865 dols.	1864 dols	Increase. dols.	Decr. dols.
Chicago and North-Western	607	921,886	729,759	192,126	...
Illinois Central	756	621,849	661,390	...	39,541
Michigan Central	329	490,693	410,802	79,891	...
Michigan Southern	484	521,636	404,568	117,062	...
New York Central	489	1,500,000	1,196,435	303,565	...

The Metropolis Gas Act of 1860 has already caused a material reduction to be made in the price of gas supplied in the southern districts of London, and the City is now about to benefit by the provisions of that Act. The Great Central Gas Consumer's Company have announced a reduction at Christmas to 4s per 1,000, and the probability of a further abatement to 3s 6d in the course of next year.

During the week ending Nov. 22, the imports of the precious metals were:—Gold, 1,091,251*l*; silver, 367,908*l*. The exports were:—Gold, 79,778*l*; silver, 39,046*l*.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	21.074 103	Securities	28,842 635
Public Deposits	6,144,063	Coin and Bullion	14,465,032
Private Deposits	12,878 983		
	40,097,149		43,307,697

Dated the 21st November 1865. W. MILLER, Chief Cashier.

The balance of Assets above Liabilities being 3,210,863*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£587,028
AN INCREASE of Public Deposits of	453,915
AN INCREASE of Other Deposits of	608,967
No change in Government Securities.	
A DECREASE of Other Securities of	304.317
AN INCREASE of Bullion of	787,934
AN INCREASE of Rest of	12,683
AN INCREASE of Reserve of	1,356,099

The return published this week by the Bank of England indicates a general improvement in the money market as well as in the resources of the national establishment. The private securities have been reduced, while the private deposits show an increase of 603,967*l*. The increase in coin and bullion is 787.934*l*, and the addition to the reserve amounts to no less than 1,356,099*l*.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1855:—

At corresponding dates with the present week	1855.	1862.	1863.	1864.	1865.
Circulation, including bank post bills	£ 20,013,383	£ 20,675,944	£ 21,154,252	£ 20,120,567	£ 21,074,103

Digitized by Google

In the corresponding week of 1855, various peace rumours were in circulation, and the tendency of the stock and share markets was upwards, notwithstanding the activity of the general mercantile demand for money.

In 1862, the state of the discount market had become quieter. A demonstration at Athens in favour of the election of the English Prince Alfred to the throne had been followed by similar movements in other Greek cities. The Italian Ministry had resigned.

In 1863, the Saxon Diet had pledged itself to adopt measures calculated to maintain the rights of the Duchies. Prince Frederick of Augustenburg had notified his assumption of the Dukedom of Schleswig-Holstein to the Governments composing the German Confederation. The Holstein officials had received orders from Copenhagen to take the oath of allegiance to Christian IX. Extensive war preparations were being made in Denmark. The Prussian Chamber had resolved to support the rights of Prince Frederick to the Duchies.

In 1864, the proclamation of King Christian of Denmark releasing the inhabitants of the ceded Duchies from their allegiance had been published. Some slight insurrectionary movements in Venetia had taken place. The Bill for the transfer of the capital from Turin to Florence had been passed by the Italian Parliament by 317 against 70 votes. The Florida C. S. vessel had been seized in the harbour of Bahia by the U. S. vessel Wachussetts. News had been received of the re-election of President Lincoln. The Confederate Congress had reassembled. The Bank of England rate had been reduced from 8 to 7 per cent., and that of the Bank of France from 7 to 6 per cent. for discounts and 8 to 7 per cent. for advances on public securities.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1855, a deficiency of 7,122,054*l*; in 1862, a deficiency of 4,943,812*l*; in 1863, a deficiency of 7,220,475*l*; and in 1864, a deficiency of 4,354,886*l*. In 1865, the deficiency is 6,125,582*l*.

Discount and Money Market.—The Bank directors, at their weekly court yesterday, announced the reduction of the rate of discount from 7 to 6 per cent. The alteration of the Bank of France rate from 5 to 4 per cent. was almost simultaneously announced. The returns published by both establishments explain the reasons for the steps taken. During the early part of the week the ordinary terms of the market were sustained at the Bank rate. Little money was offered, but mercantile houses abstained from applying for discounts in any considerable amount. A very small amount of business, except that resulting from current necessity, was transacted. Since the reduction of the rate there has been even less demand. The alteration in the state of the reserve of the Bank has been produced so rapidly, and is so considerable, that there is a disposition to look for further immediate ease. Judging, however, from the past, very many causes combine to render the future of the money market extremely insecure, The cotton speculation may revive at any moment, and in the unsettled state of the trade will be afresh attended by disturbance in the value of money. Many loans are required by foreign states, and in some cases their wants are sufficiently urgent to induce the acceptance of any terms on which the public might consent to grant a loan. Besides these, there are foreign commitments preparing in the shape of financial advances for works of public utility, or to favour commercial enterprise; and as some are upon a gigantic scale, and appear to proffer unusual profits, it is too much to expect that the public will not be tempted to engage their resources so soon as they discover any symptoms of a material reduction in the value of money. Hence it would be premature to infer a proximate stable condition of the market, even though a further decline in the rate of money should ensue.

Annexed are the rates of discount for bills, with various periods to run :—

30 to 60 days	6 per cent.
3 months	6 per cent.
4 months	6¼ per cent
6 months—Bank bills	6¼ per cent.
6 months—Trade ditto	6¾ per cent.

On the Stock Exchange money was inquired for during the early part of the day at 5 to 5½ per cent. The supply at a later period became more abundant at from 4 to 5 per cent. The following are the rates of interest allowed on deposits :—

Joint Stock Banks	*4½ per cent.
Discount houses at call	4½ per cent.
Do. with seven days' notice	5 per cent.
Do. fourteen days	5¼ per cent.

* At the London and Westminster 3½ per cent. only on sums below 500*l*.

Bullion.—10,000 sovereigns have been withdrawn for exportation to Egypt.

The alterations in the Bank of France return are of a favourable nature, as follows :—

	£
Increase.	
Cash in hand	540,000
Decrease.	
Bills discounted, not yet due	700,000
Advances	500,000
Notes	152,000
Current accounts	285,000

There is no variation in the amount of the Treasury balance.

The following are the rates of discount current in the chief continental cities. The principal reduction has taken at Hamburg, owing to the sudden cessation in the demand for silver.

	Bank Rate. Per cent.	Open Market Per cent.
Paris	4	3¾
Vienna	5	5
Berlin	7	6½
Frankfort	5½	5
Amsterdam	6	6
Turin	5	4½ 5
Brussels	6	5½
Madrid	9	...
Hamburg	...	5½
St Petersburg	6	6⅛ 7

The prospectus o a new Austrian Government loan has been issued this evening by the Agra and Masterman's Bank, agents for the Comptoir d'Escompte of Paris, in combination with other capitalists. The loan is for about 14,693,880*l* in "734,694 bonds of 19*l* 17s sterling; or, 500 francs; or, 200 florins Austrian value in silver. The bonds are to be issued at 13*l* 14s 4d each, with coupons attached, payable half-yearly, of the value of 9s 11d each, being at the rate of 5 per cent per annum, from 1st December proximo. 1*l* per bond to be paid on application, and the remaining 12*l* 14s 4d in instalments :—1*l* 19s 7d on 15th December; 3*l* 11s 7d on 10th February; 3*l* 11s 7d on 10th April; 3*l* 11s 7d on 10th June (less coupon for 9s 11d)—13*l* 14s 4d. The bonds are to be redeemed in 37 years, by half-yearly drawings. At each drawing an equal number, or 9,928 bonds, will be withdrawn and paid off at 19*l* 17s (or at par), with the half-yearly dividend. The drawing will take place publicly, at the Austrian Embassy in Paris, on the 1st May and 1st November of each year, the first drawing will take place on 1st May, 1868. The subscription will be opened simultaneously in London, Paris, Vienna, Prague, Amsterdam, Brussels, Hamburg, and Frankfort, on Monday, 27th November, and will remain open until Wednesday, the 29th November, at 4 p.m., unless it shall have been completed intermediately."

English Government Funds.—At the opening of the week there was a trifling improvement in the Consol market, which became much more marked on the reduction of the Bank rate to 6 per cent. The public, however, continue to sell stock on balance; the absorption on account of the Commissioners for the reduction of the national debt has produced little effect in face of the large and constant supply induced by the high market value of money. The funds have been firm throughout the day, and Consols close at 88⅜ to 88½ ex div. for the account, and 89⅝ to 89¾ for immediate transfer. The Government broker purchased 20,000*l* New Three per Cents. The closing quotation of New Three per Cents. and Reduced is 87¾ to 88, and India Five per Cents., 105⅛ to 105⅜.

There is a rather firmer market in Exchequer bills, with a slight advance in price. March bills close at 6s to 2s discount, and June, 9s to 4s discount. India bonds 13s to 18s prem.

Foreign Stocks.—Rather more animation, and a little additional business, has resulted from the more satisfactory state of the money market. The public generally have, however, very few open accounts in the shape of speculations in foreign stocks, and there are hardly any investments making. The foreign loans effected in London during the past 8 or 10 months have not proved very satisfactory to the subscribers, and there are in consequence very few transactions. Some movement has taken place in Spanish securities; and to-day an advance of 1 per cent. in Spanish Certificates. Turkish 5 per cents. also have slightly risen, partly owing to the

Digitized by Google

repurchase of stock by operators who had sold for the fall. The closing quotations of stock dealt in to-day are subjoined:—Brazilian 5 per Cent. scrip, 2⅞ to 3⅛ pm. 7 per Cent. Danubian loan, 74 to 76. 7 per Cent. Egyptian, 92½ to 93½; ditto, 1864, 91 to 92. 5 per Cent. Greek, 17½ to 18; ditto, Coupons, 6½ to 7½. 3 per Cent. Mexican, 26⅜ to 26⅝. 2 per Cent. New Granada, 31½ to 32½. 5 per Cent. Peruvian, 1865, 73 to 74; 4½ per Cent. ditto, 1862, 72 to 73. 3 per Cent. Portuguese, 46 to 46½. 5 per Cent. Russian, 1822, 87½ to 90½; 4½ per Cent. ditto, 1850, 88½ to 89½; ditto, 1862, 89 to 90; ditto, 1864, 92 to 93. 5 per Cent. Sardinian, 76 to 78. 3 per Cent. Spanish Deferred, 37½ to 38½; ditto Passive, 28⅝ to 28⅞; ditto, Certificates, 14⅝ to 14⅞. 6 per Cent. Turkish, 1858, 75 to 76; ditto, 1862, 74¾ to 75¼; 5 per Cent. ditto, 1865, 43½ to 44. 5 per Cent. Italian, 64 to 64½.

The closing price of French 3 per Cent. rentes, telegraphed this evening from Paris, is 68f 70c.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks on last Friday and this day:—

RAILWAYS AND OTHER SHARES.—The same want of interest on the part of the public renders the transactions in the railway market comparatively unimportant. The fluctuations are slight in consequence, and there is little of moment to record. The tendency is good, and prices mostly show an advance on those of the past week. Great Eastern have risen 1 per cent.; Great Northern, 3 per cent., and the "A" stock 2½ per cent. Great Western is 1½ per cent. and Lancashire and Yorkshire 1 per cent. higher. London, Brighton, and South Coast stock has improved ½ per cent. London and and North-Western, 2 per cent. Metropolitan 2½ per cent. and Middland 1¼ per cent. South-Eastern is 1¼ per cent per higher.

In colonial shares and bonds the market is fairly supported, though with a moderate degree only of business.

American 5-20 bonds have been rather firm during the day, but other securities have declined slightly.

In miscellaneous shares the finance companies have improved. Hudson's Bay Company are also higher.

Subjoined is the usual list of the closing prices of the principal railway shares on last Friday and this day:—

SPECIAL SETTLING DAYS.—Monday the 27th inst. has been appointed by the Stock Exchange Committee in the 18*l* inconvertible preference shares of the Midland Railway Company to be inserted in the official list.

The Stock Exchange Committee met on Tuesday to consider two resolutions proposed by individual members on the subject of settling days in the shares of new companies. It was on the one hand proposed to make the appointment of special settling days, subject to regulations of a more stringent nature than those hitherto enforced: on the other, to leave dealers the liberty of entering into engagements for a fixed day, at their own choice. No decision was taken on either proposition, but a sub-committee of nine members was appointed to consider upon the subject generally, and to report thereon.

FOREIGN EXCHANGES.—There was a general demand for bills, and a consequent decline in most quotations.

BULLION.—The following is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper:—

Gold.—The arrivals of gold since our circular of the 16th inst. have been very large, and comprise the Holmesdale, from Melbourne, with 428,000*l*; the London (steamer), from Melbourne, with 342,000*l*; the Maid of Judah, from Sydney, with 192,500*l*; the Africa, from New York (Nova Scotia gold), with 5,000*l*; the City of Boston, from New York, with 26,000*l*. Of the above, no less than 657,000*l* has been bought by the Bank of England, and 11,000*l* has been withdrawn.

Silver.—Sales have been effected at 61 1/16d per oz standard.

Mexican Dollars.—The demand for this coin for China being very limited, the dollars ex Tasmanian were disposed of for refining purposes at 60d per oz.

PUBLIC COMPANIES.—The report of the directors of the Brazilian and Portuguese Bank, to be presented at their meeting on the 27th instant, states that the progress of their business has been satisfactory. The capital of the Company, which by the late commercial disasters at Rio had been trenched upon to the amount of 19,716*l* 14s 4d, has been carried to its original amount out of profits realised during the half-year. The balance is to be carried to new account.

The report of the directors of the Trust and Loan Company of Upper Canada, issued prior to the meeting called for 30th, states the net profits for six months ended 30th Sept. at 13,498*l* 14s 2d, giving balance to credit of revenue account 13,687*l* 15s 1d. The directors propose a dividend at the rate of 7¾ per cent. per annum, less income tax, on the paid-up capital stock of the Company; that 3,588*l* 17s 5d be carried to reserve fund; 250*l* to preliminary expenses account; and 161*l* 7s 8d to new account profit and loss.

At the meeting of the Cambrian Consolidated Gold Mining Company, on Tuesday, it was resolved to wind up the undertaking.

The directors of the Madras Irrigation and Canal Company have issued their report, in anticipation of the meeting called for the 29th instant. They state that further capital will be required to finish the section of work undertaken. They repeat that the issue of further capital for cost of works will not affect the guarantee of nil on the shares representing the present capital of 1,000,000*l*.

The directors of Hewitt and Company (limited) have declared an interim dividend at the rate of 10 per eent.

The report of the directors of the Eastern Bengal Railway Company was approved at the meeting to-day.

The meeting of the Anglo-Egyptian Bank was held yesterday. The net profit for the year was stated at 67,344*l*. A dividend of 8s per share for the first half-year absorbed 16,000*l*, and 36,000*l* is now devoted to the dividend of 18s per share for the second half-year. 10,703*l* is

Digitized by Google

devoted to repayment of preliminary expenses, and 4,641*l* carried to new account.

The late investigat ions of those concerned in the Atlantic and Great Western Railway have attached unusual interest to the meeting held yesterday at the London Tavern. Sir S. Morton Peto, Mr Young, and others, gave an account of the actual position and prospects of the line, which was received by the proprietary present with great satisfaction.

The directors of the Financial Discount Company (Limited) have issued their report to be presented at the meeting of the 30th inst. The net balance of profit is stated at 3,399*l* 7s 10d. The dividend proposed is at the rate of 10s per share, the balance of profit to be carried to new account.

At the meeting of the Panama, New Zealand, and Australian Royal Mail Company (Limited), this day, the receipts for the six months ended 30th June are stated at 80,963*l*, and the expenses at 65,155*l*, leaving a surplus of 15,807*l*. A dividend for the half-year at the rate of 5 per cent. per annum was agreed to, leaving 8,507*l* to be carried to account of repairs and depreciation at the close of the year.

The directors of the Matella Coffee Gompany announce the closing of the share list for Wednesday next.

The directors of the Ebbw Vale Company (Limited) have declared an ad-interim dividend of 10s per share from profits made during the six months ending 30th September last. And they have assured their shareholders that the progress of the works during the period above named has been very satisfactory, and the profits made have fully realised their anticipations. A call of 5*l* per share will be made payable early in January next, of which due notice will be given; and that the directors expect their future requirements will not exceed 5*l* per share, which will probably be divided into payments extending into 1867.

Messrs Knight, Dale and Co. are authorised to receive subscriptions for 300,000*l*, in 15,000 shares of 20*l* each, in 15,000 provisional scrip certificates to bearer, in the East and West Junction Railway Company, with the exception of 1,000 fully paid shares which have been reserved. This railway extends from Towcester to Stratford-on-Avon, a distance of thirty-three miles, and will shorten by thirty miles the narrow guage route between London and the great coal fields of South Wales. It passes through a populous and wealthy country, the traffic of which it will have peculiar advantages in conveying. It is in commnnication likewise with the ironstone estates in Northamptonshire, the ironstone of which is most extensively consumed in South Wales.

The Naples Public Works Company (Limited) is formed for the purpose executing public works in the city of Naples, of which the first and most immediately important will be a long boulevard of magnificent size connecting the, Royal palace and Government buildings with the principal pleasure drive of the capital. The municipality contribute very largely to the work, and under the present enlightened Government of Italy the condition of Naples is rapidly improving. The capital is 1,200,000*l*, first issue 600,000*l*.

The American Oil Wells Trading Company (Limited), capital 240,000*l* in 8,000 shares of 30*l*, on which a minimum dividend of 8 per cent, is guaranteed, is designed to buy, lease, and work, or resell and sublet oil lands in America. A provisional contract has been entered into for a purchase of 1,343 acres and a lease of 4,830 in the centre of the petroleum district of Western Virginia, which have given undeniable evidence of containing oil.

The Swedish Steel and Iron Company (Limited) has been formed under a very influential board of directors to amalgamate the very extensive iron and other works and estates of the Hogbo Company, in Sweden, with the Northfield Steel and Iron Company, near Rotherham, in England. The former company is carried on by Mr Goransson, the first person under whom the Bessemer process for making steel in practice succeeded, and the English site is exceedingly well adapted to be the English agency of the Swedish works, as it has an extensive plant, &c., available for the purpose already in existence or at work. The vendors accept 200,000*l* in part payment in shares of the company, with 12*l* 10s only credited on each share, and no dividend is to be payable on such shares till the other shareholders have received 15 per cent. on their capital. The capital is to be 1,500,000*l*, in 60,000 shares of 25*l* each, of which it not expected that more than 12*l* 10s will be called up.

Miscellaneous.—The numbers of various certificates of the shares of the Italian Irrigation Canal Company are published for sale on the 5th Dec., unless the 9th instalment be paid before that date.

Messrs Baring announce that on the 1st December they will be prepared to pay the dividend warrants due on that day on New Granada 2 per Cent. bonds at 11s 6d per 100*l*, and on the deferred bonds at 3s 4d per 100*l*.

Messrs Baring and Co announce the conversion of the Mexican deferred debt: 434,350*l* Mexican deferred bonds to be exchanged for 325,000*l* Mexican 6 per Cent. bonds, bearing interest from the 1st October, 1864, according to the proposal of the 19th May, 1864, agreed upon with Count Germiny and assented to by the Committee of Mexican deferred bondholders.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 1 per mille premium, and the short exchange on London is 25.17½ per 1*l* sterling. On comparing these rates with the English Mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 1-10th per cent. dearer in Paris than in London.

By advices from Hamburg the price of gold is 424 per mark, and the short exchange on London is 13.4½ per 1*l* sterling. Standard gold at the English Mint price is, therefore, at about the same price in London and Hamburg.

The course of exchange at New York on London for bills at 60 days' sight is 108¾ to 109 per cent. At this rate there is no profit on the importation of gold from the United States.

MAILS ARRIVED.

Latest Dates.

On the 18th November, America, per steam ship African, via Queenstown—New York, Nov. 8.

On the 20th November, West Indies, per steam ship American, via Liverpool—Colon, Oct. 21; Santa Martha, 23; Kingston, 6; Port-au-Prince, 28.

On the 21st November, America, per steam ship City of Boston, via Queenstown—New York, Nov. 11.

On the 22nd November, America, per steam ship City of Cork, via Liverpool—New York, Nov. 8.

On the 23rd November, America, per steam ship Maralton, via Liverpool—New York, Nov. 11.

On the 23rd November, America, per steam ship Saxonia, via Southampton—New York, Nov. 11.

On the 23rd November, America, per steam ship Damascus, via Southampton—New York, Nov. 11.

AVERAGES OF GRAIN.

The following is a statement showing the quantities sold and the average price of British corn (imperial measure) as received from the inspectors and officers of Excise, conformably to the Act of the 27th and 28th Victoria, cap. 87, in the week ended Nov. 18, 1865:—

	Quantities Sold.	Average Price.
	qrs bush	s d
Wheat	71,570 3	46 11
Barley	63,816 5	33 7
Oats	5,240 4	22 9

COMPARATIVE AVERAGES.

The following is a comparative statement, for the corresponding week in each of the years from 1861 to 1864, of the quantities of British corn sold in the towns from which returns are received under the Act of the 27th and 28th Victoria, cap. 87, and of the average prices as ascertained under the Act 5th and 6th Victoria, cap. 14:—

Corresponding week in	Quantities Sold.			Average Prices.

COMMERCIAL EPITOME,

FRIDAY NIGHT

The supply of English wheat on sale at Mark-lane to-day, was very moderate, and the condition poor. Dry samples changed hands at full prices; otherwise, the English wheat trade was dull. Foreign wheat was in but moderate request, at late rates. Barley sold heavily, and the quotations had a drooping tendency. Oats were in fair supply, and moderate request, at late prices. Beans and peas ruled firm, at full currencies. There was a fair demand for flour, at late rates. This week's imports amount to 8,480 quarters of wheat; 1,090 barley; 11,270 oats; 500 sacks and 3,820 barrels of flour.

The Liverpool cotton market, on Monday, assumed a quiet tone, and prices have since declined from day to day, till the fall was equal to about 1d per lb; since yesterday, however, there has been a better feeling prevailing in the market, and prices have partially recovered.

Postal advices from Bombay are to Oct. 28. As regards the state of the cotton trade during the preceding fortnight, Messrs Nicol and Co. write as follows:—Sawginned Dharwar has been most in demand next to Dhollerah, but prices of this kind have not shown so much variation; the first sales reported, which were insignificant, were at 441 to 445 rs for delivery in one month; the bulk of the transactions, however, have been at 465 rs for ready cotton and one month's delivery, prices are now nominally 445 rs to 450 rs, but we have not heard of any actual sales at this quotation. Oomrawuttee has been in better demand at from 390 rs to 410 rs, but in Broach and Coompta there have been very few transactions. The Dhollerah varies a good deal in quality, and, as far as we have seen, does not show any improvement, most of it being very leafy. Sawginned Dharwar is now arriving in large quantities, and is generally speaking of good quality. Coompta, however, is still very scarce, and the quantity arrived so far quite insignificant. Oomrawuttee shows some improvement upon what we have lately had in stock, but Broach, on the other hand, is very inferior, and there is almost none now remaining either here or in the districts. It is difficult here at all times, but especially at this early stage, to get any reliable information as to the prospects of next season's crop, but we are given to understand that in most of the cotton-growing districts the yield will not by any means be equal to that of last year. When the present crop was sown, cotton was at its lowest or very nearly so, and the prospects for any improvement looked far from bright. Grain, on the contrary, was high, and likely to continue so, and in many districts, especially Dharwar and Coompta, we believe there is fully one-fourth of the land under grain crops upon which cotton was grown last year. The following tables show the prices current, Oct. 28, as well as the exports from Jan. 1 to Oct. 27:—

CURRENT PRICES of COTTON at BOMBAY, Oct. 28.

	Market Value. Per candy, 784 lbs.	C. F. I. Exchange 2s 0¼d Freight 2/ 0s. per lb
	rs	d

America	706	800
China	...	3,714½
Grand total	824,500	864,578

Via the Persian Gulf, we have intelligence from Bombay to Nov. 11. The cotton trade had been dull, at 415 rs for Dholierah. The week's export had amounted to 35,000 bales.

From Alexandria, we have news to Nov. 22. The market for cotton had been quiet, but firm. Fair *new* open-ginned produce was quoted at 21½d, cost and freight; fair open-ginned ditto, for December shipment, 20¾d; ditto, January shipment, 20½d per lb, free on board. Freight to Liverpool ½d per lb.

In the early part of the week, the raw sugar trade was in a most inactive state, at a decline in prices of 6d per cwt. During the last few days, however, the market has become firmer, and the quotations are now without material change from Friday last. Coffee continues very firm, and, in some instances, enhanced rates have been obtained. For most descriptions of tea, there has been a good demand, at full currencies. Last week, duty was paid in London on 1,332,548 lbs of tea, whilst the export, for the week ending Nov. 16, amounted to 514,273 lbs, making a total of 1,846,821 lbs, against 1,287,602 lbs last year. Rice—owing to the prevailing depression in the markes for wheat—is dull, at rather lower prices. British spirit has been reduced 1d, or to 11s 11d per gallon.

The following statement, published by Messrs Niebuhr and Co., shows the total export of rice from the ports of British Burmah, from Jan. 1 to Sept. 30, in each of the last three years:—

Advices from Colombo are to Oct. 16. In reference to the state of the coffee trade, Messrs Fryer, Schultze, and Co., write as follows:—Plantation parchment is beginning to find its way down to Colombo, but not to any great extent as yet, the crop being unusually late this year. Several transactions have taken place since our last, however, at about previous prices. A crop of 6,000 bushels has been contracted for at 13s, and other purchases have been made at 12s 9d, while a parcel of fine quality sold at auction at 13s 2d. In native coffee business has also not been of an extensive nature, the quantity of new crop on offer being exceedingly limited and the market being almost bare of last season's growth. We hear of a small contract for the former, "unpicked" at 43s 6d, and another for 2,000 cwts "picked and dried" at 49s.

Exports of Coffee from Colombo from Oct. 1 to Oct. 15.

The public sales of colonial wool continue to be well attended by home and foreign buyers. The biddings both for Cape and Australian produce continue to rule active. As regards fine parcels of the former, the quotations show an advance of ½d per lb. In the latter, an improvement varying from 1d to 2d per lb has taken place from the close of last sales. The export demand is tolerably large. Good Australian clothing wool is quoted at 1s 10½d to 2s 7d; ditto, combing, 1s 11d to 2s 7d; greasy, 1s 1½d to 1s 6½d; good and fine Cape, 1s 7½d to 2s; medium ditto, 1s 5d to 1s 7d; greasy, 9d to 10d per lb.

Hemp is in fair demand, at 34*l* for clean Russian qualities. Flax, jute, and coir goods rule firm, at full currencies.

The silk market has ruled inactive. All descriptions of produce, however, have changed hands at fully late rates.

The late advance in the value of copper is fully supported. In tin, there has been considerable activity, at enhanced rates. Spelter has advanced to 22*l* 5s per ton, on the spot. Scotch pig iron is quoted at 58s 4½d cash, mixed numbers.

Nearly all descriptions of oils are firm in prices. Linseed oil, 39s; foreign refined Cape, 57s per cwt; sperm, 118*l* to 120*l* per tun. French spirits of turpentine, 46s to 47s per cwt. American refined petroleum is worth 3s 5d per gallon. The tallow trade has ruled quiet, at 50s 3d per cwt, on the spot.

In reference to the state of money and commercial affairs at New York, the New York *Shipping List*, of the 11th inst., says:—Business remains without noteworthy change. Trade continues light, both in imported merchandise and domestic produce, but the markets generally were rather firmer last evening than in the beginning of the week. There is but little change in the gold market. The demand has been steady and mainly for Customs, and the bulk of transactions have been at 146⅜ to 146¼ per cent. Foreign exchange, though without decided change, is dull, and rates are rather lower. The demand has been very moderate, and mainly for brokers' drafts. The money market is, if anything, rather more stringent. The active movement in stocks has occasioned more inquiry for money, and 7 per cent. has been freely paid, but not so readily accepted as last week. Still, 7 per cent. is the ruling rate for call loans. Commercial paper is offered freely, and discounted quite readily, but generally at high rates. We quote:—

	Per cent.	per annum.

THE COTTON TRADE.

LIVERPOOL—Nov. 24.

The cotton market opened with steadiness in the beginning o the week, but the advices from New York, per Africa, of a continuance of heavy receipts and larger exports, produced general dulness, and prices gradually declined. Yesterday the demand revived, and a fair amount of business has been done to-day, with less pressure to sell and more firmness, particularly since the reduction of the Bank rate to 6 per cent. In Sea Island a fair business has been transacted, at last week's current prices. American continues in demand, but on Monday and Tuesday was very irregular and declined fully ¼d per lb. To-day the market is less freely supplied, but quotations are still ¼d per lb below last week in some instances. The transactions in Brazil have been only moderate; at the beginning of this week Pernam was scarce, and 22d was occasionally paid for fair; subsequently prices receded, and close without change from last Thursday. In Egyptian a fair amount of business has been done, and after some decline last week's rates are again established. Smyrna barely supports former quotations. There has been a fair inquiry for East India, but prices have been irregular, and close rather lower than last week. In China and Japan the sales are very moderate, and notwithstanding the limited stock last week's quotations are barely supported.

The sales, to arrive, continue to a considerable extent; the last quotations were to-day, for New Orleans average middling, December shipment 19½d per lb—Egyptian, fair new open, December shipment or January delivery 21d; December or January shipment 21¼d; November shipment, old crop 21d—Oomrawuttee, fully fair, September sailing 16d.—Western Madras, fair, ship named 15½d per lb.

The sales of the week amount to 51,080 bales, including 6,880 on speculation, and 10,850 declared for export, leaving 33,350 bales to the trade. The market to-day opens with a general demand, and the sales will probably amount to about 10,000 bales, at full prices of yesterday.

LONDON—Nov. 24.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—On Friday and Saturday there was an improved demand, especially for cotton afloat, and ¼d to ½d per lb advance was obtained; but since the receipt of American news on Monday the market has been dull and depressed, and prices have fallen 1d per lb, so that although the reduction of the Bank rate yesterday to 6 per cent. caused a firmer feeling, the present quotations for cotton on the spot are about ½d below those of Friday last.

NEW YORK—Nov. 11.

NEW YORK, Nov. 11.—On Wednesday and Thursday the market continued dull and heavy, and sales were made at an irregular decline of 2c to 4c per lb. Yesterday, a much better feeling prevailed, and a recovery of fully one cent per lb was established, closing firm at our revised quotations; sales for three days, 9,500 bales. We quote:—

	NEW YORK CLASSIFICATION. Upland. c	Florida. c	Mobile. c	New Orleans and Texas. c
Ordinary ..... per lb	42	42	42	42
Good ordinary	44	44	45	46
Low Middling	48	49	49	50
Middling	51	52	52	53
Good middling	54	55	56	57

Export from Jan. 1 to Oct. 31, 135,491 bales, against 27,423 in 1864. Cotton—Export, from 1st to 7th Nov., 17,085 bales, against 49 in 1864.

MARKETS IN THE MANUFACTURING DISTRICTS.

The demand for manufactured goods has been moderately active this week, and the quotations have ruled firm. Rather an extensive business has been passing in iron at full prices. Coals have sold briskly both for home use and export.

MANCHESTER, Nov. 23.—The heavy imports of cotton for the last few days have caused much general depression, which has only been partially relieved to-day by the reduction of the Bank rate and the consequently steadier tone of the Liverpool market. Some inquiry was felt in the early part of the week for good shirtings for China, which have been almost enabled thereby to maintain their position whilst other goods were lowering in value. Water twist has also been taken for the same market at but slightly reduced rates. Mule twist generally and cop twist up to 60's have fallen about 1d per lb. Some small sales of the finer and doubled numbers have been made at last week's rates. Greater firmness was sought to be established to-day, but so far little increase of business has followed.

BRADFORD.—The tone of the wool market is rendered a little more cheerful by the lowering of the Bank rate. But though the feeling is more cheerful, there is an almost general pause on the part of buyers' and where transactions have taken place they have been quite of a retail character. In the yarn market there is very little noticeable change, and both home and foreign merchants are disinclined to operate at present. Transactions in pieces are also limited, and merchants continue to act with caution.

LEEDS.—There has been a rather limited attendance of buyers in the cloth halls, and they made purchases rather slowly, chiefly of tweeds and meltons, and some fancy goods for ladies' wear.

HUDDERSFIELD.—Purchases generally have been made for the purpose of sorting up stocks, and the parcels of goods that have changed hands have been small in the aggregate. Orders for fancy goods for the spring trade keep the manufacturers of those articles generally well employed, and have tended to prevent present stocks being large.

SHEFFIELD.—Trade here is, on the whole, active. The steel trade has improved during the last few weeks. There are orders from America for steel. The home orders for steel for railway and general manufacturing purposes are also moderately good. The coal and coke trade is active in all departments. There is now a large demand for smelting coal, and for both soft and hard coke for manufacturing purposes. The cutlery trades are brisk.

BIRMINGHAM.—The trade of this town continues active. There is much more being done than is usual at this period of the year. During the last month the orders have come in steadily on account of the home trade, and there is not more than one or two branches of any importance in which the manufacturers have not got a good supply of orders on their books.

Digitized by Google

LEICESTER.—The hosiery trade continues healthy. There is fully an average business doing in all departments, and manufacturers are working entirely to order. Worsted yarns are firm, at high prices. Wools remain in good consumptive demand, at high rates.

NOTTINGHAM.—Business in most departments of the lace trade has been quiet. Cotton fancy goods are very quiet, and the plain trade is equally dull. Black silk laces are selling to a small extent, but in narrow edgings there is next to nothing doing. Silk meshlins and quillings are not much in request. The hosiery trade continues very brisk; there is, however, a little less disposition to buy goods in advance for the spring trade. There is no stock on hand.

CARDIFF.—The steam coal trade continues moderately buoyant. The continental markets are taking fully an average quantity for this time of the year, and on home account the sales are considerable. Quotations are fairly maintained. The iron trade remains about the same; the works are in pretty active operation, and orders are coming in steadily.

WOLVERHAMPTON.—The orders for iron are not quite so large; but with the exception of some of the plate mills the works are in full operation, and there is no fear of a want of specifications. In the hardware trades there is a steady improvement in almost every branch.

DUNDEE.—Our flax market has been very active, and a large amount of business has been done at advancing prices, both in goods on the spot and on contract. Jute continues very firm, and the recent advance in the prices is maintained. In the demand for linens there is nothing new to notice; orders have been coming in but sparingly, but manufacturers are generally well employed with old contracts.

GLASGOW.—Iron—G.m.b., No. 1, 57s 9d; No. 3, 57s; Gartsherrie, No. 1, 67s; No. 3, 58s; Eglinton, No. 1, 57s; No. 3, 56s; No. 1 Coltness, 57s; Glengarnock, 61s; Calder, 60s; Kinniel, 58s 6d; Forth, 57s 6d; Carron, 57s 6d; Middlesborough warrants, 51s 3d to 51s 6d cash.

BELFAST.—The demand for linens is slightly less active; the supply of some goods is quite inadequate to the existing demand. Yarns have not been brisk. Stocks are small, and prices continue firm. The country markets are still well supplied with flax. Prices continue very high.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Nov. 11.—The market for State and Western flour continued buoyant under a good demand, on Wednesday, when prices further advanced 8c to 10c per barrel. The market subsequently reacted, however, and with only a limited demand from the local and coastwise trade, prices have declined, closing at 5c to 10c below our previous quotations. The sales for the three days comprise 45,000 barrels. Flour—Export from Jan. 1 to Oct. 31, 1,149,427 bushels against 1,702,152. Export, from 1st to 7th Nov., 16,850 bushels against 18,467. The market for wheat has been irregular, and prices have alternately advanced and declined. Corn has been tolerably active, and prices have for the most part ruled firmer, prime Western mixed having sold as high as 91½c to 92c.

EXPORT of GRAIN, &c., from NEW YORK from Jan. 1 to Oct. 31.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Somewhat increased supplies of English wheat have been received up to our market this week, coastwise and by land carriage, in but middling condition. Really fine samples have moved off slowly, at barely stationary prices; whilst the value of inferior kinds has given way 1s per quarter. The show of foreign wheat has not increased; nevertheless, the demand has ruled heavy, and the quotations have been with difficulty supported. Malting barley has commanded previous currencies, with a fair demand. Grinding and distilling sorts have met a slow inquiry, on former terms. The malt trade has been somewhat heavy, and prices have had a drooping tendency. Very little change has taken place in the value of oats. The oat trade, however, may be considered steady. Beans and peas have commanded extreme rates, owing to their scarcity. The demand for both English and foreign wheat has fallen off.

In the various local markets, wheat has met a dull sale, on rather lower terms. Most kinds of spring corn have ruled steady in price.

The continental markets have been steady for wheat as to price; but the demand for it has been inactive. Other produce has moved off firmly. In the United States, both wheat and flour continue high in price, with only moderate supplies on offer.

In Scotland, the sale for wheat has been very inactive, at barely last week's prices. Barley and all other articles have commanded full quotations.

The Irish markets have been but moderately supplied with wheat and spring corn. For the most part, the trade has been in a sluggish state, at barely previous quotations.

The supply of English wheat on sale at Mark lane to-day was very moderate. Dry samples changed hands at fully late rates, but the market for damp produce was in a most inactive state. Foreign wheat moved off slowly at previous quotations. The trade for barley was dull, on former terms. Oats were in fair supply, and steady request, at full currencies. Beans and peas ruled firm at quite previous quotations. The flour trade was steady, on former terms.

The floating grain trade is thus reported by Mr George Dornbusch:—Arrivals at ports of call since last Friday, 57 cargoes, viz., 33 wheat, 17 maize, 3 barley, 1 millet-seed. 2 linseed, and 1 rapeseed; nearly the whole of these have arrived within the last three days. The trade in grain has been inactive, very few sales have been effected, and prices of all articles tending downwards. Wheat—Sales: 2 arrived, Odessa Ghirka, at 43s and 44s per 492 lbs, 9 P 32 and 10 P. Maize—5 arrived cargoes sold, Odessa, 32s 3d; Galatz, 32s per 492 lbs; Ibrail, 30s; Bulgarian, 30s 3d; and Barbary, from Saffi, 30s per 480 lbs. Linseed in improving demand, 1s dearer. East Indian, from Calcutta, arrived, 65s and 66s 6d; on passage. 68s per 410 lbs L.A.T.; Mirzapore, from Calcutta, on passage, Aug. and Sept., 68s and 68s 6d per 410 lbs L.A.T.; Odessa, on passage, Sept., 65s; and Taganrog, Oct., 65s 3d per 424 lbs L.A.T.; Black Sea, from Odessa, shipping, 65s; and Danubian, from Ismail, at 65s 9d per 424 lbs L.A.T. Cotton-seed—Egyptian, 1864 crop, from Alexandria, shipping, at 7*l* 17s 6d; and shipping, or to be shipped, 1864 crop, at 7*l* 15s; and to be shipped, 1865 crop, at 8*l* 1s 3d and 8*l* 8s 9d per ton.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market opened flatly with limited sales, at 6d per cwt decline, but yesterday rather a better demand prevailed, owing to the favourable result of the Dutch sale and the reduction in the Bank rate to 6 per cent. Refiners are buying to a moderate extent at present quotations, and the trade seem more desirous to extend their operations. About 1,200 casks West India sold to yesterday, and the various parcels offered by auction were chiefly bought in. The landings keep relatively light, and the stock is further reduced to 85,020 tons, against 114,190 tons last year. There is, however, some diminution in the deliveries, which are smaller than at the same date last year.

Mauritius.—4,038 bags offered by auction chiefly found buyers. as follows: brown, 29s 6d to 33s 6d; soft yellow and grey, 34s to 35s 6d; grainy and crystallised, 36s to 40s per cwt.

Bengal.—421 bags partly sold at 34s per cwt for low yellow Gurpatta date.

Penang.—456 bags grainy yellow sold at 35s to 36s per cwt.

Madras.—7,800 bags low Jaggery are reported, price not allowed to transpire. Yesterday 100 tons grainy sold to arrive at 30s 6d per cwt.

Foreign.—The public sales have been small. 182 casks 50 barrels Porto Rico partly sold at 36s to 38s 6d; the remainder bought in up to 40s for fine. 314 casks Cuba were taken in at 35s to 37s 6d per cwt.

Refined.—Dry goods have been in little demand.

MOLASSES.—100 puncheons Antigua have sold at 16s per cwt.

RUM.—The market is firm. Leewards have sold at 1s 6½d to 1s 7½d per proof gallon. Further business has been done in Jamaica.

COFFEE.—The market continues to maintain its firm position, and the recent advanced rates have been paid for coloury kinds. 1,351 casks, 1,282 bags plantation Ceylon all sold: good to fine, 84s to 91s; low middling to middling coloury, 79s 6d to 83s 6d; mixed unclean, &c., 74s to 79s. 1,456 bags native sold from 69s to 72s 6d. 321 bags East India realised 71s 6d to 75s 6d; a few lots Singapore, 57s 6d. 1,098 bags Guatemala, 72s to 77s. 3,410 bags Rio were bought in at 56s to 66s per cwt. A floating cargo of Rio is reported at 56s 1½d per cwt. 45 cases 70 bags East India sold at steady rates. The Dutch Trading Company's sale on Wednesday went off at ¾ to 1 cent. advance.

TEA.—The market continues firm, and a full amount of business has been done from the present arrivals. At the public sales on Tuesday and Wednesday previous rates were, with very few exceptions, maintained. 20,490 packages in the catalogues contained 12,030 packages printed "without reserve," the latter being disposed of. Common to fair black leaf congou realised 1s 6¾d to 1s 6¾d; red leaf, 1s 3¾d to 1s 5½d per lb. Various parcels of Japan sold at steady rates.

COCOA.—There is a firm market. 368 bags Trinidad sold steadily at 65s to 91s. 619 bags Guayaquil about two-thirds bought in at 72s to 74s; the remainder, consisting of inferior quality, sold at 66s to 66s 6d per cwt.

Digitized by Google

RICE.—There has been a cessation of demand, and the market is now very flat, with extremely limited transactions in soft grain descriptions.

IMPORTS and DELIVERIES of RICE to Nov. 18, with STOCKS on hand.

	1865.	1864.	1863.	1862.
Imports ..... tons	39500 ...	52500 ...	48900 ...	96240

Stock	27300 ...	32860 ...	42900 ...	68050

SAGO.—2,224 boxes sold at high prices for bold grain, viz., from 22s 6d to 23s 6d; a few lots extra bold, 28s 6d. Small grain about 20s 3d to 20s 6d per cwt.

SPICES.—The markets have been steady. White pepper cannot be obtained, unless at a further advance, and 299 bags Singapore, by auction, were withdrawn. Black firm, but not much business doing, owing to the high pretensions of holders. 1,131 bags were bought in: Singapore, 3½d; Penang, 3⅜d. 77 cases nutmegs sold at full rates for brown sorts; small to good, 1s 2d to 1s 10d; bold, 3s 3d to 3s 5d. 23 cases mace sold at 1s 7d to 2s 3d per lb. There is less inquiry for pimento, but holders continue firm, owing to the reported failure of the crop. 432 bags partly sold at 3d to 3⅛d per lb. 201 barrels Jamaica ginger sold at 68s to 170s per cwt.

SALTPETRE.—Some Bengal has sold privately, refraction 7 to 3½, at 24s 9d to 25s per cwt.

IMPORTS and DELIVERIES of SALTPETRE to Nov. 18, with STOCKS on hand.

	1865	1864	1863	1862

COCHINEAL.—The fortnightly sales of Wednesday were large, containing 1,530 bags, of which two-thirds sold at previous rates to 1d decline. Honduras silver, 2s 3d to 3s 5d; Teneriffe, 3s 3d to 3s 5d; black, 3s 5d to 4s 4d per lb.

IMPORTS and DELIVERIES of COCHINEAL to Nov. 18, with STOCKS on hand.

	1865	1864	1863	1862
Imports ..... tons	13060 ...	13550 ...	17250 ...	14030
Deliveries	15095 ...	14230 ...	19152 ...	17142
Stocks	5052 ...	6800 ...	6911 ...	8784

OTHER DRYSALTERY GOODS.—There is more inquiry for several articles. Gambier has sold freely for arrival at 20s 6d to 20s 9d, and 21s since refused. 2,904 bags Cutch, by auction, met with great competition, selling at 26s to 29s, which is dearer. 275 bales Bengal safflower, of the new crop, sold with fair spirit at full quotations, from 5*l* 10s to 7*l* 10s per cwt.

SHELLAC has met with more inquiry.

RUBBER.—All kinds have advanced considerably. Fine Para, 1s 6½d to 2s 8d. Fine E. I. has sold as high as 1s 10d per lb.

METALS.—The full advance of 20*l* per ton recently fixed by the smelters cannot be obtained, but large contracts have been made in Australian, and the market is still very strong. Speculative business of considerable extent has occurred in foreign tin. Straits, 95*l* to 97*l* 10s, according to conditions; the bulk, however, for cash. To arrive, 97*l* 10s to 98*l* per ton. Spelter steady, at 22*l* to 22*l* 5s for ordinary, and special brands in proportion. Scotch pig iron is steady, and rather higher, mixed numbers selling at 58s 6d to 58s 9d per ton, cash.

JUTE.—There has been less business done than for some time past. On Wednesday, 5,110 bales, offered by auction, sold at partly previous rates, from 14*l* 10s to 24*l* per ton.

HEMP.—Manilla is quiet, but Russian remains firm. Clean Petersburg, 34*l* 10s per ton.

LINSEED is scarce on the spot. Several cargoes of Azov have sold at 64s 9d to 65s 3d; one of Taganrog at 65s 9d. Bombay afloat has sold at 69s to 70s 6d; Calcutta, 66s 6d to 67s per quarter.

OIL.—Linseed closes rather quiet, at 38s 9d to 39s on the spot; forward deliveries to April, 39s 6d to 40s per cwt.

TALLOW.—The market is inactive and lower. 1st sort new Petersburg Y.C., 50s 1d to 50s 3d; January to March, 51s; March, 52s per cwt.

PARTICULARS OF TALLOW.—Monday, November 20, 1865.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market has been much firmer. Privately 1,500 bags grainy Mauritius sold at 39s. 250 casks Porto Rico at 36s. 201 casks Barbadoes offered by auction, went rather dearer for the portion sold. 650 brown Bengal sold at 30s to 32s per cwt. Week's business in West India 1,732 casks.

COPPER.—913 casks 462 barrels and bags plantation Ceylon sold at full rates. 62 casks 2,542 bags native realised 69s to 73s 6d per cwt.

OIL.—681 casks palm sold at 39s 6d to 41s 6d per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar has been very steady, no material change to note with respect to prices. Dutch crushed firmer, but little doing.

DRY FRUIT.—The market for currants is dull, and for common fruit shows a decline. Anything good to fine is well held, but without any business doing. Valentias are lower, and sales can only be made at a great reduction. Sultanas are firm. Figs lower.

ENGLISH WOOL.—More demand for Down tegs; other sorts neglected.

COLONIAL WOOL.—The sales progress firmly.

FLAX.—The market is very firm.

HEMP.—Trade steady at the quotations.

SILK.—In China silk a fairly moderate business is continued at extremely firm rates, best No. 3 Tsatlees realising 31s 6d. In Bengal silk there has been but little doing.

TOBACCO.—With exception of about 100 hhds of Virginia leaf taken for the Navy, sales of American descriptions have been less active, purchasers having confined themselves to small lots for immediate consumption. Prices are without change. Other growths than American were in good demand at very full rates.

LEATHER AND HIDES.—The demand for leather during the past week has not been brisk. The supply of fresh leather at Leadenhall on Tuesday was rather above the average: prime crop hides, 35lbs and 50lbs, foreign bellies, English horse hides, and light calf skins are much wanted and sell freely on arrival.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	54	3
Fat by ditto	3	8½
Yellow Russia	51	6
Melted stuff	41	6
Rough ditto	23	6
Greaves	20	0
Good dregs.....	6	6

METROPOLITAN CATTLE MARKET.

MONDAY, Nov. 20.—The total imports of foreign stock into London, last week, amounted to 19,815 head. In the corresponding week in 1864 we received 13,425; in 1863, 11,417; in 1862, 5,205; in 1861, 6,303; in 1860, 8,330; and in 1859, 5,981 head.

For the time of year the supply of foreign stock on offer in our market to-day was rather extensive. The condition of the beasts and sheep, however, was only middling. Sales progressed slowly, and the quotations had a drooping tendency. The arrivals of beasts fresh up from our own grazing districts were on the increase. From Ireland and Scotland the supply was moderate. The beef trade was heavy, at a decline in the quotations compared with with Monday last of 2d per 8 lbs, and a total clearance was not effected. The top prices for Scots and crosses were 5s to 5s 2d per 8 lbs. From Lincolnshire, Leicestershire, and Northamptonshire we received 2,200 Shorthorns, &c; from other other parts of England 700 various breeds; from Scotland 172 Scots and crosses; and from Ireland 250 oxen, cows, and heifers. The show of English sheep was again very moderate; nevertheless the sale for them was heavy, at 2d per 8 lbs less money. The best old Downs were disposed of at 6s 8d, and the best half-breeds 6s 4d to 6s 6d per 8 lbs. Nearly all breeds came to hand in but middling condition. We were well supplied with calves, chiefly from the continent, and the inquiry for for them was very inactive, at Thursday's decline in the quotations. There was only a limited sale of pigs, the show of which was good, at barely stationary prices.

SUPPLIES.

	Nov. 21, 1864.	Nov. 20, 1865
Beasts.....	6130	6610
Sheep.....	21200	24180
Calves	220	520
Pigs	280	930

THURSDAY, Nov. 23.—To-day's market was fairly supplied with beasts as to number. The demand for all breeds was heavy, and the quotations had a drooping tendency. The top figure was 5s 2d per 8 lbs. The show of sheep was moderate, and sales progressed slowly, on rather lower terms. The best Downs realised 6s 8d per 8 lbs. Calves, the supply of which was extensive, were very dull, at the late decline in value. Prices ranged from 4s to 5s per 8 lbs. The pork trade was heavy, and prices were not supported. The highest figure was 5s 2d per 8 lbs. Milch cows were very dull and rather cheaper.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d

HAY MARKETS.

THURSDAY, Nov. 23.—On the whole, the trade is steady. Hay and clover are in fair supply; but straw continues scarce.

Per load of 36 trusses

	Smithfield.	Cumberland.	Whitechapel.
	s s	s s	s s
Hay	90 to 115	85 to 115	80 to 115
Clover	90 to 135	95 to 140	90 to 135
Straw	36 to 42	38 to 45	36 to 45

HOP MARKET.

BOROUGH, Friday, Nov. 24.—The trade for most descriptions of hops rules quiet. For good and fine samples, however, the market must be considered firm; but the demand for inferior produce is in a sluggish state. New Mid and East Kents, 80s to 190s; New Weald of Kents, 70s to 126s; New Sussex, 60s to 115s; Yearlings, 95s to 135s per cwt.

POTATO MARKETS.

BOROUGH, Friday, Nov. 24.—The supplies of potatoes on sale are moderate. On the whole, the trade is steady, at the annexed rates:—Scotch Regents, 65s to 80s; Yorkshire Regents, 60s to 90s; Flukes, 80s to 110s; Rocks, 50 to 60s; Kent and Essex Regents, 70s to 90s per ton.

COAL MARKET.

FRIDAY, Nov. 24.—Wallsend:—Haswell 20s—Hetton 20s—Hartlepool 19s 9d—Tees 19s 9d—Pensher Primrose 18s 6d—Hastings' Hartley 19s. Ships at market, 22; sold, 9; gas contracts, 11—20; unsold, 2; ships at sea, 80.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Nov. 24.—The business done this week has been of moderate extent only, as importers on the one hand are very firm in their demands and in some cases hold for enhanced prices, whilst buyers on the other hand do not purchase more than they absolutely require at present high rates.

EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic receipts of railways in the United Kingdom amounted for the week ending the 11th of November on 12,299 miles, to 666,368*l*, and for the corresponding week of last year, on 11,889 miles, to 623,475*l*, showing an increase of 410 miles and of 42,893*l*. The gross receipts on the 14 principal railways amounted in the aggregate, on 8,808 miles, to 552,472*l*, and for the corresponding week of 1864, on 8,489 miles, to 518,612*l*, showing an increase of 319 miles and an increase of 33,860*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, Nov. 20.—In the share market to-day the transactions were few, as were also the variations from Saturday's final quotations of the principal securities, and with the exception of a slight tendency to firmness in American, and a shade of weakness in British mines, there was no material change of tone in either of the descriptions. In English railways, Lancashire and Yorkshire recovered ½; Midland improved ¼, and North-Western a further ¼; and Great Western (South Wales) receded 1. In colonial, Great Western of Canada (shares of both descriptions) improved ¼ each, and Grand Trunk of Canada (1st preference, deferred) declined 2½, and Cape Town and Dock 2. In foreign, Lombardo-Venetian relapsed ¾. In American, Erie shares (paid up) and ditto (debentures) advanced ¾ and ¼ respectively, and Illinois Central (shares) a further ¼. In British mines, East Carn Brea and East Lovell declined ½ each, and Great Wheal Busy and Grenville ¼ each. In foreign mines, St John del Rey recovered 2, Scottish-Australian improved ½, and Cape Copper and Cobre Copper declined ¼ and 2 respectively.

TUESDAY, Nov. 21.—In the share market to-day there was no recovery of animation, and there was no material average change in the closing prices, except in English railways, which closed with firmness. Great Northern (A stock), Manchester, Sheffield, &c., Metropolitan, and North Staffordshire, and Great Eastern being all ½ higher, ditto (East Anglian) ¼ higher, and Great Southern and Western (Ireland) 3 higher; but Glasgow and South-Western was 1 lower, and North British ¼ lower. In colonial, Buffalo and Lake Huron receded ⅛. In foreign, Great Luxembourg and Bahia advanced ¼ and ½ respectively; and in Lombardo-Venetian the transactions were rather numerous, owing to a number of small investments induced apparently by the present low price. In American, Erie Debentures relapsed ¼, and United States (5-20) declined ¼. In British mines, Devon Great Consols advanced 10, Wheal Bassett 5, Wheal Seton 2½, and Providence 1; and North Roskear and West Caradon declined 2 each, East Caradon 1½, Clifford Amalgamated, Great Laxey, and Great Wheal Vor ½ each, East Carn Brea and East Grenville ¼ each, and Drakewalls ⅛.

WEDNESDAY, Nov. 22.—In the share market to-day there was a general absence of animation, and banks, colonial railways, and foreign mines were scarcely altered in tone, but the other descriptions closed with greater or less degrees of firmness, British mines and English railways showing most improvement, of which latter North London advanced 1½, Brighton and North-Eastern (York) ½ each, Great Western and Lancashire and Yorkshire ¼ each, Metropolitan a further ¼, and Great Northern (A stock) a further ½. In colonial, Great Western of Canada (paid-up shares) improved ⅛. In foreign, Lombardo-Venetian improved ⅜, Antwerp and Rotterdam ⅛, and Great Luxembourg a further ⅛; and Bahia relapsed ½. In American, United States (5-20) and Erie (debentures) recovered ¼ each, and ditto (paid-up shares) and Illinois Central shares improved ½ each. In British mines, North Roskear recovered 1, Great South Tolgus improved ¼ and Wheal Bassett and Wheal Seton further 5 each, and Chiverton declined ½. In foreign mines, Frontino Gold recovered ⅛; and St John del Rey declined 1, United Mexican ¼, and Cape Copper a further ½.

THURSDAY, Nov. 23.—In the share-market to-day, although the amount of business was not considerable, yet all the descriptions closed with a firm tendency, which was most general in American securities and English railways, of which latter Great Northern advanced 1½, North-Western ¾, Midland, North Staffordshire, South-Eastern, and Great Eastern ½ each, ditto (East Anglian) ¼, Metropolitan (Extension) ⅛, ditto (stock) and Great Western further ¾ each, Brighton and North-Eastern (York) a further ½ each, and Lancashire and Yorkshire a further ¼. In colonial, Great Southern of India and Scinde improved ½ each. In foreign, Dutch-Rhenish and Sambre and Meuse improved ⅝ each, Great Luxembourg a further ¼, and Lombardo-Venetian further ⅜. In American, Atlantic and Great Western (New York, both mortgages), and (Pennsylvania 2nd mortgage), and Marietta bonds, all advanced 1, Illinois Central (shares) and Erie (debentures) a further ½ each, ditto (paid-up shares) further ¾, and United States (5-20) a further ¼. In British mines, West Seton improved 5, and Wheal Bassett and Wheal Seton further 5 each, and West Chiverton declined 4½, Grenville ¼, Clifford Amalgamated ½, and Chiverton a further ½. In foreign mines, Cape Copper recovered ¼.

FRIDAY, Nov. 24.—The railway market to-day was decidedly firm, and in several cases prices exhibit a fresh improvement. Great Western, London and North-Western, Lancashire and Yorkshire, and Caledonian stocks rose ½ per cent., and Metropolitan and South-Eastern ¼. Great Eastern stock was dull.

LAURIE'S TABLES OF SIMPLE INTEREST for EVERY DAY in the YEAR, at 5, 4½, 4, 3½, 3, and 2½ per cent., from 1 to £1,000. Twenty-ninth Edition. 8vo. 21s.

LAURIE'S TABLES OF SIMPLE INTEREST, for every Day in the Year, at 5, 6, 7, 8, 9, and 9½ per cent., from 1 day to 100 days. Eighth Edition. 8vo. 7s.

"In the great requisites of simplicity of arrangement and comprehensiveness, we have seen none better adapted for general use."—McCULLOCH'S COMMERCIAL DICTIONARY.

"Mr Laurie was well known as one of the most correct and industrious authorities on commercial calculations, and the practical value of his various tables has long been recognised."—THE TIMES.

Virtue Brothers and Co., Amen corner, London.

"MY LIBRARY."

Edited by PAMPHILIUS.
SIXPENNY VOLUMES.
Each Volume complete in itself, uniform in size, and neatly bound, with Ornamental Wrapper.

The object of "MY LIBRARY" is to direct the attention of young men to LITERATURE of a higher standing than that generally published at so low a price—to provide them with a CHEAP, NEAT, PRACTICAL, and PROGRESSIVE LIBRARY, calculated to stimulate to INDUSTRY, ENERGY, PERSEVERANCE, and SELF-DENIAL, for with these virtues there is no eminence to which a man may not aspire, and from the examples deduced he will perceive that a truly enviable reputation is only to be acquired by independency of character, by honesty, consistency, and by spotless integrity, both in public and in private life.

"MY LIBRARY" will be devoted to PRACTICAL and PROGRESSIVE KNOWLEDGE—will be a MIRROR of LITERATURE, SCIENCE, and ART—a multum in parvo—the condensation of the primary aspirations of the great, the good, and practical, whose examples are calculated to engender and animate virtue, to create emulation, and teach the RISING GENERATION to struggle, to endure, to conquer difficulties, or in failure—

"To arm the obdurate heart
With stubborn patience and with triple steel."

"MY LIBRARY" will also be a Magazine of Reference, an INDICATOR to the youthful mind in the choice of books—for the choice of books, like the choice of companions, either tends to ELEVATE or DEGRADE, as books give the same turn to our thoughts and reasoning that GOOD COMPANY does to our conversation.

POPULAR AUTHORS
Will be Engaged upon "MY LIBRARY."

Now Ready.

I.

PARIS	At 279 Rue St Honoré;

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Casks and Bottles, and on Draught, genuine, from all the most respectable wine and beer merchants and licensed victuallers, on "ALLSOPP'S PALE ALE" being especially asked for.

SUGAR CANE MILLS AND ENGINES for Sale.—Two Horizontal Sugar Cane Mills, with rollers 24 inches diameter and 51 inches long, with double-geared connecting machinery, driven by horizontal steam-engines, with multitubular boilers and all necessary fittings: also two portable horizontal Cane Mills, with rollers 16 inches in diameter, and 30 inches long, driven by vertical high-pressure steam engines—the engine and mill standing on a strong cast-iron frame, with multitubular boilers and fittings; and three portable horizontal Cane Mills, with rollers 16 inches diameter and 24 inches long, with machinery for driving by cattle power. The whole of this machinery has been constructed by one of the first London houses, and is of the most improved and substantial construction.—For further particulars address to G. P. H., care of Messrs Hammond and Nephew, 77 Cheapside, London, E.C.

ACCOUNTANT.—MANAGING CLERK wanted, in the office of a Birmingham accountant, must be thoroughly experienced.—Address, by letter, giving age, references, and expected salary, 795 Journal office, Birmingham.

THE WINE TRADE.—A Cambridge graduate is desirous of placing between £3,000 and £4,000 in a wine business, with a view to the employment of his time and capital. References exchanged. Apply (by letter only) H.W., New University Club, St James's street, S.W.

TO FOREIGN MERCHANTS.—An Englishman of many years' mercantile experience in foreign countries, and fairly acquainted with Russian and French, is open to an ENGAGEMENT at home or abroad.—Particulars may be obtained and references exchanged on application to E. Erskine Scott, Public Accountant, 17 East India chambers, Leadenhall street, London, E.C.

WANTED FOR INDIA, A Gentleman to fill a responsible situation in a Merchant's office.—Apply by letter, with all particulars, to "India," care Davies and Co., Advertising Agents, Finch lane, Cornhill.

FINANCIAL AGENT.—WANTED, the services of a Gentleman who has influence with Town and Country Bankers, Insurance offices, Solicitors, &c., and who has had experience in negotiating the placing of first-class securities. Social position must be good.—Apply, by letter only, to M. D., care of Mr Edward Stanford, 6 Charing cross, S.W.

HEAD CLERK.—WANTED BY AN East India House in London, a Corresponding and Head Clerk, competent to direct the details of an office.—None need apply who have not had good experience, and held a similar position in a Mercantile firm.—Applications, stating antecedents, age, &c., may be addressed to C.B., City of London Club, Old Broad street.

CONFIDENTIAL CLERK.—Wanted, by the advertiser, a Situation in the above capacity. Is now engaged as Head Clerk in a Spice Merchant's office. Five years' reference as to ability and integrity from one of the leading produce brokers in the City. He has been accustomed to superintend, and is well acquainted with, the general routine of office work. Salary not under £150. Age, 25 years.—Address W. E., Miss Belshaw, 2 London street, Mark lane, E.C.

BANK MANAGER.—WANTED, IN a well-established British Colonial Bank, a Gentleman to fill the position of Inspector and Chief Colonial Officer. He must have had considerable experience in the highest departments of Banking, and be not less than 35 years of age. The most satisfactory testimonials as to character and ability will be required. It is especially requested that none but gentlemen possessing these qualifications will apply.—Address Messrs Wilkinson, Stevens, and Wilkinson, Solicitors, Nicholas lane, Lombard street, E.C.

FOUR-AND-HALF TERMINABLE STOCK.

The Bristol and Exeter Railway Company is issuing the remainder of its Terminable Preference Stock, bearing interest, payable half-yearly, at 4½ per cent. per annum, till 31st December, 1870, when the Stock is to be paid off at par, unless otherwise agreed, at the option of the holder. Applications to be made to the Secretary, Bristol from whom further particulars may be obtained. A. MOORE, Secretary.

EAST INDIAN RAILWAY COMPANY.

The East Indian Railway Company is prepared to receive Tenders for the supply and delivery of 8,650 tons of Rails, 4,750 tons of Chairs, and 500 tons of Fishing Plates, as per specifications and drawings, to be seen at the Company's offices.

Tenders must be delivered in sealed envelopes addressed to the undersigned, marked Tender for Rails, Chairs, &c., as the case may be, not later than 12 o'clock at noon, on Thursday, the 30th day of November next.

The Company is not bound to accept the lowest or any Tender.—By order of the Board,
D. I. NOAD, Secretary.
East India Railway House, Alderman's walk, New Broad street, London, 2nd Nov., 1865.

GREAT CENTRAL GAS CONSUMERS COMPANY.

The Directors beg to announce, that in comformity with a communication made to the Commissioners of Sewers on the 11th February last, the price of gas supplied by this Company will be REDUCED from 4s 6d to 4s per 1,000 cubic feet, from Christmas next.

They have further the pleasure of stating their belief, that by Christmas, 1866, the certified accounts of the Company as required by Parliament will show such results, that, under the provisions of the Metropolis Gas Act, 1860, the consumers will be entitled to a further reduction of 6d per 1,000 cubic feet.

28 Coleman street, City, E.C., November 15, 1865.

SECRETARY (pro tem.)—B. Lambert, Esq.

Temporary Offices—City Bank chambers, Threadneedle street, London.

PROSPECTUS.

This Company is formed at the express solicitation of merchants and others engaged in trading and monetary operations in the Ottoman Empire, for the purpose of extending to the mercantile community of Turkey that legitimate aid, which, in more favoured countries, is rendered to commerce by well-conducted banking institutions.

The enormous development of the trade of Turkey within the past few years, has not been met by any continuous increase of banking facilities; and when it is considered that the total imports and exports have risen from £20,000,000 in 1852 to upwards of £80,000,000 in the year 1864, some idea may be formed of the vast and profitable field which is open to a bank, conducted upon English principles, and managed by gentlemen possessing a local and practical knowledge of the country.

In the year 1851, the total number of vessels that entered and cleared at the port of Constantinople was only 13,069, tonnage 2,397,316; while in the year 1864, the number rose to 48,939, tonnage 7,433,063. At the port of Smyrna, the total imports and exports in the year 1854 amounted only to £2,464,525; while in 1864 they increased to £8,563,502. In these great centres of Turkish commerce, there is but one joint stock bank in existence.

The Ottoman Bank (La Banque Impériale Ottomane) is the only bank in Turkey, and the profitable nature of its operations is evidenced from the price of its shares, which with £10 paid are quoted at £16, while the last dividend amounted to 15 per cent. per annum.

The operations of the Bank of Turkey will be strictly confined to banking business, to the exclusion of anything connected with the business of a merchant. It will assist commerce, while at the same time, it will avoid on its own part all interference with, or competition in trade. This feature in a bank for Turkey is of peculiar value and will secure at once for the Company a clientelle of the most unexceptionable and profitable character.

The bank will afford facilities to merchants in this country and on the continent, for the negotiation of their drafts on correspondents in Turkey.

Applications for shares may be addressed in the annexed form to the Directors, and copies of the prospectus may be obtained at the offices of the Ottoman Company, 20 Threadneedle street, or at the offices of the Bankers, Brokers, and Solicitors; but no application will be considered unless a deposit of £1 per share on the number of shares applied for has been paid.

Copies of the memorandum and articles of association may be obtained at the offices of the Solicitors, or at the temporary offices of the Bank. Copies will be forwarded by post, without charge, on application to the Secretary.

FORM OF APPICATION FOR SHARES.

(To be retained by the Bankers).

No.—

To the Directors of the Bank of Turkey, Limited.

Gentlemen,—Having paid to your bankers the sum of £ , being a deposit of £1 per share on shares in the above Company, I hereby request that you will allot me that number, and I agree to become a member of the Company in respect of such shares, or in respect of any less number you may allot me, and to execute the Articles of Association when required; and I request that my name may be placed on the Register of Members for the shares so allotted.

No. 52 Threadneedle street, London E.C.

THE LAND MORTGAGE BANK OF INDIA (CREDIT FONCIER INDIEN), Limited.

The first drawing on account of the issue of 1864 of £500,000 Five per Cent. Debentures of this Bank, redeemable at par within 30 years, by half-yearly drawings, will take place on the 21th instant. Notice of the numbers drawn will be duly advertised.

DEBENTURES OF THE LAND MORTGAGE BANK OF INDIA (CREDIT FONCIER INDIEN) Limited.

Subscribed capital £2,000,000. Paid up £400,000.

Debentures of this Bank are issued in Bonds to Bearer, or Registered Proprietor, of £20, £100, £500, and £1,000 each, Redeemable at Par within 30 Years, by Half-yearly Drawings.

Interest, £5 per Cent. per Annum,

Payable Half-yearly or Quarterly, as stated below.

The Price of Issue is £87 for every £100.

The debentures of the Bank are secured by the whole of its invested funds and by the additional guarantee of the uncalled capital, which at present is £1,600,000, represented by a proprietary of 1,300 shareholders. The investment of the Bank's funds is restricted, by the articles of association, to real estate in India and Government Securities, and the issue of debentures can never exceed the sum so invested. The amount of debentures already issued exceeds half a million sterling, and the amount invested on mortgage of real estates in India is upwards of three quarters of a million sterling.

The above price of issue gives to the subscriber 5¾ per cent. interest on the amount invested, and a cash bonus of £14 18s 10d per cent. on the redemption of the bonds at par by the half-yearly drawings, which (averaging the period of drawing) yields a return of 6¼ per cent.

The Bank also issues debentures at par for fixed periods of three, five, seven, and ten years, bearing 5½ per cent. interest.

The Bonds are payable either to bearer—transfers passing from hand to hand without endorsement and free of further stamp duty—or to persons duly registered in the debenture books of the Bank, ownership changing only by transfer deed. Coupons for the half-yearly interest are attached, payable either 1st January and 1st July, or 1st April and 1st October, by which means investors have the option of drawing their interest half-yearly or quarterly. The quarterly receipts of interest are secured by part of the investment being made in bonds, with interest payable January and July, and part in those the interest of which is payable April and October.

Applications to be made at the Offices of the Company, 17 Change alley, Lombard street, E.C., where any further information may be obtained.

THE LONDON JOINT STOCK BANK

give notice, that the rate of interest allowed on deposits at seven days' call is this day reduced to FOUR-AND-A-HALF per cent. per annum.

Profits are divided every fifth year, four-fifths thereof being appropriated to the persons assured on the participating scale of premium.

At the Six Divisions of Profits which have been made, Bonuses amounting in the aggregate to £4,164,147 have been added to the several policies.

The Claims paid to 31st December, 1864, amounted to £6,580,091, being in respect of sums assured by policies £5,167,984, and £1,412,107 in respect of Bonuses thereon.

Prospectuses, statements of accounts, forms of proposal, &c., may be obtained, and Assurances effected, through any Solicitor in town or country, or by application direct to the Actuary at the office in London.

WILLIAM S. DOWNES, Actuary.

UNIVERSAL LIFE ASSURANCE SOCIETY (Established 1834), 1 King William street, London, E.C.

At the Thirty-First Annual General Meeting, a reduction of 50 per cent., or one-half, upon the premiums for the current year was declared upon all participating policies six years in force, as shown in the following examples:—

Age in Policy.	Sum Assured on Lives in England.	Original Premium.	Reduced Premium for next year.
	£	£ s d	£ s d
20	1,000	19 6 8	9 13 4
30	1,000	24 8 4	12 4 2
40	1,000	31 10 0	15 15 0

Age in Policy	Assured on Lives in India.	Original Premiums.	Reduced Premium next Year.	Further Reduced Premium if in Europe.
	£	£ s d	£ s d	£ s d
20	1,000	42 0 0	21 0 0	9 13 4
30	1,000	48 0 0	24 0 0	12 4 2
40	1,000	59 0 0	29 10 0	15 15 0

The above will show the great advantages attaching to policies effected with this Society, the annual reduction of premiums having been nearly 50 per cent. per annum at 26 divisions of profit. Large reversionary bonuses were also added to policies the holders of which preferred increasing the sums assured to decreasing their premiums.

Premiums and conditions highly favourable to assurers proceeding to India. The society has branch offices at Calcutta, Madras, and Bombay, where policies may be taken out on lives residing in any part of India.

FREDK. HENDRIKS Actuary and Secretary.

Messrs Grindlay and Co., 55 Parliament street, S.W., have been appointed agents to this Society for the west end of London.

NOTICE.

GENERAL DEBT OF THE OTTOMAN EMPIRE.

CONVERSION OF THE OLD INTERNAL DEBTS.

The public are hereby informed, that the period during which Consolidés and other bonds of the Turkish Internal Debt are received for examination, verification, and conversion into the 5 per cent. General Debt of the Ottoman Empire has been extended on the original terms to 31st December, after which date the conversion will be definitively closed.

The terms of exchange are at present as follows for Consolidés of the 1st, 2nd, 3rd, and 4th issues:—

For Bonds of £100 Turkish Money, giving at 6 per cent. an annual interest (payable in Constantinople only) equal to £5 8s sterling, there will be given in exchange Bonds of the General Debt for £121 Turkish Money, equal to £110 sterling, giving at 5 per cent. an Annual Interest of £5 10s sterling, payable in London; or 137½ francs payable in Paris, Amsterdam, or Frankfort.

Prospectuses, laws, and list forms at the offices of this Company, open daily from eleven to two, except on Saturdays.

Notice is likewise given to holders of converted (stamped) Consolidés, in London only, that they can receive New 5 per cent. Bonds, in exchange for any of the former bearing within the entry stamp any List No. between 1 and 1,000, or for conversion receipts bearing any such No.

Lists can be had at the offices open (Saturday excepted) from 11 to 2.

For the General Credit and Finance Company of London (Limited), Agents for the Contractors,

JAMES MACDONALD, General Manager.

27 Austinfriars, London, November, 1865.

THE MATELLA COFFEE ESTATES COMPANY OF CEYLON (Limited).

Incorporated under the Companies Act, 1862, by which the liability of each shareholder is limited to the amount unpaid on his shares.

Capital £60,000, in 6,000 shares of £10 each.

Power is reserved for the Company by special resolution to increase the capital.

The Directors and their friends subscribe for 4,000 shares, leaving 2,000 to be offered to the public.

£1 per share payable on application, and £1 10s on allotment, the remaining £7 10s by calls not exceeding £2 10s per share, at intervals of not less than three months.

The vendor guarantees and secures to the satisfaction of the Directors dividends upon the paid-up capital of £12 per cent. per annum, by half-yearly payments, during the three years next after the allotment. The guarantee may be inspected at the solicitors' office.

The vendor bears all the preliminary expenses.

DIRECTORS.

A. K. Dyer, Esq., late General Manager in Ceylon of the Asiatic Banking Corporation (Chairman).
John Randon Worcester, Esq., Director of the Ceylon Coffee Estates Company.
H. H. Potts, Esq., Director of the Hunasgeria Coffee Company.
Richard Courtney, Esq., Director of the Ouvah Coffee Company.
W. D. Gray, Esq., late of Ceylon, Director of the Ceylon Coffee Estates Company.

BANKERS.

The Agra and Masterman's Bank, Nicholas lane, Lombard street.

BROKER.

John Inchbald, Esq., 2 Copthall court and Stock Exchange, London.

SECRETARY.

C. E. Banks, Esq.

Offices.—70 Cannon street West, London.

The objects of this Company are the acquisition and working of Coffee Estates in Ceylon, and the selling of their produce.

The Directors have purchased three valuable Coffee Estates, situated in the Matella District, known as Beredewelle, Delagohoya, and Oodasgeria. The contract may be seen at the office of Messrs Courtenay and Croome, the Company's solicitors. These estates contain about 1,010 acres. 614 acres are planted, 552 are in full bearing, and the remainder will be so next year. 55 acres are in guinea grass, for cattle. 200 acres of very fine forest land are to be planted this year, which will leave about 140 acres to be brought into cultivation at a later period.

The crop for the year 1865-6, and which is now partly picked, is estimated between 5,000 and 5,500 cwts, and as the vendor bears all expenses of up keep to the 30th June last, 5,500 cwts should give a net profit available for dividend and reserve fund of more than £10,000.

When the whole acreage, exclusive of the 140 acres is in full bearing, the estimated profit available for dividend would, at present prices, amount to about £12,000, or at the rate of £20 per cent. per annum on the entire capital.

During the period of the guarantee, the Directors will place to a reserve fund all profits beyond £12 per cent. per annum on the paid up capital; at the expiration of that period, this fund will be distributed pro rata amongst the then holders of shares to which the guarantee extends.

The Ceylon Coffee Estates Company's success shows what large profits are derivable from Coffee cultivation. The Directors of that Company, which has a capital of £60,000 out of the profits on their first year's operation, paid a dividend of £10 per cent. and carried to the reserve fund, £4,757 5s 0d, equal to about £8 per cent. more.

Prospectuses and forms of application for shares may be obtained at the offices of the Company, and of the bankers, brokers, and solicitors, where the contract for purchase may be seen.

Copies of the memorandum and articles of association can be had at the offices of the solicitors, or at the temporary offices of the Company. Copies will be forwarded by post without charge, on application to the secretary.

THE MATELLA COFFEE ESTATES COMPANY OF CEYLON (Limited).

Notice is hereby given, that the Share List of this Company will be Closed on Wednesday next, November 29th.—By order. C. E. BANKS, Secretary.

Messrs CLENCH, SMITH, and CO. are instructed to receive Applications for Scrip Certificates in the

NAPLES PUBLIC WORKS COMPANY, Limited.

Incorporated under the Companies Act, 1862, by which the liability of each shareholder is limited to the amount of his shares.

Capital £1,200,000; first issue, £600,000.

With power to increase.

In 6,000 provisional scrip certificates to bearer, of £100 each, of which £3 must be paid on application, and a further sum of £7 on allotment each of such scrip certificates being divisible into five share certificates of £20 each, upon there being called up and paid thereon the proportion of 20 per cent. of the nominal value.

Interest on all calls duly paid by shareholders during the first two years of construction, at the rate of six per cent. per annum; or at seven per cent. if fully paid up. After the first two years, the rentals, then constituting the shareholders' revenue, are estimated to yield ten per cent., irrespectively of bonuses from sales.

The £100 provisional scrip certificates may be exchanged, with the consent of the Company, for debenture bonds, redeemable in five and seven years, to bear eight per cent. interest.

SECRETARY—J. F O'Brien, Esq.

Temporary Offices—1 Royal Exchange buildings, London.

This Company is formed for the purpose of executing Public Works in Naples, and will commence operations by constructing a boulevard upwards of a mile in length and 80 feet wide, connecting the centre of the city, the Royal Palace, and the Government buildings with the Chiaja, and Corso Victor Emanuel, the chief carriage drive of the Neapolitan people. The entire project is shown on the accompanying plan, where the portion coloured red indicates the first section of the works, and that coloured blue (for which plans are now being prepared, and arrangements are in progress with the Municipality) is marked out to be subsequently proceeded with.

Naples, the third city in Europe, contains about 600,000 inhabitants, and is rapidly increasing in population and commercial development. It is the port and centre of a population numbering nearly 2,000 000 souls, dwelling within a radius of twenty miles, and is much frequented by foreigners from all parts of the world, both for temporary and permanent residence.

A Tender for this work was made to the municipality of Naples, in accordance with a decree of expropriation, and having been accepted by them, and approved in due form by the Prefect, on behalf of the Government of Italy, the requisite compulsory powers are thus secured for the purchase and expropriation of the necessary land in fee simple for the intended object, without the delay of other legal formalities. The municipality of Naples, upon accepting this Tender, required the usual deposit of cash money, which the concessionaire has accordingly paid.

The municipality contributes a subsidy of 1,800,000f, payable progressively as the work proceeds.

Contractors have undertaken to purchase all the land necessary and to complete the construction of the new thoroughfare in the style of the edifices lately erected on the new boulevards of Paris, including the formation of the road, paving, and works of drainage, &c. The new houses are to be 20 metres high (65 feet), and the total cost for houses, land, &c., amounts to 620 francs (£24 16s) per square metre of the area built upon.

The contractors, relying upon the success of the undertaking, have accepted these terms, and they look for their remuneration out of a portion of the surplus profits after repayment of capital, interests, and all other expenses. This remuneration has been fixed at one-fourth of the realised profits, the remaining three-fourths being divisible among the shareholders.

From a Report published by the Municipality of Naples, in 1862, on the value of house property there, and from the increase of value since that date, which is estimated by experienced residents at upwards of 30 per cent., the revenue from rentals would be calculated to yield at least 10 per cent per annum on the cost of construction.

The value of house property in Naples is reported to vary, according to locality, between twenty to twenty-five years' purchase:—Houses in the Via Toledo being valued at twenty-five years', those in the Chiaja district, and in the vicinity of the new street at twenty years' purchase. When the proposed boulevard is opened into the Toledo, it is believed that these houses will command an equal, if not a higher price than those in the Toledo. Taking the value, however, at an average of only twenty years' purchase, each square metre yielding a minimum rental of sixty-five francs, or over ten per cent. on a cost of 620 francs (£24 16s), would attain a selling value of 1,300 francs (£52).

There is a large and increasing demand for house accommodation in Naples, and house property being the favourite investment of the Neapolitan people, immediately houses are completed they find ready purchasers. Indeed, in many cases, contracts for sale can be made in anticipation of their completion.

After a most careful examination of the present project and of all attendant circumstances, it is calculated that a share capital of £600,000, together with the returns from sales taking place during the progress of the works, will be sufficient to work out the entire concession. And the calculation, founded upon the above stated rates, exhibits as a result,—within the term of eight years to be occupied in completing this enterprise,—returns, from the disposal of successive portions of the estate, which promise to furnish at least £500 in the aggregate of bonuses upon every subscription of £100,—exclusively of the entire repayment of the capital:—or, in other words, a capital profit of 500 per cent., with intervening interest at the rates of 5 per cent., 6 per cent, and 10 per cent., as described.

The report of Mr Burges, the architect, of London, who was especially deputed to make investigations on the spot, is referred to in corroboration of the foregoing statements.

A provisional contract has been entered into for the transfer of this Concession to the Company for the sum of £50,000 as the consideration for such transfer.

The Company, under their articles, adopt and confirm the agreements and contracts, and the Directors are enjoined to carry out the same, to repay the caution-moneys, discharge the considerations as agreed, and to pay the various expenses and commissions incurred to constitute the Company. The Company indemnify the first contractors in the usual manner; and the Financial Agency Commission is fixed not to exceed two per cent., to cover and include commissions for acceptance upon bank credits required.

Power is reserved in the memorandum and articles of association, which can be seen at the temporary offices of the Company, for the Board to enter into engagements for other public works, deemed promising by the Directors, as also to purchase or lease premises for improvements or use, and to create and issue redeemable debenture bonds and deposit notes, in proportion to the progress of the works, and to the extent of one-half of the value of works completed from time to time.

The right is hereby reserved to all ottees of scrip certificates to pay up the full nominal value thereof, so that they be convertible into fully paid shares.

Deposits upon which no allotments are made, will be returned in full.

Prospectuses and all information can be obtained from Messrs Clench, Smith, and Co., 1 Royal Exchange buildings, and copies of the articles of association may also be obtained from the brokers and solicitors.

THE NAPLES PUBLIC WORKS COMPANY (Limited).

Capital £1,200,000. First issue £600,000.

FORM OF APPLICATION.

To the Directors of the Naples Public Works Company (Limited),

Per Messrs Clench, Smith, and Co., 1 Royal Exchange buildings, London.

Gentlemen,—Having paid to the Bankers of your Company the sum of £ for your Company's credit, I request you to allot me per certificates of £100 each in the said Company. And I hereby agree to accept such scrip or any less amount that may be allotted to me, and also to pay the further sum of £7 for every such certificate when allotted to me; and I agree also subsequently to accept, in lieu of each such scrip certificate of £100, five share certificates of £20 each, and to hold or transfer such scrip or share certificates, subject to the provisions of the articles of association of your said Company, on the register of which you may inscribe my name as a member in case of allotment.

Name in full.....
Address.....
Profession or Condition.....
Date .....

This portion will be retained by the Bankers.

GOTHIC HARP, BY ERARD, scarcely used and in perfect condition, to be sold for about half cost. May be seen at Messrs Keith, Prowse, and Co.'s warehouse, 48 Cheapside.

FLUTES.—THE NEW MODEL FLUTE (old fingering), for beauty and volume of tone unsurpassed, 3½ gs. and 7 gs. Also a Rudall and Co.'s Prize Medal Flute, about half cost, at Messrs KEITH, PROWSE, and CO.'s manufactory, 48 Cheapside. Just published, Rockstro's "Hints to Flute Players," price 6d.

CONCERTINAS.—AT MESSRS KEITH, PROWSE, and CO.'s manufactory, 48 Cheapside, may be found, CONCERTINAS, which, for quality and durability, have proved by their long use in India and other extreme climates to be unsurpassed. Prices, first-class, 5 to 15 guineas. Ordinary concertinas two guineas.

HARMONIUMS, BY ALEXANDRE.—The new church Harmonium, with stops and knee pedals, Venetian swell, and four rows of vibrators, is now being introduced (price 24 guineas, packed and delivered at any London railway station) by the city agents, Messrs KEITH, PROWSE, and CO., 48 Cheapside.

MUSICAL BOXES, BY NICOLE, FRERES.—Messrs KEITH, PROWSE and CO., direct importers, offer parties seeking really fine, well-tuned instruments a selection of more than 200 boxes, with all the recently-introduced improvements, from four guineas. The new boxes, with accompaniment of flutes, bells, and drum, should be heard to be appreciated, as the expressive effects upon the ear are exceedingly novel and beautiful.—48 Cheapside.

THE ORGAN ACCORDION has two rows of vibrators, organ keyboard, three octaves, and is as easily played as the accordion. Any pianist can perform upon it without study. Price from 4 guineas.—KEITH, PROWSE, and CO., 48 Cheapside.

166th SALE.

CUSTOM HOUSE.—London, December, 1865.

For Sale, by order of the Honourable the Commissioners of Her Majesty's Customs, at the Commercial Sale Rooms, Mincing lane, on Wednesday 6th, Thursday 7th, Friday 8th, and Saturday, 9th December, 1865, at Twelve o'clock at noon precisely, the following goods for exportation or home consumption:—Anchors, boats, brandy, coffee currants, eau de cologne, Geneva, needles, knives, perfumed soap, perfumed spirits, private effects, photographic pictures, rum, cigars, spirits (mixed), sugar, tobacco, tea, timber, watches (gold and silver), wine, and various other goods.

The above goods may be viewed at the Queen's Warehouse, Custom House, Thames street, at the St Katharine, London, West India, East India, and Victoria Docks, and at the Tobacco Ground, Rotherhithe, on Monday, the 4th, and Tuesday, the 5th December, 1865, from ten o'clock in the morning until three o'clock in the afternoon, and on the days of sale, from ten o'clock in the morning until twelve o'clock at noon, the tasting of spirits and wine being restricted to the day of sale as regards the Queen's Warehouse.

Take notice, that goods sold at this sale will not be delivered until after two clear days of the day on which they are sold, and that no lots can be paid for at the office of the Receiver-General after two o'clock in the afternoon, and that on the days of sale money will not be received by the Receiver-General after eleven o'clock in the forenoon.

Catalogues may be had at the Queen's Warehouse, Custom House, Thames street, 9d each.

COFFEE ESTATES FOR SALE, comprising about 1,370 acres of Plantation, nearly the whole of which is in full bearing, and very extensive tracts of Jungle, Forest, and Grazing land, estimated to comprise several thousand acres.

To be Sold by Auction, unless previously disposed of by private contract, at Bombay, early in the month of January, 1866, subject to the conditions to be then and there produced, to be first offered in the entirety, and, if not sold, in the following eight lots:—

Lot 1.—All that very valuable Estate called "LACKADIE,"

Situate at the head of the Tamboocherry Ghat, about 30 miles from Calicut, comprising about 250 acres, more or less, of Coffee in full bearing. Also, a large tract of rich Forest and Grazing Lands.

The Estate is well supplied with permanent buildings, and the most approved machinery, including a first-class water-wheel; is thoroughly roaded and well laid out.

Lot 2. THE CULLOOR ESTATE,

Situate about 2¼ miles from the head of the Tamboocherry Ghat, and connected therewith by a good road, comprising about 290 acres, more or less, of coffee in full bearing, a large and very rich forest and grazing lands.

The estate is well furnished with permanent buildings, and the most approved machinery, driven by water power for curing the crops.

The habits of the plant on this estate is most luxuriant, and its bearing capacity of the highest order.

The crops of the estate may be safely estimated at 10 cwts an acre.

Lot 3.—THE CHARLOTTE ESTATE,

Is a young and very promising Property, cut out of the Harnooth Valley, is distant about 4½ miles from the head of the new Tamboocherry Ghat, and is connected therewith by a good road. The Estate contains about 150 acres, most of which is in bearing, and possesses excellent permanent buildings.

Lot 4.—THE ANNETTE ESTATE,

Is bounded by the Culloor and Harnooth, and comprising about 240 acres in full bearing, a large tract of unopened Forest and some Grass Lands, and is furnished with all requisite buildings and machinery.

Lot 5.—THE ADELAIDE ESTATE,

Comprising about 180 acres of Coffee in full bearing, and sundry Swamps and Grazing Lands.

This estate is well furnished with permanent buildings of all kinds of the best description, and is amply supplied with the best machinery and working plant.

It is opened on the most productive description of soil in the Wynaad, and is in all points second to no estate yet opened in the Wynaad District.

The first opening was made in 1857, and the last in 1859, so that it is just acquiring its fullest bearing capacity.

The crop of 1863-4 was 110 tons, and the crop now on the trees is estimated at 130 tons.

Lot 6,—THE FIELD ESTATE,

Comprising about 150 acres of coffee in the most luxuriant and promising state of growth, is well supplied with permanent buildings, machinery, and working plant, is well roaded, and otherwise well laid out. The estate is formed on the same description of soil as the Adelaide, has been well managed, and will become a very productive property.

Lot 7.—THE WALLACE ESTATE,

Opened in 1859, comprising about 150 acres of Coffee in full bearing, and a large stretch of Jungle, Forest, and Bamboo and Grazing Lands. It is well roaded and well laid out, and possesses a first-class bungalow and other permanent buildings; also, in conjunction with the Field Estate, the most approved machinery and buildings for curing the crops.

Lot 8.—TWO UNCULTIVATED JUNGLES, called "Palakomda" and "Muddikah Mullil," of fine forest land, and in the vicinity of the above estates.

For particulars, and to view the Estate, apply in London to Messrs Hughes, Masterman, and Hughes, solicitors, 17 Bucklersbury, and to Messrs Flux and Argles, Solicitors, No. 1 East India Avenue; and in Bombay to Messrs Kelly, Hore and Manisty, and to Mr James Boosey, on the Adelaide Estate.

JOHN BENNET LAWES, F.R.S., 1 Adelaide place, London Bridge, Chemist and Merchant. Artificial Manures specially prepared for Sugar Cane, Coffee, and other crops. Sulphate of Ammonia, Superphosphate of Lime, supplied and shipped with despatch.

WARD'S PALE SHERRY at 36s per Dozen, FIT FOR A GENTLEMAN'S TABLE. Bottles and Cases included. Terms Cash, prepaid. Post Orders payable Piccadilly.

SAMPLES SENT FREE OF CHARGE.

CHARLES WARD AND SON,

(Established upwards of a Century), 1 Chapel street West,

MAYFAIR, W., LONDON.

MESSRS KNIGHT, DALE, AND CO., 1 ROYAL EXCHANGE BUILDINGS, ARE INSTRUCTED TO RECEIVE SUBSCRIPTIONS FOR £300,000, IN 15,000 SHARES OF £20 EACH, IN 15,000 PROVISIONAL SCRIP CERTIFICATES TO BEARER, IN THE

EAST AND WEST JUNCTION RAILWAY COMPANY.

With the exception of 1,000 fully paid-up shares, which have been reserved.

Incorporated by 27 and 28 Vict., cap. 76.

£1 on application, £4 on allotment, remainder in calls of £5 each, at intervals of not less than three months.

Interest at £6 per cent. per annum on the above capital guaranteed by the contractor, until the opening of the single line.

The capital at present authorised for a single line is £300,000 in shares, and £100,000 in debentures.

Powers for increasing this capital by the issue of preference shares (not exceeding £300,000) and £100,000 in debentures, for completion of a double line, making a total capital of £800,000, will be applied for next session of parliament.

It is proposed that this further share capital of £300,000 shall rank for dividend before the original share capital and receive a fixed dividend of 6 per cent., and be offered at par to the holders, for the time being, of the original capital, pro rata.

The estimated revenue is based on the proposed total capital of £800,000, viz., (£600,000 in shares and £200,000 in debentures).

SECRETARY—C. Banks, Esq.

Offices—3 Westminster chambers, Victoria street, Westminster, S.W.

This railway extends from Towcester to Stratford-on-Avon, a distance of 33 miles. Its object is to shorten by 30 miles the present narrow guage route, via Blisworth, between London and the great coal fields of South Wales, also to afford greater facilities for the coal traffic between South Wales and London, and the return ironstone trade between Northamptonshire and South Wales. The Company have secured running powers from Towcester to Blisworth, as well as most favourable arrangements with the Great Western Company

The line passes through a rich and populous country, and will afford the best route to London for all traffic arriving at Worcester from whatever source, as well as from Redditch, Alcester, Stratford, Kineton, and other important towns.

In 1864, South Wales produced 11,000,000 tons of coal, and London consumed 5,600,000 tons; of which quantity 2,000,000 tons were steam, and 1,000,000 tons gas coal; but, notwithstanding that South Wales is practically the only district in Great Britain where smokeless steam coal is found, less than 200,000 tons of coal of all descriptions were sent by railway from South Wales to London.

This virtual exclusion of the Welsh coal from the London market arises from the fact that the South Wales coal proprietors cannot successfully compete with the northern proprietors in consequence of the rates being lower on the northern lines than those hitherto charged by the Great Western Railway.

If these rates were equalised, and the independent narrow guage route shortened, as it will be by the proposed railway, there can be no doubt that a traffic in coal will be developed over it far exceeding the present quantity.

An annual demand exists in Wales for 2,000,000 tons of ironstone of the quality found in Northamptonshire which district at present supplies only about 200 000 tons, in consequence of the long routes and high rates. This quantity will be largely increased, as the reduced rates and the shortened distance of 30 miles will enable the ironstone to be delivered in Wales at a reduction of 8s per ton, making a price less than it could be raised in Wales or imported, and will secure to this railway, above all other routes, the great desideratum of back mineral carriage.

Arrangements have been made by which the traffic of some of the principal ironstone estates in Northamptonshire, including a considerable portion of Lady Palmerston's estate, is secured to this Company.

From the foregoing data it must be assumed that a traffic of at least 1,000,000 tons of coal and a like quantity of ironstone will be attained. The passenger and goods traffic from the important districts through which it passes cannot be taken at less than £50 per mile weekly, especially when it is borne in mind that an immense traffic already exists between Worcester and London in which this Company must participate. Taking three-eights of a penny per mile for minerals, and taking the working expenses at 40 per cent. for minerals, and 50 per cent. for passengers and ordinary goods traffic, will give the following results:—

	£	£
Passenger and ordinary goods traffic, at £30 per mile per week over 33 miles.	£51,480	
Deduct working expenses at 50 per cent.	25,740	
		25,740
Mineral traffic on 1,000,000 tons coal — — 1,000,000 tons ironstone		
2,000,000 at three-eights of a penny per mile	£103,124	
Deduct working expenses, 40 per cent.	41,249	
		61,875
Gross profit		87,615
Deduct interest on £200,000 debentures	£12,000	
Deduct dividend on proposed preference share capital of £300,000, at 6 per cent.	18,000	
		30,000
Available for dividend on present issue of ordinary share capital of £300,000		57,615

Being at the rate of nearly 20 per cent. per annum, or if distributed equally over the entire share capital, giving a mean dividend of nearly 13 per cent.

The authorised capital of the Company is £300,000, in 15,000 shares of £20 each, and £100,000 debentures.

The subscribers for the 14,000 shares now offered will be required to pay as under:—

£1 on application.
£4 on allotment.
£5 21st December, 1865.
£5 21st March, 1866.
£5 21st June, 1866.

£20

The subscribers will be entitled, on payment of the £4 per share on allotment, to a scrip certificate in respect of each share subscribed for.

When the whole amount of £20 has been paid on each certificate, the holder will be entitled to have the share transferred to him in exchange for such certificate.

The non-payment of any instalment will render previous payments liable to forfeiture.

The subscribers will have the option of paying up in full. Interest at the rate of 6 per cent. per annum will be allowed on pre-payment of instalments.

The holders for the time being of the capital now offered for subscription will have the valuable option of taking at par pro rata the proposed preference capital of £300,000.

Applications must be made on the forms annexed, and accompanied by payment of £1 per share (without which no application can be considered) to Messrs Smith, Payne, and Smiths.

In the event of no allotment being made, the deposit paid will be returned forthwith without deduction; and if less than the number of shares applied for are allotted, the sum paid will be applied towards the amount payable on allotment on the number so alloted.

Prospectuses, with maps, plans, &c., may be had of Messrs Knight, Dale, and Co., 1 Royal Exchange buildings, and at the offices of the East and West Junction Railway Company (C. Banks, Esq., Secretary), 3 Westminster chambers, Westminster, S.W.

FORM OF APPLICATION.

£300,000 in 15,000 shares of £20 each.

THE EAST AND WEST JUNCTION RAILWAY COMPANY.

To Messrs Knight, Dale, and Co., Royal Exchange buildings, London, E.C.

Gentlemen,—Having paid to Messrs Smith, Payne, and Smiths, the sum of £ , being £1 per share, I request you to allot me of the above shares, in conformity with the prospectus issued by you, and I hereby agree to accept such shares, or any less number that may be allotted to me, and to pay the further sum of £4 on allotment thereof, and the instalments when due, according to the terms of the prospectus.—I am, Gentlemen, your obedient servant,

THE AMERICAN OIL WELLS TRADING COMPANY, LIMITED.

To be incorporated under the Companies Act of 1862, by which the Liability of the Shareholders is limited to the amount of their Shares.

CAPITAL, £240,000, in 8,000 Shares of £30, of which 1,000 fully paid up are reserved for the vendor.

£1 payable on application, and £3 on allotment, which will be returned in full if no settlement is granted by the Committee of the Stock Exchange.

Calls not exceeding £5 per share to be made at intervals of not less than three months.

A minimum dividend of 8 per cent. per annum, payable half-yearly, is guaranteed for ten years; for the regular payment of which 64 per cent. will be retained from each instalment payable to the vendor, and be invested in the name of trustees, at the Bank of London, until the whole amount of the guarantee shall be deposited.

DIRECTORS.

J. W. Mollett, Esq.
H. W. Weguelin, Esq.
J. B. Hartwell, Esq.
Major E. J. Charter.
D. F. Luckie, Esq.

SOLICITOR—George Lawrence, Esq., 9 Fenchurch street, E.C.
AUDITOR—Henry Threlkeld Edwards, Esq., 9 King's Arms yard.
SECRETARY (PRO TEM.)—Edward James Smith, Esq.
TEMPORARY OFFICES—41 and 42 Langbourne chambers, 16½ Fenchurch street, E.C.

ABRIDGED PROSPECTUS.

This Company is established to acquire petroleum lands in America, either by purchase or lease; to work those lands on its own account, or to re-sell or sub-let them; and generally to trade in petroleum.

A preliminary contract has been entered into for the purchase by the Company of the undermentioned properties:—

The freehold of 1,343 acres, and the leases of 4,830 acres—together 6,173 acres, situate in Kanawha, Calhoun, Mason, Ritchie, Putnam, Wirt, and Jackson counties, in the centre of the petroleum producing district of Western Virginia.

These lands bear upon them undeniable evidence of oil. Not a week passes but oil is struck on adjacent properties; the yield of the wells being from 15 to 70 barrels of oil daily, of the best lubricating sort, which pervades the whole district, and is saleable at the well's mouth at from 40 to 50 dollars per barrel.

The sum to be paid for the acquisition of the property, including all engines, tools, derricks, and other fixtures, is 30,000*l* in paid-up shares of the Company, and 130,000*l* in cash, by instalments, out of which the vendor empowers the directors to retain (say 64 per cent., or about 85,000*l*) sufficient to guarantee a minimum dividend of 8 per cent. per annum for ten years on the amount paid up on shares alloted to the public. This reserved amount will be deposited, as the instalments are paid, with the Bank of London, in the names of trustees to be appointed by the directors on behalf of the shareholders.

Bearing in mind the disappointments which have resulted to the public from the recent refusals of settling days by the Committee of the Stock Exchange, the Directors will apply for a settlement within one month after allotment, and have arranged to return the deposits in full if no settlement is granted to the Company.

Prospectuses and forms of application for shares may be obtained at the offices of the Company, and of the Bankers, Brokers, and Solicitor, where the articles of association and contract for purchase, together with a plan of the several properties, can be seen.

THE AMERICAN OIL WELLS TRADING COMPANY, LIMITED.

The LIST for APPLICATIONS will Close on Thursday next the 30th instant.—By order, E. T. SMITH, Secretary (pro tem.).

COUNTRY AND TOWN Residences, Landed Estates, Investments, Hunting Seats, Fishing and Shooting Quarters, Manors, &c.—BEAL'S REGISTER of the above, published on the first of each month, forwarded per post, or may be had on application at his Offices, 209 Piccadilly, W. Particulars for insertion should be forwarded not later than the 28th of each month.

NOTHING IMPOSSIBLE.—The greatest and most useful invention of the day, AGUA AMARELLA.—Messrs JOHN GOSNELL and CO., Three King court, Lombard street, perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it, on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price one guinea per bottle; half bottles, 10s 6d. Testimonials from articles of the highest order and from individuals of undoubted respectability may be inspected. Messrs John Gosnell and Co. have been appointed perfumers to H.R.H. the Princess of Wales.

THOMAS TURTON AND SONS, Manufacturers of CAST STEEL for cutters, punches, taps and dies, turning tools, chisels, &c. CAST STEEL piston rods, crank pins, connecting rods, straight and crank axles, shafts, and forgings of every description. FILES marked T. Turton. Superior to any other make. (See results of trial in the TIMES, July 26, 1851.) TOOLS of all kinds, for engineers, railways, contractors, &c., &c. EDGE TOOLS marked Wm. Greaves and Sons. Electro-Boracic steel, warranted to wear out three tools made of cast steel. DOUBLE SHEAR STEEL, BLISTER STEEL, SPRING STEEL, GERMAN STEEL. Springs, buffers, and cast steel tyres for locomotive engines, railway carraiges, and waggons. SHEAF WORKS and SPRING WORKS, SHEFFIELD.
London Warehouse, 35 Queen street, City
Paris Warehouse, 10 Rue du Grand, Chantier.
New York Store, 102 John street.
Where the largest stock of steel, files, tools, &c., &c., may be selected from.

E. MOSES AND SON, GENERAL OUTFITTERS, HABIT MAKERS, TAILORS, HATTERS, HOSIERS, WOOLLEN DRAPERS, BOOT AND SHOE MAKERS.

E. MOSES AND SON, HAVE SEPARATE DEPARTMENTS FOR BESPOKE CLOTHING, READY-MADE CLOTHING, MOURNING, LIVERIES, UNIFORMS, SAILORS' CLOTHING, MECHANICS' CLOTHING, HOSIERY, SHAWLS AND MANTLES, LADIES' UNDERCLOTHING, BOOTS AND SHOES.

Nicoll's Winter Suits for Boys	— 1½ Guineas.
Nicoll's Winter Knickerbocker	— 1 Guinea
Nicoll's Winter Highland Dress	— 2 Guineas.

H. J. and D. Nicoll, 114 to 120 Regent street, 22 Cornhill, London; 10 Mosley street, Manchester; and 50 Bold street, Liverpool.

NEW OPERA AND FIELD GLASS and the Reconnoitrer Glass, price 10s 10d (sent free). This "TOURIST'S FAVOURITE," through extraordinary division of labour, distinctly shows small windows ten miles off, landscape at 30 miles, Jupiter moons, &c. The Marquis of Carmarthen—"The reconnoitrer is very good." Earl of Breadalbane—"I find it all you say, and wonderfully powerful for so very small a glass." Earl of Caithness—"It is a beautiful glass." "Rev. Lord Scarsdale approves of it." Lord Gifford—"Most useful." Lord Garvagh—"Remarkably good." Sir Digby Cayley—"It gives me complete satisfaction, and is wonderfully good." Captain Sendey, Royal Small Arms Factory, Enfield, "found it effective on the 1,000 yards range." F. H. Fawkes, of Farnley hall, Esq.—"I never before met, although I have tried many, a glass combining so much power, for its size, with so much clearness." THE FIELD—"We have carefully tried it at an 800 yard rifle range against all the glasses possessed by the members of the corps, and found it fully equal to any of those present, although they had cost more than four times its price." NOTES AND QUERIES—"What intending tourist will now start without such an indispensable companion to a pleasure trip?" The celebrated Hythe Glass shows bullet marks at 1,200 yards, and men at 3½ miles, 31s 6d. All the above glasses, respectively bearing the registered Trade-Marks, "Salom," "Reconnoitrer," and "Hythe," are only to be had direct from Salom and Co., 98 Princes street, Edinburgh. No agents of any kind anywhere.

AUSTRIAN GOVERNMENT LOAN OF 1865.

IN 734,694 BONDS OF £19 17s STERLING; OR

500 FRANCS; OR 200 FLORINS AUSTRIAN VALUE IN SILVER.

A Contract for this loan has been entered into between the Imperial Government of Austria, and the Comptoir d'Escompte of Paris, in combination with several capitalists.

AGENTS IN LONDON,

AGRA AND MASTERMAN'S BANK, LIMITED,

35 Nicholas lane, Lombard street.

These bonds will be issued at £13 14s 4d each, with coupons attached, payable half-yearly, of the value of 9s 11d each, being at the rate of 5 per cent. per annum, from 1st December proximo.

£1	0	0	per Bond to be paid on Application, and the remaining £12 14s 4d in the following instalments:—
1	19	7	on 15th December,
3	11	7	on 10th February,
3	11	7	on 10th April,
3	11	7	on 10th June (less Coupon for 9s 11d).
13	14	4	

Subscribers will be at liberty to pay their scrip in full on any of the above dates, under discount at 6 per cent. per annum.

Provisional certificates to bearer will be delivered to subscribers in exchange for their receipts after the payment on the 15th December.

These certificates will be exchanged for bonds after payment of the final instalment. Coupons will be attached to the bonds payable 1st June and 1st December, at the Agra and Masterman's Bank, Limited.

These bonds will be redeemed in thirty-seven years, by half-yearly drawings. At each drawing an equal number, or 9,928 bonds, will be withdrawn and paid off at £19 17s (or at par), with the half-yearly dividend.

The drawing will take place publicly, at the Austrian Embassy in Paris, on the 1st May and 1st November of each year, the first drawing will take place on 1st May, 1868.

The subscription will be opened simultaneously in London, Paris, Vienna, Prague, Amsterdam, Brussels, Hamburg, and Frankfort, on Monday, 27th November, and will remain open until Wednesday, the 29th November, at 4 p.m., unless it shall have been completed intermediately.

It is intended to allot to subscribers the full amount for which they apply, while the list remains incomplete. The day on which the number of applications shall exceed the number of certificates remaining available, the subscription will be closed, and applications received during that day proportionally reduced.

Applications for bonds, accompanied by the deposit of £1, to be addressed to the Agra and Masterman's Bank, Limited, where prospectuses and forms of application can be obtained.

London, 24th November, 1865.

The Political Economist.

TO ADVERTISERS.—To secure insertion, advertisements for the ECONOMIST must be forwarded to the office by 5 o'clock p.m. on Fridays.

The Investor's Manual *is now sold separately, price 9d stamped, 8d unstamped. If taken as a* Supplement *to the* Economist, *it remains at its former price, 6d. In addition to the information formerly given, it gives a concise summary of the Reports of the Companies for the present year as will enable Investors to judge of their position.*

THE MONEY MARKET.

It is important to observe that, according to the official returns received yesterday, the increase in our export trade, which has been continuous since the beginning of the year, has now met with a check. We cannot too often remind our readers that for the purpose of estimating the most recent effect of our trade upon the money market we should compare the last known month of this year, say October, with the month before of this year, say September: this is the *new* force which has just now come into operation. The comparisons with the corresponding month of last year, or of two years ago, have great value in many inquiries, but no value in explaining the most recent changes in the money market. Thus, in October our trade has declined, while it had augmented all the year previously steadily from May onwards. The figures are—

British Exports for the following Months of 1865.

	£
May	13,194,758
June	13,227,062
July	14,113,410
August	14,158,648
September	17,316,681
October	15,547,225

Our trade was indeed in October more than it was in August, but not so much as it was in September. The sudden demand upon our capital consequent on the vast augmentation in September has now much diminished, and a relaxation in the value of capital, in the rates of Lombard street, has ensued.

The condition of the market is, upon the whole, much the same as last week. But it is to be remembered that at the end of December the greatest demand upon the Bank for notes and coin for the public usually takes place. The outgoings to the non-banking classes, which always happen at the end of a quarter, are higher at the end of the December quarter than at the end of any other; and the Bank must keep fully prepared for such payments, or we may have another such dislocation of the money market by the effect of these outgoings (in conjunction with other causes) as we had at the end of the October quarter.

MR FORSTER'S ACCEPTANCE OF OFFICE.

It is of great significance at the present moment that Mr Forster should have accepted office. He is well known as the ablest, the sincerest, and the most effectual of the younger Radicals. Anything he does, he does with a will. "Whatever thy hand findeth to do, do it with thy might," is a text made for him. Such a man neither could nor would accept office unless he believed, and believed on grounds to satisfy an accomplished man of business, that the Government were fully determined as soon as may be—as soon as the necessary facts are well ascertained and the needful thought matured—to bring in a considerable and substantial measure of Parliamentary Reform. It becomes, therefore, most important to inquire what sort of measure a politician such as Mr Forster would approve of, or what at least he would accept.

In ultimate aim we should not, as far as we can judge of Mr Forster's opinions, in the least concur with them. They assume a principle to which we fear he attaches grave importance, but which we believe to be both mistaken and dangerous. He believes that some time or other, in the year 1965, or 2065, or 2565, the Government of England is to be given over to the numerical majority of the men (if not of the women) in it. He would accept as an instalment any fraction of power he can get for the most numerous class now: he would not (we suppose) wish to give them more than an ascertainable though considerable fraction now, but he takes what he now takes in part payment only. The supreme power now possessed and used by the more educated minority is ultimately to be possessed by the less educated majority: the nearer we come to that ideal the better we are, and the further we halt from that idea the worse we are.

As we have often explained, this doctrine seems to us false in its basis as well as mischievous in its results. The suffrage question may be argued in two ways, as a matter of right and as a matter of expediency. Take it as a matter of right, we deny that any man has a right to any portion of political power which he cannot use without hindering or superseding a man who could better use it. The argument for inherent rights assumes that "each man ought to be able to use his "full powers and whole faculties." But those who have most political faculties are those who can least use them where the multitude rule. To give to a man of great fitness the same, and only the same power as a man of little fitness, is an invasion of the very doctrine of natural rights by which it is sought to justify it; it is giving equal dividends to unequal claimants; it is giving as much to those who by intrinsic right deserve little, as to those who by intrinsic right deserve much. The inequality between the lowest class of Englishmen and the highest class will doubtless as time goes on be lessened, but

Digitized by Google

it is now in no country so great as in England; an English peasant is nearly as bad, and an English statesman about as good, a political creature as the world affords; but though the inequality will be diminished, it will still remain. The highest class will improve, and with them the faculty of political guidance, and in consequence the policy of our country. As soon as a man has any political competency he ought by right, and as far as the rough expedients of practical life permits, to have some political power, but by right he must not be able to prevent a better man using the full vigour and measure of his greater capabilities.

If we consider the Reform question from the more common point of view, from the view of expediency, the same conclusion is even more obvious. Nobody can maintain, nobody does maintain, that it is for the interest of the State to be ruled by its least instructed class; on the contrary, it is obvious that such a rule, if it does not ruin it, must at least impede its progress. The fittest people ought to rule in a State, and not the least fit. The only arguments suggested on the other side are two. 1st. That it is a good training for a whole people to have unwonted power even if it does not produce a good Government. To which we reply, that it is a better training to a people to have their rightful share of a Government, their share in proportion to competency, than to absorb the whole Government. Merely to live under a Government at once free and good, in which discussion is abroad, in which great minds argue, in which good decisions are taken, is more instructive than living under a Government where everybody *may* vote, but where the best people never *do* vote, where only inferior minds argue, where wrong decisions are taken. A popular bad Government is not instruction; it is deterioration. It corrupts the mind by accustoming it to wrong conclusions, by basing its reasonings upon mischievous precedents, by inducing it to expect low deductions grounded on low premisses. The best political training for a people is a Government both popular and elevating, and the maintenance of the superior power of the highest class is for that highest sort of Government not only desirable but essential. Again it is said that though a people who know little have uncontrolled power, yet that they will choose those who know much. But experience shows that this is an error. If the acquisition of power is left to the unconscious working of the natural influences of society, the rich and the cultivated will certainly acquire it; they obtain it insensibly, gradually, without the poorer orders knowing that they are obtaining it. But the result is different when, by the operation of a purely democratic constitution, the selection of rulers is submitted to the direct vote of the populace. The lower orders are then told that they are perfectly able to judge; demagogues assert it to them without ceasing; the constitution itself is appealed to as an incontrovertible witness to the fact; as it has placed the supreme power in the hands of the lower and more numerous classes, it would be contravening it to suppose that the real superiority was in the higher and fewer.....In consequence, experience shows that under a democratic government those who speak the feelings of the majority themselves have a greater chance of being chosen to rule than any of the higher orders, who, under any other form of government, would be admitted to be the better judges. The natural effect of such a government is to mislead the poor." These arguments appear to be conclusive, we might say demonstrative; and what is of infinitely more importance, they seem conclusive to the whole political classes of England. They have not the slightest intention, now or hereafter, of submitting themselves to the rule of the greatest number of the populace.

What is the inference? What ought a man like Mr Forster to do? Into what scale ought he to throw his vote? What sort of Reform Bill ought he to wish for? He cannot get the Bill he would wish; he cannot get any admitted or avowed approach to such a Bill. What, then, should he desire?

We say that the Reform Bill often suggested in the ECONOMIST should meet his views far better than any other Bill. No uniform reduction in the boroughs just now can attain the wishes of a moderate, thinking, intellectual Radical. A little uniform reduction, say to 8*l*, will not include the working classes, whom he wishes to include; they will be as much unrepresented as they now are. A lower and worse grade of the middle classes will gain power; the bribeable element in the small boroughs will be augmented. But the working men, the class to whom we wish to give a voice, would be as much without a representative in Parliament as they are now. A considerable uniform reduction in the borough franchise, say to 5*l* or 6*l*, has simply no chance of being carried. Rightly or wrongly, it is regarded as admitting the principle that we are to be governed by the numerical majority of the people, and this, for the reasons we have given, the *mind* of England will not concede.

But if the Reform Bill for which we contend were proposed, if the franchise were to be greatly reduced in the principal seats of industry—were so far reduced as really to include the working men, an able and thoughtful Radical would have accomplished much, would have gained a great instalment of what he wishes. He would have given a voice, a member, a considerable number of members, to the very class of which he is the spokesman, which he above others desires to enfranchise.

It is true that we propose this under the safeguard of the "minority" principle, and Mr Bright says the minority principle is a "trick." It is not otherwise a trick than the whole British Constitution is a trick. It simply reserves a share of power to the educated minority, and our Constitution does so too. Mr Bright says it takes away with one hand what it gives with the other. Let us look at its real operation in his own constituency in Birmingham. We should give three members to that city, probably the working men would return two, and the present constituency the other. Nothing would be taken from the working classes; they would have two members given them; something would be taken from Mr Bright's present constituents, though we should not venture to suggest that his seat would be in danger A new order of electors would in the greatest towns—the only towns where that order exists—elect two members; and the only safeguard—the only mitigation is that in those towns, the present constituency—the *super*-operative classes—could by combining elect another member.

THE COTTON SUPPLY.

THE probable supply of cotton to be expected during the next six or twelve months still excites great interest and gives rise to much controversy, as upon the opinions generally formed on the subject will depend the course of prices in the Liverpool market. The really important point, on which the whole question of *immediate* prices hangs, is the quantity which remains in the United States, inclusive of the crop of 1865, which is now in process of being gathered in. We gave our readers the best estimate we could form a fortnight ago, stating at the same time that all estimates were and must be conjectural. Since then we have received a pamphlet written by Mr George McHenry,* an American gentleman, who has access to all materials for forming a judgment on the matter, and who is disposed to place the quantity of cotton in the States at a lower figure than we have yet seen named by any one. He considers that on the 1st of Nov. the total amount, *including the new crop*, did not exceed 750,000 bales of the ordinary size. Mr McCulloch, the Secretary of the Treasury, writing on Oct. 27 to Mr Dudley, considers that at the capture of Savannah, there was not more than a million of bales *in a condition to be sent to market*, and that the new crop would not add more than 300,000 to this quantity.

Mr McHenry gives the calculation by which he arrives at the result we have stated, and defends the various items of his calculation with much plausibility. But we cannot say that he has convinced us of their accuracy. We are not prepared to accept, on the authority of Mr Trenholm, the basis of his estimate—viz., that in October, 1864, there were only 2,000,000 bales in the South, *including the crop of that year* (which only began to come forward in September or October). Nor can we adopt his statement that 900,000 bales were consumed in the several States, North and South, during the last year; nor his supposition that 350,000 more have been lost or destroyed during the same period. All these things *may* be so; but our knowledge about them is far too doubtful to render it safe to assume any such extreme views as to the foundation for commercial action. We should still recommend those who *must* act to take from a million to a million and a quarter bales of American cotton

* Cotton Supply of the United States. By Geo. McHenry.

Digitized by Google

(including the new crop) as the quantity still unused on the other side of the Atlantic. What prices this datum will justify we cannot take upon ourselves to decide. One thing appears to us pretty certain, viz., that growers of cotton in *no* part of the world need be much discouraged, or fear any sudden or *immediate*, or even very early, failure in demand. We ground this opinion upon three considerations:—*First*—the exhaustion of stocks of manufactured goods all over the world, and the certainty therefore (in spite of momentary fluctuations) of a vast and continuous demand, which will ensure the consumption of as much of the raw material as can be sent forward for some time to come;—*Second*—the length of time that, under the most favourable circumstances, must elapse before the industry of the Southern States can be re-organised;—and *Thirdly*—the probable great deficiency of labour that will for some time be felt in the Cotton States, owing to the mortality that has taken place both among whites and blacks, and that still continues, apparently to an alarming extent, among the latter. We do not know how far the available labouring population will eventually be found to have been reduced by migration northward, by squatting, and by death. It may turn out that in 1866-7 the negroes in the Cotton States—*i.e.*, the South, omitting Virginia and Kentucky—do not exceed 2,000,000. If so, some years must probably elapse before the old rate of cultivation can be recovered.

THE FURTHER INTELLIGENCE FROM JAMAICA.

It will be necessary we think for Her Majesty's Government to relieve Mr Eyre of the Governorship of Jamaica. A great mass of evidence has reached home this week as to the condition of the island, the movement which has broken out there, the means adopted to suppress that movement, and the measures by which the authorities hope to prevent the future recurrence of similar alarms. That evidence is no doubt fragmentary, in part unintelligible, in part untrustworthy, made up of the reports of men too fatigued or too excited to write temperately, of despatches from officers who see everything through a haze, of speeches delivered by officials with points of policy to gain while the excitement lasts, of newspaper articles, and above all of letters not meant for publication, and full of the loosely authenticated stories by which men strive to convey to friends at a distance not so much the facts of a great crisis as the impression those factshave made upon minds not a little unhinged. Much of it would not be sufficient for an intelligent jury, and ought to be insufficient for an intelligent public, but unfortunately there remains a substratum, a basis which is obviously sound, and upon which it is difficult or rather impossible to avoid building an opinion which renders action not so much expedient as imperative. That opinion, when the froth of the news has been carefully blown away, will we think among unprejudiced Englishmen be something like this. A very strong *impression*, not a belief mind, but an impression, has for about two months possessed the minds of the whites in Jamaica that some movement, involving more or less of danger to their lives and property, was impending among the blacks. Whether that impression was based upon known facts—of which there is no evidence, or upon rumours—of which there is some probability, or upon mere fancy excited by annoyance at the termination of the American Civil War—which is a mere guess, is of course still uncertain. But it is not uncertain that it existed, and that it was so strong as to induce the Governor—himself, be it remembered, a man free from personal timidity to a degree unusual even among brave men—to send armed vessels to different points of the coast where they are not usually seen. When, therefore, the riot broke out in Morant Bay, provoked we still think by the injudicious severity of a custos or prefect obviously much hated by the people, the idea that the revolt had commenced instantly began to spread, and communicated itself like a contagion to every member of the menaced class, including the very highest officials.

Aware of the very great disproportion in numbers between the whites and the coloured population, aware also of the existence of considerable bitterness of race, acquainted with the history of the island—a bit of information wanting to nearly all men in this country,—aware of the fewness of the garrison, and unaware of the tremendous advantages contained in civilisation, organisation, and a difference of race so great as to make the colour of the face a sufficient uniform, the whites felt like men in presence of an almost irresistible yet somehow *insulting* danger. Any means, no matter what, the use of thunderbolts had thunderbolts been available, seemed justifiable if only they would prevent the storm, and —all whites becoming instantly an army of defence—the natural decree seemed to be to let those whites loose. They were let loose, and that mysterious and hitherto unexplained force which has made white men the masters of the world, that terrible reserve of unscrupulous energy which lies as it were bottled and sealed among our kinsmen, to be released only on emergency, at once made itself manifest. In a week the native population, thirty-one times as numerous, was crushed beyond the possibility of resistance. We do not hesitate to say that it was at the end of that week within the potency of the 12,000 whites in Jamaica to have exterminated the coloured population, to have slain the males inhabiting the island,—a marvellous example, but not an unfrequent one of the increase civilisation has made in physical force. The disproportion, after all, was less than the disproportion in India.

So far we have nothing to object. It is on the whole evident to all men who have studied history, or who comprehend the relation of different races, that it is better for the world that the whites should have this latent force, should be able to keep at the top, whatever the odds against them, should be released in their work of civilisation from any fear of ultimate subjugation. Unfortunately, in letting their strength loose, it is necessary or unavoidable to let other things loose also, the bloodthirstiness not peculiar to the whites, and the instinct of dominance which is their vice as well as their greatest political power. Lord Canning found this difficulty in India, Lord Durham had to contend with it even in Canada, where the sufferers were not black, and the Government of Washington has, when acting against red men as well as blacks, to control it every day. Mr Eyre, accustomed for many years to see whites in collision with inferior races, ought to have expected this and to have prepared for it, and he did not so prepare. There can be no doubt we think among reasonable men that, after making all allowances for excited imaginations and party feeling, and that desire to exaggerate the horrible which falls upon all terrorists,—which fell, for instance, upon the great agents of the Committee of Public Safety, tempting them to wonderful unconscious lies,—the impression of coming but not actual rebellion produced an actual slaughter not justified by any statements as yet received in England, or any *evidence* likely to exist in Jamaica. Much is uncertain still, but the deaths of eighteen whites and of many hundreds of blacks seem to be outside the region of uncertainty. They are facts, and facts which, the black persons being subjects of Great Britain, deserve and require strict investigation. Look upon Jamaica in the light of a prison, the blacks dangerous convicts, the whites their guardians, and still there must be that. It is also certain that the majority of officials employed did not rise above the popular temper, did not moderate violence, but became so heated as to employ language very likely more savage than their acts, but still strongly indicative of heat of brain. Finally, it is certain that Mr Eyre was not free from this heat; that he himself, as he himself states, while declining to place his capital under martial law, did, in one instance, treat it as if it had been under martial law, did seize a member of his Legislature—guilty it may be, though the fact alike from his character, his wealth, and colour, is very improbable—but at all events, an unarmed resident of a city under civil law, send him to a district under martial law, and there have him executed by sentence of two naval lieutenants and one military ensign. It is also certain that he made to his Legislature a heated speech, in which he spoke of "so-called" ministers of the Gospel as the sources of the "insurrection," and generally conducted himself in a way indicating the absence, temporary perhaps, but still the absence of calm judgment.

All these things demand inquiry. Any assertion *primâ facie* true that two thousand of her Majesty's subjects have been slain without one soldier being wounded would demand inquiry, and the necessity is greatly increased when the deaths appear to have been inflicted by a caste. No such inquiry is possible while Mr Eyre governs Jamaica. It would not even be right, politically right, to institute one. The principle of

Digitized by Google

the right of legitimate British authority to act, and act sternly, in emergencies within a tropical colony, is almost as important as justice itself, and that principle would be set at naught if Governor Eyre were liable to trial within the colony he had governed. An inquiry under such circumstances, disguise it how we may, is a trial. Whether it is carried on by an individual, or a commission, or a committee of neighbouring governors—a suggestion not hitherto made, but still not without official analogies—the inquiry must involve the accusation of an unjust or injudicious use of power leading to the death of many free subjects of Her Majesty. If Mr Eyre is acquitted it is easy to promote him in his own profession. If adjudged guilty it will not be more difficult, but less difficult to punish him when he has ceased to be a governor. In either case an inquiry would until concluded paralyse his authority; and if, as we should expect, the result should be an acquittal qualified with strong political censure, his power of obtaining respect from the coloured population would undoubtedly cease. It seems to us certain, therefore, that the inquiry, which is inevitable, should either be entrusted to a new Governor, or to a commission of gentlemen absolutely unconnected with recent events, unfettered by Mr Eyre's authority, and uninfluenced by that sense of antagonism which necessarily springs from the feeling that they are trying an official locally stronger than themselves.

Finally, it is necessary that slaughter, and indeed vengeance of any kind, should at once cease; and the only way compatible with safety to cause it to cease is to create an Administration unpledged either to severity or lax rule. Whatever the true history of the island during the riots, one fact must remain a strange one. Both parties appear to have believed that Jamaica was the world. We do not find in the proceedings of the coloured population, as represented by Governor Eyre or as represented by Mr Underhill, any satisfactory proof that they looked to Great Britain as a final, irresistible, and just authority. Nor do we see either in Mr Eyre's acts or speeches any proof of the needful consciousness that behind him and above him stood a power to which that of the whole population of Jamaica, even if organised and armed, was utterly contemptible,—was inferior beyond all reach of metaphor or literary expression. Had the coloured men realised this truth, their action could not have been so bloody; had the Governor realised it, his action could not have been so precipitate. Each, it is plain, considered Jamaica for the time a world; and it is indispensable to show to both that a power distant from local prepossessions, calm, fearless, and for political purposes omnipotent, will in the last resort control, and judge, and if necessary punish their acts. Of anything else it is unneceesary to speak at present. With a change of Governors, the wild legislation attempted within the island will be postponed for more temperate measures,—measures which will root out instead of merely repressing agitation, and which will be directed against crime, disorder, and pauperism, instead of against religious teaching and freedom of speech.

MR HARRISON ON TRADES UNIONS.

An able and thinking man, who has studied the practical working of Trades Unions as thoroughly, perhaps, as any man in the country who does not belong to the class they embrace, —Mr Frederick Harrison,—contributes to the number of the *Fortnightly Review* of 15th November an article professedly on the good and evil of Trades Unions. It is, however, really an article on what Mr Harrison thinks the real good and supposed evil which Trades Unions effect, with a few slight comments on the occasional cases of moral disturbance in which they work less beneficially—comments precisely of the kind indicated by the logical maxim that the exception proves the rule. We have always held to the opinion shared by nearly every thorough economist that Trades Unions are essential to the interests of the working classes,—indeed, are the only conditions on which there can be anything like that equality of footing established in the "higgling of the market" which alone renders that elegant tentative process either a reasonable or fair adjustment of relation. If a capitalist with no fear of wanting either necessaries or luxuries for years to come has to "higgle" with a labourer who is himself, and whose family is also, at the very brink of starvation, it is obvious enough that the capitalist can practically dictate terms, and that the labourer has no voice in the matter beyond the privilege of refusing terms which he thinks no better than pure starvation. Combinations of labourers and the clubbing of their small means are the only conditions on which they have any alternative to fall back upon, if justly dissatisfied with what is offered them. It is, in a scientific point of view, monstrous to object to the labourers backing themselves with capital in the only way in which it is open to them to do so. And we do not doubt at all that Mr Harrison is right in saying that Trades Unions have constantly succeeded in extorting fair terms, which capitalists would never have conceded voluntarily. Even if the actual strikes have often, as of course they often have, been failures because ill-considered and founded on false premisses, the *power* to strike which the capitalist knows and respects has probably been an instrument of pure unmixed benefit to the labourers. Trades Unions give this power, and Trades Unions, therefore, are joined by almost all thriving and prudent working men.

But it is one thing to say that Trades Unions are natural, useful, and necessary to the wages-paid class of the community, and quite another thing to say, as Mr Harrison does, that almost all the evils incidental to them are nearly imaginary. On the contrary, we say that the evils incidental to them, and which it is the highest part of any true friend of the working classes to point out frankly, are very real and almost essential to that peculiar kind of organisation. *A priori*, any one would say that the evils likely to attend Trades Unions would be precisely the evils likely to attend any pure democracy, —in other words, would be likely to take the form of subordinating the individual to the will of the majority. One would expect this *a priori*, and, in matter of fact, that is precisely what one finds to be the case. Nor is the matter any better because one hears so little complaint of it, rather worse. What we want to see in the working class is, power of combination for properly common objects, and yet the disposition to resist anything like that tyranny of majorities which so often imposes a dull monotonous pressure on personal ambitions or genius. When society-men try to impose their will, by the help of social persecution or even violence, on non-society men, no one probably is more indignant than Mr Harrison. But is there no interference with individual liberty of the same kind, though not of the same degree, which is involved in all the ordinary procedures of Trades Unions, and which is anything but desirable? We think Mr Harrison's evidence shows conclusively that there is.

In the first place, he admits and defends the Trades Unions' practice of putting a stop altogether, if they can, to "overtime." Now, we do not deny at all that, if the majority of the Unionists dislike overtime work, they have as much right to decline it for themselves as to decline working for lower wages than they can get. Still less do we deny that they may be wise in disliking overtime, and wishing for the evening hours for other and sometimes perhaps higher objects than any of mere gain. But is it at all fair or desirable that the workman who wishes perhaps to rise to be master, and wants to save up all the wages he can as capital, and whose constitution and temperament enable him to work longer hours than others, should have his opportunities all cut off because the majority of his fellow-workmen dislike overtime for themselves and resist the practice on the part of the masters through their Trades Unions? The reason that they resist it as a practice is, no doubt, that the masters will prefer the men who are willing to work overtime, and, when there is a necessity for dismissing any, will dismiss the men who decline to work overtime rather than the men who prefer overtime, and so the majority suffer as compared with the overtimers. But *ought* it not to be so? Does not a a barrister who will work till midnight deserve to succeed better *at the bar* than a barrister who deliberately devotes his evenings to social amenities or literature? He may not have chosen the better part, but whatever part he has chosen, he deserves to succeed in, just as the man who prefers to give his evenings to literature deserves to reap the profit of the course he has chosen and which the other has rejected. What we object to in democratic action is its inevitable tendency to suppress *variety* of mind and taste, to make the whole working class tyrannize over the working men who make up that class. It is a great evil caused by Trades Unions, that working men, ambitious to push on in their own special line, should have their opportunities crippled because the mass of the trade

Digitized by Google

desire moderate work, and object to even *optional* overtime. This is a great evil of Trades Union organisation, and a characteristic evil.

Again, the Trades Unions, says Mr Harrison, use their power to prevent too frequent fluctuation of wages, and he says it is a legitimate use of their power. We will not deny it if the working men really all agree. But they should know what it means. It means practically that the capitalist *insures* them, to a certain extent, against fluctuation, and, *therefore*, pays them less,—taking the difference as his premium for insuring them to that extent. Any working man who proposed to follow more closely the fluctuations of the market ought to receive *more* wages on the whole than those thus insured against fluctuation. The Trades Unions' device is a device for taking less wages on condition that they be more uniform,—and has a Trades Union a right to enforce this necessity on the whole class unless the whole class wish it? Mr Harrison's comparison between the case of clerks with fixed salaries in merchants' offices and wages-paid working men is not at all in point. The cost of labour is of course the *principal* element in cost of production, while the clerk's salary is usually an infinitesimal element in the cost of the distribution effected by the merchant. Of course, therefore, operatives' wages must vary much and frequently with the demand for what they manufacture, while clerks' wages need not. Of course, if the operatives like to sacrifice a part of their remuneration for greater regularity, they may do so, as the civil servants used to sacrifice a part of their salary for a pension. But it is a sacrifice, and a sacrifice quite needless to a prudent man. Nor do we believe that the working men generally understand that a more uniform rate of wages *means* less wages on the whole, than a rate of wages fluctuating more completely according to the laws of demand and supply.

The worst kind of interference of this sort, which Mr Harrison does not defend, but which is, we believe, pretty common with Trades Unions, is an interference equalising or tending to equalise the wages between more and less skilled, or between skilled and unskilled workmen. This is democratic levelling in its worst form. And yet Mr Harrison will not deny that Trades Unions do too often interfere to insist on none but the wages of skilled workmen being paid for comparatively unskilled operations. This is an act of tyranny of exactly the same order as if a literary union were to forbid any of its members to take a less remuneration for their work than the publishers are willing to give to Mr Dickens or Mr Trollope. Interference of this kind depresses the gains of the most able, in order to increase the gains of the least able workmen. It might be a benevolent social provision if it were ever done really with the hearty assent of those who lose by it; but even then its effect would be to prevent the free development of varieties of individual capacity and genius. And against interference of this sort on the part of Trades Unions, every true friend of the working man will raise his voice.

As to the controversy into which our contemporary the *Pall Mall Gazette* has plunged with Mr Harrison for denying that the labour market is in the ordinary sense a market at all, it is clearly only a controversy of words. Of course, according as contracts involve more and more of intimate personal relations, a host of minor considerations, that are really very essential to the bargain to be made, but which cannot be expressed in that bargain at all, come into the question and affect the result of the bargain. We agree with domestic servants for certain wages, but a number of personal qualities on both sides, which can neither be bought nor sold, really affect the contract. And so no doubt the contract for labour is a very much less simple contract than the contract for the mere possession of a ready-made material object. All Mr Harrison means, we suppose, is, that there are numerous considerations beyond the *price* of the labour affecting the bargain,—some of them almost as essential, or even more essential, than the price itself. All the *Pall Mall Gazette* means is that, after all, the legal essence of the matter is a bargain, and nothing more. In this verbal controversy we take small interest. But in the tendencies of Trades Unions to control individual liberty at the wish of the majority, we see real danger; and believing them very valuable and essential institutions to the working men, on the whole, we would willingly see the friends of these institutions speak out a little more frankly, or a little more wisely, about their true evils.

BOARD OF TRADE RETURNS.

THE returns issued by the Board of Trade, embracing the first ten months of the present and two previous years, give the value of the exports of home manufactures and produce as follows:—

	£
1863	119,377,045
1864	136,275,652
1865	135,264,602

In October only, the shipments were valued as under:—

	£
1863	15,062,332
1864	12,871,491
1865	15,547,225

The value of the goods and produce imported in the first nine months was:—

	£
1863	136,166,725
1864	160,974,110
1865	137,303,165

The annexed return shows the increase and decrease in the real value of the principal articles imported in the first nine months of the current year, compared with the same period in 1864:—

Articles.	1864. £	1865. £	Increase. £	Decrease £
Coffee, raw	2,753,335	3,284,162	530,827	...
Wheat	8,335,552	6,137,962	...	2,197,590

CHANGES IN PRICES.

TO THE EDITOR OF THE ECONOMIST.

SIR,—The variety of causes acting upon prices, and their unequal action at different times and places and on different articles, would make it impossible to measure with approximate accuracy the effect of the new gold, even if we could get a complete account of all local changes, instead of the scanty statistics obtainable respecting some particular commodities in a few particular markets. How, for example, is the statistician to separate the effect of gold from that of bad harvests, war, and speculation upon the price of corn in 1854-56; or from that of scarcity, increased cost of carriage, difference of quality, and also speculation upon the price of cotton in the last few years? To ascertain what money has done we must have before us not only all the actual changes in prices, but all the contemporary changes in the supply of commodities; and even this would not enable us to distinguish the effect of the new gold, which has not been the only additional or abnormal monetary power in the market. Speculation, while it lasts, acts like money upon prices, and its action has been violent and frequent in the last fifteen years. The extension of banking among classes with small incomes has brought into effective circulation much money which formerly lay idle in the desk and the till; vast sums which had been hoarded in France have come forth in loans to the State and commercial investments; and the paper currencies of Russia and America have not only raised prices in those countries, but added greatly to the quantity of specie in circulation elsewhere. Hence the new gold mines, if they are the chief, are yet by no means the only new purchasing power to be taken into account, and their influence upon prices must be regarded as a matter not for precise arithmetical statement, but for probable reasoning and conjecture.

Looking at the vast addition from all sources to the currency of the world since 1849, I think it may fairly be assumed that but for the effect of steam and free trade upon the diffusion of money and the supply and distribution of commodities, there would have been an excessive congestion of money in its old channels, and in fact such a rise of prices in England as would have beggared the large class with small and stationary incomes, and produced a social revolution. But, as I before tried to show, the increase of money has been contemporary with a readjustment of the scale of comparative local and international prices; independently of its influx, the price of land and its produce must have risen in many remote places in consequence of access to metropolitan and other great markets; and if no addition has been made to the currency of the world, the equalisation of prices in cheap and dear markets must have caused a fall in the latter proportioned to the rise in the former. Adam Smith tells us that the Union with England had trebled the value of cattle in Scotland, while the price of meat in the London market was a good deal lower in his time than at the period of the Union; and analogous changes in comparative prices would have followed the recent commercial union of various countries and places, had nothing happened to check the fall in what, for brevity, I may call metropolitan markets. As it is, there has been a rise in the price of all kinds of animal food even in London, in spite of all improvements in tariffs and methods of transit; but the rise in remote parts of the United Kingdom and in many parts of the continents of Europe and Asia is without parallel here; although Londoners make the most audible complaints. Thirty, and even fifteen years ago, there were not only many foreign, but many English, Irish, Scotch, and Manx country towns and villages, where one shilling would go further in the market than three would go now. People with small incomes are still sometimes recommended to fly from metropolitan prices and rents, to cheap places in the country; but how many cheap places are left, and if any, how long are they likely to remain? House rent, it is true, remains low in many country towns even in Great Britain, but one reason is that the equalisation of prices has diminished the attractions of the country for the poor, and driven many families to seek some addition to their incomes in the employments which great cities create.

Another cause of low and falling house-rents in many of the smaller country towns is likewise connected with the equalisation of prices; namely, that country people have begun to buy as well as to sell in large towns at a distance, and the country shopkeeper must follow his business; a change in the seats of various trades and a migration of capital and labour must take place as commerce extends; and shops as well as dwelling-houses in small towns are left without tenants and going to decay. The low house-rents thus caused are not marks of general cheapness of living, but rather that the places where they exist offer no such inducement to people to resort to them. In the Isle of Man, for example, rents have considerably risen in Douglas, but are rather lower than formerly in less prosperous and fashionable Castletown, while the prices of provisions have risen in both places alike. A town in a part of Ireland which I know well affords a striking example that low house-rents are no indication that living remains cheap in country towns. Wexford was formerly inhabited by many poor gentry, on account of the low prices of even luxuries, before direct and frequent steam communication with Liverpool and Bristol had been regularly established. The half-pay officer got not only beef and mutton at 2½d a pound, but lamb for 1s 6d a quarter, fat chickens for 10d a pair, a turkey at 2s 6d, for which he would now pay 10s, and excellent salmon at 2½d a pound; horses were cheap in proportion, and there was plenty of hunting; he was willing, therefore, and could well afford to pay 50*l* a year for a house, which would not now let for 20*l*, and is in fact falling into ruin for want of occupation.

So far are more luxurious habits from being, as some writers have contended, the cause of the insufficiency of the incomes of the class I refer to, that formerly they lived really in luxury where now they have barely the necessaries of life; and if we were to regard the interests of this class alone, we might pronounce the extension of the market, and the greater demand for the natural productions of each place, a great evil. But we look also to the fact that while country consumers are now paying, country producers are getting almost London prices in their own markets. And as I have instanced the rise of prices to country producers in Ireland, I may add that the estimates in the Registrar-General's returns of the value of the live stock in Ireland, at rates assumed in 1841,—namely, for cattle, each, 6*l* 10s; sheep, 22s; pigs, 25s,—fails to show

Digitized by Google

the real advance in the value of Irish animal produce, not only because these rates are much too low for 1865, but also because they are much too high for all Ireland in 1841, when many parts of the island were without means of exportation and prices were very unequal.

To return to the general question of the changes in prices. Whoever examines them with any care must perceive that they have varied greatly in different places, in different years, and in the case of different commodities, so that they cannot be summed up in any general proposition respecting the change in the value of money. The additional money in circulation has not been expended in all places or on all commodities equally; the supply too of some commodities upon which there has been an increased money expenditure has proportionately increased, while that of others has not; other variations in supply at different times have been great. But although we cannot measure the change in the value of money, we may draw some practical conclusions from the changes in prices. The important distinction, for example, may be observed between changes which must be regarded as temporary and others which are certainly permanent. Thus the price of corn has been high in London in particular years since the new mines were discovered, and may be high in particular years again, but a permanent rise in the price of corn in London has certainly not been established. On the other hand, whenever the prices of food have risen, at home or abroad, in consequence, not of bad seasons or scarcity, but of the extension of the market and the equalisation of prices, the change must be looked on as permanent; and when once the comparative cheapness of "cheap places" has departed from this cause, it has departed for ever. And what fortunes might have been made, and what losses escaped, had persons foreseen in good time the local elevation of prices necessarily consequent on the opening of traffic by roads, railways, and steam navigation! Great fortunes are still to be made and great losses escaped by anticipating such changes in comparative prices, which will happen whatever may be the fertility of the mines, or the value of money in the old centres of trade. Whatever may be the prices of food and materials ten years hence in the market of London, they will certainly be higher than they are now in many places abounding in both, but cut off from the market in London. "A railway map of the world enables "any one to predict that prices must rise greatly and soon in "a number of places. However obvious the remark, it is one "of great practical importance in trade, speculation, emigra- "tion, the purchase of land, and industrial enterprises of a "hundred different kinds, that the price of labour and produce "will eventually rise wherever the soil is productive and the "means of locomotion are deficient, and will rapidly rise "wherever those means are suddenly and greatly improved."*

—I am, Sir, your faithful servant, T. E. C. Leslie.

London, November, 1865.

Agriculture.

DAIRY FARMING.

MISMANAGEMENT OF PERMANENT GRASS LAND.

There are inconsistencies and apparent anomalies in our husbandry which are not easy to account for or explain, and which could scarcely exist in relation to any other of the industrious occupations of this country. We find the prices of all kinds of dairy produce extremely high, and confessedly most remunerative to the producers. Yet dairy farming is decreasing throughout the country, and milking cows are widely giving place to sheep and feeding cattle. We believe that in many cases this change is a mistake, having regard to the interest of the farmers occupying land fit for dairy husbandry. The reasons commonly given for the change amongst the farmers themselves is, that a dairy, either for cheese or butter, involves a great deal of trouble; that its success is greatly dependent on the skill and attention of the dairy women; that the wives and daughters of the farmers are every day becoming less willing to afford the attention, even if they possess the skill required; that without the supervision of the mistress, hired dairy women are not to be relied on, and that even hired dairy women are becoming more and more difficult to obtain. All this unquestionably points to the conclusion that the old system of dairy husbandry by small farmers, depending mainly on the labour of their own families, is wearing out, and that a new organisation of dairy farming upon a plan more consonant with the other branches of modern husbandry is required. This will probably be gradually brought about, and we believe that will be effected by the combination of tillage with dairy farming, implying the use of more capital and higher intelligence than has been found on the small dairy farms—chiefly consisting of grass land only—and more care and higher feeding of the milking cows. Such seemed to be the direction indicated in some papers on dairy farming in Gloucestershire, to which we on former occasions have referred, and some of the points mentioned in a paper on dairy farming in the Midland counties, published in the last number of the "Journal of the Royal Agricultural Society," look the same way. To this paper we shall presently refer.

Again, whilst we are told by high landed authorities, that the right thing to do is to lay down land to permanent grass, in order that the urgent and increasing demand for fat meat may be supplied, we learn from an intelligent practical farmer that our existing permanent grass lands are constantly deteriorating in fertility and value from neglect and mismanagement. How are these inconsistencies to be explained? Surely we do not require more permanent grass to be laid down when that which we already possess is so confessedly neglected? And it is admitted that our present permanent grass land would give ample returns for capital to a large and indefinite amount laid out in their improvement. We believe that all this is only a part of the system of mismanagement to which so much of the landed property in England is subjected, and may be traced to the same causes we have so often referred to. Our present purpose is to draw attention to some of the facts and data illustrative of the subjects of dairy and grass land management in the Midland counties to be found in the paper, by Mr W. T. Carrington, we have before mentioned.

For successful dairying there must be pasture land well supplied with good water, free from garlic and other strongly flavoured herbs, and contiguous to the homestead suitable for the proper protection of the dairy stock. Then there must be a properly constructed dairy, and where cheese is made a good store room for keeping it is indispensable. To supply roots and straw for the cows in the winter there must be tillage land, upon strong soils not exceeding one-third of the whole farm, and such tillage land must be thoroughly drained. Here we at once come to a point at which what should be differs from what is, in connection with dairy farming. For the most part dairy farms consist wholly of grass land, or if they have any tillage land it is usually undrained, while their farm buildings are insufficient and ill adapted for the shelter of the stock, the economical storing of roots, straw, and other winter fodder, or the production and preservation of the manure. For these things the farmers are answerable, if at all, only in the smallest degree.

If roots are not grown, the cows can only be wintered on hay or costly food, or some of them must be sold off in the autumn, at a probable loss of 5*l* per cow. Such a change of stock, too, is not profitable, for cows never do so well as on the farm where they are bred.

"Farms," says Mr Carrington, "which are all in grass are generally small, and in the hands of needy and unenterprising tenants, the fields being small and intermixed, the fences objectionably wide and irregular"; though higher fences than are proper on arable land are useful in pasture fields to protect the cattle from sun, wind, or rain. If cheese-making be the object it should be made good, for low-priced cheese does not pay; and although certain districts are renowned for their cheese, there is reason for believing "that the quality of cheese is generally much more dependent on its making and keeping than on the soil, and that with proper management, good if not fine cheese may be made on land of almost any description." Mr Carrington scouts the figment that improving the land by draining, and the use of bones, lime, or guano injures the quality of the cheese, which experience has proved to be a mischievous fallacy. It may suit the farmers who are unable or unwilling to improve their land to propound that error. The best cheese-makers—all the principal prize-takers at the Royal Agricultural Society's meeting at Chester in 1858—use manures extensively in the improvement of their grass. It is the known effect of dairy farming to deteriorate the pastures, unless they are liberally dressed with manure of some sort. "Where two adjoining fields of equal quality are grazed, the one with dairy stock and the other with feeding stock, the difference in condition will in a few years become quite apparent." And it is the fact that "a large proportion of our dairy pastures is very much in need of a judicious outlay for both draining and manures." Both of these improvements must go together, for "there is little use in applying manures to wet pastures on which the water stagnates; and, again, drainage is not of much utility, unless followed up by a liberal outlay in manures, to effect a thorough change in the herbage; otherwise, the aquatic plants and grasses struggle on, though deprived of their food by drainage, and in some cases the produce is actually lessened."

The annual yield of milk per cow ranges from 400 to 600 gallons; depending in part on the kind of cows kept; and per-

Digitized by Google

haps still more on the way in which they are fed. Mr Carrington considers 535 gallons to be a fair average annual produce per cow. If this milk can be sold at 8d per gallon, the most profitable way of dealing with it, a return of 18*l* per cow per annum will be obtained.

This quantity of milk made into cheese will produce about 4½ cwt per annum, which at 65s per cwt will give a money return of 14*l* 1s, to which may be added for whey, butter, and bacon 2*l* more, making a total of 16*l* 1s. The best farmers will get a better price than 65s, equal to 7d per lb, for their cheese. Palm nut meal given to cows has been found to increase the richness of their milk.

The above 535 gallons of milk are reckoned to make 200 lbs of butter per annum,—or 1 lb of butter to 22 pints of milk. Supposing the butter to sell at 1s 1d per lb (a low price if the butter be good) the amount received will be 10*l* 16s 8d. The skimmed milk, either made into cheese or used for calves or pigs is valued at 4*l* 4s, giving a total return of 15*l* per cow. In his details of the management of a Staffordshire dairy farm by his father and himself, Mr Carrington states that the greater portion of the cows calve in March and April, and that they are allowed to go dry at Christmas. Here we find full two months lost, for it is well known that if cows be well fed and sheltered through the winter, a month, or at most six weeks will be quite long enough to let them go dry before calving. Mr Carrington, in describing his own farm, consisting of 300 acres of cold strong, land rented at 30s per acre, one-third being arable, and the rest pasture—says "by far the most profitable mode of occupying such a farm (provided that the ordinary requirements are supplied) will be by keeping a large dairy of cows, and endeavouring to make whole-milk cheese of first-rate quality." The arable land will be essential to this purpose, and must be well drained, so as to grow large quantities of roots and green food. Then, "by the use of cake and crushed corn to the value of say 100*l*, fifty dairy-cows would be well kept, besides rearing from twelve to twenty heifer calves every year." The importance of rearing his own stock will be more than ever obvious to every dairyman since the prevalence of the cattle plague. Mr Carrington says, "My father and myself have for many years had upwards of one hundred dairy cows, but by adopting the plan of rearing a sufficient number of heifer calves and scarcely ever buying stock in the market, we have been most fortunate in escaping infectious disease."

It may be mentioned that dairy expenses are estimated to vary from 1*l* to 2*l* per cow. We may say that we are satisfied from experience that a higher rate of produce than that stated may be obtained by good feeding and careful treatment of the cows. This of course involves a larger outlay than that stated.

To show that the fertility of our grass lands has declined, Mr Carrington says "Arthur Young more than fifty years ago estimated that the best grazing land would feed a large ox and a Lincoln sheep per acre; there is, I believe, but little of such land now to be found. Whilst the produce obtained from arable land has, since the last century, been nearly doubled, the grass land has from neglect too often absolutely deteriorated. To fatten a large beast and a sheep, one acre and a quarter would now be generally required, and such land as this is readily let at 3*l* per acre." And he afterwards adds, "There is a great deal of pasture land which might be made of excellent feeding quality by the spirited application of manures." Here, then, we have the result which every inquiry into any branch of English husbandry affords, viz., more capital and intelligence is required from the tenant, who in turn demands greater outlays in permanent improvements on the part of the landlord, with the security for tenant's capital only to be afforded by a long and rational lease.

Foreign Correspondence

In spite of the rate of discount at the Bank of France being lower than at London, Frankfort, Amsterdam, Brussels, St Petersburg, Turin, Berlin, and Madrid, the coin and bullion since last Thursday have increased by 3,564,000*f*. This is accompanied by an augmentation of 47,020,000f in the discounts, of 32,009,000f in the circulation of notes, and of 27,357,000f in the deposits.

The speculators of the Bourse during the past week have chiefly been occupied with the Threes and the Comptoir d'Escompte, but they have not produced any marked variations in their prices. The following are the week's quotations. The disfavour of the Spanish railways is, it will be seen, increasing:—

The subscription to the Austrian loan opened by the Comptoir d'Escompte has had even greater success than was anticipated. It was opened on Monday morning and closed on Monday afternoon; and to-day a notification has appeared that the subscriptions made at Paris will have to be reduced 20 per cent., the demands having exceeded by more than 200,000 the 734,694 bonds to be accorded. In the reduction, however, subscriptions not exceeding five bonds are to be admitted entire, and in cases in which it is necessary to take account of fractions less than 4-10ths are not to be counted at all, and more than 4-10ths are to be counted as one. The success of the Comptoir d'Escompte will naturally considerably increase its *prestige*. It is really a great affair to get upwards of 10,000,000*l* subscribed in a single day by the public, the larger part in France, a country in which, until within the last few years, only very eminent capitalists took foreign loans, the mass of the people regarding them with distrust. Greater still does the success of the Comptoir appear, when it is taken into account that very powerful French and German interests were arrayed against the loan, and employed energetic efforts to damage it. The London market has had no part in the success of the affair, the Agra and Masterman's Bank which was charged with it having, I am told, only transmitted subscriptions for 4,000 bonds, or thereabouts, and even those there is reason to believe were made by the bank itself, in order to save appearances by proving that it can do something. This result shows that the surprise which, as mentioned in my last, was felt here at the Agra and Masterman's Bank having been selected in an affair of such importance in preference to all others, was fully justified. In London, it is the Rothschilds, the Barings, and the other really important houses that have heretofore taken up the loans of the great European States; among them assuredly the Austrian Government might, by proper inducements, have found one possessed of more real influence in the loan business than the Agra and Masterman's Bank, in spite of its enterprise, can boast of, seeing that, being younger than they, it has not had time to form connexions equal to them, or to gain for itself their *prestige*. I name the Austrian Government, because it was its agent, and not the Comptoir d'Escompte, which selected that bank. Although at one moment

Digitized by Google

the new loan was sold at a slight loss, it has, since Monday, been at a premium of 1f 50c per bond. It is, however, scarcely necessary to remark that it is not yet quoted, and that transactions in it take place only in the *coulisse*.

An Imperial decree, issued on Saturday last, sanctions M. Fould's project for suppressing the offices of Receiver-general of Taxes and of Government payer, and for uniting the two in one official under a new name. The Minister calculates that this will produce a saving of 2,500,000f (100,000*l*) a year, but he does not propose to bring the reforms into complete operation before 1st January, 1867, and even in that year he only counts on 2,000,000f saving, owing to the necessity of making provision for dismissed receivers and payers. The public thanks are assuredly due to His Excellency for having made this important reduction in expenditure, even though it be only *in futuro*, and especially for having carried it in spite of energetic opposition from very influential personages. But if the Minister had decreed it years back, the service to France would have been greater, and there was just as much reason for making it years ago as there is now. The office of Receiver-general has long been a crying abuse; without being of any real utility, it imposed on the public the necessity of exorbitantly paying not fewer than eighty-nine persons, many of whom got as much as a Cabinet Minister, and some even the wildly extravagant sum of 200,000f (8,000*l*) per annum.

In order to complete what was said by M. Pinard, director of the Comptoir d'Escompte, before the Superior Council of Commerce charged with the inquiry into banking and currency, I will take from his evidence his opinions on certain points not noticed in my letter in the ECONOMIST of the 18th of November. He said that the crisis of 1863-4 was caused principally by the export of specie to pay for cotton; also in part by money being sent abroad for financial and industrial operations commenced in 1862. He said that the extension of trade, and the increased facility of communications by railway, telegraphs, &c., naturally tend to make financial crises more general and more frequent; but that, nevertheless, they will be less long and less profound. He expected that for some time to come there would be a demand on the precious metals in Europe to carry on the trade with India and China, those countries not accepting, at least in large quantities, other merchandise in exchange for theirs. With respect to what the French call credit societies, he said that certain of them, such as banks, aid commerce by their operations; but that others, which immobilise capital, may occasion it inconvenience by lessening the amount of disposable capital. He said that though the sums which France had to send abroad in 1863-4 for Spanish and Italian railways and foreign loans may have had some effect on the crises, since in a moment of crisis even 100,000,000f the less is felt, those operations did not exceed her resources in normal times. To the authorised negotiation of foreign securities at the Bourse of Paris he declared himself favourable, albeit it was at times productive of inconvenience; and he said that the facilities enjoyed in this respect at London had contributed largely to the expansion of British trade. M. Pinard described how the displacement of specie from one market to another is necessitated, and said that whether it is produced by purchases made abroad or by a financial operation, it must forcedly bring about an elevation of the rate of discount, and a diminution in the stock of coin and bullion. Being asked what in Europe were the causes of the displacement of specie, he answered:—"They are loans, or works done on a scale too large for the disposable resources of the year, or purchases of merchandise. Thus, at this moment England has to purchase oxen: she gets them where she can; her commercial balance will be modified by so much, and if finally the amount of her foreign trade should not augment in proportion, she must pay the difference in specie. For a time," he added, "the situation may be disguised by exchange operations; but in the end payment must be made either in specie or goods." M. Michel Chevalier asked if an understanding between great banking establishments might, not indeed destroy, but lessen and render more tolerable the inconveniences caused by the displacements of specie, and he referred to arrangements made at different times between the Banks of England and France, and to the sale by the latter establishment of part of its *rente* to the Emperor of Russia in 1847. M. Pinard replied: "Such measures are exceptions; they may be employed in very peculiar cases, for a very limited time, and must be terminated in the shortest period possible. In the last crisis, the Bank of France got opened for itself a credit for 50,000,000f on Messrs Baring, and it is certain that by so doing the Bank prevented a drain on its till, I do not say of 50,000,000f, but of a veritable importance, by satisfying the want of paper in England, and which without it would have had to be replaced by gold. It was by maintaining the exchange at a price below the export of specie, that the Bank protected its till, until things could return to their normal state. I say then that that is a measure to which banks of issue can, and even in certain cases ought to have recourse; but it cannot be denied that when the crisis attains a certain intensity, a certain impetuosity, it becomes insufficient." M. Pinard added in connection with this matter that it would perhaps be good policy in the Bank to have a "foreign portfolio," *id est* a reserve of foreign bills; it would be useful, he said, in certain circumstances in providing for temporary crises. Passing on to a new subject, M. Pinard showed that the circulation of notes had increased in France in ten years by 300,000,000f, but that it had not done so in England, owing to the general employment of cheques and transfers; and he then expressed the opinion (already mentioned in the ECONOMIST) that the adoption of the cheque system in France will encounter great difficulties, owing to the habits of the trading class being opposed to it, and to the fact that almost everybody, from dread of political commotions, keeps a certain amount in gold by him. He said, moreover, that the great bankers of Paris do nothing to promote its success. As to bank notes, M. Pinard said that they cannot be employed indefinitely, since they cannot be kept afloat when they exceed what the circulation needs; and that, if there were ten banks of issue in France, there would not be more notes out than there are now with one, in proof of which he said that when there were seven or eight such banks the circulation was less than it is at the present moment. He declared that he considered the immediate convertibility of notes as indispensable; and he pronounced, as you have already been informed, very decidedly against the plurality of banks of issue, on the ground that if they acted as the Bank of France does they would be unnecessary, and if they acted differently they would be dangerous. That, with plurality of banks, competition might reduce the rate of interest in certain localities, he did not deny; but that would produce an inflation of credit, which in its turn would bring on catastrophes. M. Michel Chevalier asked if it would not be possible, with several banks of issue, to have unity of bank notes, and to make each bank accept the other's notes? M. Pinard said that that could only be done if the banks inspired full confidence in the central establishment, and they could only do that by acting exactly as it does. In that case they would do no more than the Bank of France by its branches does now. He added that since the Bank of France supplies the country with all the notes it requires, there is no need of more issuing banks. M. Michel Chevalier remarked that when the Bank of France augments its discount at Paris the rate is increased at Toulon and Lyons, though money there be really 2 per cent. cheaper. But he said that in such cases people carried their paper not to the Bank of France, but to other bankers and discounters, and they got from them the accommodation they required so long as the rate could be maintained lower. He said further, that, as a rule, a low rate of discount (say 3 per cent.) at the Bank of France was of no consequence to the mass of petty traders, since the Bank only discounted bills with three signatures, and their bills had rarely more than two, and since their bankers always charged them 6 per cent., it was the bankers alone who profited by the low rate of the Bank of France. M. Michael Chevalier drew attention to the fact that the deposits in the branches of the Bank of France at Lyons and other places were less than what the local banks of issue received. M. Pinard said that the fact was so, but that it was owing to banks of deposit being more numerous than they were and to their paying interest on deposits; and he said that what made the deposits in the Bank of France considerable was not that commerce carried its money there, but that stock-brokers had constantly from 30,000,000f to 40,000,000f, and sometimes more, and that notaries and great bankers had large sums deposited. "Take away the funds of these three categories," said M. Pinard, "and the balance remaining will be quite insignificant." M. Pinard afterwards went on to say that though he admired the Bank of France, he considered that improvements might be effected in it. He was of opinion, for example, that it ought not to make advances on deposit of securities, and though he did not think that in times of crises, the Bank could sell its *rente*, as some persons recommended, he thought that it would be better that its capital should be invested in good foreign bills, which could be easily realised at any moment without depreciation, than in Government funds, which could not be sold without loss, particularly in political commotions. He thought further that the Bank ought to deal largely in the precious metals, instead of as heretofore only buying at moments of need. M. Pinard afterwards expressed his opinion on some other points. Among other things, he said that he thought a separation of the issue and discount departments in a National Bank desirable, and that he saw no need of making the Bank of France note a legal tender, as it was readily accepted everywhere; also, that so long as the rules of prudence are followed, it would not be well to limit the issue of notes in proportion to the coin and bullion held. He declared that the elevation of the rate of discount was a very powerful means of defending the till, though "not," he said, "of reconstituting it," but that it presented many grave inconveniences; and he suggested that they might be avoided or lessened by at one time transactions in the precious metals, at another in the timely purchase of foreign paper, also by the Bank opening credit accounts, or "performing operations producing the effect of an anticipated payment from the countries which are debtors to those which are creditors." Finally, M. Pinard condemned the idea of establishing a maximum or minimum of the rate of discount.

The *Finance* of Brussels has the following, which if erroneous will no doubt promptly be contradicted:—"The Italian Government is in arrear to the amount of several millions (francs) in the

Digitized by Google

sum necessary for the reimbursement of the loan of Messrs Hambro. Strong complaints have been sent to Florence by the Swiss holders."

The Credit Lyonnais Bank of Lyons is soliciting the public to subscribe bonds issued by the Egyptian Commercial and Trading Company of London, and which, it says, present a safe investment at 7 per cent. It is probable, from the great and the growing importance of the money market in France, that numerous English enterprises will henceforth be recommended here.

The International Telegraphic Convention concluded some months back has been promulgated to-day, and is to come into force on the 1st January. All the important States of Europe, with the exception of Great Britain, have taken part in it. Among other things, the contracting parties reserve to themselves the right of not transmitting or of stopping any despatch which "may appear dangerous to the laws of the country, to public order, or good manners."

The market of Chilian copper at Havre has of course been affected by the events at Chili. On Tuesday, 15 tons, for delivery at the end of December, were sold at 241f 25c the 100 kilogs (about 2 cwts), but yesterday, in consequence of the news that the blockade of the Chilian coasts was continuing, prices were firmer. It was said that offers of 242f 50c and even of 245f had been refused.

An official return shows that the quantity of alcohols made in France in the month of October, the first of the season, was 494,166 hectolitres, and that taken for consumption 124,905, leaving, on the 1st November, 359,261 on hand.

The Meridional of Italy Railways has removed its offices from Turin to Florence.

The market report is annexed:—

FLOUR.—Sales at *Paris* are difficult, but the quotation, yesterday, was 48f to 52f the sack of 157 kilogs, and those of six marks were firm: current month at 51f 25c; four months of January, 52f 50c; four months of March, 54f. Type Paris, the 101 kilogs, 32f current month.

WHEAT.—At *Paris*, yesterday, choice white, 27f 50c to 28f the sack of 120 kilogs; choice red, 27f 25c to 27f 50c; good, 26f to 26f 50c; other sorts, 25f to 25f 50c.

COTTON.—The market at *Havre* was calm in the week ending Friday. The sales were 4,188 bales, and the arrivals 12,831. The stock was 35,945 bales. The closing quotations were 5f lower for China; 10f lower for United States, Egypt, Surat, Tinnevelly, Madras, and Coconada; other sorts unchanged. Low New Orleans was consequently 250f the 50 kilogs; good ordinary qualities in Tinnevelly, Broach, Madras, and China, 205f; Egypt, 260f. The market was dull on Monday, but on Tuesday and yesterday there was considerable activity. Good ordinary New Orleans was 225f to 247f 50c; Mobile ordinary, 220f; ditto, low middling, 240f; ditto, good middling, 250f; Ceara, 235f; Tinnevelly, 182f 50c; Madras, 190f.

COFFEE.—At *Havre*, in the week ending Friday, 150 sacks Port-au-Prince, 84f to 84f 50c the 50 kilogs, in bond; 550 Gonaives, 85f 50c to 87f; 500 ditto, for delivery, 83f; 400 Hayti, from New York, by French ship, 84f; 1,340 Rio not washed, disposable, 67f to 82f; 1,980 ditto, for delivery, 78f 50c to 87f; 177 Rio washed, disposable, 102f; 330 Santos, at prices kept secret; 796 Bahia, disposable, 69f to 72f; 1,000 ditto, for delivery, 69f; 200 San Thomé, from Lisbon, 79f. The arrivals were about 19,000 sacks. This week, Rio, 66f to 89f 50c; Gonaives, 87f 50c. At *Bordeaux*, last week, 800 sacks Mysore, 121f 50c; 428 La Guayra non-gragé, 92f; 500 ditto gragés, 104f; 36 casks Santiago, 105f; some Guadaloupe, 140f; 237 Rio washed, 106f and 104f; 570 not washed, 77f 50c to 87f 50c; 160 washed and not washed, 84f to 102f; some damaged Malabar was also sold. This week, Rio not washed, 78f; Bahia, 84f 50c. At *Nantes*, last week, 100 bags Reunion, at prices kept secret (but it was said at 142f 50c); 110 for delivery, 140f; 9,578 Manilla, at prices not stated; 1,428 damaged Ceylon native, 109f to 112f 50c. This week, Gonaives at prices not stated. At *Marseilles*, last week, 2,667 sacks Bahia, 67f 50c. This week, Maracaibo, at prices kept secret, but supposed to be 82f.

SUGAR.—Business was very dull at *Havre* in the week ending Friday. 157 casks French West India, for delivery, 50f the 50 kilogs, bonne quatrieme, duty paid; 300 usine, on sample, 55f 50c to 57f 50c; and 681 casks Havana, 33f, No. 12 in bond. No arrivals, except 1,050 native, from Dunkirk. This week, Havana, No. 12, 33f and 34f; Pernambuco, indifferent quality, 29f. At *Bordeaux*, last week, 269 casks Mozambique, 50f, bonne quatrieme; 11,500 sacks Reunion, for delivery, 52f 25c ditto; 667 gros grain, 54f. This week, Martinique, for delivery, 50f, bonne quatrieme; ditto, to take at Nantes, 48f 50c; ditto, Reunion gros grains, 52f 50c. At *Nantes*, last week, 17,600 sacks Reunion, chiefly for delivery, 52f to 52f 50c, bonne quatrieme. This week, Reunion, 52f 25c and 52f 50c; French West India usine, second jet, 58f and 48f 50c. At *Marseilles*, last week, 237 casks French West India, 30f 50c, bonne quatrieme of Havre; 1,500 Havana, by Spanish ship, 32f 25c, No. 12. No sales this week.

INDIGO.—The sales at *Havre*, in the week ending Friday, were 13 chests Bengal, 29 serons, 1 chest Guatemala, at established prices. There were no arrivals. This week some Bengal at the estimates and at prices kept secret. At *Bordeaux*, last week, 38 chests Bengal at established prices; 65 Madras at lower quotations; 24 Kurpah and 42 serons Guatemala at prices not given. This week, Bengal, Kurpah, and Madras at prices not stated.

HIDES.—At *Havre*, in the week ending Friday, 750 La Plata dry cow, 85f the 50 kilogs; 4,100 ditto salted, 53f 50c to 60f for ox, and 47f for cow; 800 Rio Grande dry, 82f 50c; 500 ditto salted ox, 52f; 650 Bahia drysalted, 57f; 110 Lima drysalted, 52f 50c; 700 Valparaiso cow, 65f; 1,784 La Plata horse, 43f and 41f 50c; 1,399 Rio Grande salted, 40f 50c. By auction various lots of different sorts of damaged were sold. The arrivals were about 30,000. This week Buenos Ayres salted ox, 53f ditto cow, 53f 50c; Monte Video salted cow, 46f 50c; Rio Grande dry, 77f 50c; Pernambuco salted, 44f; Monte Video salted ox, 61f; cow, 42f and 46f; Buenos Ayres horse, 43f. By auction, Buenos Ayres dry, sound, 80f to 92f.

WOOL.—At *Havre*, in the week ending Friday, 153 bales La Plata unwashed, 1f 17½c to 2f 50c the kilog; 6 Chili unwashed, 1f 80c; 7 bales La Plata sheepskin, 1f 20c to 1f 55c. The arrivals were under 200 bales. This week, Chili unwashed, 1f 60c; Monte Video ditto, 1f 80c; Buenos Ayres, 1f 90c.

TALLOW.—The sales at *Havre*, in the week ending Friday, were 45 pipes La Plata, disposable or in the port, 58f to 58f 25c the 50 kilogs; 100 pipes and 100 demi-pipes ditto, for delivery, 58f 25c to 59f 50c. The arrivals were 217 casks. This week, La Plata, 58f 25c. At *Paris*, yesterday, the 100 kilogs, octroi duty included, 121f 70c.

SPIRITS.—At *Paris*, yesterday, 3-6 first quality, disposable, 44f 50c the hectolitre. At *Bordeaux*, the day before yesterday, 3-6 Languodoc, 86 deg., 55f; 3-6 beetroot, first quality, 90 deg., 54f.

COMMERCIAL AND MISCELLANEOUS NEWS.

Messrs Dymes and Co,, writing from Madras on the 27th of October, thus alludo to the state of the money market at that port during the preceding fortnight:—The great scarcity of money is beginning to cause much anxiety. The Bank of Madras has again raised its rates of accommodation 2 per cent. all round. Present rates are 12 per cent. for loans on Government securities and 14 per cent. for discount on first-class three months private bills. The steamship Arabia, with nearly ten lacs of specie on board for this port, is reported to be on shore near Coringa. It is expected that she will get off without damage, and no fears are entertained for the ultimate safety of the specie. Madras Bank shares have been in good demand, and prices have rapidly run up to 83 to 85 premium for both old and new stock. There are now no sellers under 85 premium, as prospects of a good dividend are daily improving, owing to the high rates of interest now current. The Bank of Madras has been peculiarly fortunate this half-year in having made few or no bad debts. The branch offices opened on the coast are now paying so well that we believe it is in contemplation to extend the bank's operations in this direction, in which case a further increase in capital will be necessary. Government Paper—Dear money continues prejudicially to affect these securities, and prices have again declined. Our to-day's quotations are:—Five-and-a-half per cents., 8¼ to 9 premium; five per cents, 2 to 2½ premium; and four per cents., 11 to 12 discount. Exchange—A further advance of nearly 1 per cent. has been established. We quote 6 months' sight document bills (under telegraphic credits from London) at 2-1⅛. There is still a good demand for accommodation at the exchange banks, as shipments of cotton, when the weather permits, continue at the same ratio as during the past few months. The banks' drawing rates have been advanced to 2-0¾ for 6 months' sight bills. Sovereigns—English are worth 10-4 rs each, and Australians 10-3-6 rs each.

In reference to bullion movements at Hong Kong, during the fortnight ending Oct. 15, Messrs Sharp and Co. write as follows:—Gold—The imports have been $230,000 worth, and the exports $660,000, including the shipments per Ganges and Reiver on the 27th ultimo and excluding those to leave to-morrow. The very small supply has caused an advance in the value. Silver—$390,000 worth has been received chiefly from Europe. $560,000 has been exported: the low value of rupees still making bar silver and Sycee a good remittance even at present high rates. Dollar Currency—The imports represent $580,000, of which more than one half is from the coast. The exports are $620,000 to Shanghai and to India. Discounts and Mortgages—Loans on first-class securities have been made at 7 per cent. Mortgages 10 per cent. Exchange—There has been a fair amount of business done for the period: all first-class bills have been readily bought up, and the market leaves off buyers. The private demand for rupee remittance has been small, consequent on Indian drawings against drug. Shares—A few purchases for investment have been made, but speculative operations are still quite in abeyance. Closing Quotations:—On London, 6 months' sight, 4s 5¾d; on Calcutta, 3 days' sight, 218½ rs; on Bombay, 3 days' sight, 218 rs; on Shanghai, 30 days' sight, 73½ tls; on Amoy, 15 days' sight, 1½ per cent. dis.; on Foochow, 15 days' sight, 1 per cent. dis.; on Kanagawa, 15 days' sight, 1½ per cent. dis.; on Singapore, 30 days' sight, ½ per cent. dis.; Batavia, 3 days' sight, 255 gs.; bar silver, 7 dwts B, 10¾ per cent. prem.; Sycee, 8½ per cent. prem.; Mexicans, ½ per cent. prem.; gold leaf, $22.85 per tael; gold bars, Californian, $22.80 'per tael, equivalent 100 touch; ditto, Pekin, $22.40 per tael; sovereigns, English, $4.60 each; ditto, Sydney, $4.51 each; discounts, bank, short, 7 per cent.; ditto, merchants', 8 per cent.; Hong Kong and Shanghai Banking Company shares, 6 per cent. prem.; Hong Kong and Whampoa Dock Company, 40 per cent. prem.; Union Dock Company, 1 per cent. prem; Hong Kong Gas Company, 30 per cent. prem.; Steamer Express, 40 per cent. dis.

It has recently been found that the shales of unctious clay overlying the ironstone deposits of the Yorkshire moors, in the North Riding, can be made to produce a mineral oil, similar to petroleum, at a cost of 6d per gallon.

The following are the last monthly returns of the Irish banks of issue for the four weeks ending the 11th inst.:—

The following returns, published by the Veterinary Department of the Privy Council, and having reference to the disease amongst horned cattle, do not profess to give the total number of cases which have occurred in Great Britain, but only those which have been ascertained from the official information received from Inspectors, whether appointed by the Clerk of the Council or by the local authorities. The divisions of England are those of the Census. Column I. only records the cases reported as having commenced during the weeks indicated by the headings; "back" cases being added to column II. :—

Census Divisions.	I. Number Attacked.			II. Result of reported Cases from the Commencement of the Disease.				
	Week ending Nov. 25.	Week ending Nov. 18.	Week ending Nov. 11.	Attacked.	Killed.	Died.	Recovered.	Remaining.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 29th day of November, 1865.

ISSUE DEPARTMENT.

	£		£
Notes issued	28,498,065	Government Debt	11,015,100
		Other Securities	3,634,900
		Gold Coin and Bullion	13,848,065
		Silver Bullion	...
	28,498,065		28,498 065

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	9,741,100
Rest	3,185,917	Other Securities	18,940,510
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	6,544,362	Notes	7,775,250
Other Deposits	12,471 521	Gold and Silver Coin	760,883
Seven Day and other Bills	494,023		
	37,248,843		37,248 843

THE OLD FORM

The above Bank accounts would, if made out in the old form, present the following result :—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	21,215,738	Securities	28,768 610
Public Deposits	6,544,362	Coin and Bullion	14,698,948
Private Deposits	12,471 521		
	40,231,641		43,417,558

Dated the 30th November 1865. W. MILLER, Chief Cashier.

The balance of Assets above Liabilities being 3,185,917*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

An INCREASE of Circulation of	£141,635
An INCREASE of Public Deposits of	400,319
A DECREASE of Other Deposits of	407,462
No change in Government Securities.	
A DECREASE of Other Securities of	54,055
An INCREASE of Bullion of	163,916
A DECREASE of Rest of	24,631
An INCREASE of Reserve of	26,161

The return issued by the Bank of England presents few changes from that published last week. The decrease in the private deposits is counterbalanced by the increase in the Government deposits. There is a small augmentation in the reserve, amouting to 26,161*l*. The addition to the coin and bullion is 163,916*l*.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1855 :—

At corresponding dates with the present week	1855.	1862.	1863.	1864.	1865.
	£	£	£	£	£
Circulation, including bank post bills	19,956,379	20,554,545	21,685,782	20,381,055	21,215,738
Public deposits	4,439,589	8,195,360	7,234,894	6,301,202	6,544,362
Other deposits	12,234,788	13,049,958	12,924,545	13,272,161	12,471,521
Government securities	10,275,480	11,034,517	10,710,330	10,474,542	9,741,100
Other securities	18,868,757	19,333 241	21,178,559	18,629,168	18,950,510
Reserve of notes & coin	6,052,022	9,905,529	6,675,850	8,816,824	8,857,233
Coin and bullion	11,227,107	15,009,814	13,048,475	13,989,924	14,628,948
Bank rate of discount	6 & 7 p c.	3 p. c.	8 p. c.	7 p. c.	6 p. c.
Price of Consols	90⅝	92¼ xd	90⅛ xd	89¾ xd	89¼
Average price of wheat	83s 1d	47s 2d	40s 3d	38s 8d	46s 10d
Exchange on Paris (short)	25 27½ 35	25 15 22½	25 30 40	25 17½ 23¾	25 12½ 20
— Amsterdam ditto	11 16⅝ 17	11 13¼ 14	11 17 18	11 15 16	11 18 19
— Hamburg (3 months)	13 9½ 10	13 6½ 6⅝	13 9 9½	13 8½ 8⅝	13 9½ 9⅝

In the corresponding week of 1855, the tendency of the money market was still towards higher rates.

In 1862, the signature of a commercial treaty with Belgium had been authorised by the Swiss Federal Council. The Ratazzi Ministry at Turin had resigned. The Spanish Cortes had been opened. At a public meeting at Manchester 130,000*l* had been raised for the relief of the distressed cotton operatives. Greek bonds had fallen 1 per cent. on the London Stock Exchange on the intimation that Prince Alfred would not be allowed to accept the Greek throne.

In 1863, the Polish insurrection had increased in some districts. The Chamber of Deputies at Dresden had recognised the rights of the Prince of Augustenburg. The Danish representative had been excluded from the Federal Diet at Frankfort. Lord Russell's despatch of the 23rd Nov. on the Schleswig-Holstein question to the English Ambassador at Berlin had been published, and Herr Bismarck had made a declaration to the Prussian Chambers on the same subject. An address had been voted to the Emperor of Austria by the Municipal Council of Vienna in favour of intervention in the Duchies. In America, General Longstreet had driven Burnside away into Knoxville, which he had invested.

In 1864, the official abrogation of martial law in Venetia had appeared; the insurrectionary movements had come to an end. The Prussian Government in notifying the treaty of peace with Denmark had requested the recall of the Federal troops from the Duchies, at which much dissatisfaction had been expressed in Germany. The Danubian United Principalities Seven per Cent. loan for 916,000*l* at 86 had been announced, as well as a Five per Cent. Danish loan for 728,000*l* at 94½.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1855, a deficiency of 6,633,969*l*; in 1862, a deficiency of 5,683,283*l*; in 1863, a

Digitized by Google

deficiency of 8,249,014*l*; and in 1864, a deficiency of 5,357,002*l*. In 1865, the deficiency is 6,478,989*l*.

DISCOUNT AND MONEY MARKET.—There is this week little alteration in the actual state of the money market either here or in Paris. Our own Bank return presents scarcely any variation, and that of the Bank of France shows that the precautions taken by mercantile houses are in excess of actual requirements, inasmuch as the private accounts show a large increase over the amount of the last week, although not quite equal to the increase in the bills discounted by the Bank. There is only a moderate amount of business doing here, and the terms are perhaps a shade easier than those last quoted. The exchanges were less influenced by the demand for bills, but gold continues to leave the country for abroad. The cotton market exhibits signs of recovery, and the Stock Exchange, with its requirements for "carrying over" on the account day, had some temporary effect. The commitments of the public on account of partly paid shares in joint stock companies are sufficiently large to induce caution in accommodating speculators; and, pending the inaction of the investing portion of the public, it is probable that the operation of the general money market may be even more marked than it usually is in the stock and share markets.

A lengthy pamphlet has been issued by the Committee of the Venezuelan bondholders. The conduct of the Venezuelan Government is severely animadverted upon, and the Committee in the "conclusion," page 53, briefly analyse a case that is fortunately without a parallel in recent financial history.

The Venezuelan Government have undoubtedly broken faith in the most shameless manner with their bondholders, and when the Committee ask the English Government to interfere to obtain the restitution of the sums that had been actually paid over to the bondholders' agents, they do not exceed their strict right. Lord Clarendon apparently considered that the special hypothecation of 55 per cent. of customs receipts enabled the British Government to consider and claim the hypothecated amount as British property. Lord Russell formally declined to receive Mr Antonio L. Guzman, the father of the President of Republic, "until Messrs Baring and the other British holders of Venezuelan bonds shall have received redress for the wrongs which they have suffered at the hands of that Government." Apart from the question whether the general claims of bondholders upon a foreign Government call for the active interference the Committee evoke, the special robbery committed by the Government of Venezuela on their funds already appropriated to their agents, justifies such interference; and it is to be desired. The case of bondholders whose rights are disregarded is hard enough, and, in this instance, too scandalous; but the deliberate robbery perpetrated upon the bondholders' agent is a case in which no justice can be too prompt.

Annexed are the current discount charges on paper of various dates:—

30 to 60 days	5⅞ per cent.
3 months	5⅞ per cent.
4 months	6¼ per cent.
6 months—Bank bills	6¼ per cent.
6 months—Trade ditto	6¾ per cent.

Money has been sufficiently well employed in the Stock Exchange on Government securities for short periods at 5 per cent.

The following are the rates allowed by the joint stock banks and discount houses for deposits:—

Joint Stock Banks	*4½ per cent.
Discount houses at call	4½ per cent.
Do. with seven days' notice	5 per cent.
Do. fourteen days	5¼ per cent.

* At the London and Westminster 3¼ per cent. only on sums below 500*l*.

Bullion.—15,000*l* have to-day been withdrawn from the Bank.

The following details result from a comparison between the returns published by the Bank of France this and last week:—

INCREASE.	£
Cash in hand	144,000
Bills discounted, not yet due	1,880,000
Notes	1,280,000
Current accounts	1,092,000
DECREASE.	
Advances	20,000
Treasury balance	240,000

The following are the rates of discount current in the chief continental cities. In Hamburg there is a further slight reduction.

In Madrid, owing to the extremely unsatisfactory state of finance in Spain, the rate of money is uncertain.

	Bank Rate. Per cent.	Open Market Per cent.
Paris	4	3¾
Vienna	5	5
Berlin	7	6⅓
Frankfort	5½	5
Amsterdam	6	6
Turin	5	4½ 5
Brussels	6	5½
Madrid	9	...
Hamburg	...	5½
St Petersburg	6	6½ 7

ENGLISH GOVERNMENT FUNDS.—The market has steadily declined during the week; causes long in operation that led to the constant sale of stock by the public appear still to be in operation; and it is extremely probable that the cattle plague and the increased value of almost every kind of provisions act with new force in the same direction. Investments in Government securities are very far from being as numerous as they were two or three years back; the competition of foreign states with that of the railway preference stocks, which are continually being added to, and that of secured debentures of companies English and foreign, have proved too strong, and it will probably be some years before the trade of the country will have produced surplus profits sufficient to induce purchases in the 3 per Cents. on a scale calculated to restore the quotation they formerly enjoyed. The Government broker has purchased a large amount of stock this week, but without in any way checking the decline. The closing prices of Consols is 87⅜ to 87⅞ ex div. for the account, and for money 89 to 89¼; New 3 per Cents. and Reduced, 87⅜ to 87½; India 5 per Cents. 104¾ to 105¼. The Government broker purchased 30,000*l* New 3 per Cents.

Exchequer bills close without any variation from the quotation of last week. March bills, 6s to 2s dis.; June, 9s to 4s dis. India bonds rather higher, 14s to 19s prem.

FOREIGN STOCKS.—The settlement, which took place yesterday, proved "bullish." The rates of continuation were heavy, and the subsequent decline that has occurred in most quotations indicates that speculative accounts predominate with a large amount of unplaced stock. Spanish Certificates are the almost only exception to the general decline noted, it being believed that some negotiations are on foot towards an arrangement with the holders. The closing prices of stocks dealt in to-day are subjoined:—5 per Cent. Brazil, 1865, 76 to 77; Scrip, 2⅛ to 2⅜ prem. 6 per Cent. Buenos Ayres, 85 to 87. 7 per Cent. Egyptian, 93 to 94; 7 per Cent. ditto, 1864, 92½ to 93½. 5 per Cent. Italian, 1865, 77¼ to 77⅜. 3 per Cent. Mexican, 25⅝ to 25⅞; ditto, 1864, 24¼ to 24½. 2 per Cent. New Granada, 30 to 31 ex div. 5 per Cent. Peruvian, 1865, 73½ to 74½; 4½ per Cent. ditto, 1862, 72½ to 73½. 3 per Cent. Portuguese, 46 to 46½. 5 per Cent. Russian, 1862, 89½ to 90; 3 per Cent. ditto, 1859, 53½ to 54½; 5 per Cent. ditto, 1862, 89 to 90; 5 per Cent. ditto, 1864, 92 to 93. 3 per Cent. Spanish, 44½ to 45½; ditto Passive, 28⅛ to 28⅜. ditto Certificates, 14⅞ to 15⅛. 6 per Cent. Turkish, 1854, 90 to 91; ditto, 1858, 74 to 75; ditto, 1862, 74 to 75; 5 per Cent. ditto, 1865, 44 to 44½. 5 per Cent. Italian, 64 to 64½.

The closing price of French 3 per Cent. rentes, telegraphed this evening from Paris, is 68.67½.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks on last Friday and this day:—

CONSOLS.

Railways and Other Shares.—The decline has been less felt in the railway market, as there are fewer speculative engagements open; but prices are dull, and the public mostly stand aloof. A few transactions in the preference and guaranteed stocks of the oldest companies have taken place at the approach of the dividend, nearly always producing a few inquiries of this nature; but general business is slack. Prices are with slight variation as last quoted. Great Eastern rather firmer, with an advance of 1½ per cent. over that of last Friday. Great Northern rather lower. Great Western a fraction lower. London and North-Western, London and South-Western, and Metropolitan stocks have all suffered a slight decline. Midland is also rather lower, and South-Eastern notes 1 per cent. decline.

Indian guaranteed stocks are steady, with a slight absorption on the part of the public for investment.

In foreign railway shares, Belgian are firm, with an improved tendency.

The miscellaneous share market is dull. Credit Mobilier shares which had risen on a succession of purchases have declined, owing to the preponderating supply. Australian and Agricultural shares have steadily advanced, and close at 28 to 30 prem. Most of the finance companies shares and the new banks are dull.

On the 6th instant tenders will be received at the Bank of England for 350,000*l* Government bills on India.

Subjoined is the usual list of the closing prices of the principal railway shares on last Friday and this day:—

Foreign Exchanges.—Less inquiry was experienced for bills, and in a few instances the quotations were rather higher than on last post day.

Bullion.—The following is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper:—

Gold.—The demand for export has again revived, and in the absence of any supplies of importance, buyers have been compelled to take bars from the Bank, which establishment has sold 160,700*l* in bars and coin since our last circular of the 23rd inst. The Java has brought 112,000*l* from New York, of which 80,000*l* was on French account; the Shannon brings 31,500*l* from the West Indies, and the Delta 4,790*l* from Alexandria; these amounts will also be sent away. The Mongolia took 40,000*l* to Bombay, and 12,500*l* to Alexandria.

Silver.—The Shannon has brought 90,000*l* from the West Indies, the Dore portion of which has been sold at 61¾d per oz standard. Our market has been rather quiet during the past week, the demand for India having somewhat ceased, and prices were slightly lower at 61¾d to 61½d per oz standard; there were, however, inquiries to-day for silver to be shipped at Marseilles by the steamer thence on the 5th December, and business to some extent has been done at 61⅝d per oz standard. The fine bars ex Shannon have not yet been sold, the price being in doubt, owing to the large arrival of dollars. The Mongolia has taken 376,850*l* to Bombay.

Mexican Dollars.—The Shannon has brought 250,000*l* from the West Indies; there is but a moderate demand for this coin for the China market, and the price for the large amount now to hand will chiefly depend on the silver market.

Exchange on India for drafts by the banks at 60 days' sight may be quoted 1s 11⅞d to 2s for Calcutta and Madras, and 2s to 2s 0⅛d Bombay. Council drafts on Bombay have been resold at 2s 0⅛d, and on Calcutta at 2s. Interest notes, 2s.

India Government loan notes remain at last week's quotations, viz., 107½ to 108½ for 5½ per Cents., 101 to 102 for 5 per Cents., and 87 to 89 for 4 per Cents.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std, last price; ditto, refinable, 77s 10½d per oz std, last price; Spanish doubloons, 74s to 74s 6d per oz; South American doubloons, 73s 9d to 73s 10d per oz; United States gold coin, 76s 2¾d per oz. Silver—Bar silver, 5s 1½d per oz std, nearest; bar silver, containing 5 grs gold, 5s 1¾d per oz std; five-franc pieces, 4s 11¾d per oz, last price. Quicksilver, 8*l* per bottle; discount, 3 per cent.

Settling Days.—The Committee of the Stock Exchange have appointed Friday, the 1st December, as a special settling day in the shares of the following companies:—

London Quays and Warehouses (Limited).
Merchants' Company (Limited).
Credit Foncier and Mobilier new shares.

All to be marked in the official list.

The shares of the Westminster Brewery Company are to be officially quoted.

Failures and Mercantile Embarrassments.—It is proposed by the Vice-Chancellor Kindersley to make a call of 35*l* per share, on the 5th instant, on the shares of the Portsmouth, Portsea, Gosport, and South Hants Banking Company.

Creditors of the Estates Bank (Limited) are required to send in the details of their claims on or before the 21st instant to the official liquidator, as the Master has appointed the 9th of January next for adjudicating thereon.

A petition is to be heard before Vice-Chancellor Stuart, on the 8th instant, for the winding-up of the South Foxdale Silver Lead Mining Campany (Limited).

The official liquidator of the London and Burton Railway Company (Limited) requires creditors to send in their claims on or before the 1st January proximo.

A petition for the winding-up of the General Floating Dock Company (Limited) is to be heard on the 9th December, before the Master of the Rolls.

Particulars of claims on the Land Credit Company of Ireland are to be sent in before the 1st January prox., the Master of the Rolls having fixed the 22nd January for adjudicating thereon.

A petition is to be heard on the 8th December before Vice-Chancellor Kindersley for the winding-up of the Metropolitan Paper-making Company (Limited).

An official liquidator of the Axton Mining Company (Limited) is to be appointed by Vice-Chancellor Wood on the 9th December.

Public Companies.—The International Contract Company (Limited) have declared an interim dividend at the rate of 10 per cent. per annum for the half-year ended 30th September.

The adjourned meeting of the Imperial Ottoman Bank was held on the 29th ult. The shareholders voted in favour of the issue of new shares *pro rata* to existing shareholders at par, against the recommendation of the board, by whom the issue at 2*l* 10s per share premium was proposed; the amount resulting from such premium to be added to reserve fund.

The meeting of the Vancouver's Coal Mining and Land Company was held yesterday. The report of the directors was adopted.

At the meeting of the Trust and Loan Company of Upper Canada, the net profit for the six months was stated at 13,498*l*, and the dividend declared was at the rate of 7¾ per cent. per annum, free of income tax.

The shareholders of the London and Venezuela Bank, at their meeting of yesterday, confirmed the directors' report, with a dividend for the half-year at the rate of 5 per cent. per annum, free of income tax.

The meeting of the Financial Discount Company was held yesterday. The dividend declared was at the rate of 10 per cent. per annum.

The Atlantic and Great Western Railway Company invite applications for the issue of 2,771,600*l* sterling mortgage bonds, having 25 years to run, and bearing interest at the rate of 7 per cent. per annum. The bonds are of 100*l* each, and the interest will be paid quarterly in sterling in London, and in gold at New York. The amount is chiefly required to pay off mortgage bonds already issued. The development of industry in the petroleum region is almost, if not unexampled in the annals of America, and it is these regions that this railway is connected with, and has opened up. Whatever else may be uncertain about America, the immense prosperity of its industry is at least certain.

Charles Noon and Company (Limited) has been formed for the purpose of purchasing an extensive hosiery manufacturing business at Leicester, long carried on by Mr Charles Noon. The capital required is 135,000*l* in shares of 10*l* each. The price to be paid for the business is 60,000*l*, partly in cash and partly in shares.

The acting agent of the Scinde Railway writes, under date the 24th October:—"The traffic continues steadily to improve, and I am very confident that this current half-year will show very well indeed. The expenses will show a marked difference, but this will be still more apparent in the next half-year."

The annual meeting of the Clerical, Medical, and General Life Assurance Society was held on Saturday last. The report stated that within the year ended 30th ult., 498 new policies for assurances, amounting to 337,973*l*, were issued at an annual premium of 11,329*l*.

At the meeting of the Oriental Gas Company, on the 27th ult., the available balance was stated to be 6,595*l*. The dividend declared for the six months was at the rate of 8 per cent. per annum, free of income tax.

At the meeting of the City and County Assurance Company (Limited), on the 28th ult., the new fire policies issued during the year were stated at 1,601 for 1,045,478*l*. The recommendation of the directors to pay interest at the rate of 5 per cent. on the paid-up capital of the Company was adopted.

The half-yearly meeting of the Imperial Continental Gas Association was held on the 20th ult. at the London Tavern. A dividend of 2*l* 10s per share, with a bonus of 1*l* per share, were declared for the half year ended 30th June ult., payable free of income tax on the 15th December.

The directors of the Peninsular and Oriental Steam Company have issued their report in anticipation of the meeting called for the 5th Dec. The dividend recommended is at the rate of 3½ per cent. for the half-year. An addition of 3 per cent. from the underwriting account is to be added, making with the 3½ per cent. paid in June a total of 10 per cent. for the year.

The meeting of the Hudson's Bay Company was held on Tuesday last. The Governor, Sir E. Head, stated that the general prospects of the company were of a most encouraging nature. No negotiations are in progress for the sale of the Company's territory to the Canadian Government. The resolution and bye-laws adopted at the independent shareholders meeting a few days previously were proposed, and after discussion withdrawn. One, appointing Mr Quilter and Mr E. W. Watkin, M.P., auditors, was adopted. The Governor and committee were re-elected. The same interim dividend as formerly passed was declared.

The meeting of the Brazilian and Portuguese Bank was held on Wednesday last. The directors' report was adopted. The chairman stated that the profits made during the half-year would have sufficed for the payment of an interim dividend of 3 per cent., after replacing 19,716*l* to capital, but owing to the absconding of an accountant appointed by the special commissioners of the bankrupt estates in Rio, they were prevented from making this proposition. The net profit amounted to 7,000*l*, but the directors did not think it advisable, in the fluctuating condition of the currency, to declare a dividend at present.

The directors of the New Zealand Banking Corporation (Limited) have issued their report, in anticipation of the half-yearly meeting called for the 6th December. The net profits on returns up to the 13th September from New Zealand amount to 4,267*l* 9s 2d. The directors propose a dividend for the six months at the rate of 10 per cent. per annum; 1,000*l* to reserve; 227*l* 4s 6d to preliminary expenses; and 291*l* 1s 5d to new account.

MISCELLANEOUS.—300,000*l* New South Wales Government debentures, falling due on the 1s January, are advertised for payment in London in due course.

Mr Thomas Gooch, of the firm of Gooch and Cousens, has been elected a director of the Bank of England, in the room of his father, lately deceased. Mr Falconer Larkworthy has been elected to the vacancy caused by the retirement of Mr J. E. Anderdon.

The subscription list of the Austrian loan has been closed, the amount written for being in excess of the nominal sum for which the loan is made. No transactions have been noted in the scrip on the London Stock Exchange.

Messrs Baring and Co. have received the following remittances on account of New Granada dividends:—Santa Marta, 5,000*l*; Sabanilla, 1,394*l* 12s 3d; San José de Cucuta, 621*l* 16s 9d; Cartagena, 691*l*—total, 7,635*l* 9s.

The General Credit Company have issued the following recommendation relative to the loan of 1864 of the Republic of Venezuela:—La Guayra, Nov. 9, 1865.—Per statement No. 53, from La Guayra, 2,050 dols 50c; ditto No. 54, 7,195 dols 17c; ditto No. 65, Puerto Cabello, 27 dols 21c—total, 7,635 dols 9c. London, Nov. 29.

The Mexican Imperial Commissioner, M. Y. de Ybarrondo, has notified to Messrs Baring and Co. that he is under the necessity of referring to his Government for fresh instructions prior to opening the conversion of bonds advertised, and that the conversion must consequently be delayed.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 1 per mille premium, and the short exchange on London is 25.15 per 1*l* sterling. On comparing these rates with the English Mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is nearly 2-10ths per cent. dearer in Paris than in London.

The course of exchange at New York on London for bills at 60 days' sight is 108¾ to 109 per cent. At this rate there is no profit on the importation of gold from the United States.

The Commercial Times.

The following alterations have been made in the French Mail Packet Service to the West Indies, viz.:—1st. Mails for St Lucia, St Vincent, Grenada, and Trinidad, instead of being forwarded, as formerly, by the Mexican packet, which leaves St Nazaire on the 16th of each month, are now carried by the packet for Colon, leaving St Nazaire on the 6th of each month. 2nd. Mails for Demerara can now be forwarded by the French packet leaving St Nazaire on the 6th of each month. 3rd. By the French packet on the line to Mexico, which leaves St Nazaire on the 16th of each month, mails can be forwarded to Jamaica, St Thomas, Porto Rico, and Cape Haytien. Letters, &c., intended to be sent by the French packet sailing from St Nazaire on the 6th, must be posted in or reach London, at the latest, in time for the day mail to France of the 5th; and letters intended for despatch by the packet sailing from St Nazaire on the 16th, must be posted in or reach London in time for the day mail to France of the 15th; and if either the 5th or the 15th of the month happen to fall on a Sunday, in those cases the letters must leave London on the evening of the previous day. The rates of postage on letters for the several places above mentioned, when sent by French packet, will be the same as the rates charged to those places by British packet. To the British Colonies prepayment is optional, but to St Thomas, Porto Rico, and Cape Haytien, the postage must be paid in advance.

In a notice issued on the 7th August last, it was stated erroneously that letters for Japan, intended for transmission by French packet, might be forwarded either unpaid or paid to destination, at the option of the sender. Such option of prepayment, however, applies only to letters addressed to the port of Yokohama, where a French post office has been established. To all other places in Japan, addressed to be sent by the French line of packets, and to all places in Japan, without exception, when sent by British packet the postage of letters must be paid in advance or they cannot be forwarded.

COMMERCIAL EPITOME,

FRIDAY NIGHT

The supply of English wheat on sale at Mark lane to-day was very moderate. For dry samples there was a fair demand, at full prices, but damp produce sold heavily, at about Monday's currency. The amount of business transacted in foreign wheat was somewhat restricted, at the rates current on Monday. Trade in barley was very dull, at fully the late decline in prices. Malt changed hands to a limited extent, at barely late rates. With oats the market was but moderately supplied, and the trade ruled firm, with a tendency to improvement as regards price. Beans and peas were firm, at fully late rates. For flour there was a moderate demand, on former terms. This week's imports amount to 7,120 quarters of wheat, 1,950 barley, 7,370 oats, 960 sacks and 820 barrels of flour.

At Liverpool, this morning, wheat was in improved request, on rather higher terms. Flour sold steadily, at full prices. For Indian corn there is a good demand, at an advance of 3d to 6d per quarter. At Wakefield, fine wheats realised 1s per quarter more money than on Friday last.

The Liverpool cotton market opened dull on Friday last, and on Saturday prices were fully ¼d per lb lower; but on Monday a better inquiry prevailed, which has since improved daily, and to-day we close at an advance of fully 1d per lb upon the current rates of Friday last.

Via the Persian Gulf, we have intelligence from Bombay to Nov. 21. The demand for cotton at that date had somewhat improved, and prices were higher. Broach was quoted at 13.292d, and Dhollerah at 14.391d per lb, including freight.

Postal advices from Madras are to Oct. 26. During the preceding fortnight, the value of cotton fluctuated considerably, Western produce having sold as high as 260 rupees, closing at 232 rs per candy. The latest quotations were 13½d for Western produce, and 12¼d for Salem and Coimbatore.

From Alexandria, we have news to Nov. 24. The arrivals of *new* cotton had been small, yet the market was quiet, but firm. Fair open-ginned produce was quoted at 21½d per lb on the spot. Freight to Liverpool was ¼d per lb.

In the markets for colonial and foreign grocery produce, only a moderate business has been transacted during the week. The raw sugar trade continues very quiet, with limited transactions; but tea and coffee have been in fair request. As compared with Friday last, the quotations exhibit no change of importance, the principal feature being a somewhat drooping market for raw sugar.

Last week, duty was paid in London on 1,176,581 lbs of tea, whilst the export, during the week ending Nov. 23, amounted to

Digitized by Google

438,913 lbs, making a total of 1,615,494 lbs, against 2,049,098 lbs last year. Advices from China state that considerable business had been done both in black and green teas, but at reduced rates. The shipments to Great Britain, since the opening of the season, had amounted to 60,250,400 lbs, against 71,046,800 lbs in the corresponding period last year.

Advices from Havana are to Nov. 4.—During the month of October the demand for sugar had been far from active; nevertheless, holders were firm, and a slight advance has taken place in prices. The subjoined statements of prices and exports are from Messrs Morales and Co.'s circular:—Quotations:—Cucuruchos, Dutch numbers, No. 8 to 10, 28s 5d to 29s 6d; ordinary yellows, ditto, No. 11 to 12, 30s 1d to 30s 8d; middling ditto ditto, No. 13 to 14, 31s 10d; fine ditto ditto, No. 15 to 16, 31s 10d; florete ditto ditto, No. 17 to 19, 31s 10d to 32s 11d; ordinary whites, 31s 10d to 32s 11d; middling ditto, 34s 1d; fine and florete ditto, 36s 4d to 37s 6d; crystallised, No. 15 to 16, 29s 6d to 30s 1d; ditto, No. 17 to 20, 30s 8d to 31s 10d per cwt, free on board.

EXPORTS of SUGAR from Havana, Matanzas, and Cardenas, for the ten months ending Oct. 30, 1864 and 1865.

From Colombo we have intelligence to Oct. 30. The supply of coffee on sale at that date was small, and as the demand, both for Europe and Australia, ruled active, higher prices had been realised. Plantation produce was quoted at 12s 9d to 13s 6d per bushel; unpicked native do., 43s to 43s 6d; picked and dried do., 48s to 49s 6d per cwt. The following table of shipments is from Messrs Fryer, Schultze, and Co.'s circular:—

EXPORTS OF COFFEE from Colombo in October 1864 and 1865.

The public sales of colonial wool continue to be well attended by buyers, and the biddings have shown increased activity, whilst a further advance has taken place in prices. According to Mr H. Schwartze's circular, Port Philip wool is now 2d to 3d, Sydney 1½d to 2½d, and Cape 1d per lb dearer than at last sales. About 50,000 bales have now been disposed of. Privately, the trade for English wool is firm, but with only a moderate business doing.

During the fortnight ending Oct. 8, there was an active demand at Shanghai for all descriptions of silk, the result being that holders obtained an advance in price, varying from 20 to 30 taels per picul. The quotations, at per lb overland, all charges paid to England at the exchange of 6s 3d per tael, were as follows:—Tsatlees, chop No. 1, 31s 11d to 32s 6d; ditto, No. 2, 30s 10d to 31s 5d; No. 3, 29s 9d to 30s 4d; market, No. 3, 28s 8d to 29s 2d; No. 4, 27s 2d to 28s 4d; No. 5 and common, 25s 7d to 26s 8d; Taysaam, chop No. 1, 26s 8d to 27s 10d; No. 2, 25s 7d to 26s 5d; No. 3, 24s 10d to 25s 4d; No. 4, 5, and common, 21s 11d to 24s 3d; Yuenfa, No. 1, 27s 2d to 28s 4d; No. 2, 26s 2d to 26s 8d; No. 3, 25s 1d to 25s 7d; No, 4 and common, 22s 8d to 24s 10d; Hainings, 21s 11d to 27s 2d per lb. Subjoined are the particulars of receipts, &c., since the opening of the season:—

	1863. bales.	1864. bales.	1865. bales.
Receipts	34,700	20,000	40,854
Settlements	12,200	15,000	39,854
Exports	20,485	14,134	37,078
Unsold stock, Oct. 8	12,500	5,000	1,000

From Yokohama, we have postal intelligence to Sept. 30. The transactions in silk had been chiefly on French account, and of limited extent, but at full prices. The unsold stock was estimated at 2,500 Japanese bales. The exports, since June 1, had been 4,672 bales, against 1,416 bales during the same period last year.

In reference to the state of the tobacco trade, last month, Messrs Grant, Hodgson, and Co. write as follows:—There has been less activity in the market for American tobacco than was experienced in the previous month, the trade having confined their purchases, in most instances, to limited lots for immediate consumption, which is generally the case at this period of the year, in the absence of any special causes affecting prices. Purchases for home trade chiefly consisted of good and fine qualities, at full quotations, and on some small lots and remnants of middling and ordinary, to close parcels, slight concessions were submitted to. Sampling of Western strips, during the month, made considerable progress, and some of the best marks were found of very fine quality and and much superior to any previously inspected. For nearly all other growths than American a very good demand existed throughout the month, and business in some descriptions would have been further increased, but for absence of stock. For exportation, sales were chiefly of a retail character, consisting principally of common and ordinary Western leaf at prices in favour of buyers. Imports, 1,775 hhds. Deliveries, 810 hhds, against 918 hhds in the corresponding month of last year. Stock, 22,905 hhds, against 18,059 hhds in 1864; 18,034 hhds in 1863; 21,610 hhds in 1862; 27,220 hhds in 1861; and 22,426 hhds in 1860.

Hemp has changed hands to a fair extent at 34*l* for clean Russian qualities. Flax is very firm. Jute, however, is dull, and rather lower in price.

In metals, the leading change is in English tin, which has been raised in price to the extent of 2*l* per ton. Foreign tin is also dearer. The copper market has been in a sensitive state, but, for the most part, firm. Scotch pig iron has realised 58s 6d to 58s 9d cash, mixed numbers. Most other metals rule firm. The following relates to Banca tin in Holland:

	1865. slabs.	1864. slabs.	1863. slabs.
The stock on warrants amounted on Oct 31	121759	75350	87820

Stock on warrants, Nov. 30	109259	71032	79670
Arrived towards next sale	...	66848	50358

The oil trade has been rather quiet. Linseed oil has fallen to 38s 9d per cwt, on the spot, whilst sperm is selling at 117*l* per ton. French spirits of turpentine are quoted at 46s 6d per cwt on the spot. The market for pretroleum is very firm, and American refined qualities have advanced to 3s 9d per gallon, on the spot.

The tallow market has been much quieter, with a tendency to heaviness. Prices are lower—P.Y.C. being quoted at 48s 6d to 48s 9d per cwt, on the spot, and 50s 6d for March delivery. The following table shows the extent of the shipments from St Petersburg during the season just concluded:—

Advices from New York are to Oct. 11. Speaking generally, the state of trade was remarkably quiet. The transactions in most articles of food and manufacture had been on a limited scale; nevertheless, prices, almost generally, ruled firm. The principal fluctuations in values had been in cotton, the closing quotation for middling upland produce being 51 cents. per lb. The market for breadstuffs had been rather quiet; flour, especially, was dull; but a fair export demand for wheat had given some firmness to prices, in so far that the rates of the previous week were steadily maintained. The supply of money on offer was abundant, and the quotations were somewhat easier, as follows:—

	Per cent. per annum.	
Loans on call, stock securities	7	...
Do. bond and mortgage	7	...
Prime endorsed bills, 60 days	7	8
Do. do. 3 to 4 months	7½	8
First-class single signatures	8	9
Other good bills	10	12

There had been a steady demand for gold, at 146⅞ to 147¼ per cent. The stock of bullion in the banks of New York city, at the

Digitized by Google

close of the previous week, was 2,399,040*l*, the balance in the Sub-Treasury at the same date being 11,775,270*l*. The shipment of specie since the commencement of the year had been 5,196,930*l*, against 8,191,770*l* last year, 7,938,080*l* in 1863, and 10,122,760*l* in 1862. The imports of dry goods, for the week ending Nov. 11, were valued at 554,360*l*, against 201,060*l* last year, and 193,530*l* in 1863.

THE COTTON TRADE.

LIVERPOOL—Dec. 1.

The cotton market opened with firmness on Friday, but upon advices from New York, per Java, of lower prices, some degree of heaviness appeared. On Monday, with accounts, per Peruvian, of a recovery of quotations in New York, the demand revived, with hardening prices; and on Tuesday the market became more animated. On Wednesday and to-day, with a renewed and general demand from the trade, the sales have been very large, and a decided advance has been established. Sea Island has been in fair request, and the finer descriptions are dearer. American is in extensive demand, and after declining about ½d per lb in the early part of the week, closes at an advance of 1d to 1¼d per lb upon last Thursday's quotations. Brazil is in increased demand, particularly to-day, and prices have risen ½d per lb in Pernam and Maceio, and ½d to 1d in Maranham. In Egyptian, a large business has been done, and although some little decline was submitted to in the early part of the week, prices have advanced 1½d to 2d per lb. Smyrna has risen ¼d to ½d per lb, and is in fair request. East India has participated in the general advance, and prices may be quoted ½d to 1d per lb above the close of last week. China and Japan are in fair request at ¾d per lb advance.

The transactions, to arrive, have been large, at an advance corresponding with that of the general market; the latest quotations were to-day, for New Orleans, average middling, ship named, 20⅞d and 21d per lb; Pernam, first quality, at sea, 21½d; Egyptian, new open, good fair to good, at sea, 23½d; fair, November shipment, 22½d; shipping or shipped, 23d; at sea, heavy canvas, 22½d; Dhollerah, fair, November shipment, overland, 16½d; Oomrawuttee, middling fair, ship named, 15½d; fair, 16½d; Scinde, fair, ship named, 11½d; Western Madras, ship named, 16d per lb.

The sales of the week amount to 96,230 bales, including 18,190 on speculation, and 19,940 declared for export, leaving 58,100 bales to the trade. The market, to-day, opens with a general demand, and the sales will probably amount to about 15,000 bales, at firm prices.

LONDON—Dec. 1.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—The market was very dull on Saturday, and prices were fully ¼d per lb below Friday's quotations, but on Monday a better feeling set in, which has (stimulated by the improvement in Manchester on Tuesday) increased daily, and we close with a very strong market, at a general advance of nearly 1d per lb in the week. Cotton for arrival has been much in request during the past two or three days, and November shipments have found buyers at prices very little below the value of the same descriptions on the spot.

NEW YORK—Nov. 18.

In the early part of the week the cotton trade was dull, on easier terms; but during the last few days the demand has improved, and an advance of fully 1 cent per lb has taken place in prices. The total import since Sept. 1 amounts to 263,838 bales. The export from Nov. 1 to Nov. 11 was 31,142 bales, against 43 bales last year. This week's receipts are 15,200 bales. The prices current are as under:—

	New York Classification. Upland.	Florida.	Mobile.	New Orleans and Texas.
	c	c	c	c
Ordinary .....per lb	42	42	42	42
Good ordinary.....	44	44	45	46
Low Middling	48	49	49	50
Middling	51	52	52	53
Good middling.....	54	55	56	57

NEW YORK, Nov. 23.—The cotton trade is firm at enhanced rates—middling Upland being quoted at 53 cents per lb.

MARKETS IN THE MANUFACTURING DISTRICTS.

There has been much less activity in the demand for cotton goods, this week. Prices, however, have been fairly supported. The stocks on hand are only moderate for the time of year. The iron trade is very firm, at extreme rates. Coals continue to sell freely, at late quotations.

MANCHESTER, Nov. 30.—A number of orders, which had been accumulating for some time, have been precipitated on the market this week, occasioning quite an animated rally in prices. The immediate causes of the movement were rumours of decreasing receipts of cotton at the American ports, and very favourable telegrams for yarns and piece goods from China and some other outlying markets. The lightness of stock here renders holders very sensitive to any positive increase of demand, and sends spinners at once into the Liverpool market. Transactions commenced to be liberal on Tuesday, were large yesterday, and continue so to-day, except where checked by the now advanced quotations. Avoiding the extreme rates now currently required, but not realised, and occasional instances in which extra prices have been given, both yarns and cloth may be said this week to have risen fully 1d per lb.

BRADFORD.—The improvement in the Liverpool cotton market has imparted a more confident tone to the wool market. There is considerably more inquiry, and a fair quantity is changing hands in small transactions. Prices are rather stiffer than last week. Business in yarns continues slack. The home trade has become decidedly quieter, and the export houses are as yet doing next to nothing. Prices are unchanged. Pieces—Buyers having previously operated to the full extent of their requirements, the market exhibits but little activity.

LEEDS.—Tweeds and meltons were in moderate request, but not so much so as to give animation to the market, and most other goods, including some heavy winter fabrics, sold in quite retail quantities. In the open market there is little or anything doing in spring goods, but upon such and ordinary cloths the manufacturers are well employed.

HUDDERSFIELD.—Business, on the whole, has been quiet, and selections for the most part have been confined to seasonable goods required for immediate consumption. In the shipping trade there is a moderate business doing, but the country trade is slow. There is nothing striking to report in the way of patterns, mixtures in various makes and colours being again in the ascendant.

ROCHDALE.—The warehouses have been more frequented by some of the influential buyers associated with the home trade. Their inquiries are almost altogether for fancy and dyed goods, of which there are endless shades and infinite patterns, adapted both for men's and other wear.

LEICESTER.—An average amount of business is doing in hosiery goods of all kinds usually in demand at this time of the year. Worsted yarns command high prices. There is no change in cotton yarns.

NOTTINGHAM.—There is an almost general slackness in the lace trade. Silk mechlins and quillings sell very slowly, and the same may be said of black laces. The hosiery trade continues active, and the operatives are all fully employed. Manufacturers have an abundance of orders on hand. Yarns are firm.

CARDIFF.—Considerable activity prevails at the docks, and the steam coal trade is buoyant, considering the lateness of the season. Nearly all the pits are in regular work, and there is more expedition exercised in the transit of coal to the port for shipment. The iron trade rules firm, and the works are in active operation.

BIRMINGHAM.—In the metal trades generally not much change has taken place of late; the advance in the price of copper has not yet been much felt, for the reason that manufacturers had a good supply of orders previously on their books.

SHEFFIELD.—Business here continues to improve in most branches. The orders from the United States for steel are larger than for some time past, and there is in addition a fair home, French, and German demand.

WOLVERHAMPTON.—There are rather fewer orders for iron, but most of the works are in full, or nearly full, operation. The hardware trades are steady.

GLASGOW.—Iron—G.m.b., No. 1, 58s 9d; No. 3, 58s; Gartsherrie, No. 1, 67s; No. S, 58s; Eglinton, No. 1, 57s; No. 3, 56s; No. 1 Coltness, 67s; Calder, 60s 6d; Glengarnock, 61s 6d; Langloan, 59s 6d; Kinniel, 58s 6d; Carron, 58s.

BELFAST.—The demand for linens continues quiet, and fresh orders are not coming forward freely; still manufacturers are busily employed in most cases producing to order, so that stocks keep small and show little increase, while prices rule firm. Yarn —The market continues without animation, and transactions are generally of a restricted character.

DUNDEE.—Our flax market has continued active, and a large amount of business has been done in goods on the spot, at improving prices. Jute continues very firm, a temporary dulness in the article having been succeeded by renewal of activity. The yarn market has been rather quiet. There has also been rather more inquiry for linens, but manufacturers being still well employed for some time to come, are scarcely in a position to take orders, unless for forward delivery.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Nov. 18.—The market for Western and State flour is dull, and low and medium grades are 5c to 10c lower. The better brands are irregular. The sales are 6,100 bushels, at $7.70 to $8 for superfine State; $8.05 to $8.25 for extra State; $8.40 to $8.65 for fancy State; $8.20 to $8.60 for the low grades o Western extra; $8.85 to $9.10 for shipping Ohio; $9.10 to $11.10 for trade brands, and $13 to $13.25 for St Louis extras. Buckwheat flour is dull and heavy at $4.50 to $5 per 100 lbs. Canadian flour is dull and heavy. Sales of 270 bushels at $8.10 to $8.40 for the low grades of extra, and $8.50 to $12 trade and family extras. Southern flour is firm and fairly active. Sales of 650 barrels at $9.15 to $10.15 for mixed to good superfine country Baltimore, &c., and $10.25 to $16 for trade and family brands. The wheat market is fairly active. The offerings are liberal. The sales are 98,000 bushels at $1.82 to $1.87 for Chicago spring; $1.83 to $1.87 for Milwaukee club; $1.88 to $1.89 for amber ditto; $2.41 to $2.43 for amber. Corn is fairly active at 1c to 2c better. The sales are 95,000 bushels unsound at 88c to 95c; Western mixed at 96c to 97c; and Southern white at $1.01.

NEW YORK, Nov. 23.—A fair business is passing in flour, at low rates. The trade for wheat is dull; but in corn, an active business is doing.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The arrivals of English wheat, coastwise and by land carriage, have continued on a very moderate scale. The show of samples has not therefore increased. Fine dry qualities have changed hands slowly at about stationary prices. All other kinds have ruled heavy at barely late rates. The show of foreign wheat has not increased. The transactions in it have been on a very moderate scale at last week's currency. Malting barley has been scarce, and in fair request, at very full prices. Grinding and distilling sorts have met a heavy sale at 1s per quarter less money. The transactions in malt have been to a moderate extent on former terms. The supply has been tolerably good. Oats may be considered steady at extreme rates. Beans and peas have been in short supply, and fair request, at full prices. The flour trade has been inactive at late quotations.

The various local markets have been fairly supplied with wheat, which has moved off slowly, on former terms. Nearly all kinds of spring corn have sold steadily at very full prices

The markets on the Continent have been much less active for wheat. In some instances the quotations have ruled in favour of buyers. Barley, oats, beans, and peas have continued very firm. In America, both wheat and flour continue high in price.

In Scotland, fine wheat, barley, and oats have moved off freely, at very full prices. Otherwise, the trade has been in a sluggish state.

The Irish markets have been rather scantily supplied with most kinds of produce. Generally speaking, the demand has been inactive, at about stationary prices. Out-door farm labours have progressed steadily, although some quantity of rain has fallen in most parts of England.

Very few complaints have reached us respecting the potato disease. The supplies of potatoes on offer continue large, and the demand for them is steady, at from 50s to 105s per ton.

The supply of English wheat on sale at Mark lane, to-day, was very moderate, and all good and fine dry samples changed hands at full prices. Foreign wheat was in limited request, at late rates. The barley trade was very dull, at fully the recent decline in prices. Malt sold slowly, at late rates. Oats were in but moderate supply, and the trade ruled firm with an upward tendency in prices. Beans and peas realised full prices. There was a fair demand for flour, at late rates.

The state of the floating trade is thus reported by Mr George Dornbusch:—Arrivals at ports of call since last Friday, 125 cargoes, viz., 63 wheat, 33 maize, 7 barley, 2 rye, 1 oats, 6 linseed, 6 cottonseed, and 7 oilcake. With numerous arrivals, a large business has been done at improving prices. Wheat 1s to 2s dearer; 27 arrived cargoes sold—Ghirka Taganrog, 41s 6d to 43s 6d; Odessa, 41s 6d to 45s; Marianopoli, 45s; Nicolaieff, 43s; hard Taganrog, 43s 6d; hard Odessa, 43s per 492 lbs. Polish Odessa, 42s 6d and 43s per 480 lbs. Maize firm; 9 arrived cargoes sold—Galatz, 31s 6d and 33s per 492 lbs. Wallachian, 29s 9d; Ibrail, 30s 3d and 30s 6d; Bulgarian, 29s 6d; mixed from New York, 30s; and mixed from Montreal, 31s per 480 lbs. Barley, 3 arrived cargoes sold—Odessa, 25s 4d; Nicolaieff, 25s 3d; Kavarna, 24s 3d per 400 lbs, and to be shipped; Danubian, March-April shipment, 24s 6d; and Azov from Taganrog, spring shipment, 24s 6d per 400 lbs. Of linseed, the following sales are reported:—Arrived—Taganrog, 65s to 65s 6d; Odessa, 65s 6d per 424 lbs L.A.T.; Bombay, 70s per 416 lbs L.A.T. On passage—Taganrog, B.L. Oct., 65s 9d to 66s; Nicolaieff, B.L. Nov., 66s per 424 lbs L.A.T. Calcutta, country-damaged, B.L. Sept., 67s per 410 lbs L.A.T. Odessa, shipping, 66s and 66s 6d per 424 lbs, L.A.T.; and Danubian, to be shipped, 66s per 424 lbs; and Bombay, 70s 6d per 416 lbs L.A.T. Of cottonseed, the reported sales are:—1 arrived cargo of Egyptian, 1864 crop, from Alexandria, 8*l* 10s; shipping, 1864 crop, 8*l* 5s and 8*l* 6s 3d; 1865 crop, 8*l* 15s; and to be shipped, 1865 crop, 8*l* 10s to 8*l* 15s per ton.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market has been unsettled, with a limited demand, and in some instances prices have slightly favoured the buyers. All kinds are now dull. Of West India, 816 casks had sold in three days, including Barbadoes by auction at 33s 6d to 38s 6d per cwt. The refiners are taking limited supplies. Few, if any, floating cargoes of foreign are on offer. The landings last week were small, not exceeding 730 tons. There is not any improvement in the deliveries, which were 3,060 tons, leaving the stock at the close 82,700 tons, against 113,400 tons at the same date in 1864.

Mauritius.—2,135 bags offered by auction partly sold: brown and yellow, 33s to 36s; grainy, 37s to 38s per cwt. Some business has been done privately, chiefly in the lower qualities.

Bengal.—1,156 bags partly sold at 35s 6d to 37s 6d per cwt for Gurpatta date yellow. The remainder was bought in at high prices.

Penang.—1,064 bags sold at rather easier rates: brown, 30s to 32s; yellow, 33s 6d to 36s 6d.

Manilla.—6,500 bags clayed are reported at 33s cash.

Other Foreign.—There have not been any public sales of Porto Rico or Cuba, and a limited business has been done privately. 900 boxes Havana, No. 12, sold at 37s 9d per cwt.

Refined.—Dry goods have sold rather slowly at last week's rates.

RUM.—The market is steady with sales of moderate extent.

COCOA.—All kinds continue firm. 209 bags were bought in at high prices, also 191 bags Trinidad. The sound portion of 200 bags Cuba withdrawn at 30s to 100s per cwt.

TEA.—The market remains steady. New season's congous are still in demand at late quotations. No change of importance has occurred in other sorts. Public sales are declared to commence on the 5th inst.

COFFEE.—The supplies have been moderate and the demand steady, at previous quotations. 289 casks 417 barrels and bags plantation Ceylon chiefly sold at 80s to 96s 6d for low middling to fine. 26 casks 599 bags native found buyers at 69s 6d to 72s 6d. 189 cases 876 bags East India, pale to good, 75s to 89s 6d; Manilla, 72s. 157 bags pale Guatemala sold at 75s per cwt.

RICE.—The few sales effected have not been reported. There is a partial inquiry this week, but at lower prices, for soft grain.

IMPORTS and DELIVERIES of RICE to Nov. 25, with STOCKS on hand.

	1865.	1864.	1863.	1862.
Imports ...tons	46600	54700	49160	99140
Deliveries	53840	66900	71400	60000
Stock	34210	23700	41820	69020

SAGO.—100 boxes small medium grain sold at 20s to 21s; 75 bags small grain at 19s 6d per cwt.

SAGO FLOUR.—210 bags were bought in at 14s 3d. 3,000 bags sold privately at 14s 9d to 15s 3d per cwt, upwards.

SPICE.—Black pepper is firm. By auction, 1,510 bags Singapore partly sold at 3⅞d; the remainder withdrawn at 3¼d. 761 bags Penang sold steadily at 3⅞d to 3¼d for West Coast. There are still inquiries at these rates, with few sellers. White is again slightly dearer. The last sale in Singapore was at 5⅜d cash; that price since refused, and 5½d paid for good Penang. 10 cases low mace were bought in at 1s 6d. 10 cases Penang cloves at 1s 3d; 314 bags Zanzibar, rather more than half sold at 3d to 3⅛d; a small quantity 3¼d. 21 cases brown nutmegs part sold at 11d to 1s 3d. 359 bags ordinary pimento were sold at 3d per lb. 227 barrels Jamaica ginger sold at 67s to 120s per cwt. 180 boxes cassia lignea were chiefly taken in. Business has been done privately upon lower terms.

SALTPETRE.—The market remains inactive. A limited business is reported in Bengal by private contract: refraction 4 to 3 at 25s cash. 173 cases Kurrachee by auction sold at 20s, refraction 37¾ to 36¾; 484 bags, refraction 51¾ to 43¼, 18s to 19s; 12½ to 4½, 23s to 24s per cwt.

IMPORTS and DELIVERIES of SALTPETRE to Nov. 25, with STOCKS on hand.

	1865	1864	1863	1862

Deliveries	9985	12160	12730	15510
Stock	6940	7800	6100	4110

COCHINEAL is unchanged since the sales last week.

IMPORTS and DELIVERIES of COCHINEAL to Nov. 25, with STOCKS on hand.

	1865	1864	1863	1862
Imports ...serons	13260	15880	17880	14600
Deliveries	15460	14500	19400	17500
Stocks	4900	6870	7300	9000

DRYSALTERY GOODS.—Gambier is firmer: business done on the spot at 21s 6d to 21s 9d; to arrive at 21s 6d. Cutch maintains the rise reported last week, good quality selling at 29s to 29s 6d per cwt. Safflower is steady.

METALS.—The markets have been devoid of animation. Copper is unsettled, and British cannot be sold unless at lower rates than officially quoted. Foreign tin is firmer, and the smelters have raised their prices 2s. Straits sold at 96*l* to 97*l* per ton cash or short prompt; to arrive, 98*l*. Spelter is firm, but rather quiet. Scotch pig iron was last sold at 58s 6d to 58s 9d per ton cash, mixed numbers.

Digitized by Google

HEMP.—Manilla is quiet. 290 tons Petersburg clean offered by auction, and sold "on account of whom it may concern," went at 32*l* to 33*l* per ton.

JUTE barely maintains its position, and the demand has been moderate. 3,100 bales offered by auction on Wednesday went off at the previous value: low to good, 14*l* 10s to 23*l* 10s per ton. There has been a moderate inquiry privately.

OIL.—Linseed continues in steady request, but prices have again favoured the buyer; to-day not more than 38s 6d is obtainable for immediate delivery. For delivery next month 38s 9d to 39s is quoted; and for first four months delivery sales have been made at 40s per cwt. Owing to a considerable decline in the value of brown rape oil on the continent the market is weaker, and parcels are now freely offering at our last week's quotations. Common sorts of olive are still much sought after, and Mogadore readily brings 61*l* 10s per ton. Other kinds remain as last quoted. Palm oil has again favoured the buyer: fine Lagos can be bought at 44s to 44s 6d per cwt. Cocoa-nut dull: Ceylon can be bought at 48s to 48s 6d, and Cochin 52s per cwt. Sperm is slow of sale at 117*l* to 118*l*.

PETROLEUM.—Sales for immediate delivery have been made at the advance of 3s 8d per gallon.

TALLOW.—The market is dull, and lower. 1st sort new Petersburg Y.C., 48s 3d to 48s 6d; January to March, 49s 3d; March only, 50s 6d per cwt.

PARTICULARS OF TALLOW.—Monday, November 27, 1865.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market is flat to-day; various parcels of West India were offered by auction and partly sold, and the week's business is 1,313 casks. 455 bags Bengal partly sold at 35s per cwt.

COFFEE.—The public sales comprising 1,022 bags East India, and sundry odd lots of Plantation Ceylon went at previous rates. 814 bags Bahia part sold at 59s to 64s per cwt.

SAFFLOWER.—139 bales Bengal sold at 4*l* 12s 6d to 6*l* 2s 6d per cwt.

OIL.—209 casks palm, offered by auc tion, part sold at 44s per cwt.

TALLOW.—Town reduced to 51s 6d. By auction 575 casks Australasion sold:—Beef, 46s 6d to 47s; sheep, 46s 9d to 49s. 1,169 casks wrecked Y.C. sold at 47s to 48s per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar is very dull; no material alteration as respects prices. In Dutch crushed, second hand parcels have been sold at 30s 10½d for A. S. R. 1; in barrels H. R. 1, 31s 1½d; B. H. 1, 31s 1½d and 31s 3d; in all 110 tons, for present delivery f.o.b. in Holland.

GREEN FRUIT.—Market well supported for all kinds. Oranges have a ready sale. Some parcels St Michael, Fayal, and Palermo, sold by Keeling and Hunt at public sale, were taken freely by the trade. Lemons without alteration. Barcelona nuts maintain their value. Para a trifle ower. Almeria grapes, of sound quality, in request. The parcels offering realised prices in character with condition and quality.

COLONIAL WOOL.—The public sales progress with much spirit, and prices are decidedly higher than at the opening for most descriptions.

FLAX market firm.

HEMP.—Market quiet during the week at the quotations.

SILK.—The market has been rather inactive this week, but prices continue firm.

TOBACCO.—Purchases by the trade of American descriptions have been less active, and almost limited to selections for immediate use; some small lots of Western were taken for exportation, and about 80hhds of Virginia for the Navy. Other growths experienced a very good demand, and considerable sales effected at hardening prices.

LEATHER AND HIDES.—There has been only a moderate demand for leather through the week without any change to record in prices. At Leadenhall, on Tuesday, there was a short supply of fresh goods, particularly of good foreign butts of thick substance, crop hides, 40lbs and 50lbs, foreign bellies, and light calfskins, for all of which there was a good inquiry.

METALS.—After a very quiet market for copper during the week, the news of yesterday from Chili gave increased strength to the market, and business to some extent was done in Chili bars at 95*l* to 96*l*. There was also more inquiry for Australian and English tough; and a small parcel of the former was sold at 108*l*, although at that price buying was not all general. Tin somewhat firmer, at 96s 6d to 97s for cash. Other metals unchanged.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	51	6
Fat by ditto	2	6½
Yellow Russia	50	0
Melted stuff	40	0
Rough ditto	22	6
Greaves	20	0
Good dregs	6	0

METROPOLITAN CATTLE MARKET.

MONDAY, Nov. 27.—The total imports of foreign stock into London, last week, amounted to 14,797 head. In the corresponding week in 1864 we received 12,600; in 1863, 9,850; in 1862, 12,458; in 1861, 8,128; in 1860, 6,661; and in 1859, 5,387 head.

For the time of year, the supply of foreign stock on sale here to-day was moderately good. There was some very superior beasts and sheep on offer; but their general quality was only middling. The trade was steady, at full prices. The arrivals of beasts fresh up from our own grazing districts were moderate, and in improved condition. The supply from Scotand was on the increase, and mostly of prime quality. From Ireland the receipts were again limited. For all breeds of beasts there was a steady demand, and, in some instances, prices ruled a shade higher than on Monday last. A few very superior Scots and crosses realised 5s 4d; but the general top figure was 5s 2d per 8 lbs. From Lincolnshire, Leicestershire, and Northamptonshire we recieved 2,000 Shorthorns &c; from other parts of England, 800 various breeds; from Scotland, 272 Scots and crosses; and from Ireland, 250 oxen, cows, and heifers. The show of sheep was only moderate. Most breeds however, came to hand in good condition. The mutton trade was firm, and last week's currency was fully supported. The best old Downs sold at 6s 8d per 8 lbs. We have to report a dull sale for calves—the supply of which was tolerably good—on rather lower terms. The highest figure was 4s 10d per 8 lbs. The sale for pigs was inactive, at slightly reduced rates—viz., 4s 10d to 5s 2d per 8 lbs. A notice has been issued this morning, compelling butchers, residing without the London districts, to slaughter all beasts purchased in this market within forty-eight hours after leaving the stands.

SUPPLIES.

	Nov. 28, 1864.	Nov. 27, 1865.
Beasts	3850	4990
Sheep	17580	26940
Calves	70	313
Pigs	475	560

THURSDAY, Nov. 30.—Our market, to-day, was but moderately supplied with beasts. For nearly all breeds, the demand ruled steady, at prices equal to Monday. The general top figure was 5s 2d per 8 lbs. The show of sheep was by no means extensive. Downs and half-breds were in good request, at full quotations. Otherwise the mutton trade was in a sluggish state on former terms. The highest figure was 6s 8d per 8 lbs. We had a slow inquiry for calves—the supply of which was moderate—at the late decline in value. The pork trade was in a sluggish state, at last week's prices. In milch cows, only a limited buisness was transacted.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	3	2	to 3	6	Prime Southdown sheep	6	4	to 6	8

HOP MARKET.

BOROUGH, FRIDAY, December 1.—The demand for most descriptions of hops rules quiet. Good and fine samples, however, are firm in price. Superior qualities are selling at about late rates. New Mid and East Kents, 80s to 190s; New Weald of Kents, 70s to 126s; New Sussex, 60s to 115s; Yearlings, 95s to 135s per cwt.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, FRIDAY, December 1.—The supplies of potatoes on sale are tolerably large. The trade rules steady, at the annexed quotations:—Yorkshire Regents, 60s to 90s; Flukes, 70s to 110s; Rocks, 45s to 65s; Kent and Essex Regents, 70s to 90s; Scotch Regents, 60s to 90s per ton.

HAY MARKETS.

THURSDAY, Nov. 30.—The supplies of hay and clover on sale have increased, and the demand has ruled heavy, at lower prices. Straw is scarce, and firm in value.

	Smithfield.	Cumberland.	Whitechapel
	s s	s s	s s
Hay	90 to 110	85 to 115	80 to 110
Clover	90 to 130	95 to 135	90 to 130
Straw	36 to 40	38 to 42	36 to 42

COAL MARKET.

FRIDAY, December 1.—Wallsend Haswell, 21s—Hetton, 21s—South Hetton, 21s—Hartlepool, 20s 9d—East Hartlepool, 20s 9d—Stewart's, 20s 6d—Tees, 20s 9d—Braddyll's Hetton, 20s 3d—Caradoc, 20s 3d—Cassop, 20s 3d—Gosforth, 19s 3d—Hetton Lyons, 19s 3d—Heugh Hall, 20s—Kelloe, 20s—New Belmont, 19s 6d—Eden Main, 19s 6d—Pittington, 18s 6d—South Kelloe, 20s—Tunstall, 19s 3d—Pensher Primrose, 19s 9d—Cowpen Hartley, 19s 9d—Pensher W. Hartley, 18s—Hasting's Hartley, 19s 9d—Holywell Main, 19s—Tanfield Moor Butes, 16s 3d. Ships at market, 86; sold, 40; gas contracts, 41—81; unsold, 5; ships at sea, 40.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Dec. 1.—There is a fair inquiry, and if holders were somewhat less firm in their demands, more business would be the result; as it is, however, buyers are very reluctant to pay present full rates, and restrict their purchases, therefore, as much as is compatible with urgent wants.

Digitized by Google

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Dec. 1.—Good attendance at market; wheat in good demand at Tuesday's prices for American; French, 2d per cental dearer; flour steady at full prices. Indian corn in good request, at 3d to 6d per quarter dearer; mixed, 30s to 30s 6d. Beans unchanged. Oats very firm. Oatmeal, 6d per load dearer.

EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic receipts of railways in the United Kingdom amounted for the week ending the 18th of November on 12,299 miles, to 659,517*l*, and for the corresponding week of last year, on 11,889 miles, to 610,227*l*, showing an increase of 410 miles and of 49,290*l*. The gross receipts on the 14 principal railways amounted in the aggregate, on 8,808 miles, to 548,878*l*, and for the corresponding week of 1864, on 8,489 miles, to 509,686*l*, showing an increase of 319 miles and an increase of 39,192*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, Nov. 27.—In the share market to-day dulness was the only feature, and none of the descriptions showed any material change of tone, the only partial exceptions being that Canadian and American securities were inclined to firmness, and in foreign railways there was a shade of weakness. In English railways, North-Eastern (Leeds) improved ½, and Midland declined ¼. In colonial, Grand Trunk of Canada and ditto (4th preference) advanced a further ½ each, ditto (deferred) a further 1, and ditto (3d preference deferred) ¼. In foreign, Dutch-Rhenish receded ⅛, and Lombardo-Venetian a further ¼. In American, United States (5-20) recovered ⅛, Illinois Central (shares) ⅛, and Erie shares (paid-up) 1¼. In British mines, Great Wheal Vor advanced ½; and East Carn Brea declined ¼, Tincroft ¼, and South Wheal Frances further 2½. In foreign mines, Panulcillo improved ¼, and Cape Copper declined ¼.

TUESDAY, Nov. 28.—In the share market to-day foreign railways closed with rather a firmer tendency, but English were rather disposed to flatness. Of the latter, North London improved 1; and Great Eastern declined 1, Metropolitan ½, ditto (Extension) and Lancashire and Yorkshire ¼ each, and Midland a further ¼. In colonial, Delhi (stock) improved ½, and Grand Trunk of Canada a further ½. In foreign, Dutch Rhenish and Lombardo-Venetian recovered ¼ each; and Sambre and Meuse improved ⅛; Great Luxembourg, ¼; and Western and North-Western of France, ⅛. In American, Illinois Central (shares) relapsed ¼. In mines, West Chiverton advanced 5, and Chiverton ½.

WEDNESDAY, Nov. 29.—In the share market to-day, it being the preparation for the settlement at the end of the month, a majority of the transactions were for the account, and there was a rather general tendency to higher prices in our final quotations, which chiefly affected the railways. Of the English lines Metropolitan recovered ¾, ditto (extension) ⅛, and Lancashire and Yorkshire and Midland ¼ each; and Bristol and Exeter advanced 1, Manchester, Sheffield, &c. ½, and Great Western and North-Western ¼ each. In colonial, Grand Trunk of Canada improved further 2, ditto (1st preference) ½, ditto (both descriptions of 2nd, 3rd, and 4th preference) an average of 1½ each, Buffalo and Lake Huron ¼, and Punjaub ½. In foreign, Antwerp and Rotterdam improved ⅛, Dutch-Rhenish (paid-up) ¼, ditto (ordinary) and Lombardo-Venetian a further ⅛ each, and Sambre and Meuse a further ⅛. In American, Erie shares (paid up) improved ¼. In mines, the only changes were an advance of ½ each in Great Wheal Vor and Tin Croft.

THURSDAY, Nov. 30.—In the share market to-day, although the transactions were few, the final quotations of yesterday were in general fully maintained, British mines being the only description in which the tendency was slightly adverse. In English railways, Metropolitan District, North-Eastern (Leeds), and ditto (York) improved ½ each, and North London (shares of both descriptions) ¼ each; and North-Western and Midland relapsed ¼ each. In colonial, Grand Trunk of Canada, ditto (2nd preference), and ditto (1st preference) advanced a further 1 each, ditto (deferred) 5, Atlantic and St Lawrence 1, and Eastern Bengal ½. Of the last-named railway, the new shares of July last have all been taken up. In foreign, Lombardo-Venetian improved a further ¼, Sambre and Meuse further ⅜, ditto (preference) ¼, and Namur and Liege ⅛. In American, United States (5-20), Illinois Central (shares), and Erie (debentures) advanced ¼ each, and ditto (paid-up shares) a further ½. In British mines, Herodsfoot improved 1; West Seton declined 5, East Lovell ½, and Marke Valley ¼; and Devon Great Consols are now quoted ex dividend. In foreign mines, St John del Rey improved 1.

FRIDAY, Dec. 1.—The railway market was flat to-day, and some of the principal stocks exhibited a reduction. Antwerp and Rotterdam, Sambre and Meuse, and Lombardo-Venetian shares improved, while Grand Trunk of Canada and Demerara stocks receded in value.

Annexed are the traffic returns of some of the American railways for October:—

London: Virtue Brothers and Co., Amen corner.

"MY LIBRARY."

Edited by PAMPHILIUS.
SIXPENNY VOLUMES.
Each Volume complete in itself, uniform in size, and neatly bound, with Ornamental Wrapper.

The object of "MY LIBRARY" is to direct the attention of young men to LITERATURE of a higher standing than that generally published at so low a price—to provide them with a CHEAP, NEAT, PRACTICAL, and PROGRESSIVE LIBRARY, calculated to stimulate to INDUSTRY, ENERGY, PERSEVERANCE, and SELF-DENIAL, for with these virtues there is no eminence to which a man may not aspire, and from the examples deduced he will perceive that a truly enviable reputation is only to be acquired by independency of character, by honesty, consistency, and by spotless integrity, both in public and in private life.

"MY LIBRARY" will be devoted to PRACTICAL and PROGRESSIVE KNOWLEDGE—will be a MIRROR of LITERATURE, SCIENCE, and ART—a multum in parvo—the condensation of the primary aspirations of the great, the good, and practical, whose examples are calculated to engender and animate virtue, to create emulation, and teach the RISING GENERATION to struggle, to endure, to conquer difficulties, or in failure—

"To arm the obdurate heart
With stubborn patience and with triple steel."

"MY LIBRARY" will also be a Magazine of Reference, an INDICATOR to the youthful mind in the choice of books—for the choice of books, like the choice of companions, either tends to ELEVATE or DEGRADE, as books give the same turn to our thoughts and reasoning that GOOD COMPANY does to our conversation.

POPULAR AUTHORS
Will be Engaged upon "MY LIBRARY."

Now Ready.

1.

THE ECONOMY OF LIFE:
SELF-HELP TO PRACTICAL AND PROGRESSIVE KNOWLEDGE.

II.

PATIENT BOYS,
AND HOW BY PATIENCE THEY BECAME GREAT MEN.

III.

In the Press.

GENIUS AND WRITINGS OF
A POPULAR NOVELIST

OPINIONS OF THE PRESS.

....."Pamphilius, by the issue of this thoughtful little series of volumes, can hardly fail to win the respect of his readers, or to earn more and more widely their attention and encouragement."—SUN.

....."The wisdom of the ancients is here pleasantly served up, and precepts of golden value preserved to refresh the memory and guide the conduct of man, for 'a precept that has taken root in the heart may change the whole current of man's life.' Youth, as the age for improvement, is especially admonished and addressed. 'The seed of divinity is sown within us, and if the mind is well cultivated the fruit will answer the original: if not, like the nettle, it will run to weeds."—MORNING ADVERTISER.

....."The first contains a collection of the wise sayings and doings of ancient and modern philosophers, and numerous hints, gained by the author's own experience, as to the way to get on in the world, which form a multum in parvo of moral instruction of a marvellous nature. The second number is equally replete with wisdom and instruction."—BELL'S LIFE.

Ward, Lock, and Tyler, 158 Fleet street; and 107 Dorset street, Salisbury square.

DECISION OF CHARACTER.—See ECONOMY OF LIFE.—("My Library," Vol. I.)

INDECISION.—See ECONOMY OF LIFE.—("My Library," Vol. I.)

SECRET OF SUCCESS IN LIFE.—See ECONOMY OF LIFE.—("My Library," Vol. I.)

RUDOLPHE, the Young Aspirant.—See PATIENT BOYS.—("My Library," Vol. II.)

PATIENCE IS GENIUS.—See PATIENT BOYS.—("My Library," Vol. II.)

"'My Library' will be a boon to the rising generation."

"Kindness and good feeling run, like veins of gold, through every story."

"It is seldom that so much good sense is seen in so small a compass."

Sixpenny Volumes.
Ward, Lock, and Tyler, Fleet street.

1865.

On the 12th of December will be published, price 31s 6d, cloth gilt, the Volume of

THE ART-JOURNAL FOR 1865,

Containing 36 Line Engravings after Sir Edwin Landseer, J. Philip, W. P. Frith, T. Creswick, R. Ansdell, P. F. Poole, T. Faed, A. Elmore, D. Maclise, F. Goodall, J. C. Hook, A. L. Egg, W. Collins, J. GABRIEL'S PAMPHLET ON THE TEETH (illustrative and descriptive)

Explaining the only effectual mode of supplying Artificial Teeth without pain, to answer in every particular the purpose of natural masticators.

These Teeth are supplied on the principle of capillary attraction and suction, thus dispensing entirely with springs, and are supplied at moderate charges.

London:—27 Harley street, Cavendish square, W.
City Establishment:—36 Ludgate hill.
(Four doors from the railway bridge).
Country Establishments:—134 Duke street, Liverpool; 65 New street, Birmingham.

Messrs GABRIEL guarantee every case they undertake

PENNY READINGS.—GOD BLESS THE PRINCE OF WALES.—The new accepted National Airs may be had for male voices; ditto for Soprano, Alto, Tenor, and Bass, with Piano Accompaniment, 2d. The Song 3s. Vocal Trios for equal voices, 13 books, 2d each. 101 rounds, canons, &c., 13 books, each 2d. Both works are by WILLIAM HILLS.

THE HARMONIUM.—Every one possessing an Harmonium should procure the new and admirable CATECHISM of the HARMONIUM, by J. WARREN. Price 1s; free by post for 13 stamps. This little manual is invaluable to performers, more especially from one leading feature, which is a series of minute instructions for remedying any defects that may occur in the instrument without being obliged to return it to the factory.

London; Robert Cocks and Co., New Burlington street

NUNN'S MARSALA OR BRONTE WINE, 25s per dozen, £7 4s per six dozen, £12 15s per quarter-cask. Rail paid to any station in England. This wine will be found of superior quality, is soft and old, and, though full flavoured, entirely free from heat or the slightest approach to acidity.—THOMAS NUNN and SONS, Wine, Spirit, and Liqueur Merchants, 21 Lamb's Conduit street, W.C. Price lists on application Established 1801

KINAHAN'S LL WHISKY.—DUBLIN EXHIBITION, 1865.—This celebrated old Irish Whisky gained the Dublin Prize Medal. It is pure, mild, mellow, delicious, and very wholesome. Sold in bottles, 3s 6d, at the retail houses in London; by the agents in the principal towns in England; or wholesale at 8 Great Windmill street, London, W. Observe the red seal, pink label, and cork branded "Kinahan's LL Whisky."

WHERE SHALL WE DINE? Go to DEACON'S COFFEE HOUSE, WALBROOK, where the "Economist" and all other newspapers in the world are taken in and file. Directories for every county in England, also for Canada and Australia. Advertisements inserted in any papers English or foreign.—Wm. Howell, proprietor.

N.B.—Lists of Heirs at Law, Next of Kin.

SAUCE.—LEA AND PERRINS' WORCESTERSHIRE SAUCE.

This delicious condiment, pronounced by connoisseurs is prepared solely by Lea and Perrins.

"THE ONLY GOOD SAUCE."

The public are respectfully cautioned against worthless imitations, and should see that Lea and Perrins' names are on wrapper, label, bottle, and stopper.

Ask for LEA AND PERRINS' SAUCE.

*** Sold wholesale and for export by the Proprietors Worcester; Messrs Crosse and Blackwell; Messrs Barclay and Sons, London; &c., &c., and by Grocers and Oilmen universally

---

PARTNERSHIP.—A good opportunity offers for an active man of business, with £3,000 or upwards, to take the place of a retiring senior partner in a well-established Broker's business in the City.—Apply T. B. W., Baltic.

ACCOUNTANT.—MANAGING CLERK wanted, in the office of a Birmingham accountant, must be thoroughly experienced.—Address, by letter, giving age, references, and expected salary, 795 Journal office, Birmingham.

HEAD CLERK.—WANTED BY AN East India House in London, a Corresponding and Head Clerk, competent to direct the details of an office.—None need apply who have not had good experience, and hold a similar position in a Mercantile firm.—Applications, stating antecedents, age, &c., may be addressed to C.B., City of London Club, Old Broad street.

SHIPPING CLERK. — WANTED an Engagement by a young man well acquainted with Custom House business, correspondence, bookkeeping, and experienced in general mercantile transactions. First-class references.—J. J. C., Deacon's News Rooms, Leadenhall street, E.C.

AN OLD-ESTABLISHED Commission House in Manchester requires an Agent resident in London, fully conversant with East India and China requirements, who can influence orders for Manchester staples from first-class houses. Liberal commission allowed. References required.—Address P. 6, Post Office, Manchester.

CONFIDENTIAL CLERK.—Wanted, by the advertiser, a Situation in the above capacity. Is now engaged as Head Clerk in a Spice Merchant's office. Five years' reference as to ability and integrity from one of the leading produce brokers in the City. He has been accustomed to superintend, and is well acquainted with, the general routine of office work. Salary not under £150. Age, 25 years.—Address W. E., Miss Belshaw, 2 London street, Mark lane, E.C.

TO FOREIGN MERCHANTS.—An Englishman of many years' mercantile experience in foreign countries, and fairly acquainted with Russian and French, is open to an ENGAGEMENT at home or abroad.—Particulars may be obtained and references exchanged on application to E. Erskine Scott, Public Accountant, 17 East India chambers, Leadenhall street, London, E.C.

THE NATIONAL GUARANTEE AND SURETYSHIP ASSOCIATION (Limited).

Head Office—119 George street, Edinburgh.

This Association transacts all descriptions of Guarantee business on liberal principles.

Forms of proposal and every information may be had on application to

GEORGE T. RAIT, Accountant, 90 Ethelburga house, 70 Bishopsgate street;
Capt. W. M. MACKENZIE, 10 Regent street; or
W. M. COMBER, Woodridings, Pinner, Middlesex.

FLUTES.—THE NEW MODEL FLUTE (old fingering), for beauty and volume of tone unsurpassed, 3½ gs. and 7 gs. Also a Rudall and Co.'s Prize Medal Flute, about half cost, at Messrs KEITH, PROWSE, and CO.'s manufactory, 48 Cheapside. Just published, Rockstro's "Hints to Flute Players," price 6d.

CONCERTINAS.—AT MESSRS KEITH, PROWSE, and CO.'s manufactory, 48 Cheapside, may be found, CONCERTINAS, which, for quality and durability, have proved by their long use in India and other extreme climates to be unsurpassed. Prices, first-class, 5 to 15 guineas. Ordinary concertinas two guineas.

HARMONIUMS, BY ALEXANDRE.—The new church Harmonium, with stops and knee pedals, Venetian swell, and four rows of vibrators, is now being introduced (price 24 guineas, packed and delivered at any London railway station) by the city agents, Messrs KEITH, PROWSE, and CO., 48 Cheapside.

MUSICAL BOXES, BY NICOLE, FRERES.—Messrs KEITH, PROWSE and CO., direct importers, offer parties seeking really fine, well-tuned Instruments a selection of more than 200 boxes, with all the recently-introduced improvements, from four guineas. The new boxes, with accompaniment of flutes, bells, and drum, should be heard to be appreciated, as the expressive effects upon the ear are exceedingly novel and beautiful.—48 Cheapside.

THE ORGAN ACCORDION has two rows of vibrators, organ keyboard, three octaves, and is as easily played as the accordion. Any pianist can perform upon it without study. Price from 4 guineas.—KEITH, PROWSE, and CO., 48 Cheapside.

H. J. AND D. NICOLL, TAILORS to the Queen, Royal Family, and Courts of Europe. The public and foreign visitors to London, Manchester, or Liverpool, will find at Messrs Nicolls' Establishments garments ready for immediate use, or made to order at a few hours' notice.

Nicoll's Winter Overcoats	from 2	Guineas.
Nicoll's Winter Frock Coats	— 3	Guineas.
Nicoll's Winter Morning Coats	— 2	Guineas.
Nicoll's Winter Trowsers	— 1	Guinea.
Nicoll's Waterproof Tweed Coats	— 1	Guinea.

THE IMPERIAL OTTOMAN BANK, CONSTANTINOPLE.

(Capital £2,700,000, paid-up £1,350,000)

Branches at Smyrna Beyrout, and Salonica, and Agencies at Galatz, Bucharest, Larnaca (Cyprus), Paris, and London.

The London Agency receives money on deposit for fixed periods at rates to be agreed upon. It grants credits on Constantinople, Smyrna, Beyrout, Salonica, Galatz, Bucharest, and Larnaca; purchases or collects bills drawn on those places, and undertakes the negotiation of all Turkish Government Securities and the collection of the coupons.

The London Agency will also execute orders through the Branches of the Imperial Ottoman Bank at Salonica and Smyrna for the purchase of produce, such as Cotton, Wool, Silk, Madder roots Valonea, Opium, Grain, &c.

Terms may be ascertained on application at the offices of the London Agency, No. 4 Bank buildings, Lothbury.

R. A. BRENAN, Manager.

IMPERIAL OTTOMAN BANK.—

At the Adjourned Special General Meeting of Shareholders, held at the London Tavern, on Wednesday, the 29th November, 1865, the following Resolution was adopted:—

"That the nominal capital of the bank shall be increased to £4,050,000 (101,250,000f), by an issue of 67,500 shares of £20 (500f) each.

"That these shares shall in the first instance be offered by advertisement to the holders of the existing shares, at par, in the proportion of one new share to every two old shares.

"That any shares remaining unapplied for on the 15th December, 1865, by the holders of existing shares, shall be disposed of by the Committee for the benefit of the bank.

"That £10 (250f) shall be paid on each new share, at the following dates:—

£5 (125f) on the 15th December, 1865,
£5 (125f) — 15th January, 1866;

with power to the Committee to receive payment of the second instalment in advance, on such terms as they shall think fit.

"That interest be charged on all payments in arrear at the rate of 6 per cent. per annum from the date at which they are payable.

"That if any instalment or interest thereon be not paid within one month after the day fixed for such payment, the shares on which such payment is in arrear shall be dealt with in accordance with Article 14 of the Statutes.

"That the new shares shall be entitled to receive the same dividend per share as the old shares out of the profits accruing to the bank from the 1st January, 1866."

Holders of existing shares who wish an allotment of the new shares, in accordance with the terms of the above resolution, must deposit their certificates of the old shares, accompanied by a request, the form of which can be had on application by the 15th December. Those proprietors whose certificates are already deposited can either sign the request at the offices of the bank, or it will be sent to them by post. In cases where a proprietor has an uneven number of old shares—such as, for instance, 11 shares—and is, therefore, entitled to 5½ new shares, a certificate for the half will be given, and two of such certificates will be considered as representing a claim to one new share.

The Directors of this Company are prepared to receive applications for a limited amount of the £250,000 as yet unissued Preference Stock created under the Act of the 1st Session, 28th Vic., cap 40, being part of the sum of £300,000 thereby authorised, and the only Preference Stock existing in the Company.

Application, stating the sum proposed to be taken, to be addressed to the Secretary.

Commission of ten shillings per cent. allowed.—By order,

HENRY BEAUSIRE, Secretary.

Broadstone Station, Dublin, Nov. 23, 1865.

EAST INDIAN RAILWAY COMPANY.

Notice is hereby given, that the Transfer Books of this Company will be closed from Friday, the 15th day of December, 1865, to Friday, the 12th day of January, 1866, both days inclusive, for the purpose of making up the interest account to 31st December, 1865. The Interest Warrants will be forwarded on the 11th January to the Proprietors who are registered in the Company's books on the 14th day of December next.—By order of the Board, D. I. NOAD, Secretary.

East Indian Railway House, Alderman's walk, New Broad street, London, 30th Nov., 1865.

N.B.—Transfers will not be received at the office while the Books remain closed.

MADRAS RAILWAY COMPANY.
FIFTH EXTENSION SHARES,
First and Second Issue (£2 per Share paid).

Notice is hereby given, that, in pursuance of a resolution of the Board of Directors, the proprietors of Fifth Extension Shares (£2 paid) in the Madras Railway Company are required to pay a Call of £3 per share on each of their respective shares, on or before the 29th day of December next, at the Union Bank of London, 2 Prince's street, in the City of London.

Notice is hereby further given, that interest at the rate of £5 per cent. per annum will be charged on all Calls remaining unpaid after the day above mentioned; that the proprietor whose Calls are not paid on or before the day named will further incur a loss of interest on the amount called upon each share for the period intervening between the 29th day of December aforesaid and the date at which the Company are entitled, under the contract, to make the next payment into the Treasury at the India Office, on account of the capital; and that, if default be made in the payment of this Call for one calendar month after the 29th day of December aforesaid, the shares in respect of which default is made will become liable to forfeiture, under the Company's deed of settlement.—By order of the Board,

JAMES WALKER, Managing Director.

33 New Broad street, London, E.C.,
Nov. 24, 1865.

THE EAST LONDON BANK, LIMITED,
Is authorised to receive Subscriptions for Shares of

SECRETARY (pro tem).
H. S. Bird, Esq.

TEMPORARY OFFICES.
Langbourn chambers, Fenchurch street, E. C.

PROSPECTUS.

This Company is not a speculative one; it is formed for the purpose of more efficiently carrying on an established and profitable business, which has grown to its existing magnitude under the management of the present proprietor, and is capable of an extension beyond the ordinary means of private enterprise.

The increase in the tonnage of ships sailing from the port of London, which has taken place for some years, calls for a corresponding increase in the size and power of the tug boats employed. During the past two years no less than 221 ships of upwards of 1,000 tons (averaging 1,200 each) have been added to Lloyd's Registers; the various shipping companies, both in London and Liverpool, are constantly adding ships of 1,200 tons and upwards to the Mercantile Marine of the country. A great proportion of these sail from the port of London, and yet there has been scarcely any increase in the power of the tug-boats employed on the Thames.

While the Company will direct its immediate attention to the extension of the business by building new boats*, the Directors have made a provisional agreement with Mr William Watkins, the owner of a fleet of the most powerful tugs now on the Thames (sixteen in number), for the purchase of these boats, and the entire goodwill of the business, for the sum of £55,000. The valuation of the boats, &c., has been made on behalf of the Directors by Messrs Alfred Brett and Co. (150 Leadenhall street), the well-known brokers and steam ship valuers, which valuation, together with the statement of account, may be seen at the temporary offices of the Company. The Directors have secured the services of the vendor in the management of the business for a period of at least five years, upon terms mainly depending on the profits of the undertaking, and the business will be taken over by the Company as from the 1st October, 1865.

The vendor also guarantees a minimum dividend of 10 per cent. per annum on the first issue for the first three years, which dividend will be paid to the shareholders half-yearly; and in order to show his perfect confidence in the future success of the Company, he has agreed to accept in part payment of his purchase money 2,300 shares (with £10 paid thereon), being the largest number of the first issue of shares which, by the rules of the Stock Exchange, the Directors are enabled to allot to him, two-thirds being required to be offered to the public.

The operations of the Company will comprise the objects mentioned in the memorandum and articles of association, which may be inspected and copies obtained at the offices of the solicitors to the Company.

The statement of account, as taken from the books and certified by Messrs Quilter, Ball, and Company, shows that the profits for the two years ending 1st of July last, amount to 17 per cent. per annum on the capital employed, and with the connections and influence of the Company, and the enlarged business which it will be enabled to carry on, there can be little doubt that the profit will be materially increased. No large or expensive staff is required in working this Company, and it will be the study of the Directors to conduct it with the strictest economy, while by the arrangement made for the purchase of the existing business, not only will a powerful competition be prevented, but an immediate dividend secured to the shareholders.

The preliminary expenses will be strictly limited to the actual disbursements, and no promotion money has been or will be paid.

* The Company will have the advantage of immediately securing a much larger and more powerful tug than any on the Thames. This vessel, fitted with all the latest improvements in her engine and machinery, is now building (to the order of Mr Watkins, who will make over his contract to the Company) at the Thames Iron Works, and will be ready to be launched early in January next.

In the event of no allotment being made the deposit to be returned in full: should a less number of shares be allotted than are applied for, the money paid on deposit will be made available toward the payment on allotment, and the balance (if any) will be returned to the applicant.

Prospectuses may be obtained at and applications for shares may be made to the bankers, brokers, or to the secretary (pro tem.) at the temporary offices of the Company, every application being accompanied by the deposit of £1 per share.

Copies of the articles of association may be obtained (gratis) at the offices of the solicitors to the Company.

EMPIRE OF MEXICO.—
BRITISH CONVENTION BONDS of 1851.

The LONDON BANK of MEXICO and SOUTH AMERICA (Limited) hereby give notice, that the Provisional Receipts issued by the Bank in Mexico to holders who had deposited the Original Bonds there, can now be Exchanged at this office for Certificates prepared by the bank in accordance with the original agreement.

The receipts will be received in exchange on and after the 15th December next.—By order,

W. THOS. MORRISON, Manager.

16 King William street, London, Nov. 30, 1865.

The following report, dated Mexico, August 26, 1865, has been received from H.M.'s Consul in Mexico, the agent for receiving the proportion of import duties hypothecated for the payment of the interest and sinking fund of the above debt.

LONDON BANK OF MEXICO AND SOUTH AMERICA (Limited).

British Convention.—Mexico, August 26th, 1865.

W. Newbold, Esq., Manager, Mexico.

I beg to acknowledge the receipt of your letter of the 22nd inst., in which, as representative of about 2,00 ,000 dollars of British Convention Stock, you request me to give you information relative to certain particulars connected with the same, which, as far as it is in my power, I have much pleasure in furnishing.

	dols.
The original amount of the British Convention as specified in the bonds was ...	4,984,914·84
The amount of capital paid off, according to the statements delivered to me by the former agents, Messrs Martinez del Rio Brothers, is.....	810,634·84
Remainder represented by existing bonds	4,174,280·00

The interest upon the remaining capital is paid at the rate of six per cent. per annum in six-monthly dividends, which become due on the 4th of June and 4th of December.

All dividends have been paid up to the 4th of June last, and the sum of 113,899.06 dols has been collected by me on account of the 28th dividend, which will be due on the 4th December next; in addition to which I have received advices from the agents on the coast of forthcoming bills for a further sum of 60,988.75 dols recently paid by the Maritime Custom houses. The sinking, fund, by the second article of the Convention of the 4th December, 1851, bore a rate of 5 per cent. during the first five years, which was, however, increased to 6 per cent. per annum by the fifth article of the same Convention from and after the 4th of December, 1856.

The de facto assignments actually set apart by the Imperial Government for the payment of the British Convention Fund consist in 16 per cent. of the import duties collected at all the ports of the empire which are opened to foreign commerce.

The payment of the additional 13 per cent. on all imports by the Ports of Vera Cruz and Tampico (French vessels excepted), assigned to this fund by Mexico in virtue of the Dunlop and Aldham Convention, was stopped by the Imperial Government in February last. This occurrence was immediately brought before the British Legation, and Mr Scarlett has kindly given the matter his attention; the question is, however, still pending.

The capitals of the British Convention, and that known as the Padre Moran Convention, being respectively 4,174,280 dollars and 825,720 dollars, the distribution made of the funds proceeding from the 16 per cent. assignment is:—

To the British Convention ..... 83·4856 per cent., and
To the Padre Moran Convention 16·5144 per cent.

With regard to the application of any surplus that may remain after paying what is due by treaty to the stockholders, I am unable to furnish you with any positive information; but in the event of any such occurrence, the good offices of Her Majesty's representative will be solicited in support of the interests of the stockholders.

The sums paid by the Maritime Custom Houses for account of the British Convention Fund during the period of my agency are the following:—

	16 pr cent.	8 per cent.	5 per cent.	Total.
	dols c	dols c	dols c	dols c
In 1862.....	1,229 66	453 3	313 88	1,996 57
1863.....	116,326 26	45,092 1	35,365 40	196,683 67
1864.....	365,332 55	132,319 12	111,347 96	599,999 63
1865, to August 25th ...	469,145 90	9,321 73	9,501 39	487,969 2
	952,084 37	178,185 89	156,428 63	1286648 89

(Signed) F. GLENNIE, Agent.

From the foregoing it will be seen that, presuming the receipts continue as shown by Mr Glennie's letter, the interest of 6 per cent. per annum is amply provided for, and a large surplus will remain for the action of the sinking fund, allowing the whole of the debt to be liquidated at par in the course of a few years.

The Bonds are of the following amounts:—

dols	£	dols	£
20,000 each (say)	4,000	5,000 each (say)	1,000
10,000 —	2,000	1,000 —	200

Any further information may be obtained on application to the Bank in London, at their offices, 16 King William street, E.C.
